

This week : 02 Aug to 09 Aug 2026

Name	Ganesh
Profile	44M 181 cm 87 kg -> 79 kg
Goal	Body Recomposition -- Fat loss, muscle preservation
Pace	0.5 kg/week 15% calorie deficit

WEEKLY TRAINING REPORT

Generated : 2026-08-09 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 02 Aug to 09 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 6, 1, 0 sessions (avg 2.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min

Type : Full Body A -- Monday

Volume : 3,000 kg*reps | 13 sets

Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 05 Aug 2026 08:54 IST | 51 min

Type : Full Body B -- Wednesday

Volume : 5,973 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM

Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]

Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]

Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +2.8kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (12 Jul-19 Jul): [#####] 32,945 kg*reps 6 sess

Wk -2 (19 Jul-26 Jul): [#.....] 1,920 kg*reps 1 sess

Wk -1 (26 Jul-02 Aug): [.....] 0 kg*reps 0 sess

This wk (02 Aug-09 Aug): [#####.....] 8,973 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul
Next session : 57.0kg x 6 reps
*** FLAGS: rep collapse (10->6)

[C] Overhead Press (Barbell)
Best this week : 40kg x 10 reps (e1RM 53.3kg)
vs prior : DOWN -3.4kg vs 15 Jul
Next session : 38.0kg x 10 reps
*** FLAGS: rep collapse (10->4)

[C] Pull Up
Best this week : 0kg x 6 reps (e1RM 0.0kg)
vs prior : First time in 30-day log
Next session : 0kg x 6 reps
*** FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)
Best this week : 75kg x 8 reps (e1RM 95.0kg)
vs prior : SAME as 15 Jul
Next session : 75kg x 8 reps

[C] Squat (Barbell)
Best this week : 60kg x 6 reps (e1RM 72.0kg)
vs prior : DOWN -21.3kg vs 13 Jul
Next session : 57.0kg x 6 reps

[I] Bicep Curl (Dumbbell)
Best this week : 10kg x 10 reps (e1RM 13.3kg)
vs prior : UP +2.8kg vs 15 Jul
Next session : 11.25kg x 10 reps

[I] Lateral Raise (Dumbbell)
Best this week : 10kg x 14 reps (e1RM 14.7kg)
vs prior : SAME as 13 Jul
Next session : 10kg x 14 reps

[I] Leg Extension (Machine)
Best this week : 70kg x 12 reps (e1RM 98.0kg)
vs prior : DOWN -4.7kg vs 15 Jul
Next session : 66.5kg x 12 reps
*** FLAGS: rep collapse (12->8)

[I] Triceps Pushdown
Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
vs prior : SAME as 15 Jul
Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status
-----+-----+-----+-----+

Chest | 3 | 12 | 9 | CRITICAL
 Back | 6 | 14 | 8 | CRITICAL
 Shoulders | 6 | 10 | 4 | CRITICAL
 Traps | 3 | 6 | 3 | LOW
 Rear Delts | 0 | 8 | 8 | CRITICAL
 Biceps | 3 | 8 | 5 | CRITICAL
 Triceps | 3 | 8 | 5 | CRITICAL
 Legs | 10 | 14 | 4 | CRITICAL
 Core | 0 | 6 | 6 | CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (12 Jul-19 Jul): 6 sessions

Wk -2 (19 Jul-26 Jul): 1 sessions

Wk -1 (26 Jul-02 Aug): 0 sessions

Time between sessions this week:

Mon 03 Aug 08:25 -> Wed 05 Aug 08:54: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK
Back 6 10 AT RISK
Shoulders 6 8 AT RISK
Traps 3 4 AT RISK
Rear Delts 0 6 AT RISK
Biceps 3 6 AT RISK
Triceps 3 6 AT RISK
Legs 10 10 OK
Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 4
Weeks since last deload : 4 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W11 (started 2026-05-24; 76 days elapsed = 11 weeks)
Sessions this week: 2 of 6 target

Day | Expected | Detected | Status

-----+-----+-----+-----+-----

Sun 02 Aug | REST | No session | OK
Mon 03 Aug | Push A | Full Body A (INFERRED: Mixed) | MISMATCH -- not PPL format
Tue 04 Aug | Pull A | No session | MISSED
Wed 05 Aug | Legs A | Full Body B (INFERRED: Mixed) | MISMATCH -- not PPL format
Thu 06 Aug | Push B | No session | MISSED
Fri 07 Aug | Pull B | No session | MISSED
Sat 08 Aug | Legs B | No session | MISSED

Adherence: 0% PPL-type match (0 of 2 done sessions followed PPL format)
33% attendance (2 of 6 scheduled sessions completed)
NOTE: Titles contain no PPL keyword; both sessions are Full Body format.
Mon 03 Aug exercises: Squat (Legs), Bench Press (Push), Pull Up (Pull),
Lateral Raise (Push) -- inferred Mixed. Expected day: Push A.
Wed 05 Aug exercises: Romanian Deadlift (Back/Legs), OHP (Push),
Leg Extension (Legs), Bicep Curl (Pull), Triceps Pushdown (Push) --
inferred Mixed. Expected day: Legs A.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 Legs-day session -- MISSING on Wed 05 Aug

