

30-Day Analysis Report

This week : 30 Jul to 06 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-06

WEEKLY TRAINING REPORT

Generated : 2026-08-06 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 30 Jul to 06 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 5, 3, 0 sessions (avg 2.7)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min

Type : Full Body A -- Monday

Volume : 3,000 kg*reps | 13 sets

Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 05 Aug 2026 08:54 IST | 51 min

Type : Full Body B -- Wednesday

Volume : 5,973 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM

Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]

Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]

Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (09 Jul-16 Jul): [#####] 26,147 kg*reps 5 sess

Wk -2 (16 Jul-23 Jul): [#####.....] 15,180 kg*reps 3 sess

Wk -1 (23 Jul-30 Jul): [.....] 0 kg*reps 0 sess

This wk (30 Jul-06 Aug): [#####.....] 8,973 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

* FLAGS: rep collapse (10->6)

[C] Overhead Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -3.4kg vs 08 Jul

Next session : 38.0kg x 10 reps

* FLAGS: rep collapse (10->4)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : SAME as 15 Jul

Next session : 75kg x 8 reps

[C] Squat (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -21.3kg vs 13 Jul

Next session : 57.0kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : SAME as 08 Jul

Next session : 10kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : DOWN -4.7kg vs 15 Jul

Next session : 66.5kg x 12 reps

* FLAGS: rep collapse (12->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 08 Jul

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		3		6		3		LOW
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (09 Jul-16 Jul): 5 sessions

Wk -2 (16 Jul-23 Jul): 3 sessions

Wk -1 (23 Jul-30 Jul): 0 sessions

Time between sessions this week:

Mon 03 Aug 08:25 -> Wed 05 Aug 08:54: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	6	10	AT RISK
Shoulders	6	8	AT RISK
Traps	3	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	10	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 4

Weeks since last deload : 4 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W11 (started 2026-05-24; 73 days elapsed = 10.4 weeks, rounded up)

Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+			
Mon 03 Aug	Push A	Full Body (INFERRED)	MISS -- wrong session type
Wed 05 Aug	Legs A	Full Body (INFERRED)	MISS -- wrong session type
Tue 04 Aug	Pull A	No session	MISSED
Thu 06 Aug	Push B	No session	MISSED
Fri 07 Aug	Pull B	No session	MISSED
Sat 08 Aug	Legs B	No session	MISSED

Note: No PPL keywords found in any title this week. Both sessions titled "Full Body A" and "Full Body B" contain push + pull + leg exercises mixed and cannot be matched to a single PPL session type. Both marked INFERRED.

Adherence: 0% (0 of 2 sessions matched expected PPL type on correct day)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions logged

Leg work done (Squat, Leg Ext, RDL) without Hip Thrust -- APT ABSENT

Core stabiliser (all sessions): 0 of 2 sessions -- Dead Bug/Bird-Dog missing from both

Rear delt work in Pull sessions: 0 of 0 Pull sessions (no dedicated Pull session logged)

0 rear delt sets total this week vs 8 required

Sessions over 60 min : Mon 03 Aug -- 82 min (22 min over 60 min limit)
Wed 05 Aug -- 51 min (OK)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps

Prior week : N/A -- no sessions 23-29 Jul

Last logged : 10kg x 14 reps (Mon 13 Jul)

Trend : SAME -- no weight progression for 3 consecutive weeks of data

7. KEY INSIGHTS

Recovery at 44

Ganesh completed 2 sessions this week: Mon 03 Aug 08:25 IST and Wed 05 Aug 08:54 IST -- a gap of exactly 48h. This clears the 48h minimum between same-muscle sessions, but only barely. Both sessions were Full Body format, meaning chest, back, legs, and shoulders were all loaded on Monday and then expected to complete full recovery by Wednesday. At 44, connective tissue and tendons recover 15-20% slower than in the late 20s. The 48h gap meets the muscle minimum but is the floor, not the target -- 72h between full-body sessions would be safer at this age and training load. All same-muscle pairs cleared 48h this week: no violations, but operating at minimum tolerance.

