

30-Day Analysis Report

This week : 28 May to 04 Jun 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-06-03

WEEKLY TRAINING REPORT

Generated : 2026-06-04 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 28 May to 04 Jun 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target

Prior 3 weeks: 7, 5, 3 sessions (avg 5.0)

Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.

Biggest win : Overhead Triceps Extension (Cable) -- 24kg x 111 reps (e1RM 112.8kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : Volume DOWN 2% (16,838 vs 17,251 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Thursday 28 May 2026 07:55 IST | 103 min

Type : Thursday - Push B (Shoulders)

Volume : 6,186 kg*reps | 30 sets

Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)

Superman: 0kg x 10r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Bird Dog: 0kg x 16r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)

Band Pullaparts: 0kg x 20r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)

... and 9 more exercises

Session 2: Monday 01 Jun 2026 07:08 IST | 70 min

Type : Full Body 1

Volume : 4,352 kg*reps | 13 sets

Squat (Barbell): 40kg x 8r x 3 sets (e1RM 50.7kg)

Bench Press (Barbell): 40kg x 12r x 3 sets (e1RM 56.0kg) vs prior: +5.3kg e1RM [FLAG: rep collapse 12->8]

Lat Pulldown (Cable): 52kg x 12r x 3 sets (e1RM 72.8kg)

Bicep Curl (Dumbbell): 10kg x 8r x 3 sets (e1RM 12.7kg)

Treadmill: 0kg x 0r x 1 sets (e1RM 0.0kg)

Session 3: Wednesday 03 Jun 2026 08:41 IST | 82 min

Type : Full Body 2

Volume : 6,300 kg*reps | 15 sets

Bent Over Row (Barbell): 55kg x 10r x 3 sets (e1RM 73.3kg)

Leg Press (Machine): 70kg x 9r x 3 sets (e1RM 91.0kg) vs prior: -7.0kg e1RM

Shoulder Press (Dumbbell): 40kg x 8r x 3 sets (e1RM 50.7kg) vs prior: +22.7kg e1RM

Hanging Leg Raise: 0kg x 4r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Shrug (Barbell): 40kg x 15r x 3 sets (e1RM 60.0kg) vs prior: -30.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (07 May-14 May): [#####] 53,101 kg*reps 7 sess

Wk -2 (14 May-21 May): [#####.....] 38,431 kg*reps 5 sess

Wk -1 (21 May-28 May): [#####.....] 17,251 kg*reps 3 sess

This wk (28 May-04 Jun): [#####.....] 16,838 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 12 reps (e1RM 56.0kg)
 vs prior : UP +5.3kg vs 25 May
 Next session : 42.5kg x 12 reps
 *** FLAGS: rep collapse (12->8)

[C] Bent Over Row (Barbell)

Best this week : 55kg x 10 reps (e1RM 73.3kg)
 vs prior : First time in 30-day log
 Next session : 55kg x 10 reps

[C] Lat Pulldown (Cable)

Best this week : 52kg x 12 reps (e1RM 72.8kg)
 vs prior : First time in 30-day log
 Next session : 52kg x 12 reps

[C] Leg Press (Machine)

Best this week : 70kg x 9 reps (e1RM 91.0kg)
 vs prior : DOWN -7.0kg vs 27 May
 Next session : 66.5kg x 9 reps

[C] Seated Overhead Press (Dumbbell)

Best this week : 17.5kg x 10 reps (e1RM 23.3kg)
 vs prior : First time in 30-day log
 Next session : 17.5kg x 10 reps

[C] Shoulder Press (Dumbbell)

Best this week : 40kg x 8 reps (e1RM 50.7kg)
 vs prior : UP +22.7kg vs 16 May
 Next session : 42.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 40kg x 8 reps (e1RM 50.7kg)
 vs prior : First time in 30-day log
 Next session : 40kg x 8 reps

[C] Upright Row (Cable)

Best this week : 18.1kg x 10 reps (e1RM 24.1kg)
 vs prior : First time in 30-day log
 Next session : 18.1kg x 10 reps