(Wednesday = Legs A day; RDL and Leg Extension logged but no Hip Thrust)
Core stabiliser (all sessions): 0 of 2 sessions -- MISSING
(No Dead Bug, Bird-Dog, or Plank in either session -- mandatory for T8-T12)
Rear delt work in Pull sessions: N/A -- 0 dedicated Pull sessions this week
(0 rear delt sets total this week vs 8-set target -- critically short)
Sessions over 60 min: Mon 03 Aug -- 82 min (22 min over 60-min limit)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps (Mon 03 Aug, 3 working sets)
Prior 7 days (Jul 27-Aug 2): 0 sessions -- no data
Last prior occurrence: 10kg x 14 reps (Mon 13 Jul, 3 weeks prior)
Trend: SAME -- weight and reps unchanged across 3+ weeks; V-taper KPI stagnant

7. KEY INSIGHTS

RECOVERY AT 44

The two sessions this week -- Mon 03 Aug at 08:25 and Wed 05 Aug at 08:54 -- were exactly 48 hours apart. This clears the mandatory floor but nothing more. Critically, both sessions trained the same muscle groups: Bench Press (Mon) and Overhead Press (Wed) hit chest and shoulders with exactly 48h gap; Squat (Mon) and Romanian Deadlift plus Leg Extension (Wed) hit quads and hamstrings with the same 48h window. At 44, connective tissue and central nervous system recovery lag well behind muscle recovery. Hitting the 48h minimum repeatedly with overlapping muscle groups -- rather than spacing them across a proper Push/Pull/Legs split -- accumulates joint fatigue faster than the 6-day PPL design was intended to allow.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 11 of a programme that started on 2026-05-24. Attendance this week is 33% (2 of 6 sessions), and PPL-type adherence is 0% -- both sessions used Full Body format, not the designated Push/Pull/Legs split. Missed days: Tuesday (Pull A), Thursday (Push B), Friday (Pull B), Saturday (Legs B). The consistent pattern is sessions only on Monday and Wednesday -- the front half of the week only. Eleven weeks in, the PPL split has not been adopted. This is the most significant structural issue in the log.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate: 0 of 1 Legs-day session this week (APT uncorrected).
Rear delt sets: 0 of the 8-set weekly target -- the most acute safety risk.
At 44, when the anterior deltoid (trained by Bench Press, OHP, and Machine Press) becomes significantly stronger than the posterior deltoid and external rotators, the humeral head migrates forward in the glenoid socket under load. Over time this erodes the supraspinatus tendon and leads to impingement or partial tears -- injuries common in men over 40 that can take 6-12 months to resolve and require complete deload. Rear Delt Reverse Fly was logged in

the Jul 10 and Jul 17 sessions but has been absent since. Core stabiliser (Dead Bug or Bird-Dog) logged in 0 of 2 sessions this week; lower thoracic kyphosis T8-T12 correction requires this every session.

LATERAL RAISE TREND -- V-TAPER KPI

Lateral Raise weight is flat at 10kg x 14 reps for at least 3 weeks (last logged Jul 13, identical weight and reps this week Aug 3). The V-taper deficit is specifically driven by love handles sitting at lat-width level, collapsing the shoulder-to-waist visual ratio. Shoulder width gains require progressing Lateral Raise weight -- stagnation here means zero visual progress on the recomposition goal's most visible metric even if fat loss is occurring. The target next session is to break 10kg: attempt 11.25kg and target 12 reps.

HARD FLAGS

1. Bench Press rep collapse: opened 40kg x 10 (set 1), escalated to 60kg and dropped to 6 reps on set 3 -- a 40% rep reduction. Load management is erratic; the pyramid approach within a single session is adding fatigue to already-fatigued tissue.
2. OHP severe collapse: 40kg x 10 (manageable, set 1), jumped to 45kg and fell to 5 then 4 reps (sets 2-3). A 5kg jump for a 10-rep set is too large; correct step is 2.5kg.
3. Pull Up logged as 0kg -- bodyweight not entered. Creates a blind spot in volume tracking; log bodyweight (87kg) as the working weight.
4. Monday session ran 82 minutes -- 22 minutes over the 60-min cap. Sessions this long at 44 elevate cortisol output without proportional hypertrophy stimulus; past 60 min the law of diminishing returns accelerates.
5. No Hip Thrust on a Legs-day Wednesday, and no core stabilisers in either session -- both mandatory correctives missed in the same week.
6. Deload is overdue: Section 6 identifies Week 11 as requiring a deload (active training weeks without a break now exceed 4). Rep collapses in Bench, OHP, and Leg Extension all in one week are a reliable fatigue signal, not a technique problem.

OVERALL VERDICT: HOLDING

Two sessions completed vs zero last week -- attendance improved from zero, but every other metric is declining: strength shows multi-exercise rep collapses, the PPL split remains unadopted at Week 11, corrective compliance stayed at zero, and the V-taper KPI has not moved in three weeks. The deload is not optional next week.

