

30-Day Analysis Report

This week : 21 May to 28 May 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-05-27

WEEKLY TRAINING REPORT

Generated : 2026-05-28 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 21 May to 28 May 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 7, 5, 5 sessions (avg 5.7)
Overall score: 6/10 -- Good week -- one or two areas need attention (see below).
Biggest win : Deadlift (Trap bar) -- 95kg x 8 reps (e1RM 120.3kg)
Biggest concern: Shoulders -- 3 sets vs 10 target (7 sets short)
vs last week : Volume DOWN 55% (17,251 vs 38,431 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 25 May 2026 08:12 IST | 84 min
Type : Monday - Push A (Chest)
Volume : 5,489 kg*reps | 29 sets
Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)
Superman: 0kg x 10r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Bird Dog: 0kg x 16r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)
Band Pullaparts: 0kg x 20r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)
... and 8 more exercises

Session 2: Tuesday 26 May 2026 10:14 IST | 118 min
Type : Tuesday - Pull A (Back + Traps)
Volume : 5,840 kg*reps | 32 sets
Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)
Superman: 0kg x 10r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Bird Dog: 0kg x 16r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Dead Hang: 0kg x 0r x 2 sets (e1RM 0.0kg)
Warm Up: 0kg x 0r x 1 sets (e1RM 0.0kg)
Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)
... and 9 more exercises

Session 3: Wednesday 27 May 2026 08:37 IST | 122 min
Type : Wednesday - Legs A
Volume : 5,921 kg*reps | 36 sets
Stretching: 0kg x 0r x 1 sets (e1RM 0.0kg)
Superman: 0kg x 10r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Bird Dog: 0kg x 16r x 2 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Stretching: 0kg x 0r x 2 sets (e1RM 0.0kg)
Stretching: 0kg x 0r x 2 sets (e1RM 0.0kg)

Glute Bridge: 0kg x 20r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]
... and 11 more exercises

4-WEEK VOLUME TREND

Wk -3 (30 Apr-07 May): [#####] 54,347 kg*reps 7 sess
Wk -2 (07 May-14 May): [#####.....] 41,442 kg*reps 5 sess
Wk -1 (14 May-21 May): [#####.....] 38,431 kg*reps 5 sess
This wk (21 May-28 May): [#####.....] 17,251 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 8 reps (e1RM 50.7kg)

vs prior : First time in 30-day log

Next session : 40kg x 8 reps

[C] Deadlift (Trap bar)

Best this week : 95kg x 8 reps (e1RM 120.3kg)

vs prior : DOWN -3.2kg vs 15 May

Next session : 90.25kg x 8 reps

[C] Dumbbell Row

Best this week : 20kg x 12 reps (e1RM 28.0kg)

vs prior : First time in 30-day log

Next session : 20kg x 12 reps

[C] Incline Bench Press (Dumbbell)

Best this week : 20kg x 12 reps (e1RM 28.0kg)

vs prior : DOWN -3.5kg vs 16 May

Next session : 19.0kg x 12 reps

[C] Leg Press (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : UP +4.7kg vs 09 May

Next session : 72.5kg x 12 reps

[C] Pull Up (Weighted)

Best this week : 0kg x 8 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 8 reps

* FLAGS: 0kg logged -- check entry

[C] Single Leg Press (Machine)

Best this week : 0kg x 10 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 10 reps

* FLAGS: 0kg logged -- check entry

[I] Band Pullaparts

Best this week : 0kg x 20 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 20 reps

* FLAGS: 0kg logged -- check entry

[I] Bird Dog

Best this week : 0kg x 16 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 16 reps

* FLAGS: 0kg logged -- check entry

[I] Chest Fly (Machine)

Best this week : 45kg x 12 reps (e1RM 63.0kg)

vs prior : DOWN -8.1kg vs 16 May

Next session : 42.75kg x 12 reps

[I] Chest Supported Y Raise (Dumbbell)

Best this week : 5kg x 12 reps (e1RM 7.0kg)

vs prior : First time in 30-day log

Next session : 5kg x 12 reps

[I] Clamshell

Best this week : 0kg x 15 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 15 reps