PPL Adherence -- Week 11 of Programme

Adherence this week: 0%. Both sessions completed were Full Body (INFERRED), not matching the PPL x2 schedule. Monday should have been Push A; Wednesday should have been Legs A. Tuesday, Thursday, Friday, and Saturday had no sessions, leaving 4 of 6 planned days untrained. Now 11 weeks into the programme (started 24 May 2026), Ganesh is still running Full Body sessions ("Full Body A", "Full Body B") instead of the PPL split. The Saturday Legs B session has been skipped repeatedly -- this is the second mandatory Hip Thrust session of the week and a critical APT correction window. The pattern of four-day training weeks (Mon/Wed only) is now a recurring issue.

Corrective Compliance

Hip Thrust hit rate: 0 out of 0 dedicated Legs A or Legs B sessions (none logged this week). Leg exercises (Squat, Leg Extension, RDL) were done in both sessions without Hip Thrust -- APT correction was completely absent. Core stabiliser (Dead Bug, Bird-Dog): 0 of 2 sessions. T8-T12 kyphosis work missed entirely. Rear delt sets: 0 this week vs the 8-set weekly target. At 44, when the anterior deltoid (loaded by OHP and Lateral Raise) consistently outperforms the posterior deltoid (Face Pull and Reverse Fly absent), the supraspinatus and infraspinatus tendons carry uneven strain during all pressing and overhead movements. Weeks of zero rear delt work is a documented pathway to rotator cuff impingement in masters athletes. This is the highest-priority corrective gap in the programme.

Lateral Raise -- V-Taper KPI

Flat for 3 weeks: 10kg x 14 reps (Mon 03 Aug) vs 10kg x 14 reps (Mon 13 Jul).
The prior 7-day window (Jul 23-29) had zero sessions. There was one rep improvement from Jul 6 (10kg x 13) to Jul 13 (10kg x 14), but no change since.
Ganesh's love handles sit at the same level as lat width, collapsing the shoulder-to-waist visual ratio. Lateral Raise weight is the primary lever to widen the shoulder silhouette. The target is consistent 15 reps across all 3 sets before moving to 11.25kg. Push for the 15th rep next Monday.

Hard Flags from Session Data

- (1) Session duration: Mon 03 Aug ran 82 min -- 22 min over the 60 min cap.
Trim warm-up or remove one accessory exercise to get under 60 min.
- (2) Bench Press pyramid collapse (Mon 03 Aug): 40kg x 10, 50kg x 10, 60kg x 6.
The pyramid inflates fatigue so the top set collapses. Next session use flat sets: 57kg x 3 x 6 -- no pyramid.
- (3) OHP weight jump collapse (Wed 05 Aug): 40kg x 10, then jumped 12.5% to 45kg and got 5 then 4 reps. A 12.5% weight jump is too aggressive. Drop to 38kg x 3 x 10 and build to consistent 10 reps before adding weight.
- (4) Leg Extension rep collapse (Wed 05 Aug): 70kg x 12, 70kg x 11, 70kg x 8.
Progressive fatigue within session. Drop to 66.5kg x 3 x 12.
- (5) Pull Up logged as 0kg in all sessions: Bodyweight is technically 0kg in Hevy, but 3 consecutive weeks of 0kg prevents e1RM tracking. Log bodyweight (~87kg) as base or use Hevy bodyweight tagging to enable trend tracking.

Overall Verdict

Volume: 8,973 kg*reps this week vs 0 in Week -1 (zero sessions Jul 23-29) and 26,147 in Week -3 (peak, 5 sessions). Strength dropped across all key lifts vs 3 weeks ago: Bench Press -8.2kg e1RM, OHP -3.4kg e1RM, Squat -21.3kg e1RM.
PPL adherence: 0%. Corrective compliance: 0% across all three markers (Hip Thrust, core stabiliser, rear delts). The bounce from zero sessions is positive but the trend across 4 weeks -- 5, 3, 0, 2 sessions -- is clearly declining.
Strength, corrective compliance, and PPL structure are all moving in the wrong direction.

