

30-Day Analysis Report

This week : 11 Aug to 18 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-17

WEEKLY TRAINING REPORT

Generated : 2026-08-18 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 11 Aug to 18 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 1, 1, 2 sessions (avg 1.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume UP 13% (10,079 vs 8,953 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 12 Aug 2026 09:09 IST | 65 min

Type : Full Body B -- Wednesday

Volume : 5,627 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +2.2kg e1RM

Lying Leg Curl (Machine): 36kg x 10r x 3 sets (e1RM 48.0kg)

Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: +2.1kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg)

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Friday 14 Aug 2026 08:49 IST | 54 min

Type : Full Body C -- Friday

Volume : 4,452 kg*reps | 11 sets

Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg)

Leg Press (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg)

Lat Pulldown (Machine): 66kg x 6r x 2 sets (e1RM 79.2kg)

Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 3 sets (e1RM 14.3kg)

4-WEEK VOLUME TREND

Wk -3 (21 Jul-28 Jul): [###.....] 1,920 kg*reps 1 sess

Wk -2 (28 Jul-04 Aug): [#####.....] 3,000 kg*reps 1 sess

Wk -1 (04 Aug-11 Aug): [#####.....] 8,953 kg*reps 2 sess

This wk (11 Aug-18 Aug): [#####.....] 10,079 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)
 vs prior : First time in 30-day log
 Next session : 70kg x 7 reps

[C] Lat Pulldown (Machine)

Best this week : 66kg x 6 reps (e1RM 79.2kg)
 vs prior : First time in 30-day log
 Next session : 66kg x 6 reps

[C] Leg Press (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)
 vs prior : First time in 30-day log
 Next session : 50kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)
 vs prior : UP +2.2kg vs 05 Aug
 Next session : 47.5kg x 7 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)
 vs prior : First time in 30-day log
 Next session : 20kg x 9 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 9 reps (e1RM 100.1kg)
 vs prior : UP +2.1kg vs 05 Aug
 Next session : 78.25kg x 9 reps

[I] Lying Leg Curl (Machine)

Best this week : 36kg x 10 reps (e1RM 48.0kg)
 vs prior : First time in 30-day log
 Next session : 36kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 13 reps (e1RM 14.3kg)
 vs prior : First time in 30-day log
 Next session : 10kg x 13 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 05 Aug
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		5		14		9		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		0		6		6		CRITICAL
Rear Delts		3		8		5		CRITICAL

Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		9		14		5		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 6 | Pull sets: 14 | Ratio pull:push = 2.33 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (21 Jul-28 Jul): 1 sessions

Wk -2 (28 Jul-04 Aug): 1 sessions

Wk -1 (04 Aug-11 Aug): 2 sessions

Time between sessions this week:

Wed 12 Aug 09:09 -> Fri 14 Aug 08:49: 48h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Wed 12 Aug + Fri 14 Aug (48h apart): overlap = legs, other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	5	10	AT RISK

Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	9	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 6

Weeks since last deload : 6 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W13 (started 2026-05-24; 85 days elapsed / 7 = 12.1 weeks, rounded up)

Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
* +-----+			

Tue 11 Aug | Pull A | No session | MISSED

Wed 12 Aug | Legs A | Full Body mix | MISMATCH (INFERRED -- OHP +

	(OHP, Leg Curl, Leg	Triceps = Push; Leg Curl +
	Ext, Bicep Curl,	Leg Ext = Legs; Bicep Curl =
	Triceps Pushdown)	Pull; not a Legs A session)

Thu 13 Aug | Push B | No session | MISSED

Fri 14 Aug | Pull B | Pull (INFERRED) | OK -- INFERRED (Row, Lat

	(Bent Over Row, Leg	Pulldown, Rear Delt Fly all
	Press, Lat Pulldown,	match Pull B; Leg Press is
	Rear Delt Rev Fly)	off-plan but majority is Pull)

Sat 15 Aug | Legs B | No session | MISSED

Sun 16 Aug | REST | No session | OK (rest day)

Mon 17 Aug | Push A | No session | MISSED (day ended at 23:30 IST)

Adherence: 17% (1 of 6 sessions on correct day or correctly inferred)

Note: Still training on "Full Body A/B/C" template -- PPL sessions not started.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 formal Legs sessions this week.

MISSING on Wed 12 Aug -- session had Leg Curl + Leg Extension but no Hip

Thrust. APT correction absent. Hip Thrust is mandatory every Legs session.

