

30-Day Analysis Report

This week : 31 Jul to 07 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-06

WEEKLY TRAINING REPORT

Generated : 2026-08-07 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 31 Jul to 07 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 5, 3, 0 sessions (avg 2.7)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min

Type : Full Body A -- Monday

Volume : 3,000 kg*reps | 13 sets

Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 05 Aug 2026 08:54 IST | 51 min

Type : Full Body B -- Wednesday

Volume : 5,973 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM

Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]

Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]

Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (10 Jul-17 Jul): [#####] 26,147 kg*reps 5 sess

Wk -2 (17 Jul-24 Jul): [#####.....] 15,180 kg*reps 3 sess

Wk -1 (24 Jul-31 Jul): [.....] 0 kg*reps 0 sess

This wk (31 Jul-07 Aug): [#####.....] 8,973 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

* FLAGS: rep collapse (10->6)

[C] Overhead Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -3.4kg vs 08 Jul

Next session : 38.0kg x 10 reps

* FLAGS: rep collapse (10->4)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : SAME as 15 Jul

Next session : 75kg x 8 reps

[C] Squat (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -21.3kg vs 13 Jul

Next session : 57.0kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : SAME as 08 Jul

Next session : 10kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : DOWN -4.7kg vs 15 Jul

Next session : 66.5kg x 12 reps

* FLAGS: rep collapse (12->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 08 Jul

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		3		6		3		LOW
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (10 Jul-17 Jul): 5 sessions

Wk -2 (17 Jul-24 Jul): 3 sessions

Wk -1 (24 Jul-31 Jul): 0 sessions

Time between sessions this week:

Mon 03 Aug 08:25 -> Wed 05 Aug 08:54: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	6	10	AT RISK
Shoulders	6	8	AT RISK
Traps	3	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	10	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 4

Weeks since last deload : 4 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W11 (started 2026-05-24; 74 days elapsed, rounded up = 11 weeks)

Sessions this week: 2 of 6 target

NOTE: Ganesh is still following a Full Body programme (titles: "Full Body A/B/C", "Chest Shoulder"). After 11 weeks, the prescribed PPL x2 split has not been implemented. All sessions below are INFERRED from exercise content.

Day	Expected	Detected	Status
* +-----+-----+-----+-----+			
Mon 03 Aug Push A	Full Body A (INFERRED)		MISMATCH - mixed session
Wed 05 Aug Legs A	Full Body B (INFERRED)		MISMATCH - mixed session
Fri 31 Jul Pull B	No session		MISSED
Sat 01 Aug Legs B	No session		MISSED
Tue 04 Aug Pull A	No session		MISSED
Thu 06 Aug Push B	No session		MISSED
Sun 02 Aug REST	REST		OK

Adherence: 0% (0 of 2 completed sessions matched expected PPL type;
4 of 6 target training days not attempted)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 legs sessions -- MISSING in all sessions;
no Hip Thrust logged anywhere this week.

APT correction is completely absent.

Core stabiliser (all sessions): 0 of 2 sessions -- Dead Bug / Bird-Dog / Plank
absent in both sessions. T8-T12 kyphosis
correction is not happening.

Rear delt work in Pull sessions: 0 of 0 pull sessions -- no dedicated Pull session
done; rear delt sets = 0 this week (vs 8 target).

Sessions over 60 min: Mon 03 Aug -- 82 min (22 min over limit)

LATERAL RAISE (V-TAPER KPI):

This week: 10kg x 14 reps | Prior week: No data (0 sessions Jul 24-Jul 30)

Last recorded: 10kg x 14 reps (13 Jul 2026) | Trend: SAME

7. KEY INSIGHTS

RECOVERY AT 44

Only two sessions were logged this week: Monday 03 Aug at 08:25 IST and Wednesday 05 Aug at 08:54 IST, a gap of 48 hours 29 minutes. The minimum required recovery between sessions hitting the same muscle group is 48 hours. Both the shoulder pair (Lateral Raise on Monday / Overhead Press on Wednesday) and the quad pair (Barbell Squat on Monday / Leg Extension on Wednesday) cleared this minimum by a margin of just 29 minutes -- too close for comfort at 44. No session exceeded the midnight IST cutoff. However, the 82-minute duration of Monday's session is itself a recovery concern: sessions beyond 60 minutes drive cortisol significantly higher, and elevated cortisol at 44 lengthens the recovery window. Monday needs to be trimmed to 60 minutes maximum.

