

This Week's Training Summary

08 Aug – 14 Aug 2026 · Generated 15 Aug 2026 · Week 12 of PPL x2

HOW THIS WEEK WENT

3 of 6 planned sessions completed (50%) — and none followed the PPL x2 split. All 3 were logged as Full Body A/B/C. Tuesday Pull A, Thursday Push B, and Saturday Legs B were missed entirely. This is Week 12 and the PPL structure has not been established yet.

✗ CRITICAL

Squat jumped to 70kg x 6 (e1RM 84kg), up +12kg e1RM from the previous logged session — the biggest strength win of the week. Volume was up 46% vs last week (13,059 vs 8,973 kg·reps). OHP and Leg Extension both regressed slightly, likely from 5 consecutive training weeks without a deload.

⚠ LOW

Lateral Raise (V-taper KPI): 10kg x 14 reps — identical to last week. Trend: FLAT for 2 consecutive weeks. Love handles sit at lat-width level, so shoulder width is the only lever for the visual taper. Stagnant lateral raises mean a stagnant V-taper. Next target: 15+ reps at 10kg before jumping to 11.25kg.

⚠ LOW

Three corrective foundations completely absent: Hip Thrust not logged in any session this month (mandatory for APT correction — 0 of 0 Legs sessions), Dead Bug / Bird-Dog absent from all 3 sessions this week (0 of 3 for T8-T12 kyphosis), and only 3 rear-delt sets vs the 8-set weekly target. Rear delt deficit raises rotator cuff impingement risk at 44.

✗ CRITICAL

DO THIS NEXT WEEK (W13 — DELOAD)

Monday Push A: Switch from Full Body to PPL now. Bench Press 2x6@60kg, OHP 2x7@45kg, Lateral Raise 2x14@10kg — aim for 15 reps this session; if you hit 15 clean reps on both sets, you earn the jump to 11.25kg next week. 2 sets only (deload week W13).

Wednesday Legs A — log Hip Thrust: Hip Thrust has not appeared in any session in 30 days. Set up the barbell pad before the squat. Do 2x10@60kg (conservative start). This single exercise corrects anterior pelvic tilt — without it, every squat and deadlift loads L4-L5 in a compromised position. Do not skip.

Friday Pull B — rear delts and traps: Do Rear Delt Reverse Fly 3x13@10kg (mandatory — hinge to 45°, elbows wide, no swinging) and add Shrug

2x12@70kg. Traps have had 0 sets this week vs a 6-set weekly target. This session fixes two critical gaps at once. Add Dead Bug 3x10 at the end of every session this week — no exceptions.