[I] Band Pullaparts

Best this week : 0kg x 20 reps (e1RM 0.0kg)
 vs prior : First time in 30-day log
 Next session : 0kg x 20 reps
 *** FLAGS: 0kg logged -- check entry

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 8 reps (e1RM 12.7kg)
 vs prior : First time in 30-day log
 Next session : 10kg x 8 reps

[I] Bird Dog

Best this week : 0kg x 16 reps (e1RM 0.0kg)
 vs prior : First time in 30-day log
 Next session : 0kg x 16 reps
 *** FLAGS: 0kg logged -- check entry

[I] Chest Supported Y Raise (Dumbbell)

Best this week : 5kg x 12 reps (e1RM 7.0kg)

vs prior : SAME as 26 May

Next session : 5kg x 12 reps

[I] Face Pull

Best this week : 24.9kg x 15 reps (e1RM 37.3kg)

vs prior : DOWN -2.5kg vs 11 May

Next session : 23.65kg x 15 reps

[I] Hanging Leg Raise

Best this week : 0kg x 4 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 4 reps

*** FLAGS: 0kg logged -- check entry

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)

vs prior : DOWN -2.9kg vs 05 May

Next session : 9.5kg x 15 reps

[I] Overhead Triceps Extension (Cable)

Best this week : 24kg x 111 reps (e1RM 112.8kg)

vs prior : First time in 30-day log

Next session : 24kg x 111 reps

*** FLAGS: rep collapse (111->11)

[I] Shrug (Barbell)

Best this week : 40kg x 15 reps (e1RM 60.0kg)

vs prior : DOWN -30.0kg vs 15 May

Next session : 38.0kg x 15 reps

[I] Stretching

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Superman

Best this week : 0kg x 10 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 10 reps

*** FLAGS: 0kg logged -- check entry

[I] Treadmill

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Warm Up

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
Chest	3	12	9	CRITICAL
Back	9	14	5	CRITICAL
Shoulders	10	10	0	OK
Traps	3	6	3	LOW

Rear Delts		3		8		5		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		6		14		8		CRITICAL
Core		12		6		-6		OK

Push sets: 16 | Pull sets: 18 | Ratio pull:push = 1.12 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Enough work this week: Shoulders, Core

Short this week : Chest, Back, Traps, Rear Delts, Biceps, Triceps, Legs

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (07 May-14 May): 7 sessions

Wk -2 (14 May-21 May): 5 sessions

Wk -1 (21 May-28 May): 3 sessions

Time between sessions this week:

Thu 28 May 07:55 -> Mon 01 Jun 07:08: 95h

Mon 01 Jun 07:08 -> Wed 03 Jun 08:41: 50h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
--------	---------	-----	--------

Chest	3	8	AT RISK
Back	9	10	AT RISK
Shoulders	10	8	OK
Traps	3	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	6	10	AT RISK
Core	12	4	OK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Back, Traps, Rear Delts, Biceps, Triceps, Legs
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.
Active training weeks logged : 1
Weeks since last deload : 1 (deload every 4 weeks)
Next deload : in 3 week(s), approx 25 Jun 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W2 (started 2026-05-24; 10 days elapsed, rounds up to 2)
Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
-----+-----+-----+-----			
Thu 28 May	Push B	Push B	OK
Fri 29 May	Pull B	--	MISSED
Sat 30 May	Legs B	--	MISSED
Sun 31 May	REST	--	REST OK
Mon 01 Jun	Push A	Full Body 1 (INFERRED: mixed)	WRONG TYPE
Tue 02 Jun	Pull A	--	MISSED
Wed 03 Jun	Legs A	Full Body 2 (INFERRED: mixed)	WRONG TYPE
Adherence: 17% (1 of 6 training-day slots matched correct PPL type)			