* FLAGS: 0kg logged -- check entry

[I] Dead Bug

Best this week : 0kg x 16 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 16 reps

* FLAGS: 0kg logged -- check entry

[I] Dead Hang

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Face Pull

Best this week : 24.9kg x 15 reps (e1RM 37.3kg)

vs prior : DOWN -2.5kg vs 11 May

Next session : 23.65kg x 15 reps

[I] Glute Bridge

Best this week : 0kg x 20 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 20 reps

* FLAGS: 0kg logged -- check entry

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : DOWN -3.9kg vs 05 May

Next session : 9.5kg x 12 reps

[I] Rack Pull

Best this week : 70kg x 5 reps (e1RM 81.7kg)

vs prior : First time in 30-day log

Next session : 70kg x 5 reps

* FLAGS: weight drop (70kg->50kg)

[I] Seated Incline Curl (Dumbbell)

Best this week : 7.5kg x 10 reps (e1RM 10.0kg)

vs prior : First time in 30-day log

Next session : 7.5kg x 10 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : UP +1.4kg vs 15 May

Next session : 44.25kg x 9 reps

[I] Shrug (Smith Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : SAME as 11 May

Next session : 70kg x 12 reps

[I] Side Plank

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Stretching

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

[I] Superman

Best this week : 0kg x 10 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 10 reps

* FLAGS: 0kg logged -- check entry

[I] Triceps Rope Pushdown

Best this week : 22.7kg x 9 reps (e1RM 29.5kg)

vs prior : First time in 30-day log

Next session : 22.7kg x 9 reps

[I] Warm Up

Best this week : 0kg x 0 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 0 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		12		12		0		OK
Back		10		14		4		CRITICAL
Shoulders		3		10		7		CRITICAL

Traps		6	6	0 OK
Rear Delts		6	8	2 LOW
Biceps		5	8	3 LOW
Triceps		3	8	5 CRITICAL
Legs		9	14	5 CRITICAL
Core		3	6	3 LOW

Push sets: 18 | Pull sets: 27 | Ratio pull:push = 1.50 (OK -- balanced)

Rear delts: 6 sets this week (need 8+/week)

SHORT by 2 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 6 sets this week (need 6+/week)

OK.

Enough work this week: Chest, Traps

Short this week : Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (30 Apr-07 May): 7 sessions

Wk -2 (07 May-14 May): 5 sessions

Wk -1 (14 May-21 May): 5 sessions

Time between sessions this week:

Mon 25 May 08:12 -> Tue 26 May 10:14: 26h

Tue 26 May 10:14 -> Wed 27 May 08:37: 22h [FLAG: only 22h rest, same muscles: back, biceps, other, traps]

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Mon 25 May + Tue 26 May (26h apart): overlap = chest, other, rear_delts

Tue 26 May + Wed 27 May (22h apart): overlap = back, biceps, other, traps

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day,

you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	12	8	OK
Back	10	10	OK
Shoulders	3	8	AT RISK
Traps	6	4	OK
Rear Delts	6	6	OK
Biceps	5	6	AT RISK
Triceps	3	6	AT RISK
Legs	9	10	AT RISK
Core	3	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Shoulders, Biceps, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 1

Weeks since last deload : 1 (deload every 4 weeks)

Next deload : in 3 week(s), approx 18 Jun 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W1 (started 2026-05-24; day 3 of 7)

Sessions this week: 3 of 6 target (Thu Push B / Fri Pull B / Sat Legs B still pending)

NOTE: The script above shows '5 sessions target' and consistency capped at 5/week.

The correct programme target is 6 sessions/week (24 per 30 days). All commentary below uses 6 as the weekly target.

