

30-Day Period ending 2026-08-23

Name	Ganesh
Profile	44M 181 cm 87 kg -> 79 kg
Goal	Body Recomposition -- Fat loss, muscle preservation
Pace	0.5 kg/week 15% calorie deficit
Generated	2026-08-23

WEEKLY TRAINING REPORT

Generated : 2026-08-24 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 17 Aug to 24 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 0, 2, 3 sessions (avg 1.7)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 50kg x 12 reps (e1RM 70.0kg)

Biggest concern: Back -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 61% (5,056 vs 13,059 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 19 Aug 2026 09:12 IST | 32 min

Type : Full Body B -- Wednesday

Volume : 5,056 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 36kg x 9r x 3 sets (e1RM 46.8kg) [FLAG: rep collapse 9->6]

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -30.1kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 24.9kg x 11r x 3 sets (e1RM 34.0kg) vs prior: -3.2kg e1RM

4-WEEK VOLUME TREND

Wk -3 (27 Jul-03 Aug): [.....] 0 kg*reps 0 sess

Wk -2 (03 Aug-10 Aug): [#####.....] 8,973 kg*reps 2 sess

Wk -1 (10 Aug-17 Aug): [#####] 13,059 kg*reps 3 sess

This wk (17 Aug-24 Aug): [#####.....] 5,056 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)

vs prior : SAME as 12 Aug

Next session : 45kg x 7 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)

vs prior : SAME as 12 Aug

Next session : 20kg x 9 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -30.1kg vs 12 Aug

Next session : 47.5kg x 12 reps

[!] Seated Leg Curl (Machine)

Best this week : 36kg x 9 reps (e1RM 46.8kg)

vs prior : First time in 30-day log

Next session : 36kg x 9 reps

*** FLAGS: rep collapse (9->6)

[!] Triceps Pushdown

Best this week : 24.9kg x 11 reps (e1RM 34.0kg)

vs prior : DOWN -3.2kg vs 05 Aug

Next session : 23.65kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
-----+-----+-----+-----+-----				
Chest	0	12	12	CRITICAL
Back	0	14	14	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	0	6	6	CRITICAL
Rear Delts	0	8	8	CRITICAL
Biceps	6	8	2	LOW
Triceps	3	8	5	CRITICAL
Legs	6	14	8	CRITICAL
Core	0	6	6	CRITICAL
Push sets: 6 Pull sets: 6 Ratio pull:push = 1.00 (OK -- balanced)				
Rear delts: 0 sets this week (need 8+/week)				
SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.				
Traps : 0 sets this week (need 6+/week)				
SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.				
Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core				
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.				

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target

Wk -3 (27 Jul-03 Aug): 0 sessions

Wk -2 (03 Aug-10 Aug): 2 sessions

Wk -1 (10 Aug-17 Aug): 3 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 0 8 AT RISK
 Back 0 10 AT RISK
 Shoulders 3 8 AT RISK
 Traps 0 4 AT RISK
 Rear Delts 0 6 AT RISK
 Biceps 6 6 OK
 Triceps 3 6 AT RISK
 Legs 6 10 AT RISK
 Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
 Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core
 These are not getting enough signal to hold on to muscle during a deficit.
 Add sets for these in the next 1-2 sessions.

Active training weeks logged : 7
 Weeks since last deload : 7 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
 Deload weeks let joints and connective tissue recover.
 You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W13 (started 2026-05-24; 91 days elapsed = 13 weeks)
 Sessions this week (17-23 Aug): 1 of 6 target

NOTE: All Hevy sessions are labelled "Full Body A/B/C", NOT the PPL labels (Push A, Pull A, Legs A, etc.). The programme in Hevy has diverged from the 6-day PPL split. Sessions below are INFERRED from exercises.

