

30-Day Analysis Report

This week : 19 Sep to 26 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-25

WEEKLY TRAINING REPORT

Generated : 2026-09-26 05:11 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 19 Sep to 26 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 2, 3, 2 sessions (avg 2.3)
Overall score: 5/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Bent Over Row (Barbell) -- 65kg x 10 reps (e1RM 86.7kg)
Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)
vs last week : Volume UP 99% (13,530 vs 6,804 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 21 Sep 2026 12:53 IST | 102 min
Type : Mon - Bench, Pull-ups, Shrugs, Lat Raise
Volume : 4,020 kg*reps | 12 sets
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: +0.0kg e1RM [FLAG: rep collapse 12->6]
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Shrug (Barbell): 50kg x 15r x 3 sets (e1RM 75.0kg)
Lateral Raise (Dumbbell): 12.5kg x 12r x 3 sets (e1RM 17.5kg) vs prior: +2.5kg e1RM

Session 2: Wednesday 23 Sep 2026 12:57 IST | 73 min
Type : Wed - OHP, Back Ext, Legs, Triceps
Volume : 5,040 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM
Back Extension (Hyperextension): 0kg x 12r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Seated Leg Curl (Machine): 43kg x 10r x 3 sets (e1RM 57.3kg) vs prior: +1.4kg e1RM
Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 3: Friday 25 Sep 2026 12:12 IST | 46 min
Type : Fri - BB Row, Back Ext, Rear Delt, Biceps, Shrugs
Volume : 4,470 kg*reps | 15 sets
Bent Over Row (Barbell): 65kg x 10r x 3 sets (e1RM 86.7kg) vs prior: -2.0kg e1RM
Back Extension (Hyperextension): 0kg x 12r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: +0.0kg e1RM
EZ Bar Biceps Curl: 20kg x 10r x 3 sets (e1RM 26.7kg)
Shrug (Barbell): 65kg x 8r x 3 sets (e1RM 82.3kg)

4-WEEK VOLUME TREND

Wk -3 (29 Aug-05 Sep): [#####.....] 7,592 kg*reps 2 sess

Wk -2 (05 Sep-12 Sep): [#####] 13,539 kg*reps 3 sess
 Wk -1 (12 Sep-19 Sep): [#####.....] 6,804 kg*reps 2 sess
 This wk (19 Sep-26 Sep): [#####.] 13,530 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : SAME as 07 Sep

Next session : 60kg x 6 reps

* FLAGS: rep collapse (12->6)

[C] Bent Over Row (Barbell)

Best this week : 65kg x 10 reps (e1RM 86.7kg)

vs prior : DOWN -2.0kg vs 28 Aug

Next session : 61.75kg x 10 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : SAME as 09 Sep

Next session : 45kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[I] Back Extension (Hyperextension)

Best this week : 0kg x 12 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 12 reps

* FLAGS: 0kg logged -- check entry

[I] EZ Bar Biceps Curl

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : First time in 30-day log

Next session : 20kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 12.5kg x 12 reps (e1RM 17.5kg)

vs prior : UP +2.5kg vs 07 Sep

Next session : 13.75kg x 12 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -32.7kg vs 09 Sep

Next session : 47.5kg x 12 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 04 Sep

Next session : 10kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 10 reps (e1RM 57.3kg)

vs prior : UP +1.4kg vs 26 Aug

Next session : 44.25kg x 10 reps

[I] Shrug (Barbell)

Best this week : 65kg x 8 reps (e1RM 82.3kg)

vs prior : First time in 30-day log

Next session : 65kg x 8 reps

* FLAGS: rep collapse (15->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 26 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		6		6		0		OK
Rear Delts		3		8		5		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		6		14		8		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 21 | Ratio pull:push = 1.75 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 6 sets this week (need 6+/week)

OK.