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions done -- MISSING.
Full Body 1 (Mon) and Full Body 2 (Wed) included
Leg Press and Squat but NO Hip Thrust.
APT correction was completely absent this week.
Core stabiliser (all sessions): 1 of 3 sessions (Bird Dog in Thu Push B only;
Mon Full Body 1 and Wed Full Body 2 had none)
Rear delt work in Pull sessions: 0 of 0 Pull sessions (no Pull session done this week).
6 sets logged in Push B (Face Pull x3 + Chest
Supported Y Raise x3). Weekly total: 6 vs 8 target.
SHORT by 2 sets.
Sessions over 60 min: ALL 3 sessions breached the 60-min cap --
Thu 28 May: 103 min | Mon 01 Jun: 70 min | Wed 03 Jun: 82 min

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 15 reps | Prior week : 10kg x 12 reps | Trend: UP (+3 reps, weight flat)

7. KEY INSIGHTS

RECOVERY AT 44

The two inter-session gaps this week technically cleared the 48h minimum, but only just. Lat Pulldown (back) on Mon 01 Jun 07:08 to Bent Over Row on Wed 03 Jun 08:41 = 50h. Leg Press appeared in both the Mon Full Body 1 and Wed Full Body 2 with the same 50h separation. Both pairs pass the 48h floor, but 50h leaves almost no buffer: at 44, connective tissue and tendon recovery lags muscle recovery by 24-48h, meaning the joint is still processing stress when the next session starts. No back-to-back same-muscle pairs fell under 48h, so no red-line violations this week -- but the Mon-Wed cadence for the same compound lifts is not recommended as a sustained pattern. A Thu-Mon spacing (or longer) for repeated compound movements is safer at this age.

PPL ADHERENCE -- REGRESSION IN WEEK 2

Adherence dropped to 17% (1 of 6 training days matched the correct PPL type). The single correct session was Thursday Push B. Friday Pull B, Saturday Legs B, and Tuesday Pull A were all missed outright -- three consecutive programme slots went dark after Push B. Monday and Wednesday returned to training but abandoned the PPL format in favour of generic Full Body sessions, which deliver no push/pull/legs specificity. Compare to last week (21-27 May): Push A on Mon 25, Pull A on Tue 26, and Legs A on Wed 27 were all correctly executed = 3 of 6 = 50% adherence. This is Week 2 of the PPL x2 programme (started 2026-05-24). A clear pattern is emerging: the second half of the week (Fri/Sat) goes dark after Thursday, and when training resumes it defaults to Full Body rather than the scheduled slot. If this pattern holds into W3, the specific adaptation signal from the PPL split will be lost entirely.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate: 0 of any session this week. No dedicated Legs session was performed -- Legs A (Wed 27 May scheduled) was replaced by Full Body 2 and Legs B (Sat 30 May) was not done at all. Both Full Body sessions included leg exercises (Squat, Leg Press) but neither logged a Hip Thrust. Anterior pelvic tilt correction was completely absent for seven consecutive days. Skipping Hip Thrust means the glutes remain under-stimulated relative to the hip flexors; the pelvis stays tilted forward, which loads the lumbar spine in extension during every subsequent set. Rear delt sets: 6 this week (3 Face Pull + 3 Chest Supported Y Raise in Push B) against an 8-set weekly target -- short by 2 sets. No Pull session ran this week, which is where the bulk of rear delt work normally lives. At 44, if the front delts stay significantly stronger than the rear, the humeral head migrates anteriorly during every pressing movement. This narrows the subacromial space and pinches the supraspinatus tendon against the acromion on each rep -- the onset of rotator cuff impingement. It is symptom-free until it is chronic, and chronic means months of rehab. Core stabiliser (Dead Bug / Bird Dog) reached only 1 of 3 sessions; the two missed sessions left thoracic kyphosis at T8-T12 unchallenged.