Day	Expected	Detected	Status
-----+-----+-----+-----			
Mon 17 Aug	Push A	(no session)	MISSED
Tue 18 Aug	Pull A	(no session)	MISSED
Wed 19 Aug	Legs A	Full Body B (INFERRED-mixed: OFF-PLAN	
	OHP+Leg Curl+Leg Ext	(contains push, legs, pull)	
	+Bicep Curl+Triceps)		
Thu 20 Aug	Push B	(no session)	MISSED
Fri 21 Aug	Pull B	(no session)	MISSED
Sat 22 Aug	Legs B	(no session)	MISSED
Sun 23 Aug	REST	REST	OK

Adherence: 0% (0 of 6 sessions on correct PPL day; 5 days missed entirely)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 legs-inclusive session -- MISSING on 19 Aug
(APT correction absent -- mandatory every Legs session per programme)
Core stabiliser (all sessions): 0 of 1 sessions (no Dead Bug / Bird-Dog / Plank logged)
(T8-T12 kyphosis correction absent)
Rear delt work in Pull sessions: 0 of 1 sessions with pull exercises
(no Face Pull / Rear Delt Fly / Reverse Fly in Wed 19 Aug; 0 sets vs 8/week target)
Sessions over 60 min : None (Wed 19 Aug was 32 min)

LATERAL RAISE (V-TAPER KPI):

This week : No Lateral Raise performed (no session with lateral raises)
Prior week : 10kg x 14 reps (Mon 10 Aug)
2 weeks ago: 10kg x 14 reps (Mon 03 Aug -- same weight, no progression)
Trend : DOWN (weight stalled at 10kg for 3+ weeks; not performed this week at all)

7. KEY INSIGHTS

RECOVERY AT 44

The closest same-muscle sessions in the last 30 days were legs: Wed 12 Aug (09:09) with Leg Extension/Lying Leg Curl, followed by Fri 14 Aug (08:49) with Leg Press -- only 47h 40min apart, just under the 48h minimum required for muscle tissue repair at 44. Every other same-muscle pair cleared 48h comfortably: OHP appeared on Wed 05, Wed 12, and Wed 19 Aug, each exactly 168h apart; Bench Press on Mon 03 and Mon 10 Aug = 168h; Bicep Curl on Wed 12 and Wed 19 Aug = 168h; Triceps Pushdown on Wed 05, 12, and 19 Aug = 168h each. One recovery violation to flag: Legs on Wed 12 -> Fri 14 Aug = 47h 40min, 20 minutes short of the minimum.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 13 of the programme (started 2026-05-24). This week's adherence is 0%: 1 session ran (vs 6 target) and it was labelled "Full Body B" rather than the prescribed "Legs A". No day this week had the correct PPL session. The pattern in the data is stark -- all 6 sessions in the last 30 days are labelled Full Body (A, B, or C). The PPL split exists in the programme reference but has not been implemented in Hevy. Missing days this week: Mon, Tue, Thu, Fri, Sat. Sunday was correctly a rest day. Volume has been declining three weeks in a row: 0 sessions (Wk -3), 2 sessions (Wk -2), 3 sessions (Wk -1), 1 session (this week). That is a downward trend, not the expected ramp toward 6 sessions/week.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0 of 1 legs-inclusive sessions (MISSING on 19 Aug). Hip Thrust is the primary correction for anterior pelvic tilt (APT). APT causes the lower back to over-arch, overloading the lumbar erectors and

reducing glute activation on every compound lower-body movement. Without Hip Thrust to reinforce posterior pelvic tilt and glute engagement, squat and deadlift mechanics remain compromised and the correction stalls entirely. Rear delt sets this week: 0 vs 8-set target (8 sets short). At 44, if the anterior shoulder group (chest, front delt) stays disproportionately stronger than the posterior rotator cuff anchors (infraspinatus, teres minor, rear delt), the humeral head migrates superiorly under pressing load, compressing the supraspinatus tendon between the humeral head and acromion. This is the mechanism of rotator cuff impingement syndrome. It is preventable -- but only if rear delt sets (Face Pulls, Reverse Fly) are done consistently, not skipped. Core stabiliser (Dead Bug / Bird-Dog / Plank) present: 0 of 1 sessions. T8-T12 kyphosis correction has been absent for the entire week.

LATERAL RAISE -- V-TAPER KPI

Trend: DOWN. No Lateral Raise was performed this week at all (17-23 Aug). The prior two logged lateral raise sessions both recorded 10kg x 14 reps (Mon 03 Aug and Mon 10 Aug) -- the weight has not moved in at least 3 weeks. Lateral Raise weight progression is the primary V-taper KPI for Ganesh specifically because the love handles currently sit at roughly lat-width level, meaning the shoulders and hips have almost the same visual width. The only way to widen the top of that ratio -- short of losing several more centimetres off the waist -- is to build out the medial deltoid head, which Lateral Raise specifically targets. Stalling at 10kg for 3 weeks and then missing the exercise entirely this week means zero V-taper visual progress.