Enough work this week: Traps

Short this week : Chest, Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (29 Aug-05 Sep): 2 sessions

Wk -2 (05 Sep-12 Sep): 3 sessions

Wk -1 (12 Sep-19 Sep): 2 sessions

Time between sessions this week:

Mon 21 Sep 12:53 -> Wed 23 Sep 12:57: 48h

Wed 23 Sep 12:57 -> Fri 25 Sep 12:12: 47h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Wed 23 Sep + Fri 25 Sep (47h apart): overlap = biceps, other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	6	10	AT RISK
Shoulders	6	8	AT RISK
Traps	6	4	OK
Rear Delts	3	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	6	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 11

Weeks since last deload : 11 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W18 (started 2026-05-24; 124 days elapsed = 17.7 weeks, rounded up to W18)

Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+			
Mon 21 Sep	Push A	INFERRED Push (Bench Press + Shrugs	OK -- inferred match
	+ Lateral Raise; Pull Up also		(Push compound primary;
	present but Push dominant)		Pull Up secondary)
Tue 22 Sep	Pull A	--	MISSED
Wed 23 Sep	Legs A	INFERRED Push/Legs hybrid (OHP +	WRONG -- OHP and Triceps
	Triceps Pushdown + Leg Curl +		indicate Push elements;
	Leg Extension)		Legs A not completed;
			Hip Thrust ABSENT
Thu 24 Sep	Push B	--	MISSED
Fri 25 Sep	Pull B	INFERRED Pull B (BB Row + Rear Delt	OK -- inferred match
	Reverse Fly + EZ Bar Biceps Curl +		(mandatory rear delt
	Barbell Shrugs)		work present)
Sat 26 Sep	Legs B	--	MISSED (report generated
			today; session not done)

Adherence: 67% of logged sessions on correct day type (2 of 3 sessions matched expected PPL type)
33% of 6-day programme target covered correctly (2 of 6 target sessions done right)
3 sessions missed entirely (Tue/Thu/Sat)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 identified Legs sessions -- MISSING on Wed 23 Sep
(APT correction not performed this week)

Core stabiliser (all sessions): 0 of 3 sessions -- Dead Bug and Bird-Dog completely absent
all week (T8-T12 kyphosis corrective skipped every session)

Rear delt work in Pull sessions: 1 of 1 pull sessions -- OK (Rear Delt Reverse Fly 3x12 on Fri 25 Sep)

Sessions over 60 min: 2 sessions exceeded 60-min target

Mon 21 Sep: 102 min (42 min over target)

Wed 23 Sep: 73 min (13 min over target)

LATERAL RAISE (V-TAPER KPI):

This week : 12.5kg x 12 reps (Mon 21 Sep, 3 sets) | e1RM 17.5kg

Prior week : 10.0kg x 15 reps (Mon 07 Sep, 3 sets) | e1RM 15.0kg

* No Lateral Raise logged in week of 12-19 Sep; compared to most recent prior session

Trend : UP (+2.5kg e1RM, +25% in estimated max from last logged session)

7. KEY INSIGHTS

RECOVERY AT 44

This week had three sessions with two back-to-back gaps. Mon 21 Sep (12:53) to Wed 23 Sep (12:57) was exactly 48h -- technically meeting the minimum but with notable muscle overlap: Monday's Bench Press loaded chest and triceps; Wednesday's OHP and Triceps Pushdown hit the same shoulder-triceps complex. Both sessions fell within the 48-72h minimum window, but the triceps were taxed again before full repair at this age. The second pair, Wed 23 Sep (12:57) to Fri 25 Sep (12:12), was 47h -- one hour SHORT of the 48h minimum. Wed worked OHP and Triceps; Fri worked BB Row and Biceps, so direct muscle overlap was minimal (back vs shoulders), but at 44 any sub-48h gap counts as a flag. The offending pair is Wed-to-Fri: tighten the schedule by shifting one session to at least midday Thursday to restore the buffer.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 18 of the PPL x2 programme (started 2026-05-24). Three of six target sessions were completed (50% rate). All three missed days follow the same pattern: Tuesday (Pull A), Thursday (Push B), and Saturday (Legs B) -- every secondary session of the week is skipped. The result is that only the Monday and Friday slots are consistent. Wednesday was attended but mislabelled as a Push/Legs hybrid instead of the scheduled Legs A, and lacked the mandatory Hip Thrust. Over 18 weeks, the Monday-Wednesday-Friday structure appears to be the only reliable scaffold; Tuesday, Thursday, and Saturday slots have low adherence across prior weeks too (2-3 sessions/week was the pattern in weeks -1 through -3 as well).

