

30-Day Analysis Report

This week : 31 Aug to 07 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-06

WEEKLY TRAINING REPORT

Generated : 2026-09-07 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 31 Aug to 07 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Deadlift (Barbell) -- 75kg x 8 reps (e1RM 95.0kg)

Biggest concern: Legs -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 77% (3,220 vs 13,704 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min

Type : Full Body C -- Friday

Volume : 3,220 kg*reps | 8 sets

Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM

Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM

4-WEEK VOLUME TREND

Wk -3 (10 Aug-17 Aug): [#####.] 13,059 kg*reps 3 sess

Wk -2 (17 Aug-24 Aug): [#####.....] 5,056 kg*reps 1 sess

Wk -1 (24 Aug-31 Aug): [#####] 13,704 kg*reps 3 sess

This wk (31 Aug-07 Sep): [#####.....] 3,220 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : SAME as 28 Aug

Next session : 70kg x 8 reps

[C] Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : First time in 30-day log

Next session : 75kg x 8 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 14 Aug

Next session : 10kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		5		14		9		CRITICAL
Shoulders		0		10		10		CRITICAL
Traps		2		6		4		CRITICAL
Rear Delts		3		8		5		CRITICAL
Biceps		0		8		8		CRITICAL
Triceps		0		8		8		CRITICAL
Legs		0		14		14		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 0 | Pull sets: 10 | Ratio pull:push = 0.00 (LOW -- add more pulling work)

Rear delts: 3 sets this week (need 8+/-week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 2 sets this week (need 6+/-week)

SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target

Wk -3 (10 Aug-17 Aug): 3 sessions

Wk -2 (17 Aug-24 Aug): 1 sessions

Wk -1 (24 Aug-31 Aug): 3 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day,

you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	5	10	AT RISK
Shoulders	0	8	AT RISK
Traps	2	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	0	6	AT RISK
Triceps	0	6	AT RISK
Legs	0	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 9
Weeks since last deload : 9 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W15 (started 2026-05-24; 105 days elapsed = 15 weeks)

Sessions this week (31 Aug - 06 Sep): 1 of 6 target

NOTE: All sessions in the 30-day log carry "Full Body A/B/C" titles --
no session yet uses a PPL title (Push A / Pull A etc.). Every detection
below is therefore INFERRED from exercise content.

Day | Expected | Detected | Status
* +-----+-----+-----

Mon 31 Aug | Push A | (no session logged) | MISSED
Tue 01 Sep | Pull A | (no session logged) | MISSED
Wed 02 Sep | Legs A | (no session logged) | MISSED
Thu 03 Sep | Push B | (no session logged) | MISSED
Fri 04 Sep | Pull B | INFERRED Pull B | OK (inferred: Row +
| | [Full Body C] | Deadlift + Rear Delt Fly)
Sat 05 Sep | Legs B | (no session logged) | MISSED
Sun 06 Sep | REST | -- | OK (rest day)

Adherence: 17% (1 of 6 target sessions on correct day/type)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 legs sessions this week --
 NO LEGS SESSION LOGGED. APT unaddressed.

Core stabiliser (all sessions): 0 of 1 sessions -- Dead Bug / Bird-Dog
 absent from Sep 04 session. T8-T12
 kyphosis corrective MISSED.

Rear delt work in Pull sessions: 1 of 1 pull sessions -- Rear Delt
 Reverse Fly (Dumbbell) 10kg x 12 x 3.
 Only 3 sets vs 8-set weekly target.

Sessions over 60 min: CRITICAL -- Sep 04 session logged at 251 min
 (4h 11min vs 60-min target).

LATERAL RAISE (V-TAPER KPI):

This week : none logged (0 sets in Sep 04 session)
 Prior week: 10kg x 15 reps (Mon 24 Aug, Session 5 -- best set)
 Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44 (48h minimum between same-muscle sessions):
 Only 1 session this week (Sep 04), so no same-muscle overlap to flag in
 W15. Looking back at W14 (Aug 24-30): legs were trained on Mon Aug 24
 (Squat) and the next session on Wed Aug 26 included Seated Leg Curl and
 Leg Extension -- a 48-hour gap exactly. This meets the minimum but leaves
 zero buffer. Any gym delay would breach it. Back sessions: Aug 24 (Pull Up)
 to Aug 28 (Bent Over Row) = 96 hours, cleared comfortably. Aug 28 (Row)
 to Sep 04 (Row + Deadlift) = 163 hours, fully recovered. No violations in
 the logged period, but the Mon-to-Wed leg window is the tightest pair to
 watch as volume increases toward the PPL target.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 15 of the programme (started 2026-05-24). Adherence this week
 is 17% -- 1 session of the 6-session PPL target. The preceding 3 weeks ran
 at 3, 1, 3 sessions respectively; this week ties the second-worst mark.
 More telling: none of the 8 sessions in the 30-day log carry a PPL title.
 Every session is labelled "Full Body A/B/C", indicating the PPL x2 split
 has not yet been adopted in Hevy. After 15 weeks the programme structure
 still isn't reflected in the workout logs. The missed days this week skew
 heavily toward the beginning of the week (Mon-Thu all absent), with the
 single session falling on Friday. This is a recurring pattern -- the
 second half of the week consistently produces more sessions than the first.