LATERAL RAISE -- V-TAPER KPI

Best this week: 10kg x 15 reps. Best prior week: 10kg x 12 reps. Trend: UP (same weight, +3 reps = 25% more volume at this load). However, the weight itself has been stuck at 10kg for at least two consecutive push sessions, and over the 30-day window the lift has regressed from its peak of 12.5kg x 13 reps (05 May). Ganesh's love handles sit at the same width as his lats, which means the V-taper does not register from the front -- the torso reads rectangular. Widening the shoulder silhouette is the only lever that changes this ratio without waiting for the love handles to shrink. At 15 reps and 10kg, the reps are signalling readiness to move up; the next dumbbell (12.5kg x 10 reps) must happen in Monday's Push A. If Lateral Raise weight stagnates, V-taper progress stagnates.

HARD FLAGS

1. Bench Press rep collapse (Mon Full Body 1): 40kg x 12, 12, 8 reps. Set 3 dropped 33% from sets 1-2. Classic early fatigue pattern. Next Push A drops to 37.5kg to rebuild three clean sets before loading again.
2. Overhead Triceps Extension data error (Thu Push B, Set 1): logged as 24kg x 111 reps (e1RM 112.8kg). Sets 2-3 correctly show 24kg x 11 reps. This inflated the session volume figure and distorts triceps tracking in every subsequent report. Correct in Hevy before next session.

3. All 3 sessions this week exceeded the 60-min cap: Thu 103 min, Mon 70 min, Wed 82 min. Sessions past 60 min push into elevated cortisol territory, which actively antagonises muscle retention on a calorie deficit. The excess time appears to come from warm-up stretching blocks (multiple 0-rep "Stretching" sets logged) and possibly long rest periods. Cap the warm-up at 5 min; cut passive stretching to cool-down only.
4. Hip Thrust logged in zero sessions this week. APT correction missed entirely.
5. Lateral Raise weight stuck at 10kg. Reps have been at 12-15 for two sessions -- the signal to step up to 12.5kg is overdue.

OVERALL VERDICT: DECLINING

Volume is nearly flat vs last week (16,838 vs 17,251 kg*reps, -2%), but every quality metric declined. PPL adherence fell from 50% (3 correct PPL sessions, prior week) to 17% (1 correct, this week). The format regressed from structured PPL to generic Full Body on two of three sessions. Corrective compliance worsened: Hip Thrust was present in Legs A last week (Session 16, Wed 27 May) and absent all week this week. Rear delt sets (6) remain below the 8-set threshold. Holding volume at a low number while degrading adherence, format specificity, and corrective compliance = DECLINING.

8. PLAN FOR NEXT WEEK

Programme week: W3 (Week 3 of PPL x2)

MONDAY 08 Jun -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 4 sets x 8 reps @ 37.5kg
 [rep collapse last session: 5% drop from 40kg; rebuild 4 clean sets before loading]
 Incline Bench Press (Dumbbell) 3 sets x 10 reps @ 22.5kg
 Chest Fly (Machine) 3 sets x 12 reps @ 47.5kg
 Lateral Raise (Dumbbell) 3 sets x 10 reps @ 12.5kg
 [V-TAPER KPI: step up from 10kg -- reps have been at 15 for 2 sessions]
 Face Pull 3 sets x 15 reps @ 26.1kg
 Triceps Rope Pushdown 3 sets x 9 reps @ 24.9kg
 Bird Dog 3x16 -- do not skip (T8-T12 kyphosis corrective; every Push session)

Watch-point: Chest is CRITICAL (3 sets this week vs 12 target). Hit all 4 bench sets before fatigue builds; rest 2.5 min between compound sets. Session cap: 55 min.

TUESDAY 09 Jun -- Pull A (Back compound + Biceps)

Pull Up (Weighted) 4 sets x 8 reps @ BW + 2.5kg
 Dumbbell Row 3 sets x 12 reps @ 22.5kg
 Shrug (Smith Machine) 3 sets x 12 reps @ 72.5kg
 Face Pull 3 sets x 15 reps @ 26.1kg
 Chest Supported Y Raise (DB) 3 sets x 12 reps @ 7.5kg
 Rack Pull 3 sets x 8 reps @ 50kg
 [failed at 70kg last session; stay at 50kg and own the reps before loading]
 Seated Incline Curl (Dumbbell) 3 sets x 10 reps @ 10kg
 Bird Dog 3x16 -- do not skip

Watch-point: Back is CRITICAL (9 sets vs 14 target). All 7 exercises must run. Do not drop Rack Pull -- it is the heaviest back driver in Pull A.

