

30-Day Analysis Report

This week : 17 Jul to 24 Jul 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-07-23

WEEKLY TRAINING REPORT

Generated : 2026-07-24 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 17 Jul to 24 Jul 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 5, 4, 4 sessions (avg 4.3)
Overall score: 5/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Seated Shoulder Press (Machine) -- 90kg x 8 reps (e1RM 114.0kg)
Biggest concern: Legs -- 3 sets vs 14 target (11 sets short)
vs last week : Volume DOWN 23% (15,180 vs 19,685 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 17 Jul 2026 08:55 IST | 70 min
Type : Full Body C -- Friday
Volume : 6,690 kg*reps | 14 sets
Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM
Deadlift (Barbell): 80kg x 7r x 3 sets (e1RM 98.7kg) vs prior: +2.7kg e1RM
Shrug (Barbell): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: +7.0kg e1RM
Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 2 sets (e1RM 14.3kg) vs prior: +0.0kg e1RM
Crunch (Machine): 25kg x 12r x 3 sets (e1RM 35.0kg) vs prior: +14.0kg e1RM
Session 2: Saturday 18 Jul 2026 08:12 IST | 86 min
Type : Chest Shoulder-- Saturday
Volume : 6,570 kg*reps | 15 sets
Incline Chest Press (Machine): 30kg x 11r x 3 sets (e1RM 41.0kg) vs prior: +1.0kg e1RM
Seated Shoulder Press (Machine): 90kg x 8r x 3 sets (e1RM 114.0kg) vs prior: +3.0kg e1RM
Chest Fly (Machine): 65kg x 10r x 3 sets (e1RM 86.7kg) vs prior: +10.7kg e1RM
Bicep Curl (Machine): 25kg x 10r x 3 sets (e1RM 33.3kg) vs prior: +0.0kg e1RM
Skullcrusher (Dumbbell): 20kg x 12r x 3 sets (e1RM 28.0kg) vs prior: +7.0kg e1RM
Session 3: Monday 20 Jul 2026 08:36 IST | 16 min
Type : Full Body A -- Monday
Volume : 1,920 kg*reps | 7 sets
Squat (Barbell): 40kg x 6r x 3 sets (e1RM 48.0kg) vs prior: -45.3kg e1RM
Bench Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -26.9kg e1RM
Pull Up: 0kg x 6r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

4-WEEK VOLUME TREND

Wk -3 (26 Jun-03 Jul): [#####] 25,325 kg*reps 5 sess
Wk -2 (03 Jul-10 Jul): [#####.....] 19,422 kg*reps 4 sess
Wk -1 (10 Jul-17 Jul): [#####.....] 19,685 kg*reps 4 sess

This wk (17 Jul-24 Jul): [#####.....] 15,180 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -26.9kg vs 13 Jul

Next session : 38.0kg x 10 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Jul

Next session : 72.5kg x 7 reps

[C] Deadlift (Barbell)

Best this week : 80kg x 7 reps (e1RM 98.7kg)

vs prior : UP +2.7kg vs 10 Jul

Next session : 82.5kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Seated Shoulder Press (Machine)

Best this week : 90kg x 8 reps (e1RM 114.0kg)

vs prior : UP +3.0kg vs 11 Jul

Next session : 92.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 40kg x 6 reps (e1RM 48.0kg)

vs prior : DOWN -45.3kg vs 13 Jul

Next session : 38.0kg x 6 reps

[I] Bicep Curl (Machine)

Best this week : 25kg x 10 reps (e1RM 33.3kg)

vs prior : SAME as 04 Jul

Next session : 25kg x 10 reps

[I] Chest Fly (Machine)

Best this week : 65kg x 10 reps (e1RM 86.7kg)

vs prior : UP +10.7kg vs 11 Jul

Next session : 66.25kg x 10 reps

[I] Crunch (Machine)

Best this week : 25kg x 12 reps (e1RM 35.0kg)

vs prior : UP +14.0kg vs 10 Jul

Next session : 26.25kg x 12 reps

[I] Incline Chest Press (Machine)

