

30-Day Analysis Report

15 Sep - 21 Sep 2026 | Generated 2026-09-21 | Week 18 of PPL x2

ATHLETE PROFILE

Name: **Ganesh**

Profile: **44M | 181 cm | 87 kg -> 79 kg**

Goal: **Body Recomposition -- Fat loss, muscle preservation**

Pace: **0.5 kg/week | 15% calorie deficit**

Report generated: **2026-09-21**

POWERED BY HEVY AGENT * CLAUDE AI

WEEKLY TRAINING REPORT

Generated : 2026-09-22 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 15 Sep to 22 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 3, 2, 2 sessions (avg 2.3)
Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Bent Over Row (Barbell) -- 60kg x 11 reps (e1RM 82.0kg)
Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)
vs last week : Volume UP 1% (10,824 vs 10,669 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 16 Sep 2026 10:41 IST | 44 min
Type : Full Body B -- Wednesday
Volume : 5,484 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM
Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM
Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM
Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM
Session 2: Friday 18 Sep 2026 10:44 IST | 62 min
Type : Full Body C -- Friday

Volume : 1,320 kg*reps | 2 sets
Bent Over Row (Barbell): 60kg x 11r x 2 sets (e1RM 82.0kg) vs prior: -6.7kg e1RM
Session 3: Monday 21 Sep 2026 12:53 IST | 102 min
Type : Mon - Bench, Pull-ups, Shrugs, Lat Raise
Volume : 4,020 kg*reps | 12 sets
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -4.0kg e1RM [FLAG: rep collapse 12->6]
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Shrug (Barbell): 50kg x 15r x 3 sets (e1RM 75.0kg)
Lateral Raise (Dumbbell): 12.5kg x 12r x 3 sets (e1RM 17.5kg) vs prior: +2.5kg e1RM

4-WEEK VOLUME TREND

Wk -3 (25 Aug-01 Sep): [#####] 13,704 kg*reps 3 sess
Wk -2 (01 Sep-08 Sep): [#####.....] 6,090 kg*reps 2 sess
Wk -1 (08 Sep-15 Sep): [#####.....] 10,669 kg*reps 2 sess
This wk (15 Sep-22 Sep): [#####.....] 10,824 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))
[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -4.0kg vs 24 Aug

Next session : 57.0kg x 6 reps

*** FLAGS: rep collapse (12->6)

[C] Bent Over Row (Barbell)

Best this week : 60kg x 11 reps (e1RM 82.0kg)

vs prior : DOWN -6.7kg vs 28 Aug

Next session : 57.0kg x 11 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : SAME as 09 Sep

Next session : 45kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

*** FLAGS: 0kg logged -- check entry

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : SAME as 26 Aug

Next session : 20kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 12.5kg x 12 reps (e1RM 17.5kg)

vs prior : UP +2.5kg vs 24 Aug

Next session : 13.75kg x 12 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -32.7kg vs 09 Sep

Next session : 47.5kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : SAME as 26 Aug

Next session : 43kg x 9 reps

[I] Shrug (Barbell)

Best this week : 50kg x 15 reps (e1RM 75.0kg)

vs prior : First time in 30-day log

Next session : 50kg x 15 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 26 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
--------------	--------------	-----------	-----	--------

-----+-----+-----+-----+-----

Chest	3	12	9	CRITICAL
-------	---	----	---	----------

Back	5	14	9	CRITICAL
------	---	----	---	----------

Shoulders	6	10	4	CRITICAL
-----------	---	----	---	----------

Traps	3	6	3	LOW
-------	---	---	---	-----

Rear Delts	0	8	8	CRITICAL
------------	---	---	---	----------

Biceps	6	8	2	LOW
--------	---	---	---	-----

Triceps	3	8	5	CRITICAL
---------	---	---	---	----------

Legs	6	14	8	CRITICAL
------	---	----	---	----------

Core	0	6	6	CRITICAL
------	---	---	---	----------

Push sets: 12 | Pull sets: 14 | Ratio pull:push = 1.17 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (25 Aug-01 Sep): 3 sessions

Wk -2 (01 Sep-08 Sep): 2 sessions

Wk -1 (08 Sep-15 Sep): 2 sessions

Time between sessions this week:

Wed 16 Sep 10:41 -> Fri 18 Sep 10:44: 48h

Fri 18 Sep 10:44 -> Mon 21 Sep 12:53: 74h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks

down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK

Back 5 10 AT RISK

Shoulders 6 8 AT RISK

Traps 3 4 AT RISK

Rear Delts 0 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 6 10 AT RISK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 11

Weeks since last deload : 11 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W18 (started 2026-05-24; 120 days elapsed = 17.1 weeks, rounded up)

Sessions this week: 3 of 6 target

Day | Expected | Detected | Status

-----+-----+-----+-----

Tue 15 Sep | Pull A | REST (no session) | MISSED

Wed 16 Sep | Legs A | Full Body B (OHP+Leg machines | MISMATCH -- Push/Legs mix,

| | +Bicep Curl+Triceps Pushdown) | not a PPL Legs A session

Thu 17 Sep | Push B | REST (no session) | MISSED

Fri 18 Sep | Pull B | INFERRED Pull (Bent Over Row | PARTIAL MATCH -- correct

| | only, 2 sets, no rear delts) | muscle group, incomplete

Sat 19 Sep | Legs B | REST (no session) | MISSED

Sun 20 Sep | REST | REST | OK

Mon 21 Sep | Push A | INFERRED Push (Bench Press + | PARTIAL MATCH -- correct

| | Lat Raise; Pull-ups also done) | type, mixed with pull work

Adherence: 33% (2 of 6 training days had a session; 2 of 3 completed sessions matched

expected type. Pattern: Thu and Sat consistently skipped; Mon arriving late

in the week as a replacement Push session.)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions -- MISSING (no Legs A or

Legs B session logged all week; APT correction fully absent)

Core stabiliser (all sessions): 0 of 3 sessions -- MISSING in every session this week (no Dead Bug, Bird-Dog, or Plank logged anywhere)
Rear delt work in Pull sessions: 0 of 1 pull-adjacent sessions -- MISSING (Fri 18 Sep)
Bent Over Row session had no face pull or rear delt fly)
Sessions over 60 min : 2 sessions flagged --
Fri 18 Sep: 62 min (2 min over; incomplete 2-set session)
Mon 21 Sep: 102 min (42 min over -- significant)

LATERAL RAISE (V-TAPER KPI):

This week : 12.5kg x 12 reps (Mon 21 Sep)
Prior week : 10.0kg x 15 reps (Mon 07 Sep -- no Lateral Raise in 8-14 Sep window)
Trend : UP (+2.5kg heavier; effective load increase confirms V-taper KPI progressing)

7. KEY INSIGHTS

RECOVERY AT 44:

Three sessions this week with adequate gaps: Wed 16 Sep to Fri 18 Sep was exactly 48h (the minimum required for connective tissue -- Ganesh is clearing the floor, not building a buffer). Fri 18 Sep to Mon 21 Sep was 74h. No same-muscle sessions were closer than 48h. However, the Shoulders saw OHP on Wed 16 Sep (48h gap) and Lateral Raise on Mon 21 Sep (74h gap after Friday). At 44, connective tissue recovery lags muscle recovery by 1-2 days; clearing the 48h floor by a narrow margin on shoulder-to-shoulder is technically safe but leaves no room for error if either session is heavy. Every pair cleared the minimum this week -- that is the good news. The bad news is three sessions represents the absolute minimum stimulus for maintenance, and the gaps are close to the floor.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 18 of PPL x2 (started 2026-05-24). Adherence is 33% this week -- 3 of 6 sessions done. Over the prior four weeks (Wk -3 to this week) the count has been 3, 2, 2, 3. The pattern is unmistakable: Thursday (Push B) and Saturday (Legs B) are almost never completed. Monday also shifts -- this week's Mon session arrived after two missed days, making it a push session on a Push A day coincidentally but not because of PPL tracking. At 18 weeks in, the programme has never hit 6 sessions in a week. The Full Body template that carries session titles (Full Body A/B/C) reveals that the PPL split has not been adopted in practice -- Ganesh is still running the old Full Body routine under the PPL schedule, resulting in mis-matched days (Legs A day filled by an OHP + Leg machine session) and zero Hip Thrust or rear delt correctives being triggered.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate: 0% this week. No dedicated Legs session was run at all, so no Hip Thrust was triggered. The anterior pelvic tilt (APT) correction requires Hip Thrust to fire the glutes in opposition to the hip flexors that are chronically shortened in APT. Zero Hip Thrust means zero APT correction progress this week. Core stabiliser (Dead Bug / Bird-Dog): 0 of 3 sessions. Lower thoracic kyphosis at T8-T12 creates a passive shortening of the thoracic erectors; Dead Bug in particular loads the anterior core in spinal neutral, counteracting the flexion bias. Running three sessions with zero core stabiliser work is letting the kyphosis go unaddressed every training day this week. Rear delt sets: 0 of 8 target. At 44, an imbalanced front-to-rear shoulder ratio accelerates external rotator

