

30-Day Analysis Report

30-Day Period ending 2026-09-17

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-17

WEEKLY TRAINING REPORT

Generated : 2026-09-18 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 11 Sep to 18 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 2/10 — Below par — low sessions or major muscle imbalances this week.

Biggest win : Bent Over Row (Barbell) — 60kg x 12 reps (e1RM 84.0kg)

Biggest concern: Chest — 0 sets vs 12 target (12 sets short)

vs last week : Volume DOWN 16% (10,144 vs 12,099 kg*reps)

2. THIS WEEK — SESSION BY SESSION

Session 1: Friday 11 Sep 2026 09:47 IST | 71 min

Type : Full Body C — Friday

Volume : 4,660 kg*reps | 9 sets

Bent Over Row (Barbell): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: -4.7kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: +0.0kg e1RM

Leg Press (Machine): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: +14.0kg e1RM

Session 2: Wednesday 16 Sep 2026 10:41 IST | 44 min

Type : Full Body B — Wednesday

Volume : 5,484 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (21 Aug-28 Aug): [#####] 14,387 kg*reps 3 sess

Wk -2 (28 Aug-04 Sep): [#####.....] 4,372 kg*reps 1 sess

Wk -1 (04 Sep-11 Sep): [#####.....] 12,099 kg*reps 3 sess

This wk (11 Sep-18 Sep): [#####.....] 10,144 kg*reps 2 sess

3. STRENGTH — HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : DOWN -4.7kg vs 28 Aug

Next session : 57.0kg x 12 reps

[C] Leg Press (Machine)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : UP +14.0kg vs 28 Aug

Next session : 62.5kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : SAME as 09 Sep

Next session : 45kg x 8 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : SAME as 26 Aug

Next session : 20kg x 10 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -32.7kg vs 09 Sep

Next session : 47.5kg x 12 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 04 Sep

Next session : 10kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : SAME as 26 Aug

Next session : 43kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 26 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

-----+-----+-----+-----

Chest | 0 | 12 | 12 | CRITICAL

Back | 3 | 14 | 11 | CRITICAL

Shoulders | 3 | 10 | 7 | CRITICAL

Traps | 0 | 6 | 6 | CRITICAL

Rear Delts | 3 | 8 | 5 | CRITICAL

Biceps | 6 | 8 | 2 | LOW

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 9 | 14 | 5 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 6 | Pull sets: 12 | Ratio pull:push = 2.00 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (21 Aug-28 Aug): 3 sessions

Wk -2 (28 Aug-04 Sep): 1 sessions

Wk -1 (04 Sep-11 Sep): 3 sessions

Time between sessions this week:

Fri 11 Sep 09:47 -> Wed 16 Sep 10:41: 121h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 0 8 AT RISK

Back 3 10 AT RISK

Shoulders 3 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 3 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 9 10 AT RISK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 10

Weeks since last deload : 10 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W17 (started 2026-05-24; 116 days elapsed = 17 weeks rounded up)

Sessions this week: 2 of 6 target

NOTE: Session titles use "Full Body A/B/C" naming, not PPL names.

All session types inferred from exercises.

Day | Expected | Detected | Status

-----+-----+-----+-----

Fri 11 Sep | Pull B | Pull B (INFERRED) | INFERRED MATCH
(Bent Over Row + Rear Delt Fly + Leg Press -> Pull dominant)

Sat 12 Sep | Legs B | (not logged) | MISSED

Sun 13 Sep | REST | (not logged) | REST - OK

Mon 14 Sep | Push A | (not logged) | MISSED

Tue 15 Sep | Pull A | (not logged) | MISSED

Wed 16 Sep | Legs A | Push/Full Body | INFERRED MISMATCH
(OHP + Triceps Pushdown + Leg Curl/Ext + Bicep Curl ->

Push-dominant full body; no squat, no hip thrust)

Thu 17 Sep | Push B | (not logged) | MISSED

Adherence: 50% (1 of 2 logged sessions on correct day type)

17% of 6-session weekly target (only 1 session correct of 6 planned)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 proper Legs sessions logged this week

-- MISSING: Wed 16 Sep was expected Legs A but logged as Push/Full Body;
no Hip Thrust performed. NOTE: Zero Hip Thrusts in all 9 sessions
logged in the last 30 days. APT correction has not occurred in 4 weeks.

Core stabiliser (all sessions): 0 of 2 sessions this week

-- MISSING: Neither session has Dead Bug, Bird-Dog, or Plank.

NOTE: Zero core stabilisers logged in any of 9 sessions in last 30 days.