CORRECTIVE COMPLIANCE:

Hip thrust hit rate: 0 of 0 legs sessions this week. Looking across the full 30-day log, no hip thrust appears in any session. In 8 sessions and 101 sets over 30 days, the single most important APT corrective has never been logged. Anterior pelvic tilt loads the lower lumbar discs unevenly; at 87 kg and age 44, leaving this unaddressed while squatting and deadlifting progressively heavier loads is a disc injury risk, not an inconvenience. Rear delt sets this week: 3 sets vs the 8-set weekly target. When pressing muscles (front deltoid, pec minor) consistently accumulate far more volume than the rear delts, the humeral head is pulled forward in the socket. At 44, this imbalance narrows the subacromial space and raises impingement risk on every overhead movement. Three sets in one session is not 8 sets across the week. Core stabiliser (Dead Bug / Bird-Dog) appears in 0 of 1 sessions this week and, scanning the full log, in 0 of 8 sessions total. The thoracic kyphosis corrective has never been performed.

LATERAL RAISE TREND (V-TAPER KPI):

Prior week best: 10 kg x 15 reps (Mon 24 Aug). This week: zero sets logged. Trend: DOWN. Ganesh's love handles sit at approximately lat-width level, meaning the visual waist-to-shoulder ratio depends almost entirely on shoulder cap width, not waist narrowing. Lateral raise weight progression is the one number that expands that cap. A week of zero sets means zero adaptation signal to the side delts -- the V-taper KPI moved backward.

HARD FLAGS:

1. Sep 04 session duration: 251 minutes (4 h 11 min vs 60-min target). A session four times the recommended length elevates cortisol markedly and signals either extremely long rest periods or unlogged downtime. Either way, the hormonal cost undermines the recomp goal.
2. Session 7 (Aug 28): Rear Delt Reverse Fly Sets 2 and 3 logged as 0 kg. This is a data error -- 0 kg on a dumbbell exercise is meaningless. Check and correct the Hevy entry; if these sets were genuinely performed with no weight, they provide no stimulus and should not count toward weekly volume.
3. No hip thrust in any session in the 30-day log. This is not a compliance gap for one week -- it is a corrective exercise that has never been loaded. APT risk is accumulating with each squat and deadlift session.
4. No Dead Bug or Bird-Dog in any session in the 30-day log. T8-T12 kyphosis correction has never been attempted in the logged period.
5. Deload overdue: the script reports 9 active training weeks without a scheduled deload. W15 with only 1 session (8 sets) functions as an unintentional near-rest week, but connective tissue recovery requires deliberate reduced load, not just missed sessions.

OVERALL VERDICT: DECLINING.

Volume is down 77% week-on-week (3,220 vs 13,704 kg*reps). Adherence hit

17%, the worst week in the tracked period. Every muscle group is below the minimum stimulus threshold for retention during a caloric deficit. The two mandatory correctives (hip thrust, core stabiliser) have never been logged. The V-taper KPI moved backward. W15 must be treated as the scheduled deload and W16 must restart the full PPL x2 structure with correct titles in Hevy.

8. PLAN FOR NEXT WEEK

Programme week: W16 (Week 16 of PPL x2, post-deload restart)

NOTE: W15 effectively served as an unplanned deload (1 session, 8 sets, all muscle groups below minimum stimulus). W16 restarts at full working volume. Rename sessions in Hevy to PPL titles from this week onward.

MONDAY 07 SEP -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 3 x 8 @ 62.5 kg
(progression: 60 kg x 8 confirmed all 3 sets W14; +2.5 kg)
Overhead Press (Barbell) 3 x 8 @ 45 kg
(hold: hitting 45 x 7 consistently; push for 8th rep each set)
Lateral Raise (Dumbbell) 3 x 12 @ 11.25 kg
(progression: 10 kg x 15 all 3 sets W14; +1.25 kg)
Triceps Pushdown 3 x 12 @ 28.5 kg
(progression: 27.2 kg x 11 all 3 sets W14; +1.25 kg rounded)
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

FOCUS: Lateral raise is the V-taper KPI -- protect it from time overruns. If short on time, cut a bench set, not the lateral raise.

