

30-Day Analysis Report

This week : 13 Aug to 20 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-20

WEEKLY TRAINING REPORT

Generated : 2026-08-20 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 13 Aug to 20 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 0, 2, 2 sessions (avg 1.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Bent Over Row (Barbell) -- 70kg x 7 reps (e1RM 86.3kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume UP 10% (9,508 vs 8,607 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 14 Aug 2026 08:49 IST | 54 min

Type : Full Body C -- Friday

Volume : 4,452 kg*reps | 11 sets

Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg)

Leg Press (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg)

Lat Pulldown (Machine): 66kg x 6r x 2 sets (e1RM 79.2kg)

Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 3 sets (e1RM 14.3kg)

Session 2: Wednesday 19 Aug 2026 09:12 IST | 32 min

Type : Full Body B -- Wednesday

Volume : 5,056 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 36kg x 9r x 3 sets (e1RM 46.8kg) [FLAG: rep collapse 9->6]

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -30.1kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 24.9kg x 11r x 3 sets (e1RM 34.0kg) vs prior: -3.2kg e1RM

4-WEEK VOLUME TREND

Wk -3 (23 Jul-30 Jul): [.....] 0 kg*reps 0 sess

Wk -2 (30 Jul-06 Aug): [#####] 8,973 kg*reps 2 sess

Wk -1 (06 Aug-13 Aug): [#####] 8,607 kg*reps 2 sess

This wk (13 Aug-20 Aug): [#####] 9,508 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)
 vs prior : First time in 30-day log
 Next session : 70kg x 7 reps

[C] Lat Pulldown (Machine)

Best this week : 66kg x 6 reps (e1RM 79.2kg)
 vs prior : First time in 30-day log
 Next session : 66kg x 6 reps

[C] Leg Press (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)
 vs prior : First time in 30-day log
 Next session : 50kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)
 vs prior : SAME as 12 Aug
 Next session : 45kg x 7 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)
 vs prior : SAME as 12 Aug
 Next session : 20kg x 9 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)
 vs prior : DOWN -30.1kg vs 12 Aug
 Next session : 47.5kg x 12 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 13 reps (e1RM 14.3kg)
 vs prior : First time in 30-day log
 Next session : 10kg x 13 reps

[I] Seated Leg Curl (Machine)

Best this week : 36kg x 9 reps (e1RM 46.8kg)
 vs prior : First time in 30-day log
 Next session : 36kg x 9 reps
 * FLAGS: rep collapse (9->6)

[I] Triceps Pushdown

Best this week : 24.9kg x 11 reps (e1RM 34.0kg)
 vs prior : DOWN -3.2kg vs 05 Aug
 Next session : 23.65kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
* +-----+-----+-----+-----				
Chest	0	12	12	CRITICAL
Back	5	14	9	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	0	6	6	CRITICAL

Rear Delts		3		8		5		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		9		14		5		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 6 | Pull sets: 14 | Ratio pull:push = 2.33 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (23 Jul-30 Jul): 0 sessions

Wk -2 (30 Jul-06 Aug): 2 sessions

Wk -1 (06 Aug-13 Aug): 2 sessions

Time between sessions this week:

Fri 14 Aug 08:49 -> Wed 19 Aug 09:12: 120h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	5	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	3	6	AT RISK

Sessions over 60 min : None (Fri 14 Aug: 54 min OK; Wed 19 Aug: 32 min OK)

LATERAL RAISE (V-TAPER KPI):

This week : not logged (0 sets in Aug 13-19 window)
 Prior week: 10kg x 14 reps (Session 4, Mon 10 Aug)
 Trend : DOWN

7. KEY INSIGHTS

RECOVERY AT 44:

Only two sessions this week: Fri 14 Aug 08:49 IST and Wed 19 Aug 09:12 IST, separated by 120 hours -- well above the 48h minimum for same-muscle recovery. No same-muscle back-to-back risk this week. However, in the prior window, Session 4 (Full Body A, Mon 10 Aug 08:59) and Session 5 (Full Body B, Wed 12 Aug 09:09) were separated by just 48h10m -- and both included leg work (Squat on Monday, Leg Curl + Leg Extension on Wednesday). At 44, connective tissue and tendons lag muscle fibre recovery by 24-48h extra; a 72h gap between sessions sharing the same muscle group is the safer standard. The 48h10m pairing from prior week technically cleared the floor, but only barely, and repeated close pairings on legs tissue will accumulate micro-damage faster than it resolves.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 13 of the PPL x2 programme (started 2026-05-24), yet sessions continue to be logged as "Full Body A/B/C" rather than the PPL Push/Pull/Legs split. Adherence this week: 17% (1 of 6 planned training days completed with the correct session type). The session count has held at 2 per week for three consecutive weeks (Wk -2: 2, Wk -1: 2, This wk: 2), and Week -3 was 0. There is no single day of the week being systematically skipped -- Thursday, Saturday, Monday, and Tuesday were all absent this week. The failure pattern is total session frequency, not day-of-week bias. At 13 weeks in, the programme should be running on automation; the current 33% session adherence (2 of 6) means two-thirds of the planned volume is consistently missing every single week.

CORRECTIVE COMPLIANCE:

Hip Thrust: 0 of 2 sessions with leg work had a Hip Thrust this week. There is no Hip Thrust anywhere in the 30-day log. Without regular hip thrust to strengthen the glutes and counter hip-flexor tightness, anterior pelvic tilt (APT) will persist and steadily increase compressive load on the lumbar discs during squats and deadlifts. This is a non-negotiable corrective at current assessment status. Rear delt sets this week: 3 total (3 sets of Rear Delt Reverse Fly, Friday only) against the 8-per-week target -- 5 sets short. If the front deltoids consistently outproduce the rear, the humeral head anterior-tilts in the glenoid socket, narrowing the subacromial space. Over months of this imbalance at 44, overhead pressing and pulling movements begin producing impingement pain -- a condition that, once established, requires weeks of rest and physiotherapy to resolve. Core stabiliser: 0 of 2 sessions. Back Extension is

present as a warmup only with 0 working sets and does not address thoracic kyphosis at T8-T12. Dead Bug or Bird-Dog must be a working set in every session, not a warmup motion.

LATERAL RAISE TREND -- V-TAPER KPI:

Trend is DOWN. 10kg x 14 reps was logged the prior week (Mon 10 Aug); zero Lateral Raise sets were logged this week (Aug 13-19). Ganesh's love handles sit at the same horizontal level as the base of the lats, which collapses the visual V ratio from the rear and side. Wider lateral deltoid heads are the fastest lever available to improve that ratio -- broader apparent shoulder width creates the V illusion even before significant body-fat reduction shows in photos. A session where Lateral Raise is skipped is a session where the single most visible physique metric makes no progress. Every Push or Full Body session must log Lateral Raise sets.

HARD FLAGS:

- * Leg Extension collapsed from 77kg (Wed 12 Aug) to 50kg (Wed 19 Aug) -- a 30.1kg e1RM drop in exactly one week on the same machine. Either the weight was logged incorrectly or performance fell by 30%. Verify the actual weight used next session before applying the 5% drop correction -- if 77kg was the correct weight, log it again next time.
- * Seated Leg Curl: rep collapse 9->6 in Set 3 (Wed 19 Aug, 36kg). With 120h rest before this session, rep collapse on Set 3 suggests the set rest periods were too short or the session sequencing (OHP -> Leg Curl -> Leg Extension -> Bicep Curl) created cumulative fatigue with insufficient inter-set recovery. Take 2-3 min rest between all working sets.
- * Triceps Pushdown: 24.9kg this week vs 27.2kg in prior two sessions -- an 8% load drop with no injury reported. Consistent with accumulated fatigue or inadequate calorie intake on training days.
- * Core stabiliser absent across all sessions this week -- the T8-T12 kyphosis corrective protocol has not been touched at all. This is 13 weeks without consistent correction.

OVERALL VERDICT:

Volume ticked up 10% (9,508 vs 8,607 kg*reps) but session count remains at 2 for the third consecutive week, against a 6-session target. Corrective compliance (Hip Thrust, core stabiliser) is at 0% for the week. The Lateral Raise KPI dropped. Multiple isolation lifts regressed in load. Against a 6-session/week target, adherence at 33% represents sustained underperformance across all programme dimensions.

VERDICT: HOLDING -- the 10% volume bump is welcome but masks continued low frequency and complete corrective non-compliance.