T8-T12 kyphosis correction is completely absent from the programme.

Rear delt work in Pull sessions: 1 of 1 pull sessions (Fri 11 Sep - OK)

-- But only 3 rear delt sets total this week vs 8+ target (5 sets short)

Sessions over 60 min: Fri 11 Sep -- 71 min (11 min over 60-min cap)

-- FLAGGED: Session 5 (Fri 04 Sep) logged 251 min -- likely timer error;
flag for data review.

LATERAL RAISE (V-TAPER KPI):

This week: no sets logged | Prior week: 10kg x 15 reps (Mon 07 Sep) | Trend: DOWN

-- Lateral Raise absent this week. No data to progress from.

7. KEY INSIGHTS

RECOVERY AT 44:

The two sessions this week (Fri 11 Sep at 09:47 and Wed 16 Sep at 10:41) were
121 hours apart -- comfortably above the 48-hour same-muscle minimum. Looking
at boundary pairs with last week: Back was trained Fri 11 Sep (Bent Over Row,
60kg x 12) and the prior back session was Fri 04 Sep = 168 hours gap, fine.

Overhead Press was last done Wed 09 Sep then again Wed 16 Sep = 168 hours, fine.

No same-muscle pair this week violates the 48h minimum. One anomaly to flag:

Session 5 (Fri 04 Sep) shows a duration of 251 minutes -- this is almost
certainly a timer left running after the session ended, not a true training

duration. Confirm the Hevy log; if real, that length would represent dangerous overreaching, not recovery.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 17 of the PPL x2 programme (started 2026-05-24). The programme has never been executed as a proper PPL split in the logged 30 days: all sessions are titled "Full Body A/B/C," not the PPL session names. This week delivered 2 of 6 sessions (33%), and only 1 of those matched the expected PPL type for that day. Over the last 4 weeks the session count per week was 3, 1, 3, 2 -- average 2.3 sessions/week against a 6/week target. The pattern of missed sessions is broad: Push A (Monday), Pull A (Tuesday), and Legs B (Saturday) are consistently absent. The programme framework exists but is not being followed in either volume or structure.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate across this week and all 9 sessions in the last 30 days: zero. Not a single Hip Thrust has been logged in four weeks. The APT correction that this exercise provides -- posterior pelvic tilt under load, strengthening the glutes to pull the pelvis back to neutral -- is completely absent. Over time, anterior pelvic tilt places the lumbar spine in chronic hyperextension, increasing disc compression and hamstring tightness. Core stabilisers (Dead Bug or Bird-Dog) are equally absent: 0 of 9 sessions in 30 days. Without these, the lower thoracic kyphosis (T8-T12) identified in the posture assessment gets no corrective input. Rear delt sets this week: 3, against the 8-set weekly target. If the front shoulder muscles (anterior and lateral deltoid, getting OHP volume every session) remain consistently stronger than the rear delts and external rotators, the humeral head migrates forward in the glenoid socket under load. At 44, this compresses the supraspinatus tendon in the subacromial space -- the classic rotator cuff impingement pathway. Rear delt work is not optional accessory work; it is protective infrastructure for the shoulder joint.

LATERAL RAISE TREND:

No Lateral Raise was performed this week. Prior week best was 10kg x 15 reps (Mon 07 Sep). Trend: DOWN -- absent this week. This matters specifically for Ganesh because the love handles currently sit at the same horizontal level as the lats, collapsing the V-taper ratio. Lateral raises build the lateral deltoid, which sits above the waist, widening the visual shoulder line. This is the highest-leverage exercise for changing the apparent body shape during a recomp phase, because fat loss alone will not create the V-taper if the shoulders are not wider than the waist. Each week without Lateral Raise progression is a week where the V-taper KPI stands still.

HARD FLAGS:

1. Session Fri 11 Sep: 71 min duration -- 11 min over the 60-min cap. Warm-up or rest periods are running long. Next session, set a phone timer at 55 min.
2. Session Fri 04 Sep: 251-min duration logged -- almost certainly a timer error. Review in Hevy app and correct; the data is distorting recovery analysis.
3. Zero Hip Thrusts in 30 days -- APT correction protocol completely absent. This is the single most important corrective exercise in the plan and has

not been performed once in four weeks.

4. Zero Dead Bug / Bird-Dog / Plank in 30 days -- T8-T12 kyphosis correction equally absent.

5. Leg Extension regressed from 77kg (Wed 09 Sep, e1RM 102.7kg) to 50kg (Wed 16 Sep, e1RM 70.0kg) -- a 35% load drop in one week with no deload declared. Either a form reset (acceptable) or rep collapse without logging intent. Clarify before next Legs session.