fatigue. When the anterior deltoid and pectorals consistently outpull the posterior rotator cuff muscles (infraspinatus, teres minor), the humeral head migrates anteriorly under load. Over months, this narrows the subacromial space and produces impingement -- pain at the top of pressing movements, then pain in rest, then a partial tear. Eight rear delt sets per week is the minimum protective dose. Zero sets for an entire week is a meaningful setback.

LATERAL RAISE TREND:

V-taper KPI is moving UP: 12.5kg x 12 this week vs 10kg x 15 two weeks prior (+2.5kg). This matters specifically because Ganesh's love handles sit at the same horizontal level as lat width, collapsing the visual taper ratio. The only way to visually widen above the love handles is to build the medial deltoid head -- lateral raises are the most direct stimulus for this. A 2.5kg jump is genuine progress (not just a rep trade-off since rep count remained high at 12). This is the one bright spot this week. Maintaining or exceeding 12.5kg next week is essential; 13.75kg is the next progression target.

HARD FLAGS:

1. BENCH PRESS REP COLLAPSE: 12 reps (Sep 7) -> 6 reps (Mon 21 Sep) at the same 60kg. Rep halving at the same weight indicates accumulated fatigue or a 102-minute session (see flag 3) depleting CNS capacity before bench was reached.
2. SESSION MON 21 SEP = 102 MINUTES: 42 minutes over the 60-minute limit. Long sessions at 44 spike cortisol in the latter half, degrading the anabolic signal of the whole session. The bench coming late in a 102-min session likely explains the rep collapse.
3. SESSION FRI 18 SEP = 62 MINUTES: Only 2 sets of Bent Over Row. The session either started very late or was abandoned. 62 minutes for 2 sets is a data anomaly -- likely the timer was left running. Needs checking.
4. ZERO REAR DELTS: 0 sets this week against an 8-set target. Rotator cuff risk (see above).
5. ZERO CORE STABILISERS: Dead Bug / Bird-Dog absent in all three sessions.
6. ZERO HIP THRUST: No APT corrective all week.
7. PULL-UPS LOGGED AT 0KG: Bodyweight exercise so 0kg is expected in Hevy, but the e1RM also shows 0.0kg across all sets. Should be logged as bodyweight (~87kg) to track progressive overload over time.

OVERALL VERDICT: HOLDING

Session count is up marginally (3 vs 2 last week) and volume is fractionally higher (10,824 vs 10,669 kg*reps), but strength is declining on three lifts (Bench -4kg e1RM, BOR -6.7kg, Leg Extension -32.7kg), corrective compliance is zero across all three metrics, and the programme split is still not being followed after 18 weeks. The Lateral Raise progression is the lone positive signal.

8. PLAN FOR NEXT WEEK

Programme week: W19 of PPL x2 -- DELOAD WEEK (11 weeks overdue; mandatory)
Deload rules: 2 sets per exercise, same weight as last week, reduce session duration to 45 min max. DO NOT push intensity. Goal is joint and connective tissue recovery.

