

30-Day Analysis Report

30-Day Period ending 2026-05-25

ATHLETE PROFILE

Name: Ganesh

Profile: 44M | 181 cm | 87 kg -> 79 kg target

Goal: Body Recomposition -- Fat loss, muscle preservation

Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-05-25

POWERED BY HEVY AGENT * CLAUDE AI

WEEKLY TRAINING REPORT

Generated : 2026-05-26 05:09 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 19 May to 26 May 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 6, 5, 6 sessions (avg 5.7)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Chest Fly (Machine) -- 45kg x 12 reps (e1RM 63.0kg)

Biggest concern: Back -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 89% (5,689 vs 50,941 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Tuesday 19 May 2026 08:43 IST | 78 min

Type : Tuesday: Push (Cult)

Volume : 200 kg*reps | 1 sets

Shoulder Press (Dumbbell): 20kg x 10r x 1 sets (e1RM 26.7kg) vs prior: -1.3kg e1RM

Session 2: Monday 25 May 2026 08:12 IST | 84 min

Type : Monday - Push A (Chest)

Volume : 5,489 kg*reps | 29 sets

Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)

Superman: 0kg x 10r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Bird Dog: 0kg x 16r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)

Band Pullaparts: 0kg x 20r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)

... and 8 more exercises

4-WEEK VOLUME TREND

Wk -3 (28 Apr-05 May): [#####] 49,210 kg*reps 6 sess

Wk -2 (05 May-12 May): [#####.....] 40,391 kg*reps 5 sess

Wk -1 (12 May-19 May): [#####] 50,941 kg*reps 6 sess

This wk (19 May-26 May): [##.....] 5,689 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 8 reps (e1RM 50.7kg)

vs prior : First time in 30-day log

Next session : 40kg x 8 reps

[C] Incline Bench Press (Dumbbell)

Best this week : 20kg x 12 reps (e1RM 28.0kg)

vs prior : DOWN -3.5kg vs 16 May

Next session : 19.0kg x 12 reps

[C] Shoulder Press (Dumbbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : DOWN -1.3kg vs 16 May

Next session : 19.0kg x 10 reps

[I] Band Pullaparts

Best this week : 0kg x 20 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 20 reps

- FLAGS: 0kg logged -- check entry

[I] Bird Dog

Best this week : 0kg x 16 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 16 reps

- FLAGS: 0kg logged -- check entry

[I] Chest Fly (Machine)

Best this week : 45kg x 12 reps (e1RM 63.0kg)

vs prior : DOWN -8.1kg vs 16 May

Next session : 42.75kg x 12 reps

[I] Face Pull

Best this week : 24.9kg x 12 reps (e1RM 34.9kg)

vs prior : DOWN -4.9kg vs 11 May

Next session : 23.65kg x 12 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : DOWN -3.9kg vs 05 May

Next session : 9.5kg x 12 reps

[I] Stretching

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Superman

Best this week : 0kg x 10 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 10 reps

- FLAGS: 0kg logged -- check entry

[I] Triceps Rope Pushdown

Best this week : 22.7kg x 9 reps (e1RM 29.5kg)

vs prior : First time in 30-day log

Next session : 22.7kg x 9 reps

[I] Warm Up

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

• +-----+-----+-----+-----

Chest | 10 | 12 | 2 | LOW

Back | 0 | 14 | 14 | CRITICAL

Shoulders | 4 | 10 | 6 | CRITICAL

Traps | 0 | 6 | 6 | CRITICAL

Rear Delts | 3 | 8 | 5 | CRITICAL

Biceps | 0 | 8 | 8 | CRITICAL

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 0 | 14 | 14 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 17 | Pull sets: 3 | Ratio pull:push = 0.18 (LOW -- add more pulling work)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (28 Apr-05 May): 6 sessions

Wk -2 (05 May-12 May): 5 sessions

Wk -1 (12 May-19 May): 6 sessions

Time between sessions this week:

Tue 19 May 08:43 -> Mon 25 May 08:12: 143h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 10 8 OK

Back 0 10 AT RISK

Shoulders 4 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 3 6 AT RISK
 Biceps 0 6 AT RISK
 Triceps 3 6 AT RISK
 Legs 0 10 AT RISK
 Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
 Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
 These are not getting enough signal to hold on to muscle during a deficit.
 Add sets for these in the next 1-2 sessions.
 Active training weeks logged : 1
 Weeks since last deload : 1 (deload every 4 weeks)
 Next deload : in 3 week(s), approx 16 Jun 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W1 (started 2026-05-24; 1 day elapsed, rounded up)
 Sessions this week: 2 of 6 target (1 pre-programme, 1 PPL Week 1 session)