OVERALL VERDICT: DECLINING

Volume DOWN 16% vs last week (10,144 vs 12,099 kg*reps). Sessions DOWN from 3 to 2. Corrective compliance: 0%. Lateral Raise: absent.

Strength: flat or regressing on most exercises. The programme is in its 17th week but has not been structured as PPL since logging began.

8. PLAN FOR NEXT WEEK

Programme week: W18 of PPL x2 (Mon 21 Sep to Sat 26 Sep 2026)

*** THIS IS A DELOAD WEEK -- 2 sets per exercise, same weight as last logged ***

Deload is overdue (last deload 10+ weeks ago). Do not skip this week.

MONDAY 21 Sep -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 8 @ 60kg [DELOAD -- hold at last logged weight]

Overhead Press (Barbell) 2 x 8 @ 45kg [DELOAD]

Lateral Raise (Dumbbell) 2 x 15 @ 10kg [DELOAD -- absent last week; reintroduce]

Triceps Pushdown 2 x 11 @ 27.2kg [DELOAD]

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective absent 30 days)

Key watch-point: Re-establish push movement patterns on reduced sets; if any anterior shoulder pain during bench press, widen grip 2cm and note for adjustment.

TUESDAY 22 Sep -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 12 @ 60kg [DELOAD -- hold at this week's weight]

Lat Pulldown (Machine) 2 x 6 @ 66kg [DELOAD -- last logged 28 Aug]

Bicep Curl (Barbell) 2 x 10 @ 20kg [DELOAD]

Bird-Dog 3 x 10 each side -- DO NOT SKIP

Key watch-point: Brace core before each row set; the Bird-Dog activates the same posterior chain -- connect the two movements intentionally.

WEDNESDAY 23 Sep -- Legs A (Quads, Hamstrings, Glutes -- Hip Thrust mandatory)

Squat (Barbell) 2 x 6 @ 70kg [DELOAD]

Hip Thrust (Barbell) 2 x 12 @ 40kg [CONSERVATIVE START -- no log in 30 days; reintroduce at 40kg, feel the glute engagement before adding load]

Leg Extension (Machine) 2 x 12 @ 50kg [DELOAD -- match this week's working weight]

Seated Leg Curl (Machine) 2 x 9 @ 43kg [DELOAD]

Dead Bug 3 x 10 -- DO NOT SKIP

Key watch-point: Hip Thrust is the APT correction exercise -- this session reintroduces it after 4 weeks absent. Start 40kg, focus on full posterior

pelvic tilt at the top; this is not a weight session today, it is a technique session.

THURSDAY 24 Sep -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 8 @ 45kg [DELOAD]
 Bench Press (Barbell) 2 x 8 @ 60kg [DELOAD -- chest variation]
 Lateral Raise (Dumbbell) 2 x 15 @ 10kg [DELOAD]
 Triceps Pushdown 2 x 11 @ 27.2kg [DELOAD]
 Bird-Dog 3 x 10 -- DO NOT SKIP

Key watch-point: Second OHP session of the week on deload -- monitor for any shoulder impingement sensation; if present, switch to dumbbell press and note it.

FRIDAY 25 Sep -- Pull B (Back + Rear Delts + Biceps -- Face Pull mandatory)

Bent Over Row (Barbell) 2 x 12 @ 60kg [DELOAD]
 Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg [DELOAD -- mandatory rear delt work]
 Bicep Curl (Barbell) 2 x 10 @ 20kg [DELOAD]
 Dead Bug 3 x 10 -- DO NOT SKIP

Key watch-point: Rear delts have averaged only 3 sets/week this cycle vs 8-set target. Even on a deload, rear delt work is non-negotiable -- it is the primary rotator cuff protection at 44.

SATURDAY 26 Sep -- Legs B (Glutes, Hamstrings, Single-Leg -- Hip Thrust mandatory)

Leg Press (Machine) 2 x 12 @ 60kg [DELOAD]
 Hip Thrust (Barbell) 2 x 12 @ 40kg [DELOAD -- second Hip Thrust of the week]
 Seated Leg Curl (Machine) 2 x 9 @ 43kg [DELOAD]
 Bird-Dog 3 x 10 -- DO NOT SKIP

Key watch-point: Second Hip Thrust session -- if the technique felt right on Wednesday, this session can confirm the pattern. Keep 40kg; do not add load during deload week.

```
+-----+
| Deload : needed this week -- W18 (overdue since W5, ~13 weeks) |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
+-----+
```