Core stabiliser (all sessions): 0 of 2 sessions. Dead Bug / Bird-Dog not logged in either session this week. T8-T12 kyphosis correction missed. Rear delt work in Pull sessions: 1 of 1 pull-type session (Fri 14 Aug had Rear Delt Reverse Fly 3 x 13 @ 10kg). OK for the one pull session done. Sessions over 60 min: Wed 12 Aug -- 65 min (5 min over cap). Likely caused by Full Body format running 5 exercises across multiple muscle groups.

LATERAL RAISE (V-TAPER KPI):

This week: NOT PERFORMED (0 sets) | Prior week: 10kg x 14 reps (Mon 10 Aug) | Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44

Only two sessions were completed this week: Wed 12 Aug (OHP, Leg Curl, Leg Extension, Bicep Curl, Triceps Pushdown) and Fri 14 Aug (Bent Over Row, Leg Press, Lat Pulldown, Rear Delt Reverse Fly), separated by exactly 48h. Leg muscles were hit in both sessions -- Leg Extension (77kg x 9r) and Lying Leg Curl (36kg x 10r) on Wednesday, then Leg Press (50kg x 12r) on Friday. At 48h, this meets the absolute minimum for a 44-year-old but sits below the 72h ideal for quad/hamstring recovery. Push muscles (OHP, Triceps) appeared only on Wednesday, clearing comfortably. Back muscles (Row, Lat Pulldown) appeared only on Friday, no recovery issue. For next week: do not schedule Legs A and Legs B fewer than 72h apart.

PPL ADHERENCE AND PROGRAMME AGE

Adherence this week: 17% (1 of 6 sessions aligned to plan, inferred). This is W13 of the PPL programme (started 2026-05-24) and Ganesh is still training on the "Full Body A/B/C" template. Push sessions (Mon/Thu) have been completely absent for at least two consecutive weeks. The pattern is clear: Wed and Fri are the most reliably hit days; Mon, Tue, Thu, and Sat are systematically skipped. The 6-day PPL split requires a deliberate schedule shift -- the Full Body template needs to be retired from the app.

CORRECTIVE COMPLIANCE

Hip Thrust rate (APT): 0 of 0 formal Legs sessions. Wednesday's session had leg exercises but no Hip Thrust -- APT has gone unaddressed for at least 13 weeks. Anterior pelvic tilt shortens the hip flexors and inhibits the glutes; without Hip Thrust to reactivate the posterior chain, squats and leg presses will increasingly load the lower lumbar instead of the glutes. Rear delt sets this week: 3 (Rear Delt Reverse Fly, Fri 14 Aug) against an 8-set weekly target -- 37.5% of goal. At 44, front deltoids (bench, OHP) are inherently overloaded relative to rear delts. If the

front-to-rear strength gap widens, the humeral head translates forward under pressing load, compressing the subacromial space; over 6-12 months this becomes rotator cuff impingement. Add Face Pulls or extra Rear Delt Fly sets to every Pull session until the 8-set target is routinely hit. Core stabilisers (Dead Bug / Bird-Dog): 0 of 2 sessions. T8-T12 kyphosis requires active corrective work every session -- this has not happened.

LATERAL RAISE TREND -- V-TAPER KPI

No Lateral Raise was performed this week (prior week best: 10kg x 14 reps). Trend: DOWN. Ganesh's love handles sit at lat-width level, which means the waist visually collapses the upper-body silhouette. The only way to change that ratio without surgery is to widen the shoulder cap -- lateral raises are the primary driver. Stalling or skipping this lift for a week sets back the one visual KPI that matters most for the body recomp goal.

HARD FLAGS

1. Wed 12 Aug session ran 65 min -- 5 minutes over the 60-min cap. Five exercises spanning three muscle groups inflated the session. PPL sessions (focused on 1-2 muscle groups) naturally stay within the 60-min limit.
2. Core stabiliser (Dead Bug / Bird-Dog) ABSENT from both sessions this week. This is a mandatory corrective for T8-T12 kyphosis -- it must open every session, not be skipped when time is short.
3. Hip Thrust ABSENT from all sessions. APT correction requires Hip Thrust in every Legs session; this has not been executed in the logging period.
4. Chest: 0 sets this week against a 12-set target. On a 417 kcal daily deficit, muscles below minimum stimulus threshold lose mass first. Chest had 0 sets vs an 8-set retention minimum -- it is AT RISK of atrophy.
5. Still operating on Full Body A/B/C template in W13 of a PPL programme. The template switch from Full Body to PPL has not been made.