Best this week : 30kg x 11 reps (e1RM 41.0kg)

vs prior : UP +1.0kg vs 04 Jul

Next session : 31.25kg x 11 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 13 reps (e1RM 14.3kg)

vs prior : SAME as 10 Jul

Next session : 10kg x 13 reps

[I] Shrug (Barbell)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : UP +7.0kg vs 10 Jul

Next session : 71.25kg x 12 reps

[I] Skullcrusher (Dumbbell)

Best this week : 20kg x 12 reps (e1RM 28.0kg)

vs prior : UP +7.0kg vs 11 Jul

Next session : 21.25kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		9		12		3		LOW
Back		7		14		7		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		6		6		0		OK
Rear Delts		2		8		6		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		0		8		8		CRITICAL
Legs		3		14		11		CRITICAL
Core		3		6		3		LOW

Push sets: 12 | Pull sets: 18 | Ratio pull:push = 1.50 (OK -- balanced)

Rear delts: 2 sets this week (need 8+/week)

SHORT by 6 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 6 sets this week (need 6+/week)

OK.

Enough work this week: Traps

Short this week : Chest, Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (26 Jun-03 Jul): 5 sessions

Wk -2 (03 Jul-10 Jul): 4 sessions

Wk -1 (10 Jul-17 Jul): 4 sessions

Time between sessions this week:

Fri 17 Jul 08:55 -> Sat 18 Jul 08:12: 23h [FLAG: only 23h rest, same muscles: other]

Sat 18 Jul 08:12 -> Mon 20 Jul 08:36: 48h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Fri 17 Jul + Sat 18 Jul (23h apart): overlap = other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	9	8	OK
Back	7	10	AT RISK
Shoulders	3	8	AT RISK
Traps	6	4	OK
Rear Delts	2	6	AT RISK
Biceps	3	6	AT RISK
Triceps	0	6	AT RISK
Legs	3	10	AT RISK
Core	3	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 2

Weeks since last deload : 2 (deload every 4 weeks)

Next deload : in 2 week(s), approx 07 Aug 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W9 (started 2026-05-24; 61 days elapsed, rounded up = 9 weeks)

Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
-----	----------	----------	--------

* +-----+

Fri 17 Jul | Pull B | INFERRED Pull B | OK (row, deadlift, rear delt fly)

Sat 18 Jul | Legs B | INFERRED Push | WRONG -- Push done, Legs B skipped

Mon 20 Jul | Push A | INFERRED Full Body | WRONG -- mixed; aborted at 16 min

Adherence: 33% (1 of 3 sessions matched expected day/type)

Missed: Tue 21 Jul (Pull A), Wed 22 Jul (Legs A), Thu 23 Jul (Push B) -- 3 sessions absent

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated legs sessions

MISSING -- Sat Legs B replaced by a Push session; APT correction entirely unaddressed

Core stabiliser (dead bug, bird-dog, plank): 0 of 3 sessions

MISSING all sessions -- Crunch (Machine) on Fri is not a corrective stabiliser for T8-T12

Rear delt work in Pull sessions: 1 of 1 pull sessions -- OK

(Rear Delt Reverse Fly on Fri 17 Jul; 2 working sets only)

Sessions over 60 min: Fri 17 Jul 70 min (+10 min over); Sat 18 Jul 86 min (+26 min over)

LATERAL RAISE (V-TAPER KPI):

This week: none logged | Prior week: 10kg x 14 reps (Mon 13 Jul) | Trend: DOWN

7. KEY INSIGHTS

Recovery at 44:

The only consecutive-session pair this week was Fri 17 Jul (08:55) to Sat 18 Jul (08:12), a gap of just 23 hours -- well below the 48h minimum at age 44. While the primaries differed (back/traps/rear-delts on Friday, chest/shoulders/triceps on Saturday), the shoulder girdle was loaded in both: 70kg Bent Over Row plus Rear Delt Fly on Friday, then 90kg Seated Shoulder Press the following morning. That sub-24h turnaround added systemic fatigue to a joint complex that was already stressed. The Sat->Mon gap (08:12 to 08:36) was exactly 48h -- technically acceptable but the floor, not the goal. Both sessions exceeded 60 minutes (70 and 86 min), compounding cumulative load. The Fri->Sat 23h pairing is the sole timing violation but a significant one; it should not be repeated in W10.