A. PPL ADHERENCE

Day | Expected | Detected | Status

* +-----+-----+-----

Mon 25 May | Push A | Push A | OK (title match)

Tue 26 May | Pull A | Pull A | OK (title match)

Wed 27 May | Legs A | Legs A | OK (title match)

Thu 28 May | Push B | --- | PENDING

Fri 29 May | Pull B | --- | PENDING

Sat 30 May | Legs B | --- | PENDING

Sun 31 May | REST | --- | N/A

Adherence: 100% (3 of 3 completed sessions on correct day and type)

Week incomplete -- adherence will update as Thu-Sat sessions are logged.

B. CORRECTIVE COMPLIANCE (per session this week)

Hip Thrust in Legs sessions : 0 of 1 legs sessions -- MISSING on Wed 27 May

Glute Bridge (0kg, bodyweight) was logged but Hip Thrust (Machine) was NOT.

Hip Thrust is mandatory for APT correction -- must not be substituted.

Core stabiliser (all sessions): 3 of 3 sessions -- OK

Mon 25 May Push A : Bird Dog 2x16

Tue 26 May Pull A : Bird Dog 2x16

Wed 27 May Legs A : Dead Bug 3x16 + Side Plank 3 sets

Rear delt work in Pull sessions: 1 of 1 pull sessions -- OK

Tue 26 May Pull A : Face Pull 3x15 @ 24.9kg

Sessions over 60 min: ALL 3 sessions exceeded the 60-min target

Mon 25 May Push A : 84 min (24 min over)

Tue 26 May Pull A : 118 min (58 min over -- nearly double)

Wed 27 May Legs A : 122 min (62 min over -- more than double)

C. LATERAL RAISE -- V-TAPER KPI

Last 7 days (21-27 May): best set = 10kg x 12 reps (Mon 25 May, Dumbbell)

Prior 7 days (14-20 May): best set = 12.5kg x 13 reps (Sat 16 May, Dumbbell)

Trend: DOWN (-2.5kg, -20% weight regression)

7. KEY INSIGHTS

RECOVERY AT 44

Three sessions were logged on consecutive days: Push A (Mon 25 May 08:12), Pull A (Tue 26 May 10:14), and Legs A (Wed 27 May 08:37). The Push-to-Pull gap was 26h -- rear delts appeared in both sessions (Face Pull in Push A and Pull A), meaning those fibres had only 26h before being re-loaded. The Pull-to-Legs gap was 22h -- the Trap Bar Deadlift on Wednesday directly loaded the back, traps, and biceps that had been trained on Tuesday. Both pairs fall short of the 48h minimum by 22h and 26h respectively. At 44, connective tissue (tendons, fascia) recovers more slowly than muscle. Loading the same fibres at 22-26h intervals builds fatigue, not stimulus, and raises the risk of biceps tendon and lumbar strain over a sustained training block. The fix is structural: Push A on Monday, rest or Pull A shifted to Wednesday, ensuring at least 48h between overlapping muscle groups.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 1 of PPL x2 (programme started 2026-05-24). The three sessions completed this week -- Push A Monday, Pull A Tuesday, Legs A Wednesday -- all matched the expected PPL day type exactly: 100% adherence on completed days. The week is 3/6 sessions complete with Thu Push B, Fri Pull B, and Sat Legs B still to be logged. The risk pattern is Monday-Tuesday-Wednesday consecutive days, which is causing the recovery violations above. If this becomes the habitual training window, the sub-48h gaps will accumulate into overuse injury within 3-4 weeks. Aim to distribute sessions as Mon/Tue/Thu/

Fri/Sat or adjust days to build in mid-week recovery.

CORRECTIVE COMPLIANCE

Hip Thrust was absent from Legs A (Wed 27 May). The Glute Bridge (0kg, bodyweight) was present but does not substitute for loaded Hip Thrust on the machine. Hip Thrust is the primary corrective for anterior pelvic tilt (APT): the loaded hip extension pattern teaches the pelvis to posteriorly rotate under tension. Without it, the pelvis stays tilted forward, shifting load onto the lumbar spine during all squat and deadlift movements and reducing glute activation by up to 30%. This is a hard miss -- Legs A Wed 27 May had no APT correction. Rear delt sets this week total 6 (3 from Face Pull in Push A + 3 from Face Pull in Pull A), which is 2 short of the 8-set weekly target. At age 44, if the anterior deltoid consistently outloads the rear delt, the humeral head migrates forward in the shoulder socket during pressing. This compresses the subacromial space and loads the supraspinatus tendon -- a mechanism for rotator cuff impingement that becomes chronic and difficult to train around. Adding even 2 rear delt sets per Pull session closes this gap. Core stabiliser compliance was excellent: Bird Dog in Push A and Pull A, Dead Bug plus Side Plank in Legs A -- 3/3 sessions covered the T8-T12 corrective.

