

30-Day Analysis Report

This week : 09 Aug to 16 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-15

WEEKLY TRAINING REPORT

Generated : 2026-08-16 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 09 Aug to 16 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 3, 0, 2 sessions (avg 1.7)
Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)
Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)
vs last week : Volume UP 46% (13,059 vs 8,973 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 10 Aug 2026 08:59 IST | 42 min
Type : Full Body A -- Monday
Volume : 2,980 kg*reps | 13 sets
Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: +12.0kg e1RM
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: +0.0kg e1RM
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM
Session 2: Wednesday 12 Aug 2026 09:09 IST | 65 min
Type : Full Body B -- Wednesday
Volume : 5,627 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +2.2kg e1RM
Lying Leg Curl (Machine): 36kg x 10r x 3 sets (e1RM 48.0kg)
Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: +2.1kg e1RM
Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg)
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM
Session 3: Friday 14 Aug 2026 08:49 IST | 54 min
Type : Full Body C -- Friday
Volume : 4,452 kg*reps | 11 sets
Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg) vs prior: +0.0kg e1RM
Leg Press (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg)
Lat Pulldown (Machine): 66kg x 6r x 2 sets (e1RM 79.2kg)
Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 3 sets (e1RM 14.3kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (19 Jul-26 Jul): [#####] 15,180 kg*reps 3 sess
Wk -2 (26 Jul-02 Aug): [.....] 0 kg*reps 0 sess
Wk -1 (02 Aug-09 Aug): [#####.....] 8,973 kg*reps 2 sess

This wk (09 Aug-16 Aug): [#####...] 13,059 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : SAME as 03 Aug

Next session : 60kg x 6 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : SAME as 17 Jul

Next session : 70kg x 7 reps

[C] Lat Pulldown (Machine)

Best this week : 66kg x 6 reps (e1RM 79.2kg)

vs prior : First time in 30-day log

Next session : 66kg x 6 reps

[C] Leg Press (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : First time in 30-day log

Next session : 50kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)

vs prior : UP +2.2kg vs 05 Aug

Next session : 47.5kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 6 reps (e1RM 84.0kg)

vs prior : UP +12.0kg vs 03 Aug

Next session : 72.5kg x 6 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)

vs prior : First time in 30-day log

Next session : 20kg x 9 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 03 Aug

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 9 reps (e1RM 100.1kg)
 vs prior : UP +2.1kg vs 05 Aug
 Next session : 78.25kg x 9 reps

[I] Lying Leg Curl (Machine)

Best this week : 36kg x 10 reps (e1RM 48.0kg)
 vs prior : First time in 30-day log
 Next session : 36kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 13 reps (e1RM 14.3kg)
 vs prior : SAME as 17 Jul
 Next session : 10kg x 13 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 05 Aug
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest	3	12	9	CRITICAL
Back	8	14	6	CRITICAL
Shoulders	6	10	4	CRITICAL
Traps	0	6	6	CRITICAL
Rear Delts	3	8	5	CRITICAL
Biceps	6	8	2	LOW
Triceps	3	8	5	CRITICAL
Legs	13	14	1	LOW
Core	0	6	6	CRITICAL

Push sets: 12 | Pull sets: 17 | Ratio pull:push = 1.42 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
 Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (19 Jul-26 Jul): 3 sessions

Wk -2 (26 Jul-02 Aug): 0 sessions

Wk -1 (02 Aug-09 Aug): 2 sessions

Time between sessions this week:

Mon 10 Aug 08:59 -> Wed 12 Aug 09:09: 48h

Wed 12 Aug 09:09 -> Fri 14 Aug 08:49: 48h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Wed 12 Aug + Fri 14 Aug (48h apart): overlap = legs, other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	8	10	AT RISK
Shoulders	6	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	13	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 5

Weeks since last deload : 5 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W12 (started 2026-05-24; 84 days elapsed = 12 complete weeks)

Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+-----+			
Sun 09 Aug	REST	No session	OK (Rest day)
Mon 10 Aug	Push A	Full Body A (INFERRED)	MISMATCH -- mixed push/pull/legs
Tue 11 Aug	Pull A	No session	MISSED
Wed 12 Aug	Legs A	Full Body B (INFERRED)	MISMATCH -- mixed push/legs/pull
Thu 13 Aug	Push B	No session	MISSED
Fri 14 Aug	Pull B	Full Body C (INFERRED: Pull)	PARTIAL -- pull-dominant; leg press included
Sat 15 Aug	Legs B	No session	MISSED

Adherence: 33% (1 of 3 sessions matched correct session type on correct day)

INFERRED type logic:

Mon Full Body A : Squat + Bench Press + Pull Up + Lateral Raise = mixed push/pull/legs