HARD FLAGS FROM SESSION DATA

1. Rep collapse: Seated Leg Curl (36kg) on Wed 19 Aug went 9, 9, 6 reps -- set 3 lost 33% of reps vs set 1. Either fatigue from earlier exercises or insufficient rest between sets. Drop to 34kg (5% cut) next session.
2. Leg Extension e1RM dropped 30.1kg between 12 Aug (77kg x 9, e1RM 100.1kg) and 19 Aug (50kg x 12, e1RM 70.0kg). A 30% e1RM drop in 7 days is not normal strength decline -- this is likely a machine weight-stack mis-read, a different machine, or a deliberate weight reduction. Needs clarification; do not count this as a strength loss.
3. Recovery violation: Legs trained 47h 40min apart (Wed 12 -> Fri 14 Aug), 20 minutes short of 48h minimum.
4. Hip Thrust: zero appearances in any of the 6 sessions across 30 days. APT correction has been completely absent.
5. Deload overdue: 7 active training weeks with no deload. The 4-week cycle has been missed by 3 weeks. Joint and connective tissue fatigue risk is elevated; a deload in W14 is required.
6. Programme not implemented as PPL: all Hevy sessions are Full Body. The prescribed 6-day PPL split has never been logged in the export window.

OVERALL VERDICT: DECLINING

Volume DOWN 61% this week vs last week (5,056 vs 13,059 kg.reps). Sessions DOWN from 3 to 1. PPL adherence: 0%. Corrective compliance: 0% (hip thrust, core, rear delt all missing). Deload overdue by 3 weeks. The previous two

weeks (2 and 3 sessions respectively) had shown some momentum; this week reversed it. Three consecutive weeks of under-target volume and no programme restructuring to PPL is the core issue.

8. PLAN FOR NEXT WEEK (W14 -- DELOAD WEEK)

Programme week: W14 (Week 14 of PPL x2 -- DELOAD REQUIRED)

DELOAD PROTOCOL: 7 weeks without a deload; reduce all working sets to 2 per exercise. Keep weights identical to last logged. No new PRs, no grinding.

Goal: joint and connective tissue recovery. Stronger comeback in W15.

--- MONDAY 24 Aug -- Push A (Chest primary + Shoulders + Triceps) [DELOAD] ---

Bench Press (Barbell) 2 x 8 @ 60kg

[best: 60kg x 6 on Mon 10 Aug; compound rule -- 8 reps at 60kg before +2.5kg]

Overhead Press (Barbell) 2 x 7 @ 45kg

[best: 45kg x 7 on Wed 12 Aug; consistent -- hold weight, confirm reps]

Lateral Raise (Dumbbell) 2 x 14 @ 10kg [V-TAPER KPI -- do not skip]

[stalled at 10kg x 14 for 3 weeks; isolation rule: need all sets at 14 reps before moving to 11.25kg; missed entirely this week]

Triceps Pushdown 2 x 11 @ 27.2kg

[best 30-day: 27.2kg x 11 on Wed 05 and 12 Aug; dropped to 24.9 on 19 Aug -- use 27.2kg again and see if reps hold]

Dead Bug 3 x 10 -- do not skip (T8-T12 kyphosis corrective)

Key focus: This is a deload -- every rep should be smooth and controlled.

Confirm Lateral Raise gets 14 clean reps with full shoulder plane on all 2 sets.

--- TUESDAY 25 Aug -- Pull A (Back compound + Biceps) [DELOAD] ---

Bent Over Row (Barbell) 2 x 7 @ 70kg

[best: 70kg x 7 on Fri 14 Aug; compound rule -- need all sets before +2.5kg]

Lat Pulldown (Machine) 2 x 6 @ 66kg

[best: 66kg x 6 on Fri 14 Aug; only appeared once -- consolidate form]

Pull Up 2 x 6 @ bodyweight

[consistent 6 reps per set; good]

Rear Delt Reverse Fly (DB) 2 x 13 @ 10kg [MANDATORY -- rear delt deficit]

[best: 10kg x 13 on Fri 14 Aug -- ONLY session with rear delt work this month]

Bicep Curl (Barbell) 2 x 9 @ 20kg

[best: 20kg x 9 on Wed 12 and 19 Aug]

Dead Bug 3 x 10 -- do not skip

Key focus: Rear delt sets have been 0 this week vs 8-set target. Pull A must include Reverse Fly every time without exception to protect the shoulder joint.