Overall: DECLINING

8. PLAN FOR NEXT WEEK

Programme week: W12 (Week 12 of PPL x2)

Note: W11 deload was flagged by the system but not implemented in Mon/Wed sessions. W12 returns to normal training; next deload due W15.

MONDAY 10 AUG -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 3 x 6 @ 57.0kg [5% drop; rep collapse flagged]
Incline Chest Press (Machine) 3 x 10 @ 30.0kg [conservative; last logged Jul 18]
Lateral Raise (Dumbbell) 3 x 14 @ 10.0kg [flat 3 weeks; push for 15th rep]
Triceps Pushdown 3 x 11 @ 27.2kg [consistent; maintain]
Dead Bug 3 x 10 [mandatory T8-T12 -- do not skip]

Focus: Bench at 57kg flat sets all 3 -- no pyramiding. If all 3 sets hit 6 reps cleanly, add 2.5kg next Push A.

TUESDAY 11 AUG -- Pull A (Back compound + Biceps)

Romanian Deadlift (Barbell) 3 x 8 @ 75.0kg [consistent; maintain]

Pull Up 3 x 6 @ bodyweight [log 0kg; complete all 3 sets]

Bicep Curl (Dumbbell) 3 x 10 @ 10.0kg [consistent; maintain]

Bird-Dog 3 x 10/side [mandatory T8-T12 -- do not skip]

Focus: First dedicated Pull A session in weeks. Control RDL eccentric -- 3 sec down. Pull Up: full dead hang to chin over bar.

WEDNESDAY 12 AUG -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 x 10 @ 60.0kg [MANDATORY APT correction]

Squat (Barbell) 3 x 6 @ 57.0kg [5% drop; rebuild after collapse]

Leg Extension (Machine) 3 x 12 @ 66.5kg [5% drop for rep collapse]

Dead Bug 3 x 10 [mandatory T8-T12 -- do not skip]

Focus: Hip Thrust goes first, before fatigue. If short on time, cut Leg Extension -- never cut Hip Thrust. APT correction is non-negotiable.

THURSDAY 13 AUG -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 10 @ 38.0kg [5% drop; rep collapse flagged]

Lateral Raise (Dumbbell) 3 x 14 @ 10.0kg [V-taper KPI; push for 15 reps]

Triceps Pushdown 3 x 11 @ 27.2kg [consistent; maintain]

Bird-Dog 3 x 10/side [mandatory T8-T12 -- do not skip]

Focus: OHP reset at 38kg flat sets only -- no jumping to 45kg. Get 3 x 10 consistently at 38kg, then add 2.5kg. The 12.5% jump was too fast.

FRIDAY 14 AUG -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 3 x 7 @ 70.0kg [last logged Jul 17; maintain]

Face Pull 3 x 15 @ 15.0kg [MANDATORY rear delt correction]

Rear Delt Reverse Fly (DB) 3 x 13 @ 10.0kg [last logged Jul 17; maintain]

Bicep Curl (Dumbbell) 3 x 10 @ 10.0kg [consistent; maintain]

Bird-Dog 3 x 10/side [mandatory T8-T12 -- do not skip]

Focus: Rear delt gap is the highest health risk this week. Both Face Pull AND Reverse Fly must complete. Zero rear delt work for 2+ weeks is building rotator cuff imbalance. At 44 this is not optional.

SATURDAY 15 AUG -- Legs B (Glutes, Hamstrings, Single-Leg)

Hip Thrust (Barbell) 3 x 10 @ 60.0kg [MANDATORY APT -- 2nd Hip Thrust]

Romanian Deadlift (Barbell) 3 x 8 @ 75.0kg [consistent; maintain]

Leg Extension (Machine) 3 x 12 @ 66.5kg [5% drop; maintain from Wed]

Dead Bug 3 x 10 [mandatory T8-T12 -- do not skip]

Focus: Saturday has been skipped repeatedly. This session MUST happen. The Saturday skip removes the 2nd Hip Thrust and leaves APT unaddressed. Set an alarm. Book the slot in advance.

+-----+		
Deload	: not yet -- next due Week 15, ~30 Aug 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