Wed Full Body B : OHP + Leg Extension + Leg Curl + Bicep Curl + Triceps Pushdown = mixed

Fri Full Body C : Bent Over Row + Leg Press + Lat Pulldown + Rear Delt Fly = pull-dominant

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions per PPL --

3 sessions contained embedded leg work (Squat, Leg Ext/Curl, Leg Press) but

Hip Thrust absent in ALL of them -- MISSING all week (APT correction skipped)

Core stabiliser (all sessions): 0 of 3 sessions -- Dead Bug / Bird-Dog / Plank

absent throughout; Back Extension logged as warmup only (0 working sets)

Rear delt work in Pull sessions: 1 of 1 pull-type session (Fri 14 Aug --

Rear Delt Reverse Fly x3 sets -- OK per session, but only 3 sets total vs 8 target)

Sessions over 60 min: Wed 12 Aug -- 65 min (5 min over the 60-min cap)

LATERAL RAISE (V-TAPER KPI):

This week: 10kg x 14 reps | Prior week: 10kg x 14 reps | Trend: SAME

7. KEY INSIGHTS

Recovery at 44: Two back-to-back session pairs this week. Mon 10 Aug (08:59) to Wed 12 Aug (09:09) = 48h 10 min -- comfortably clears the 48h minimum. Wed 12 Aug (09:09) to Fri 14 Aug (08:49) = 47h 40 min -- 20 minutes short of the 48h floor, with legs as the overlapping muscle group (Leg Extension + Leg Curl on Wed, Leg Press on Fri). At 44, connective tissue and fascia recover more slowly than muscle fibres; a repeated 20-minute shortfall accumulates as knee and lower back fatigue over weeks. The Wed-Fri pair is the offender this cycle.

PPL adherence and programme age: This is W12 of the 6-day PPL x2 programme, which started 24 May 2026. Not a single session this week carried a PPL split title -- all three were logged as "Full Body A/B/C." Only Friday's pull-dominant

Full Body C partially matched the expected Pull B structure, giving an adherence rate of 33% (1 of 3). The pattern of skipped days is consistent: Tuesday (Pull A), Thursday (Push B), and Saturday (Legs B) have been missed repeatedly, indicating Ganesh is running a Mon/Wed/Fri full-body template rather than the prescribed 6-day split. At W12, this is a structural drift, not a scheduling anomaly. Note: the script shows "5 sessions target" and "50% session rate" -- the correct target is 6 sessions/week, making the completion rate 50% (3 of 6), unchanged.

Corrective compliance: Hip Thrust is mandatory in every Legs session to address anterior pelvic tilt (APT). It was absent from all three sessions this week, including each that contained embedded leg exercises. When APT is uncorrected, the lumbar spine holds a sustained anterior lean -- at 44 this manifests as chronic facet joint compression during barbell squats and rows, the exact exercises Ganesh is loading heaviest. Core stabilisers (Dead Bug / Bird-Dog for T8-T12 kyphosis correction) also scored 0 of 3 sessions; Back Extension appears in the log only as warmup sets with 0 working sets. Rear delts reached only 3 sets this week against the 8-set weekly target. At 44, if the anterior deltoid and pectorals remain materially stronger than the posterior rotator cuff complex, the humeral head migrates forward in the glenoid socket over time. The clinical outcome -- rotator cuff impingement -- typically presents as pain in the 80-120 degree shoulder abduction arc. Three rear-delt sets per week is inadequate protection at this imbalance level.

Lateral Raise trend: The V-taper KPI is flat for at least two consecutive weeks. Lateral Raise has held at 10kg x 14 reps since at least 03 Aug (confirmed in log). For Ganesh specifically, the visual problem is that his love handles currently sit at the same horizontal width as his lats, nullifying the V-taper silhouette from the front. Widening shoulder capping through progressive lateral raise load is the fastest available intervention for this. A weight stuck at 10kg for two weeks must move to 12kg at the next session -- the reps support it (14 reps at 10kg signals the set is too easy).

Hard flags:

1. Wed 12 Aug: 65 min session duration -- 5 min over the 60-min cap.
2. Wed 12 Aug to Fri 14 Aug: 47h 40 min gap with legs overlap -- 20 min short of 48h.
3. No Hip Thrust in any session -- mandatory APT corrective absent all week.
4. No Dead Bug or Bird-Dog in any session -- kyphosis corrective absent all week.
5. Pull Up logged as 0kg -- bodyweight not entered; exercise volume untracked.
6. 3 of 6 sessions completed -- 50% session rate at W12 of the programme.

Overall verdict: Volume rose 46% week-on-week (13,059 vs 8,973 kg*reps) and the Monday squat jumped 12kg in e1RM (72 to 84kg). These are genuine positives. But programme structure, PPL split adoption, and all three corrective markers remain in the same failed state they have been for multiple weeks. Three sessions instead of six, no PPL titles, no hip thrusts, no core stabilisers, flat lateral raise.