Day | Expected | Detected | Status

• +-----+-----+-----

Tue 19 May | N/A (pre-prog) | Push (INFERRED) | PRE-PROGRAMME

Mon 25 May | Push A | Push A | OK

Adherence: 100% (1 of 1 programme sessions on correct day)
 Note: Programme officially started 2026-05-24 (Sunday REST). The Tue 19 May session at Cult gym (Shoulder Press x 1 set, 78 min) pre-dates the programme.
 Only Mon 25 May Push A falls within the PPL schedule and was executed correctly.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 Legs sessions this week
 ALERT: No Legs session yet -- Hip Thrust (APT correction)
 not addressed. Wednesday Legs A is next mandatory window.
 Core stabiliser (all sessions): 1 of 2 sessions
 Mon 25 May -- Bird Dog 2x16 -- OK
 Tue 19 May -- NO corrective logged -- MISSING
 Rear delt work in Pull sessions: N/A -- 0 Pull sessions this week
 NOTE: Face Pull 3x12 included in Mon 25 May Push A session -- good proactive inclusion (3 rear delt sets vs 8 target)
 Sessions over 60 min: BOTH sessions over limit
 Tue 19 May -- 78 min (18 min over)
 Mon 25 May -- 84 min (24 min over)
 Target is 60 min max including warm-up and cool-down.

LATERAL RAISE (V-TAPER KPI):

This week: 10.0kg x 12 reps | Prior week: 12.5kg x 13 reps | Trend: DOWN
 (-2.5kg regression; e1RM dropped from 17.9kg to 14.0kg, a -3.9kg fall)

7. KEY INSIGHTS

RECOVERY AT 44

The only same-type session pair this week is Push (Tue 19 May 08:43) to Push A (Mon 25 May 08:12) -- a gap of 143 hours, far beyond the 48h minimum required for muscle recovery. No same-muscle overlap risk exists this week. However, this gap is too large to drive adaptation: 143h between sessions means any muscle-building signal from Tue 19 May would have dissipated long before Mon 25 May. The ideal Push-to-Push gap is 48-72h, not 143h.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 1 of the PPL x2 programme (started 2026-05-24). Only one programme session has been completed: Mon 25 May = Push A, correctly executed. The pre-programme Tue 19 May session was a partial workout (Shoulder Press x 1 set only in 78 min) -- not a productive stimulus. With just 1 PPL session in the books, no skipping pattern is yet established, but the remaining 5 sessions this week (Pull A, Legs A, Push B, Pull B, Legs B) all need to land to hit the 6-session target. Weeks -3 to -1 averaged 5.7 sessions (6, 5, 6), so the capacity is proven -- the question is whether the PPL structure will be followed.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0 of 0 Legs sessions -- no legs work done yet.

This is the single highest-priority corrective for Ganesh's anterior pelvic tilt (APT); every Legs session must include Hip Thrust or the pelvis stays tilted forward, loading the lumbar spine under all leg and back exercises. Wednesday Legs A is the first mandatory Hip Thrust window.

Rear delt sets stand at 3 this week (Face Pull in Push A) against an 8-set target. This gap matters specifically at 44: the front deltoid, which is heavily loaded by bench press, shoulder press, and chest fly, drives internal shoulder rotation. If rear delts -- which control external rotation -- lag significantly, the rotator cuff (supraspinatus, infraspinatus, teres minor) cannot maintain glenohumeral centration under load. Over months, this causes impingement and labral fraying that cannot be fully reversed. Pull A and Pull B sessions must each contribute 4 rear delt sets minimum.

Core stabiliser (Bird Dog) was present in Mon 25 May -- the T8-T12 corrective was addressed for the Push A session. Missing on Tue 19 May (pre-programme).

Target: every session includes Dead Bug or Bird Dog, no exceptions.

LATERAL RAISE TREND -- V-TAPER KPI

The lateral raise is DOWN: 10kg x 12 this week vs 12.5kg x 13 last week, a 20% weight drop. For Ganesh, whose love handles sit at lat-width level, the visual V-taper depends almost entirely on shoulder-width-to-waist ratio. The love handles do not move quickly; the lateral raise does. Every kilogram added to the lateral raise adds perceived width above the waist, improving the ratio. A downward trend here is the wrong direction and must be reversed in Push B this week (Thu) with the machine lateral raise at 33kg and Push A next week at 11.25kg (or 12.5kg if that is the nearest dumbbell available).

HARD FLAGS

1. Both sessions exceeded 60 min -- Tue 19 May at 78 min, Mon 25 May at 84 min.

The 60-min cap is not arbitrary: sessions beyond 60 min correlate with rising cortisol and declining anabolic signalling, counterproductive on a cut.