--- WEDNESDAY 26 Aug -- Legs A (Quads, Hamstrings, Glutes) [DELOAD] ---

Squat (Barbell) 2 x 6 @ 70kg

[best: 70kg x 6 on Mon 10 Aug; compound rule -- hold weight, hit reps]

Leg Extension (Machine) 2 x 12 @ 50kg

[last logged 50kg x 12 on Wed 19 Aug; previous was 77kg on 12 Aug -- e1RM drop of 30.1kg noted. Use 50kg until the source of the drop is confirmed]

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

[best: 75kg x 8 on Wed 05 Aug -- appeared only once]

Hip Thrust (Barbell) 2 x 10 @ 40kg -- MANDATORY for APT correction

[NO prior log in 30-day window. Start at 40kg. Focus: squeeze glutes at top, tilt pelvis posterior, hold 1 second at peak. This exercise must appear in every Legs session from W14 onward.]

Dead Bug 3 x 10 -- do not skip

Key focus: Hip Thrust is the most important corrective exercise in the whole programme. Not logged once in 30 days. Start light, prioritise form over load.

--- THURSDAY 27 Aug -- Push B (Shoulders primary + Chest variation + Triceps) [DELOAD] ---

Overhead Press (Barbell) 2 x 7 @ 45kg

[best: 45kg x 7 on Wed 12 Aug -- shoulders primary day, OHP is the main lift]

Bench Press (Barbell) 2 x 6 @ 60kg

[chest variation on Push B -- same weight as Push A, different emphasis]

Lateral Raise (Dumbbell) 2 x 14 @ 10kg [V-TAPER KPI -- do not skip]

[second lateral raise session of the week -- W-taper requires twice-weekly volume]

Triceps Pushdown 2 x 11 @ 24.9kg

[use 24.9kg logged on Wed 19 Aug -- rep collapse was on leg curl, not this]

Dead Bug 3 x 10 -- do not skip

Key focus: Push B is the second chance this week to log Lateral Raise.

If both Push A and Push B hit 10kg x 14 cleanly, move to 11.25kg in W15.

--- FRIDAY 28 Aug -- Pull B (Back + Rear Delts + Biceps) [DELOAD] ---

Bent Over Row (Barbell) 2 x 7 @ 70kg

Lat Pulldown (Machine) 2 x 6 @ 66kg

Rear Delt Reverse Fly (DB) 2 x 13 @ 10kg [MANDATORY]

Face Pull (Cable or Band) 2 x 15 @ light [ADD THIS -- mandatory on Pull B]

[no prior log -- start conservative; this fills rear delt 8-set/week target]

Bicep Curl (Barbell) 2 x 9 @ 20kg

Dead Bug 3 x 10 -- do not skip

Key focus: Pull B must include BOTH Reverse Fly and Face Pull to hit the 8-set/week rear delt target. These 4 rear delt sets on Pull B, combined with the 2 sets from Pull A, get to 6 of 8; add 2 more on either Pull session if time allows.

--- SATURDAY 29 Aug -- Legs B (Glutes, Hamstrings, Single-Leg) [DELOAD] ---

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

Hip Thrust (Barbell) 2 x 10 @ 40kg -- MANDATORY for APT correction

[second Hip Thrust session of the week; same weight and cues as Legs A]

Seated Leg Curl (Machine) 2 x 9 @ 34kg

[rep collapse flagged on 19 Aug at 36kg (sets went 9, 9, 6). Drop 5% to 34kg.

If 9 reps hit on both sets, return to 36kg in W15]

Leg Press (Machine) 2 x 12 @ 50kg

[best: 50kg x 12 on Fri 14 Aug -- consistent]

Dead Bug 3 x 10 -- do not skip

Key focus: Legs B is the second mandatory Hip Thrust session. If W14 gets both Legs A and Legs B Hip Thrust logged, APT correction re-starts properly in W15.

```
+-----+
| Deload : NEEDED THIS WEEK -- next build cycle W15, ~31 Aug |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
+-----+
```