OVERALL VERDICT: DECLINING

Session count holds at 2/6 (same as prior week), volume ticked up 13% (10,079 vs 8,953 kg*reps) -- the only positive. PPL adherence: 17%. Corrective compliance: 0% on Hip Thrust and Dead Bug; 37.5% on rear delts. V-taper KPI: DOWN (Lateral Raise skipped). Deload: overdue since W10 (6 uninterrupted active weeks; deload due every 4 weeks). DECLINING -- the structural issues (template, correctives, deload) are not being addressed week on week.

8. PLAN FOR NEXT WEEK

Programme week: W14 of PPL x2 -- DELOAD WEEK (overdue since W10)
 Deload rule: 2 working sets per exercise (not 3). Weights unchanged.
 Correctives (Dead Bug) run full 3x10 every session -- do not reduce.

MONDAY 24 Aug -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 60kg
 Incline Chest Press (Machine) 2 x 11 @ 30kg
 Chest Fly (Machine) 2 x 10 @ 65kg
 Lateral Raise (Dumbbell) 2 x 14 @ 10kg [hold deload weight; progress resumes W15]
 Triceps Pushdown 2 x 11 @ 27.2kg
 Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)
 Watch-point: keep Bench grip shoulder-width, no elbow flare. This is a recovery session -- if any set feels heavier than usual, stop at 2 reps short of failure rather than grind.

TUESDAY 25 Aug -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 7 @ 70kg
 Pull Up (Bodyweight) 2 x 6 @ BW
 Lat Pulldown (Machine) 2 x 6 @ 66kg
 Bicep Curl (Barbell) 2 x 9 @ 20kg
 Dead Bug 3 x 10 -- do not skip
 Watch-point: Row at 70kg -- control the eccentric (3 seconds down). On a deload, technique quality is the only goal.

WEDNESDAY 26 Aug -- Legs A (Quads, Hamstrings, Glutes -- Hip Thrust mandatory)

Hip Thrust (Barbell) 3 x 10 @ 60kg [FIRST LOG -- not a deload lift; run full 3 sets as this is a new corrective]
 Squat (Barbell) 2 x 6 @ 70kg
 Leg Extension (Machine) 2 x 9 @ 77kg [hold -- do not advance to 78.25kg until full 3x9 is re-established post-deload]
 Lying Leg Curl (Machine) 2 x 10 @ 36kg
 Dead Bug 3 x 10 -- do not skip
 Watch-point: Hip Thrust is MANDATORY -- APT has gone unaddressed for 13 weeks. Even on a deload, execute all 3 sets. Set up with upper back on a bench at nipple height; drive through the heels; hold the top for 1 second.

THURSDAY 27 Aug -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 7 @ 45kg
 Seated Shoulder Press (Machine) 2 x 8 @ 90kg
 Lateral Raise (Dumbbell) 2 x 14 @ 10kg
 Triceps Pushdown 2 x 11 @ 27.2kg
 Skullcrusher (Dumbbell) 2 x 12 @ 20kg
 Dead Bug 3 x 10 -- do not skip
 Watch-point: OHP -- rib cage down, glutes braced. Do not let the lower back extend to compensate for limited shoulder mobility.

FRIDAY 28 Aug -- Pull B (Back + Rear Delts + Biceps -- Face Pull mandatory)

Bent Over Row (Barbell) 2 x 7 @ 70kg
 Lat Pulldown (Machine) 2 x 6 @ 66kg
 Rear Delt Reverse Fly (DB) 2 x 13 @ 10kg [mandatory -- rotator cuff protection]
 Face Pull (Cable) or extra 2 x 15 @ light (start @ 10kg cable stack)
 Rear Delt set [to close rear delt shortfall vs 8-set target]
 Bicep Curl (Barbell) 2 x 9 @ 20kg

Dead Bug 3 x 10 -- do not skip

Watch-point: Rear delt volume is the priority on this session. 3 working sets of rear delt work are the minimum. Front delts are already ahead -- adding Face Pull here directly counters rotator cuff impingement risk at 44.

SATURDAY 29 Aug -- Legs B (Glutes, Hamstrings, Single-Leg -- Hip Thrust mandatory)

Hip Thrust (Barbell) 3 x 10 @ 60kg [mandatory APT -- full 3 sets]

Romanian Deadlift (Barbell) 2 x 8 @ 75kg [hold deload; +2.5kg resumes W15]

Leg Press (Machine) 2 x 12 @ 50kg [hold deload]

Lying Leg Curl (Machine) 2 x 10 @ 36kg

Dead Bug 3 x 10 -- do not skip

Watch-point: Romanian Deadlift hinge -- neutral spine, tension through hamstrings at the bottom, drive hips forward at the top. Do not round the lower back at 75kg. Deload weight, so technique must be perfect.

+-----+		
Deload	: needed this week (W14) -- overdue since W10	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