2. Tue 19 May was effectively a 1-set workout (Shoulder Press x 1 set) completed in 78 min -- time in gym $\neq$ training stimulus. This session contributed zero to weekly volume targets.
3. Lateral Raise DOWN -2.5kg from prior week, v-taper KPI moving in wrong direction.
4. 0kg logged for Bird Dog, Superman, Band Pullaparts -- expected for bodyweight correctives; not data errors, but confirm these are being performed with intent.
5. No back, legs, or biceps work completed this week yet. Back and Legs are CRITICAL (0 sets vs 14-set targets each). These must be addressed Tue through Sat.

OVERALL VERDICT

Raw volume this week is DOWN 89% (5,689 vs 50,941 kg*reps last week), and total sessions are 2 vs 6 target. However, this is programme Day 1 -- the comparison to last week overstates the drop. The Push A session itself was structurally sound: barbell bench press introduced, corrective work (Bird Dog, Superman) added, and exercise selection aligned with the PPL plan. Duration (84 min) remains a persistent issue. Looking at the trajectory across all indicators:

OVERALL: DECLINING (volume, session count, lateral raise KPI all down vs last week)

8. PLAN FOR NEXT WEEK

Programme week: W2 (Week 2 of PPL x2)

Note: The remainder of W1 (Tue 26 May through Sat 30 May) must be completed before W2 begins. The plan below covers W2 (Mon 1 Jun - Sat 6 Jun) for reference, using the most recent logged performance for each session type.

MONDAY 1 Jun -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 4 sets x 8 reps @ 42.5kg

(Mon 25 May: 40kg x 8 x 4, all sets hit target -- compound +2.5kg)

Incline Bench Press (Dumbbell) 3 sets x 12 reps @ 22.5kg

(Mon 25 May: 20kg x 12, regression from 22.5kg -- return to prior level)

Chest Fly (Machine) 3 sets x 12 reps @ 46.25kg

(Mon 25 May: 45kg x 12, all hit -- isolation +1.25kg)

Face Pull 3 sets x 12 reps @ 27.2kg

(Mon 25 May: 24.9kg x 12, all hit -- isolation +1.25kg, round to cable increment)

Lateral Raise (Dumbbell) 3 sets x 12 reps @ 11.25kg

(V-TAPER KPI: 10kg x 12 this week -- isolation +1.25kg; use 12.5kg if 11.25 unavailable)

Triceps Rope Pushdown 3 sets x 10 reps @ 22.7kg

(Mon 25 May: 22.7kg x 9 -- first session with rope variant, hold weight, add 1 rep)

Mandatory corrective: Dead Bug 3x10 -- do not skip (T8-T12 kyphosis)

Key focus: Keep session under 60 min. Bench press is new to the log -- watch for shoulder impingement and keep scapulae retracted throughout.

TUESDAY 26 May / 2 Jun -- Pull A (Back compound + Biceps)

Seated Cable Row V Grip 3 sets x 10 reps @ 80kg

(Mon 18 May: 77kg x 10 x 3, all hit -- compound +2.5kg, round to 80kg)

Pull Up (Bodyweight) 4 sets x 8 reps @ 0kg

(Last: 0kg x 7 x 4, hit target -- aim for 8 reps per set this session)

Shrug (Smith Machine) 3 sets x 12 reps @ 72.5kg

(Mon 18 May: 70kg x 12 x 3, all hit -- isolation +1.25kg, round to 72.5kg)

Face Pull 3 sets x 15 reps @ 27.2kg

(Mon 18 May: 24.9kg x 16 x 3 -- isolation +1.25kg, next cable increment)

Hammer Curl (Dumbbell) 3 sets x 10 reps @ 13.75kg

(Mon 18 May: 12.5kg x 10 x 3, all hit -- isolation +1.25kg; use 15kg if 13.75 unavailable)

Mandatory corrective: Dead Bug 3x10 -- do not skip

Key focus: 4 rear delt sets from Face Pull alone will bring weekly rear delt count to 7 -- stay disciplined and this session bridges the gap to 8+ target.