PPL ADHERENCE & PROGRAMME AGE

This is Week 11 of the PPL x2 programme (started 2026-05-24). Despite 11 weeks on the programme, Ganesh is still logging Full Body sessions ("Full Body A", "Full Body B", "Full Body C") rather than the prescribed Push / Pull / Legs split. PPL adherence this week is 0% -- neither session matched its expected PPL type. Session completion rate is 33% (2 of 6 target sessions). The pattern of missing sessions is broad: Friday Pull B, Saturday Legs B, Tuesday Pull A, and Thursday Push B were all skipped this week. Weekend sessions (Saturday Legs B) have been the most consistently missed across prior weeks. The programme has not been implemented in its prescribed form at any point in the 30-day log; transition to PPL must be treated as an urgent action for Week 12.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate: 0% (0 of 0 dedicated Legs sessions). No Hip Thrust was logged in any session this week. Without Hip Thrust, the glutes remain under-activated and the hip flexors stay dominant, sustaining the anterior pelvic

tilt. Under barbell squat and deadlift loads, this means the lumbar spine is working in extension rather than neutral, accumulating stress with every rep. Rear delt sets: 0 this week vs 8-set target -- a critical shortfall. At 44, when the pressing-dominated anterior deltoid stays significantly stronger than the rear delt, the rotator cuff muscles lose the mechanical leverage to keep the humeral head centred in the glenoid socket. During overhead pressing and lateral raises, the humeral head migrates forward and pinches the supraspinatus tendon against the acromion -- the classic shoulder impingement mechanism. The risk is not theoretical; it is the most common shoulder injury in men over 40 who train with a push-heavy imbalance. Core stabiliser presence: 0 of 2 sessions -- Dead Bug and Bird-Dog were absent across both sessions, leaving the T8-T12 kyphosis correction completely unaddressed.

LATERAL RAISE -- V-TAPER KPI

The V-taper KPI is flat. Lateral Raise has been stuck at 10kg x 14 reps since at least 13 July 2026 (the last data point in the 30-day window). The prior week (24-31 Jul) had zero sessions, so there is no intermediate data. The trend is SAME -- no progression. For Ganesh specifically, the love handles sit at the same horizontal level as the outer edge of the lats, which means the shoulder-to-waist visual ratio (the V) is compressed from both ends. Widening the shoulders via lateral raise progression is the only gym lever available for this ratio. At 10kg, the deltoid medial head is not receiving sufficient overload to grow. The next session must attempt 11.25kg for 14 reps; if that is not available, try 10kg for 16-18 reps as a stepping stone.

HARD FLAGS

Flag 1 -- Bench Press rep collapse: Monday's session used a pyramid (40x10, 50x10, 60x6). The rep count dropped from 10 to 6 as weight increased -- a clear sign the top weight is too heavy for the current fatigue state in a full-body session. PPL Push A isolates the pressing muscles, so this should improve, but the starting weight for next week must be 57.5kg for flat 3 sets, not 60kg.

Flag 2 -- OHP catastrophic collapse: 40kg x 10, then 45kg x 5, 45kg x 4. Reps fell from 10 to 4 in one jump. The 5kg leap from 40 to 45kg was too aggressive. Drop 5% from 45kg = 42.5kg target for Week 12 Push B. Do not attempt 45kg again until 3 consecutive sets at 42.5kg hit 8 reps.