PPL adherence and programme age:

This is Week 9 of the PPL x2 programme (started 2026-05-24). Adherence stands at 33%: only Friday's Pull B session matched the expected day and type. The pattern is consistent: training is compressed into a Fri-Sat-Mon window. Saturday -- which is programmed as Legs B -- was replaced by a Push session for the second consecutive week. Tuesday (Pull A), Wednesday (Legs A), and Thursday (Push B) were skipped entirely. Skipping three of six sessions means the weekly training stimulus is running at roughly half of programme intent, which is insufficient for body recomposition at a 15% calorie deficit: under-trained muscles are at risk of catabolism even with adequate protein.

Corrective compliance:

Hip Thrust hit rate: 0% this week. Saturday should have been Legs B but was replaced by a

chest-and-shoulder session; no Hip Thrust was performed. Hip Thrust is mandatory every Legs session for anterior pelvic tilt (APT) correction. APT shifts mechanical stress from the glutes and hamstrings onto the lumbar spine during squats and deadlifts -- without corrective glute activation, every compound lower-body lift reinforces the compensation pattern. Rear delt set count for the week was 2 sets (only the Fri session) against the 8-set weekly target, short by 6 sets. At 44, with Seated Shoulder Press at 90kg (e1RM 114kg), if the front deltoid stays disproportionately stronger than the rear delt (e1RM 14.3kg), the humeral head progressively migrates forward in the socket and narrows the subacromial space. Over months this compresses the supraspinatus tendon and causes rotator cuff impingement -- a painful, slow-healing injury that would end all pressing work. Core stabiliser (dead bug, bird-dog, plank) was absent from all 3 sessions; the Crunch machine exercise does not address T8-T12 thoracic kyphosis.

Lateral raise trend:

The V-taper KPI moved DOWN: Lateral Raise was not performed at all this week. The prior week best was 10kg x 14 reps (Mon 13 Jul); Monday's session this week was aborted at 16 minutes before the exercise was reached. For Ganesh specifically, the love handles sit at lat-width level, collapsing the visual V-taper ratio. Progressive lateral raise weight is the primary mechanism to widen shoulder appearance and change that ratio -- it must be programmed EARLY in each Push session, not as a finisher that gets dropped when time runs short.

Hard flags:

1. SQUAT COLLAPSE: 80kg (e1RM 93.3kg, Mon 13 Jul) -> 40kg (e1RM 48.0kg, Mon 20 Jul).
A 45.3kg e1RM drop in 7 days is not progressive fatigue -- this is an anomalous event.
Investigate cause (pain, injury, emergency) before next Legs session.
2. BENCH COLLAPSE: 65kg (e1RM 80.2kg, Mon 13 Jul) -> 40kg (e1RM 53.3kg, Mon 20 Jul).
A 26.9kg e1RM drop in the same session as squat. Both lifts collapsed in a 16-minute session; likely an aborted warmup, not true strength regression.
3. ABORTED SESSION: Mon 20 Jul lasted 16 minutes with 7 sets. Normal sessions run 65-97 minutes with 15-16 sets. The session was clearly cut short; root cause unknown.
4. TWO SESSIONS OVER 60 MIN: Sat 18 Jul at 86 min (+26 min over target) and Fri 17 Jul at 70 min (+10 min over). PPL target is 60 min including posture reset and cool-down.
5. ZERO CORRECTIVE WORK: Dead Bug / Bird-Dog / Plank was absent from all 3 sessions.
T8-T12 kyphosis correctives have not been performed in any logged session this week.

Overall verdict: DECLINING

Volume fell 23% week-on-week (15,180 vs 19,685 kg*reps). Sessions dropped from 4 (last week) to 3, against a 6-session PPL target. Shoulder press and chest fly posted genuine strength gains, but squat and bench collapsed in an anomalous Monday session. PPL adherence is 33%. Hip Thrust and core stabilisers were entirely absent. The Lateral Raise KPI moved backward. This week is worse than last week across volume, sessions, adherence, and corrective compliance.