LATERAL RAISE TREND -- V-TAPER KPI

The Lateral Raise (Dumbbell) dropped from 12.5kg x 13 reps (Sat 16 May) to 10kg x 12 reps (Mon 25 May), a 20% weight regression. The trend is DOWN. For Ganesh, the love handles sit at approximately lat-width level, which compresses the visual shoulder-to-waist ratio and eliminates the V-taper silhouette. The Lateral Raise is the single fastest lever for widening the shoulder line -- a 2.5kg increase over 12 weeks translates directly to a visually broader top. A regression to 10kg, even if caused by the programme reset to a barbell bench press format, must be reversed quickly. Target: return to 12.5kg x 12 reps within 2 weeks and add a fourth lateral raise set in Push B (shoulder-primary day) to accelerate the KPI.

HARD FLAGS

1. Session duration: all three sessions this week exceed the 60-min cap by a wide margin -- Push A 84 min (+24 min), Pull A 118 min (+58 min), Legs A 122 min (+62 min). A 60-min limit is set for cortisol management; beyond 60 min, testosterone-to-cortisol ratio shifts unfavourably, especially at 44. Practical fix: cut rest periods to 90s for isolation exercises, 2-3 min for compounds, and remove redundant warm-up sets after the first exercise.
2. Hip Thrust absent from Legs A (Wed 27 May) -- mandatory APT corrective. Cannot be swapped for Glute Bridge at bodyweight.
3. Only 22h between Pull A (Tue 26 May 10:14) and Legs A (Wed 27 May 08:37) with back, traps, and bicep overlap -- below the 48h minimum.

4. Rack Pull weight drop within the same session: Set 1 at 70kg x 5, then Sets 2-3 dropped to 50kg x 8 -- a 20kg intra-session reduction. This signals either insufficient warm-up at 70kg or accumulated fatigue from the 118-min Pull A session. Consolidate at 60kg for 3 even sets next Pull B.
5. Lateral Raise regression: 12.5kg to 10kg (-20%) on the V-taper KPI.
The new barbell bench press in Push A may be creating systemic fatigue that affects isolation exercise performance -- monitor over the next 2 weeks.

OVERALL VERDICT: DECLINING

Volume is down 55% versus last week (17,251 vs 38,431 kg*reps), all three sessions exceed the 60-min cap, Hip Thrust was missed in the only Legs session, recovery windows between consecutive sessions are both below 48h, and the Lateral Raise V-taper KPI has regressed 20%. The positive: PPL day-type adherence is 100% on all completed sessions and core stabiliser compliance is perfect. This is Week 1 of a new programme structure, so some execution roughness is expected -- but the session duration problem and Hip Thrust omission need correcting from Session 4 onwards (Thu Push B).

8. PLAN FOR NEXT WEEK

NOTE: Complete Week 1 first (Thu 28 May Push B, Fri 29 May Pull B, Sat 30 May Legs B -- ensure Hip Thrust in Legs B). Plan below is for Week 2 of PPL x2 (Mon 1 Jun - Sat 6 Jun).

Programme week: W2 (Week 2 of PPL x2)

All weights in kg. All times in IST. Target session duration: 60 min max.