Flag 3 -- Pull Up logged at 0kg: Bodyweight pull-ups are being logged with 0kg, making the lift invisible in e1RM tracking. Log actual bodyweight (87kg) so progress can be tracked. Three sets of 0kg x 6 reps equals 0 volume in every calculation.

Flag 4 -- Monday session 82 minutes: 22 minutes over the 60-minute cap. The session included 4 exercises plus warmup sets. Either remove one exercise or cut warmup sets from 2 to 1 per compound lift.

OVERALL VERDICT: DECLINING

Volume dropped from 26,147 kg*reps in Wk -3 (5 sessions) to 8,973 kg*reps this week (2 sessions). Bench is down 8.2kg e1RM vs 13 Jul, OHP down 3.4kg vs 08 Jul, Squat down 21.3kg vs 13 Jul. Corrective compliance is 0% on all three markers (Hip Thrust, core stabiliser, rear delts). PPL has still not been implemented in Week 11. While this week is technically better than the 0-session Week 10, all underlying metrics -- strength, volume, adherence, and corrective work -- are declining against the programme benchmarks.

8. PLAN FOR NEXT WEEK

Programme week: W12 (Week 12 of PPL x2 -- FIRST FULL PPL WEEK)

Note: W11 deload recommendation has been partially met by 2 low-volume sessions plus a 0-session prior week. W12 is a return to full training on the PPL split.

The sessions below implement the PPL x2 split for the first time.

Compound progression rule: +2.5kg if all sets hit target reps.

Isolation rule: +1.25kg if all sets hit target reps.

Rep collapse rule: drop 5% from the highest attempted weight.

After-gap rule: hold weight (no increment) if last session was 3+ weeks ago.

MONDAY 10 AUG -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 4 sets x 8 reps @ 57.5kg

[rep collapse flagged; 60 x 0.95 = 57 -- flat sets only, no pyramid]

Incline Chest Press (Machine) 3 sets x 10 reps @ 31kg

[last 30kg x 11 all clean; +1.25kg]

Chest Fly (Machine) 3 sets x 10 reps @ 65kg

[last 65kg x 10 clean; hold after 3-week gap]

Lateral Raise (Dumbbell) 3 sets x 14 reps @ 11.25kg [V-TAPER KPI]

[all 3 sets at 10 x 14 hit; +1.25kg -- do not miss this increment]

Triceps Pushdown 3 sets x 11 reps @ 28.5kg

[all 3 sets at 27.2 x 11 hit; +1.25kg]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: Keep Bench at 57.5kg for ALL sets -- no pyramid loading.

The 60kg collapse on 03 Aug was caused by pyramiding; flat sets fix this.

TUESDAY 11 AUG -- Pull A (Back compound + Biceps)

Romanian Deadlift (Barbell) 3 sets x 8 reps @ 77.5kg

[75kg x 8 x 3 all clean on 05 Aug; +2.5kg]

Bent Over Row (Barbell) 3 sets x 7 reps @ 72.5kg

[70kg x 7 x 3 on 17 Jul; +2.5kg]

Pull Up (Bodyweight) 3 sets x 6 reps @ bodyweight

[LOG 87kg AS THE WEIGHT -- 0kg entry breaks all tracking]

Rear Delt Reverse Fly (DB) 3 sets x 13 reps @ 10kg [MANDATORY]

[do this THIRD before biceps -- rear delts are at 0 sets vs 8 target]

Bicep Curl (Dumbbell) 3 sets x 10 reps @ 11.25kg

[10kg x 10 x 3 all clean on 05 Aug; +1.25kg]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: Rear Delt Fly must be 3 FULL sets -- it was cut to 2 sets on 17 Jul. Move it to position 3 in the session before fatigue accumulates.