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0 of 1 legs-type session -- the APT corrective was not performed at all. Anterior pelvic tilt causes the lumbar spine to hyperextend during squats, rows, and presses, transferring load from the intended prime movers to the lower back. Without Hip Thrust loading the glutes consistently, the tilt is reinforced rather than corrected. Rear delt sets this week: 3 vs the 8-set weekly target (5 sets short). This matters specifically at 44: the front deltoids are loaded every pressing session; if rear delts and external rotators are not trained with equal urgency, the humeral head migrates anteriorly under pressing load, compressing the supraspinatus tendon against the acromion. Rotator cuff impingement typically develops silently over months and becomes painful after it is already established. Core stabiliser presence (Dead Bug, Bird-Dog): 0 of 3 sessions this week. The T8-T12 kyphosis correction requires these every session without exception.

LATERAL RAISE TREND -- V-TAPER KPI

The V-taper KPI is moving UP: best set went from 10kg x 15 reps (07 Sep, e1RM 15.0kg) to 12.5kg x 12 reps (21 Sep, e1RM 17.5kg), a +2.5kg gain in estimated max in two weeks. This is the most important isolation trend to track for Ganesh specifically because the love handles sit at the same width as the lats -- the natural waist-to-shoulder taper is compressed visually. Growing the lateral heads of the deltoids is the only way to widen the apparent shoulder silhouette and create the V without losing weight from the obliques. Lateral Raise must appear in every Push session; it should not be skipped when the session runs long.

HARD FLAGS

- (1) Bench Press rep collapse 12 -> 6: Set 1 was 50kg x 12 (controlled warmup-weight), then sets 2 and 3 jumped to 60kg x 6. The load jump of +10kg between set 1 and set 2 was too aggressive mid-session and caused rep failure at half the expected count. Fix: use 50kg x 10 for all working sets and increase by 2.5kg only when all sets clear 10.
- (2) Mon 21 Sep ran 102 min -- 42 min over the 60-min target. Long sessions at 44 elevate cortisol and compromise recovery. Excessive duration was likely caused by long rest periods (Pull Ups and Bench together require more CNS recovery, not more rest minutes).
- (3) Dead Bug and Bird-Dog absent from all 3 sessions this week. These correctives take 4 minutes total; skipping them is a structural error, not a time-saving measure.
- (4) Hip Thrust not logged in the one legs-type session this week (Wed 23 Sep). APT correction requires Hip Thrust in every Legs session without exception.
- (5) Deload overdue: 11 active training weeks without a deload. The threshold is 4 weeks. Joints and connective tissue accumulate micro-damage beyond what sleep repairs; a deload this week is mandatory, not optional.

OVERALL VERDICT: HOLDING

Volume doubled vs the prior week (13,530 vs 6,804 kg*reps) and the Lateral Raise KPI is moving up. However, programme adherence is at 50% (same pattern as prior 3 weeks), PPL structure is not being followed (sessions are Full Body carry-overs, not PPL splits), corrective compliance failed entirely (0 Hip Thrusts, 0 core stabilisers), and the deload is 7 weeks overdue. Volume recovery earns HOLDING -- not IMPROVING -- because the structural and corrective problems have not changed.

8. PLAN FOR NEXT WEEK

Programme week: W19 -- DELOAD WEEK

(Deload was overdue from W14; W19 is the deload. Full training resumes W20.)

Deload rule: 2 working sets per exercise. Keep weights at current session bests EXCEPT where rep collapse was flagged (apply 5% drop). Stop 2 reps before failure on every set. No new exercises this week.