8. PLAN FOR NEXT WEEK

Programme week: W14 (Week 14 of PPL x2)

*** DELOAD WEEK ***

The script reports 6 active training weeks since the last deload, against a 4-week deload cycle. Deload is overdue by 2 weeks. Note: the low session frequency (avg 1.7/week) means

absolute volume has been lower than a standard programme, but connective tissue stress from the loads used (70kg BOR, 75kg RDL, 70kg Squat) still accumulates. Deload protocol: reduce all main working sets to 2 per exercise; keep weights unchanged; corrective sets are NOT reduced. Complete all 6 sessions this week -- deload is easy enough that skipping is not an option.

MONDAY -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 sets x 6 reps @ 60kg
 Lateral Raise (Dumbbell) 2 sets x 14 reps @ 10kg [V-TAPER KPI -- log carefully]
 Overhead Press (Barbell) 2 sets x 7 reps @ 45kg
 Triceps Pushdown 2 sets x 11 reps @ 24.9kg
 Dead Bug 3 sets x 10 reps -- do not skip (T8-T12 corrective)
 Focus: Log Lateral Raise weight to the gram -- this is the V-taper benchmark for W14.

TUESDAY -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 sets x 7 reps @ 70kg
 Lat Pulldown (Machine) 2 sets x 6 reps @ 66kg
 Rear Delt Reverse Fly (DB) 2 sets x 13 reps @ 10kg
 Bicep Curl (Barbell) 2 sets x 9 reps @ 20kg
 Dead Bug 3 sets x 10 reps -- do not skip
 Focus: Rear Delt Reverse Fly must be a working set with full range, not a warmup; this contributes to the 8-set rear delt weekly target.

WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes -- Hip Thrust mandatory)

Hip Thrust (Barbell) 2 sets x 8 reps @ 60kg [MANDATORY -- APT correction]
 Squat (Barbell) 2 sets x 6 reps @ 70kg
 Leg Press (Machine) 2 sets x 12 reps @ 50kg
 Leg Extension (Machine) 2 sets x 12 reps @ 50kg [verify actual weight vs 77kg log]
 Seated Leg Curl (Machine) 2 sets x 8 reps @ 36kg (target 8 reps -- avoid collapse)
 Bird-Dog 3 sets x 10 reps per side -- do not skip
 Focus: Hip Thrust goes FIRST before fatigue -- set up the barbell for Hip Thrust before anything else so it cannot be skipped for time.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 sets x 7 reps @ 45kg
 Lateral Raise (Dumbbell) 2 sets x 14 reps @ 10kg [V-TAPER KPI]
 Incline Dumbbell Press 2 sets x 10 reps @ 20kg each (no recent log -- conservative)
 Triceps Pushdown 2 sets x 11 reps @ 24.9kg
 Dead Bug 3 sets x 10 reps -- do not skip
 Focus: Two Lateral Raise sessions this week (Mon + Thu) is the minimum to reverse the downward trend; log both carefully.

FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Face Pull / Rear Delt mandatory)

Bent Over Row (Barbell) 2 sets x 7 reps @ 70kg
 Lat Pulldown (Machine) 2 sets x 6 reps @ 66kg
 Rear Delt Reverse Fly (DB) 2 sets x 13 reps @ 10kg [MANDATORY]
 Face Pull (Cable) 2 sets x 12 reps @ light load (add this -- rear delt volume)
 Bicep Curl (Barbell) 2 sets x 9 reps @ 20kg
 Bird-Dog 3 sets x 10 reps per side -- do not skip
 Focus: Rear Delt Reverse Fly (3 sets Tue) + Rear Delt Reverse Fly (2 sets) + Face Pull

(2 sets Fri) = 7 rear delt sets this week -- close to the 8 target.

SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg -- Hip Thrust mandatory)

Hip Thrust (Barbell) 2 sets x 8 reps @ 60kg [MANDATORY -- both Legs sessions]

Romanian Deadlift (Barbell) 2 sets x 8 reps @ 75kg

Leg Press (Machine) 2 sets x 12 reps @ 50kg

Bulgarian Split Squat (DB) 2 sets x 8 reps @ 10kg each hand (conservative -- single-leg balance and hip stability, not load)

Bird-Dog 3 sets x 10 reps per side -- do not skip

Focus: Legs B is hamstring/glute dominant -- Hip Thrust before everything else.

Bulgarian Split Squat starts at bodyweight if balance is unstable.

+-----+		
Deload	: needed this week -- W14 (6 wks since last deload;	
	next deload due W18, ~21 Sep 2026)	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