WEDNESDAY 13 AUG -- Legs A (Quads + Hamstrings + Glutes)

Squat (Barbell) 4 sets x 6 reps @ 62.5kg
 [60kg x 6 x 3 clean on 03 Aug; +2.5kg]
 Hip Thrust (Barbell) 3 sets x 10 reps @ 60kg [MANDATORY APT]
 [not logged in 30+ days -- conservative start; squeeze glutes at top]
 Leg Extension (Machine) 3 sets x 12 reps @ 66.5kg
 [rep collapse 12->8 on 05 Aug; 70 x 0.95 = 66.5kg]
 Bird-Dog 3 x 10 each side -- do not skip (T8-T12)

Key focus: Hip Thrust is NON-NEGOTIABLE. Set up the bench, load 60kg, drive hips to full extension, hold 1 second at top. APT persists until this movement is in every Legs session.

THURSDAY 14 AUG -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 sets x 8 reps @ 42.5kg
 [rep collapse 10->4 at 45kg; 45 x 0.95 = 42.75 -- drop to 42.5kg]
 Seated Shoulder Press (Mach) 3 sets x 8 reps @ 90kg
 [90kg x 8 x 3 on 18 Jul; hold after 3-week gap -- no increment]
 Incline Chest Press (Machine) 3 sets x 10 reps @ 31kg
 [chest variation for Push B; consistent with Monday]
 Lateral Raise (Dumbbell) 3 sets x 14 reps @ 11.25kg [V-TAPER KPI]
 Skullcrusher (Dumbbell) 3 sets x 12 reps @ 21.25kg
 [20kg x 12 x 3 on 18 Jul all clean; +1.25kg]
 Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: OHP at 42.5kg -- STRICT. No attempt at 45kg until all 3 sets achieve 8 reps at 42.5. Lock shoulder blades back before pressing.

FRIDAY 15 AUG -- Pull B (Back + Rear Delts + Biceps)

Deadlift (Barbell) 3 sets x 7 reps @ 82.5kg
 [80kg x 7 x 3 on 17 Jul; +2.5kg]
 Bent Over Row (Barbell) 3 sets x 7 reps @ 72.5kg
 Rear Delt Reverse Fly (DB) 3 sets x 13 reps @ 10kg [MANDATORY]
 [do this FIRST -- impingement prevention; cannot be skipped]
 Shrug (Barbell) 3 sets x 10 reps @ 70kg
 [70kg x 11-12 on 17 Jul; hold -- last set showed slight drop]
 Bicep Curl (Dumbbell) 3 sets x 10 reps @ 11.25kg
 Bird-Dog 3 x 10 each side -- do not skip (T8-T12)

Key focus: Rear Delt Fly FIRST in the session. At 0 rear delt sets this week and 0 last week, the shoulder imbalance is accumulating. This is the exercise that keeps the shoulder joint healthy at 44.

SATURDAY 16 AUG -- Legs B (Glutes + Hamstrings + Single-Leg)

Hip Thrust (Barbell) 3 sets x 10 reps @ 60kg [MANDATORY APT]
 [second week establishing this movement -- add 5kg next week if easy]
 Romanian Deadlift (Barbell) 3 sets x 8 reps @ 77.5kg
 [carry from Pull A recommendation -- hamstring emphasis]

Leg Extension (Machine) 3 sets x 12 reps @ 66.5kg
Bulgarian Split Squat 3 sets x 8 reps per leg @ 15kg (dumbbells)
[single-leg work; no prior log -- conservative start]
Shrug (Barbell) 3 sets x 10 reps @ 70kg [traps top-up]
Bird-Dog 3 x 10 each side -- do not skip (T8-T12)
Key focus: Second Hip Thrust session -- this is the APT correction week.
Both Legs sessions MUST have Hip Thrust. If 60kg x 10 x 3 felt easy on
Wednesday, advance to 65kg on Saturday.

+-----+		
Deload	: not yet -- next due Week 15, ~03 Sep 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