8. PLAN FOR NEXT WEEK

Programme week: W12 of PPL x2 -- DELOAD WEEK

Deload protocol: 2 working sets per exercise. Apply progression or regression rule first to get the correct weight, then cut to 2 sets. Do not attempt to add sets because it "feels easy" -- the recovery value is in reduced volume,

not reduced intensity.

MONDAY -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 57kg

[rep collapse flagged -- 5% drop: 60kg x 0.95 = 57kg]

Incline Chest Press (Machine) 2 x 10 @ 30kg

[last Jul 18: 30kg x 11, hit -- +1.25kg rounds back to 30kg available]

Lateral Raise (Dumbbell) 2 x 14 @ 10kg [V-TAPER KPI]

[attempt 11.25kg if available; if rep target 12 is hit, progress is made]

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 3 x 10 each side -- do not skip

Focus: Keep total session under 60 min. No pyramid loading -- pick one weight and use it for both working sets.

TUESDAY -- Pull A (Back + Biceps)

Bent Over Row (Barbell) 2 x 7 @ 72.5kg

[last Jul 17: 70kg x 7, all sets hit -- +2.5kg progression applied]

Pull Up 2 x 6 @ bodyweight

[log your actual bodyweight (87kg) as the set weight -- fix the 0kg entry]

Rear Delt Reverse Fly (DB) 2 x 12 @ 11.25kg [mandatory rear delt]

[last Jul 17: 10kg x 13, hit -- +1.25kg; this rebuilds the posterior deltoid imbalance; do not swap or skip this exercise]

Bicep Curl (Dumbbell) 2 x 10 @ 10kg

Dead Bug 3 x 10 each side -- do not skip

Focus: Rear Delt Fly is the non-negotiable exercise on this day. Take 90s rest between sets -- do not rush the posterior work.

WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes)

Hip Thrust (Barbell) 2 x 10 @ 60kg [MANDATORY -- APT correction]

[no prior log in 30 days -- conservative start; perform this FIRST after warm-up to ensure glute activation, not hip flexor compensation]

Squat (Barbell) 2 x 6 @ 60kg

[last Aug 3: 60kg x 6, no collapse -- hold weight for deload]

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

[last Aug 5: 75kg x 8, SAME -- hold weight for deload]

Leg Extension (Machine) 2 x 12 @ 66.5kg

[rep collapse flagged -- 5% drop: 70kg x 0.95 = 66.5kg]

Bird-Dog 3 x 10 each side -- do not skip

Focus: Hip Thrust is the primary corrective for anterior pelvic tilt.

Missing it again is not acceptable.

THURSDAY -- Push B (Shoulders + Chest variation + Triceps)

Seated Shoulder Press (Machine) 2 x 7 @ 92.5kg

[last Jul 18: 90kg x 8, all sets hit -- +2.5kg]

Overhead Press (Barbell) 2 x 10 @ 38kg

[rep collapse flagged (10->4) -- 5% drop: 40kg x 0.95 = 38kg; do not jump weight mid-session; one weight, two sets]

Lateral Raise (Dumbbell) 2 x 14 @ 10kg [V-TAPER KPI, second dose]

Chest Fly (Machine) 2 x 10 @ 65kg
[last Jul 18: 65kg x 10, all sets hit -- +1.25kg rounds to 65kg]
Dead Bug 3 x 10 each side -- do not skip
Focus: OHP at 38kg will feel light -- that is intentional. Resist the urge to add weight. Deload week repairs the connective tissue, not the ego.

FRIDAY -- Pull B (Back + Rear Delts + Biceps)
Deadlift (Barbell) 2 x 7 @ 80kg
[last Jul 17: 80kg x 7, all sets hit -- deload holds progression for W13]
Shrug (Barbell) 2 x 12 @ 70kg
[last Jul 17: 70kg x 12 first set, 11 on sets 2-3 -- hold weight deload]
Rear Delt Reverse Fly (DB) 2 x 12 @ 11.25kg [mandatory -- face pull or rear delt fly required every Pull B; this is the rotator cuff safety work; cumulative rear delt sets for the week after Friday: 4 sets]
Bicep Curl (Dumbbell) 2 x 10 @ 10kg
Bird-Dog 3 x 10 each side -- do not skip
Focus: Rear delt cumulative count after Friday will be 4 sets (Tuesday 2 + Friday 2). That is still 4 short of the 8-set weekly target;
Saturdays Legs B can add 2 more via face pulls.

SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg)
Hip Thrust (Barbell) 2 x 10 @ 60kg [MANDATORY]
Romanian Deadlift (Barbell) 2 x 8 @ 75kg
Leg Extension (Machine) 2 x 12 @ 66.5kg
Bulgarian Split Squat (DB) 2 x 10 each leg @ 12.5kg
[no prior log -- conservative start for single-leg requirement;
Rack Pull will be introduced at W13 after full deload recovery]
Bird-Dog 3 x 10 each side -- do not skip
Focus: Complete all 6 sessions this week. The Monday/Wednesday-only pattern ends here. Saturday Legs B is the proof point.

+-----+
| Deload : needed this week -- next due Week 16, ~07 Sep 2026 |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
+-----+