MONDAY 22 SEP -- Push A (Chest + Shoulders + Triceps) -- DELOAD

Bench Press (Barbell) 2 x 6 @ 60kg
(Rep collapse at 60kg; hold weight, fix form in deload, do NOT drop to 57kg yet)
Overhead Press (Barbell) 2 x 8 @ 45kg
Incline DB Press 2 x 10 @ 20kg/hand (add chest volume -- Push A needs it)
Lateral Raise (Dumbbell) 2 x 12 @ 12.5kg (V-taper KPI -- hold deload weight)

Triceps Pushdown 2 x 11 @ 27.2kg
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective; 5 min, no excuse)
Key focus: Keep under 45 min. Deload = 2 sets only, no extras. Fix bench bar path -- lower to sternum, controlled descent. Dead Bug before leaving the gym.
TUESDAY 23 SEP -- Pull A (Back + Biceps) -- DELOAD
Bent Over Row (Barbell) 2 x 11 @ 60kg
Lat Pulldown (Machine) 2 x 6 @ 66kg
Bicep Curl (Barbell) 2 x 10 @ 20kg
Face Pull (Cable) 2 x 15 @ 10kg (START HERE -- rear delt mandatory)
Dead Bug 3 x 10 -- DO NOT SKIP
Key focus: Face Pull is non-negotiable. Set cable at face height, elbows flared, thumbs to temples at end position. Start light -- 10kg -- to nail form before loading.
WEDNESDAY 24 SEP -- Legs A (Quads, Hamstrings, Glutes) -- DELOAD
Squat (Barbell) 2 x 7 @ 70kg
HIP THRUST (Barbell) 2 x 10 @ 60kg -- MANDATORY APT CORRECTIVE
(No recent log; 60kg is conservative for 87kg bodyweight -- add 5kg/week if easy)
Leg Extension (Machine) 2 x 12 @ 50kg
Seated Leg Curl (Machine) 2 x 9 @ 43kg
Dead Bug 3 x 10 -- DO NOT SKIP
Key focus: Hip Thrust is the most important exercise this session for APT. Drive hips to full extension at top, hold 1 second, squeeze glutes hard. Do NOT skip it.
THURSDAY 25 SEP -- Push B (Shoulders + Chest variation + Triceps) -- DELOAD
Overhead Press (Barbell) 2 x 8 @ 45kg (shoulders primary on Push B)
Cable Chest Fly 2 x 12 @ 15kg/side (chest variation -- first log, conservative start; or DB Fly 2 x 12 @ 12kg/hand)
Lateral Raise (Dumbbell) 2 x 12 @ 12.5kg
Triceps Pushdown 2 x 11 @ 27.2kg
Dead Bug 3 x 10 -- DO NOT SKIP
Key focus: Push B distinguishes itself from Push A via OHP as the lead compound. Keep chest work to the cable fly variation to avoid bench-on-bench fatigue pattern.
FRIDAY 26 SEP -- Pull B (Back + Rear Delts + Biceps) -- DELOAD
Bent Over Row (Barbell) 2 x 11 @ 60kg
Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg (MANDATORY -- rear delt protection)
Face Pull (Cable) 2 x 15 @ 10kg
Lat Pulldown (Machine) 2 x 6 @ 66kg
Bicep Curl (Barbell) 2 x 10 @ 20kg
Dead Bug 3 x 10 -- DO NOT SKIP
Key focus: Pull B carries the bulk of rear delt protection for the week. Face Pull AND Reverse Fly together on the same session is ideal for catching up the 8-set rear delt target. Do not skip either.
SATURDAY 27 SEP -- Legs B (Glutes, Hamstrings, Single-Leg) -- DELOAD
HIP THRUST (Barbell) 2 x 10 @ 60kg -- MANDATORY APT CORRECTIVE
Romanian Deadlift (Barbell) 2 x 8 @ 75kg
Leg Press (Machine) 2 x 12 @ 60kg
Bulgarian Split Squat (BW) 2 x 8/side @ 0kg (single-leg -- bodyweight first session)
Dead Bug 3 x 10 -- DO NOT SKIP
Key focus: Second Hip Thrust of the week (Legs B). Two Hip Thrust sessions per week is the minimum to begin reversing APT. Keep weight conservative and focus on full glute contraction at the top of each rep.
+-----+
Deload : needed this week -- next due Week 23, ~19 Oct 2026
Timing : 6-9 PM IST -- no sessions after midnight

| Nutrition: 2,367 kcal/day | 174g protein minimum |

+-----+