MONDAY -- Push A (Chest primary + Shoulders + Triceps) [DELOAD]

Bench Press (Barbell) 2 x 8 @ 57kg (5% drop from 60kg -- rep collapse flagged)

Overhead Press (Barbell) 2 x 8 @ 45kg (keep weight)

Lateral Raise (Dumbbell) 2 x 12 @ 12.5kg (keep weight -- V-taper KPI; do not skip)

Dead Bug 2 x 10 -- mandatory corrective; do not skip

Session cap: 45 min. OHP and Bench on the same day is fine on a deload -- keep rest periods to 90s and stop 2 reps before failure on every set.

TUESDAY -- Pull A (Back compound + Biceps) [DELOAD]

Pull Up (Bodyweight) 2 x 6 @ bodyweight (LOG actual bodyweight, not 0kg)

Lat Pulldown (Machine) 2 x 8 @ 66kg (last logged 28 Aug; within range)

EZ Bar Biceps Curl 2 x 10 @ 20kg (keep weight)

Rear Delt Reverse Fly 2 x 12 @ 10kg (keep weight; adds rear delt volume)

Bird-Dog 2 x 10 -- mandatory corrective; do not skip

Session cap: 40 min. Rear delt work is included here even on Pull A -- rear delts are 5 sets behind the weekly target and need extra volume every pull session.

WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust mandatory) [DELOAD]

Hip Thrust (Barbell) 2 x 10 @ 40kg (first logged session -- conservative start;
APT correction -- mandatory, do not skip)

Seated Leg Curl (Machine) 2 x 10 @ 43kg (keep weight)

Leg Extension (Machine) 2 x 12 @ 50kg (keep weight)

Dead Bug 2 x 10 -- mandatory corrective; do not skip

Session cap: 45 min. Hip Thrust is the APT corrective and is non-negotiable on any Legs session. Set up the barbell before starting the session so there is no excuse to skip.

THURSDAY -- Push B (Shoulders primary + Triceps) [DELOAD]

Overhead Press (Barbell) 2 x 8 @ 45kg (shoulders primary; keep weight)

Lateral Raise (Dumbbell) 2 x 12 @ 12.5kg (keep weight -- V-taper KPI, every Push session)

Triceps Pushdown 2 x 10 @ 27.2kg (keep weight; target 10 reps not 11 on deload)

Dead Bug 2 x 10 -- mandatory corrective; do not skip

Session cap: 40 min. Push B has shoulders as the primary mover; OHP at 45kg x 8 with a 2-set limit should feel controlled -- if it does not, reduce to 40kg for deload.

FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Rear Delt Fly mandatory) [DELOAD]

Bent Over Row (Barbell) 2 x 10 @ 65kg (keep weight; row was solid this week)

Rear Delt Reverse Fly (Dumbbell) 2 x 12 @ 10kg (mandatory for Pull B -- do not skip)

EZ Bar Biceps Curl 2 x 10 @ 20kg (keep weight)

Shrug (Barbell) 2 x 8 @ 62.5kg (5% drop from 65kg -- rep collapse flagged)

Bird-Dog 2 x 10 -- mandatory corrective; do not skip

Session cap: 45 min. Face Pull or Rear Delt Fly must be logged every Pull B session -- this is the rotator cuff balance exercise; skipping it increases impingement risk over time.

SATURDAY -- Legs B (Glutes + Hamstrings + Hip Thrust mandatory) [DELOAD]

Hip Thrust (Barbell) 2 x 10 @ 40kg (mandatory APT correction; same weight as Legs A)

Seated Leg Curl (Machine) 2 x 10 @ 43kg (keep weight)

Leg Press (Machine) 2 x 12 @ 60kg (last logged 11 Sep at 60kg x 12; keep for deload)

Bird-Dog 2 x 10 -- mandatory corrective; do not skip

Session cap: 45 min. Legs B prioritises glutes and hamstrings. Hip Thrust is the APT corrective and must not be skipped -- both Legs sessions this week must have it.

+-----+

Deload	: NEEDED THIS WEEK -- W19 is deload; next due W24,	
	~26 Oct 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	

+-----+