8. PLAN FOR NEXT WEEK

Programme week: W10 (Week 10 of PPL x2, Mon 27 Jul -- Sat 01 Aug)

MONDAY 27 Jul -- Push A (Chest + Shoulders + Triceps)

Lateral Raise (Dumbbell)	3 sets x 12 reps @ 11.25kg [V-TAPER KPI -- do FIRST]
Bench Press (Barbell)	3 sets x 10 reps @ 38kg

[CAUTION: Mon 20 Jul session appears to have been aborted, not a true strength drop.

If no pain or injury, warm up to 60kg and work to 65kg x 8 reps if form holds.

38kg is the strict rule-based floor; return to prior working weight if possible.]

Incline Chest Press (Machine) 3 sets x 10 reps @ 31.25kg

Chest Fly (Machine) 3 sets x 10 reps @ 66.25kg

Skullcrusher (Dumbbell) 3 sets x 12 reps @ 21.25kg

Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]

Focus: Lateral Raise goes FIRST in the session -- it is the V-taper KPI and must not be cut by time pressure. Full session must finish inside 60 min; trim rest periods.

TUESDAY 28 Jul -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 4 sets x 7 reps @ 72.5kg

Lat Pulldown (or Pull Up bw) 3 sets x 8 reps @ 50kg

(conservative start; use machine if Pull Up shoulder feels compromised)

Bicep Curl (Machine) 3 sets x 10 reps @ 26.25kg

Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]

Focus: 4 working sets on the row -- back was 7 sets this week vs a 14-set weekly target;

Pull A must carry the primary back-compound volume this week.

WEDNESDAY 29 Jul -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 sets x 10 reps @ 60kg [MANDATORY -- APT correction]

Squat (Barbell) 3 sets x 6 reps @ 38kg

(rule-based floor; if Mon 20 Jul was an abort, warm up through 60kg and judge feel)

Leg Extension (Machine) 3 sets x 10 reps @ 78.25kg

Romanian Deadlift (Barbell) 3 sets x 8 reps @ 77.5kg

Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]

Focus: Hip Thrust FIRST -- APT has not been addressed in 2+ weeks. Start at 60kg to establish motor pattern before loading; all 3 sets before any other leg work.

THURSDAY 30 Jul -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 3 sets x 8 reps @ 92.5kg

Lateral Raise (Dumbbell) 3 sets x 12 reps @ 11.25kg [V-TAPER KPI]

Overhead Press (Barbell) 3 sets x 6 reps @ 47.25kg

(hold at 47.25kg -- only 2 of 3 sets hit this weight last time; confirm all 3 before +2.5kg)

Chest Fly (Machine) 3 sets x 10 reps @ 66.25kg

Skullcrusher (Dumbbell) 3 sets x 12 reps @ 21.25kg

Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]

Focus: Shoulder press entering new territory at 92.5kg -- watch for anterior impingement; if range of motion narrows or pinching is felt, switch to dumbbell press at 30kg.

FRIDAY 01 Aug -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 3 sets x 7 reps @ 72.5kg

Deadlift (Barbell) 3 sets x 7 reps @ 82.5kg

Shrug (Barbell) 3 sets x 12 reps @ 71.25kg

Rear Delt Reverse Fly (Dumbbell) 3 sets x 12 reps @ 11.25kg [MANDATORY rear delt]

Bicep Curl (Machine) 3 sets x 10 reps @ 26.25kg

Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]

Focus: 3 full sets of Rear Delt Fly -- non-negotiable. Only 2 sets were done Fri 17 Jul; weekly rear delt target is 8 sets and Friday Pull B must contribute 3 of those.

SATURDAY 02 Aug -- Legs B (Glutes, Hamstrings, Single-Leg)

- Hip Thrust (Barbell) 3 sets x 10 reps @ 60kg [MANDATORY -- APT correction]
- Romanian Deadlift (Barbell) 3 sets x 8 reps @ 77.5kg
- Leg Curl (Machine) 3 sets x 10 reps @ 40kg (conservative; no recent log)
- Lunge (Dumbbell) single-leg 3 sets x 10 reps @ 12kg each hand (conservative start)
- Dead Bug 3 sets x 10 reps [MANDATORY -- T8-T12 corrective]
- Focus: Hip Thrust MANDATORY -- last Saturday's Push session left APT unaddressed entirely.
- Legs B on Saturday is the single most important session to get right this week.

+-----+		
Deload	: not yet -- next due Week 11, ~07 Aug 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