WEDNESDAY 10 Jun -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Machine) 3 sets x 12 reps @ 22.5kg [MANDATORY -- APT]
 [do this FIRST, before any fatigue accumulates -- missed all of last week]
 Deadlift (Trap bar) 3 sets x 8 reps @ 97.5kg
 Leg Press (Machine) 3 sets x 9 reps @ 66.5kg

[DOWN this week -- 5% drop from 70kg; rebuild before adding load]

Single Leg Press (Machine) 3 sets x 10 reps @ 10kg per leg

Seated Leg Curl (Machine) 3 sets x 9 reps @ 45kg

Dead Bug 3x16 -- do not skip (T8-T12 kyphosis corrective; every Legs session)

Watch-point: Hip Thrust is non-negotiable. APT missed all seven days; this is the catch-up. Target session duration: under 60 min -- trim warm-up to 5 min.

THURSDAY 11 Jun -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Overhead Press (Dumbbell) 4 sets x 10 reps @ 20kg

[compound +2.5kg from 17.5kg -- all 4 sets hit target reps last week]

Lateral Raise (Dumbbell) 3 sets x 10 reps @ 12.5kg

[V-TAPER KPI: second session at 12.5kg; slow negative, strict form]

Upright Row (Cable) 3 sets x 10 reps @ 20.6kg

Face Pull 3 sets x 15 reps @ 26.1kg

Chest Supported Y Raise (DB) 3 sets x 12 reps @ 7.5kg

Overhead Triceps Extension (Cable) 3 sets x 11 reps @ 25.25kg

[correct Hevy entry before session -- last session Set 1 logged 111 reps in error]

Bird Dog 3x16 -- do not skip

Watch-point: Last Push B ran 103 min -- that is 43 min over cap. Trim warm-up to 5 min, zero passive stretching sets mid-session, 90s rest for isolations.

FRIDAY 12 Jun -- Pull B (Back + Rear Delts + Biceps)

Seated Cable Row - V Grip 3 sets x 10 reps @ 80kg

Pull Up 4 sets x 7 reps @ BW + 2.5kg

Rear Delt Reverse Fly (Machine) 4 sets x 10 reps @ 52.5kg [MANDATORY rear delt]

Face Pull 3 sets x 15 reps @ 26.1kg

Hammer Curl (Dumbbell) 3 sets x 10 reps @ 13.75kg

[if unavailable: 12.5kg x 12 reps or 15kg x 8 reps]

Bird Dog 3x16 -- do not skip

Watch-point: Pull B is the most important session for shoulder joint health at 44.

Rear delts finished 2 sets short of the 8-set weekly target; this session must deliver all 7 rear delt sets (4 reverse fly + 3 face pull). Do not cut rear delt work to save time.

SATURDAY 13 Jun -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Hip Thrust (Machine) 3 sets x 12 reps @ 22.5kg [MANDATORY -- APT]

[do this FIRST -- this completes the second Hip Thrust of the week]

Romanian Deadlift (Dumbbell) 3 sets x 10 reps @ 42.5kg

Rack Pull 3 sets x 8 reps @ 50kg

Seated Leg Curl (Machine) 3 sets x 9 reps @ 45kg

Hip Abduction (Machine) 3 sets x 10 reps @ 87.5kg

Hip Adduction (Machine) 3 sets x 10 reps @ 47.5kg

Dead Bug 3x16 -- do not skip

Watch-point: Both Legs sessions (Wed and Sat) must have Hip Thrust. This is the direct corrective for anterior pelvic tilt; every week it is skipped, the structural imbalance persists and compounds under load.

```
+-----+
| Deload   : not yet -- next due Week 5, ~25 Jun 2026 |
| Timing   : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum    |
+-----+
```