MONDAY 1 JUN -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 4 sets x 8 reps @ 42.5kg

[base 40kg x 8 x 4, all sets hit target -- compound +2.5kg]

Incline Bench Press (DB) 3 sets x 12 reps @ 22.5kg

[base 20kg x 12 x 3, all sets hit target -- compound +2.5kg]

Chest Fly (Machine) 3 sets x 12 reps @ 46kg

[base 45kg x 12 x 3, all sets hit target -- isolation +1.25kg]

Lateral Raise (DB) 3 sets x 12 reps @ 12.5kg

[base 10kg x 12 x 3, all hit -- isolation +1.25 = 11.25, use 12.5 nearest DB]

Face Pull (Cable) 3 sets x 12 reps @ 26.1kg

[base 24.9kg x 12 x 3, all hit -- isolation +1.25kg]

Triceps Rope Pushdown 3 sets x 9 reps @ 24.9kg

[base 22.7kg x 9 x 3, all hit -- isolation +1.25 -> nearest cable increment]

Bird Dog 2 sets x 16 reps @ bodyweight -- DO NOT SKIP

[T8-T12 kyphosis corrective -- every session]

Band Pullaparts 1 set x 20 reps @ band

WATCH POINT: Target 60 min. If session runs long, cut Band Pullaparts and one Chest Fly set -- never cut the corrective (Bird Dog).

TUESDAY 2 JUN -- Pull A (Back compound + Biceps)

Pull Up (Weighted) 4 sets x 8 reps @ 0kg (bodyweight)
 [all 4 sets hit 8 reps this week; if all clean again, add 2.5kg next session]

Dumbbell Row 3 sets x 12 reps @ 22.5kg
 [base 20kg x 12 x 3, all hit -- compound +2.5kg]

Shrug (Smith Machine) 3 sets x 12 reps @ 72.5kg
 [base 70kg x 12 x 3, all hit -- isolation +1.25 -> round to 72.5]

Face Pull (Cable) 3 sets x 15 reps @ 26.1kg
 [base 24.9kg x 15 x 3, all hit -- isolation +1.25kg]

Chest Supported Y Raise (DB) 3 sets x 12 reps @ 6.25kg
 [base 5kg x 12 x 3, all hit -- isolation +1.25kg; use 7.5 if no 6.25 available]

Rack Pull 3 sets x 5 reps @ 60kg
 [prior session had 70->50kg intra-session drop; consolidate at 60 even sets]

Seated Incline Curl (DB) 3 sets x 10 reps @ 8.75kg
 [base 7.5kg x 10, add missing third set; +1.25kg progression]

Bird Dog 2 sets x 16 reps @ bodyweight -- DO NOT SKIP

WATCH POINT: Pull A ran 118 min last week. Cut rest to 90s on isolation exercises, 2.5 min on compounds. Remove duplicate stretching blocks.

Rear delt total this session: Face Pull 3 + Y Raise 3 = 6 sets (need 8 across the week -- Pull B on Friday will add the remaining 2+ sets).

WEDNESDAY 3 JUN -- Legs A (Quads, Hamstrings, Glutes)

HIP THRUST (Machine) 3 sets x 12 reps @ 22.5kg -- MANDATORY
 [last logged 13 May: 20kg x 13 x 3, all hit -- compound +2.5kg]

[THIS WAS MISSING FROM WED 27 MAY -- DO NOT SKIP AGAIN]

Deadlift (Trap bar) 3 sets x 8 reps @ 90kg
 [best this week 95kg x 8 (rep drop from prior 95kg x 9) -- 5% drop applied]

Leg Press (Machine) 3 sets x 12 reps @ 72.5kg
 [base 70kg x 12 x 3, all hit -- compound +2.5kg]

Single Leg Press (Machine) 3 sets x 10 reps @ 10kg/side
 [logged 0kg x 10 this week -- add light load to begin progressive overload]

Seated Leg Curl (Machine) 3 sets x 9 reps @ 44.25kg
 [base 43kg x 9 x 3, all hit -- isolation +1.25kg]

Dead Bug 3 sets x 16 reps @ bodyweight -- DO NOT SKIP

Side Plank 3 sets x 30s each side

WATCH POINT: Hip Thrust must be the second exercise (after warm-up) to ensure it is not dropped at the end of a long session. Session ran 122 min last week

* cut warm-up time and limit rest to 2 min on compounds, 90s on isolation.