The volume uptick is welcome but does not compensate for structural deficits at W12.

Overall verdict: HOLDING

8. PLAN FOR NEXT WEEK

Programme week: W13 (Week 13 of PPL x2) -- DELOAD WEEK

(5 training weeks logged since last deload; cut all working sets to 2 per exercise, apply the planned weight increment where due so the load is set for W14 full training)

MONDAY AUG 17 -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 sets x 6 @ 62.5kg
 Overhead Press (Barbell) 2 sets x 6 @ 47.5kg
 Lateral Raise (Dumbbell) 2 sets x 12 @ 12kg [V-TAPER KPI -- up from 10kg]
 Chest Fly (Machine) 2 sets x 10 @ 65kg
 Triceps Pushdown 2 sets x 10 @ 28kg

Mandatory corrective: Dead Bug 2 x 10 -- do not skip (T8-T12 kyphosis reset)

Key focus: PPL transition week -- log this session as "Push A" in Hevy, not "Full Body."

Lateral raise moves to 12kg today; this is overdue.

TUESDAY AUG 18 -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 sets x 7 @ 70kg
 Lat Pulldown (Machine) 2 sets x 8 @ 66kg
 Pull Up (Bodyweight) 2 sets x 6 @ BW [log bodyweight ~87kg in Hevy]
 Bicep Curl (Barbell) 2 sets x 9 @ 20kg

Mandatory corrective: Bird-Dog 2 x 10 each side -- do not skip

Key focus: Enter bodyweight alongside the 0kg Hevy field for Pull Up so volume is tracked. Full dead-hang at the bottom; no kipping.

WEDNESDAY AUG 19 -- Legs A (Quads + Hamstrings + Glutes)

Hip Thrust (Barbell) 2 sets x 8 @ 60kg [MANDATORY -- APT correction]
 Squat (Barbell) 2 sets x 6 @ 72.5kg
 Leg Extension (Machine) 2 sets x 9 @ 78kg
 Lying Leg Curl (Machine) 2 sets x 10 @ 37.5kg

Mandatory corrective: Dead Bug 2 x 10 -- do not skip

Key focus: Hip Thrust is non-negotiable. Set up the bar before warming up so there is no excuse to skip. Full glute lockout at the top; if 60kg feels light, it should -- this is the deload entry. Session must finish inside 60 min; cut rest to 90 sec on isolation sets.

THURSDAY AUG 20 -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 2 sets x 8 @ 90kg
 Lateral Raise (Dumbbell) 2 sets x 12 @ 12kg
 Incline Chest Press (Machine) 2 sets x 11 @ 30kg
 Triceps Pushdown 2 sets x 10 @ 28kg

Mandatory corrective: Bird-Dog 2 x 10 each side -- do not skip

Key focus: Push B is shoulder-primary, not chest-primary -- start with Seated Shoulder Press. If 12kg lateral raise from Monday felt too heavy for 12 reps, use 10kg here for the deload and advance to 12kg in W14.

FRIDAY AUG 21 -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 2 sets x 7 @ 70kg
 Rear Delt Reverse Fly (Dumbbell) 2 sets x 13 @ 10kg [mandatory rear-delt work]
 Face Pull (Cable) 2 sets x 15 @ 10kg [introduce -- rear delt volume]
 Bicep Curl (Barbell) 2 sets x 9 @ 20kg

Mandatory corrective: Dead Bug 2 x 10 -- do not skip

Key focus: Face Pull is new this session. Use a light weight and squeeze the rear delts at full external rotation. Combined with Rear Delt Fly this gives 4 rear-delt sets per Pull session; both Pull sessions together deliver 8 sets/week against the programme target. Scapular retraction drives the movement, not arm pull.

SATURDAY AUG 22 -- Legs B (Glutes + Hamstrings + Single-Leg)

- Hip Thrust (Barbell) 2 sets x 8 @ 60kg [MANDATORY -- APT correction]
- Romanian Deadlift (Barbell) 2 sets x 8 @ 77.5kg
- Leg Press (Machine) 2 sets x 12 @ 50kg
- Leg Press Single-Leg (Machine) 2 sets x 10 @ 25kg [introduce single-leg work]
- Mandatory corrective: Bird-Dog 2 x 10 each side -- do not skip

Key focus: Hip Thrust is the APT anchor for Legs B as it is for Legs A -- do not skip. Romanian Deadlift focuses on hamstring stretch at the bottom; keep the spine neutral and do not round the lower back. Single-leg press introduced at a light load to check for left-right strength discrepancy.

+-----+		
Deload	: needed this week -- next due Week 17, ~13 Sep 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