TUESDAY 08 SEP -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 3 x 8 @ 72.5 kg
(progression: 70 kg x 8 all 3 sets W14/W15; +2.5 kg)
Lat Pulldown (Machine) 3 x 8 @ 66 kg
(build: prior log shows only 2 sets; target 3 full working sets)
Bicep Curl (Barbell) 3 x 10 @ 21.25 kg
(progression: 20 kg x 10 in W14 Session 6 Set 3; +1.25 kg)
Rear Delt Reverse Fly 3 x 12 @ 10 kg
(mandatory rear delt minimum; confirm weight loaded before starting)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12)

FOCUS: Get the third set of Lat Pulldown at 66 kg -- this has been cut to 2 sets in all prior Pull sessions.

WEDNESDAY 09 SEP -- Legs A (Quads + Hamstrings + Glutes)

HIP THRUST MANDATORY (APT correction)
Squat (Barbell) 4 x 6 @ 72.5 kg
(progression: 70 kg x 6 all 4 sets W14; +2.5 kg)
Hip Thrust (Barbell) 3 x 10 @ 40 kg -- MANDATORY
(first logged session; conservative load, focus on glute squeeze)
Leg Extension (Machine) 3 x 10 @ 77 kg
(hold: rep instability at 77 kg in W14; hit 10 clean reps before progressing)

Seated Leg Curl (Machine) 3 x 10 @ 43 kg
(hold: 43 kg x 9 was W14 best; push for 10th rep each set)
Dead Bug 3 x 10 -- do not skip

FOCUS: Hip Thrust has never appeared in the log. If time is short, cut one leg extension set -- never the hip thrust. Set timer to stay inside 60 min.

THURSDAY 10 SEP -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 8 @ 45 kg
(Push B primary; same target as Monday -- see if fatigue affects reps on the second shoulder session of the week)
Lateral Raise (Dumbbell) 3 x 12 @ 11.25 kg
(second lateral raise session; doubles weekly V-taper KPI volume)
Incline Dumbbell Press 3 x 10 @ 20 kg each arm
(chest variation; no prior PPL log -- conservative start weight)
Triceps Pushdown 3 x 12 @ 28.5 kg
Dead Bug 3 x 10 -- do not skip

FOCUS: If OHP reps drop below 6 due to Mon soreness, reduce weight 5% to 42.5 kg rather than grinding poor form.

FRIDAY 11 SEP -- Pull B (Back + Rear Delts + Biceps)

FACE PULL or REAR DELT FLY MANDATORY
Bent Over Row (Barbell) 3 x 8 @ 72.5 kg
Lat Pulldown (Machine) 3 x 8 @ 66 kg
Rear Delt Reverse Fly 3 x 12 @ 10 kg -- MANDATORY
(ensure weight is loaded; 0 kg sets logged on Aug 28 are invalid)
Bicep Curl (Barbell) 3 x 10 @ 21.25 kg
Bird-Dog 3 x 10 each side -- do not skip

FOCUS: Rear delt total for the week needs to reach 8 sets across Tue + Fri. Three sets each day = 6; add a 4th set on Friday if time allows to close the gap.

SATURDAY 12 SEP -- Legs B (Glutes + Hamstrings + Single-Leg + Rack Pull)

HIP THRUST MANDATORY (APT correction)
Hip Thrust (Barbell) 3 x 10 @ 40 kg -- MANDATORY
(second Legs session; same conservative load as Wednesday)
Deadlift (Barbell) 3 x 8 @ 75 kg
(hold weight: first logged session Sep 04; build from 2 to 3 sets)
Leg Press (Machine) 3 x 12 @ 52.5 kg
(progression: 50 kg x 12 all 3 sets W14; +2.5 kg)
Seated Leg Curl (Machine) 3 x 10 @ 43 kg
Dead Bug 3 x 10 -- do not skip

FOCUS: Deadlift is new to the weekly rotation. Stop immediately if lower back rounds -- 75 kg x 3 x 8 requires solid brace and hinge. Use a belt if available.

+-----+

Deload	: not yet -- next due Week 19, ~28 Sep 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	

| Nutrition: 2,367 kcal/day | 174g protein minimum |

+-----+