THURSDAY 4 JUN -- Push B (Shoulders primary + Chest variation + Triceps)

Dumbbell Shoulder Press 4 sets x 12 reps @ 20kg
 [base from old programme: 20kg x 12 x 3 (16 May); conservative start -- add 4th set for Push B's shoulder-primary emphasis]

Lateral Raise (DB) 4 sets x 12 reps @ 12.5kg
 [Push B is shoulder-primary day -- 4 sets vs Push A's 3; base 10kg +1.25]

Chest Fly (Machine) 3 sets x 12 reps @ 45kg
 [chest variation for Push B -- conservative, same as Push A baseline]

Triceps Rope Pushdown 3 sets x 9 reps @ 22.7kg

[Push B baseline -- same as Push A starting point]

Face Pull (Cable) 3 sets x 12 reps @ 24.9kg

[rear delt corrective in every Push session]

Bird Dog 2 sets x 16 reps @ bodyweight -- DO NOT SKIP

WATCH POINT: This is the first Push B in PPL format. Prioritise technique on Dumbbell Shoulder Press -- pause at the top for 1s on each rep to maximise lateral head recruitment. Lateral Raises are the V-taper KPI; do not skip or reduce sets regardless of fatigue.

FRIDAY 5 JUN -- Pull B (Back + Rear Delts + Biceps)

Seated Cable Row (V Grip) 3 sets x 10 reps @ 80kg

[base 77kg x 10 x 3 (18 May), all hit -- compound +2.5 -> 79.5 -> 80kg]

Lat Pulldown (Machine) 3 sets x 10 reps @ 62.5kg

[base 60kg x 11 x 3 (14 May), all hit -- compound +2.5kg]

Face Pull (Cable) 4 sets x 15 reps @ 26.1kg -- MANDATORY

[rear delt mandatory in Pull B; 4 sets to help close the 8 sets/week gap]

Rear Delt Reverse Fly (Mach) 4 sets x 10 reps @ 52.5kg

[base 50kg x 11 x 4 (14 May), all hit -- isolation +1.25 -> 51.25 -> 52.5]

Hammer Curl (DB) 3 sets x 10 reps @ 12.5kg

[base 12.5kg x 10 x 3 (18 May); if all hit, use 13.75kg next session]

Bicep Curl (Machine) 3 sets x 10 reps @ 25kg

[rep collapse within session on 14 May (12->10) -- hold at 25kg x 10 x 3]

Bird Dog 2 sets x 16 reps @ bodyweight -- DO NOT SKIP

WATCH POINT: Pull B must hit 8 rear delt sets to meet the weekly corrective target. Face Pull 4 + Rear Delt Fly 4 = 8 sets. Do not drop either.

If a rotator cuff impingement develops at 44, pressing becomes painful within days -- prevention here is the insurance policy.

SATURDAY 6 JUN -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

HIP THRUST (Machine) 3 sets x 12 reps @ 22.5kg -- MANDATORY

[mandatory for APT; same progression as Legs A above]

Romanian Deadlift (DB) 3 sets x 10 reps @ 42.5kg

[base 40kg x 11 x 3 (13 May), all hit -- compound +2.5kg]

Leg Press (Machine) 3 sets x 12 reps @ 72.5kg

[same progression as Legs A]

Seated Leg Curl (Machine) 3 sets x 9 reps @ 44.25kg

[same progression as Legs A]

Single Leg Press (Machine) 3 sets x 10 reps @ 10kg/side

[same as Legs A -- build bilateral symmetry]

Rack Pull 3 sets x 5 reps @ 60kg

[Legs B prescription from PPL plan; consolidate at 60kg even sets]

Dead Bug 3 sets x 16 reps @ bodyweight -- DO NOT SKIP

WATCH POINT: Hip Thrust placed second in the session order to guarantee it is done. Legs B ran similarly long in the old programme -- 60-min target applies.

The Deadlift (Trap bar) is on both Legs A and Legs B this week -- if fatigue is high after Legs A on Wednesday, defer it to one session only.