WEDNESDAY 27 May / 3 Jun -- Legs A (Quads + Hamstrings + Glutes)

Hip Thrust (Machine) 3 sets x 12 reps @ 22.5kg ***MANDATORY APT***

(Wed 13 May: 20kg x 13 x 3, all hit -- compound +2.5kg; DO NOT SKIP)

Leg Press (Machine) 3 sets x 12 reps @ 62.5kg

(Wed 13 May: 60kg x 12 x 3, all hit -- compound +2.5kg)

Romanian Deadlift (Dumbbell) 3 sets x 10 reps @ 42.5kg

(Wed 13 May: 40kg x 11 x 3, all hit -- compound +2.5kg)

Hip Abduction (Machine) 3 sets x 10 reps @ 87kg

(Wed 13 May: 85kg x 10 x 3, all hit -- isolation +1.25kg, round to 87kg)

Hip Adduction (Machine) 3 sets x 10 reps @ 46.25kg

(Wed 13 May: 45kg x 10 x 3, all hit -- isolation +1.25kg)

Sissy Squat (Bodyweight) 3 sets x 12 reps @ 0kg

(Progressive -- add 1 rep vs prior sessions)

Mandatory corrective: Bird Dog 3x10 -- do not skip (T8-T12 kyphosis)

Key focus: Hip Thrust MUST be first working exercise after warm-up, not last -- fatigue compromises form and glute activation is the whole point of this session.

THURSDAY 28 May / 4 Jun -- Push B (Shoulders primary + Chest + Triceps)

Seated Shoulder Press (Machine) 3 sets x 10 reps @ 82.5kg

(Thu 14 May: 80kg x 10 x 3, all hit -- compound +2.5kg)

Chest Press (Machine) 4 sets x 12 reps @ 61.25kg

(Thu 14 May: 60kg x 12 x 4, all hit -- isolation +1.25kg)

Lateral Raise (Machine) 3 sets x 9 reps @ 33.25kg

(Thu 14 May: 35kg x 9, 9, 8 -- rep collapse on set 3, drop 5%: $35 \times 0.95 = 33.25\text{kg}$)

Triceps Pushdown 3 sets x 10 reps @ 57kg

(Thu 14 May: 60kg x 11, 10, 9 -- rep collapse, drop 5%: $60 \times 0.95 = 57\text{kg}$)

Mandatory corrective: Dead Bug 3x10 -- do not skip

Key focus: Lateral raise dropped to 33.25kg due to rep collapse -- rebuild form at this weight before progressing. Shoulder primary day: press before fly.

FRIDAY 29 May / 5 Jun -- Pull B (Back + Rear Delts + Biceps)

Lat Pulldown (Machine) 3 sets x 10 reps @ 62.5kg

(Thu 14 May: 60kg x 11 x 3, all hit -- compound +2.5kg)

Rear Delt Reverse Fly (Machine) 4 sets x 11 reps @ 51.25kg ***MANDATORY***

(Thu 14 May: 50kg x 11 x 4, all hit -- isolation +1.25kg)

Face Pull 3 sets x 12 reps @ 27.2kg

(Mandatory rear delt -- combined with above = 7 rear delt sets in this session)

Hammer Curl (Dumbbell) 3 sets x 10 reps @ 13.75kg

(As Pull A -- isolation +1.25kg from 12.5kg)

Bicep Curl (Machine) 3 sets x 10 reps @ 23.75kg

(Thu 14 May: 25kg x 12, 11, 10 -- rep collapse, drop 5%: $25 \times 0.95 = 23.75\text{kg}$)

Mandatory corrective: Dead Bug 3x10 -- do not skip

Key focus: Pull B is the heaviest rear delt session of the week. 4 sets of

Rear Delt Reverse Fly + 3 Face Pulls = 7 rear delt sets in one session.

This is non-negotiable for rotator cuff health at 44.

SATURDAY 30 May / 6 Jun -- Legs B (Glutes + Hamstrings + Single-Leg)

Hip Thrust (Machine) 3 sets x 12 reps @ 22.5kg ***MANDATORY APT***

(Same as Legs A -- both legs sessions require Hip Thrust; DO NOT SKIP)

Deadlift (Trap Bar) 3 sets x 9 reps @ 97.5kg

(Fri 15 May: 95kg x 9 x 2, all hit -- compound +2.5kg)

Leg Press (Machine) 3 sets x 10 reps @ 72.5kg

(Fri 15 May: 70kg x 10 x 3, all hit -- compound +2.5kg)

Seated Leg Curl (Machine) 3 sets x 8 reps @ 44.25kg

(Fri 15 May: 43kg x 8 x 3, all hit -- isolation +1.25kg)

Leg Extension (Machine) 3 sets x 8 reps @ 78.25kg

(Fri 15 May: 77kg x 8 x 3, all hit -- isolation +1.25kg)

Single-Leg Press 3 sets x 10 reps each side @ 40kg (conservative start)

(Not in recent log -- introduce at controlled weight for single-leg stability)

Mandatory corrective: Bird Dog 3x10 -- do not skip

Key focus: Trap bar deadlift at 97.5kg is a significant load -- focus on hip hinge pattern and brace hard. Hip Thrust before deadlift in session order.

```
+-----+
| Deload : not yet -- next due Week 4, ~16 Jun 2026 |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
