

HEVY TRAINING INTELLIGENCE

30-Day Analysis Report

This week : 24 Aug to 31 Aug 2026

Name	Ganesh
Profile	44M 181 cm 87 kg -> 79 kg
Goal	Body Recomposition -- Fat loss, muscle preservation
Pace	0.5 kg/week 15% calorie deficit

Generated on 2026-08-30

WEEKLY TRAINING REPORT

Generated : 2026-08-31 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 24 Aug to 31 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target

Prior 3 weeks: 2, 3, 1 sessions (avg 2.0)

Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.

Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : Volume UP 171% (13,704 vs 5,056 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 24 Aug 2026 10:40 IST | 28 min

Type : Full Body A -- Monday

Volume : 3,450 kg*reps | 13 sets

Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: +0.0kg e1RM

Bench Press (Barbell): 60kg x 8r x 3 sets (e1RM 76.0kg) vs prior: +4.0kg e1RM

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 15r x 3 sets (e1RM 15.0kg) vs prior: +0.3kg e1RM

Session 2: Wednesday 26 Aug 2026 08:24 IST | 57 min

Type : Full Body B -- Wednesday

Volume : 5,882 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +9.1kg e1RM

Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: +0.0kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.7kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 3: Friday 28 Aug 2026 11:03 IST | 8 min

Type : Full Body C -- Friday

Volume : 4,372 kg*reps | 11 sets

Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +2.4kg e1RM

Leg Press (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: +0.0kg e1RM

Lat Pulldown (Machine): 66kg x 6r x 2 sets (e1RM 79.2kg) vs prior: +0.0kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: -1.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (03 Aug-10 Aug): [#####.....] 8,973 kg*reps 2 sess

Wk -2 (10 Aug-17 Aug): [#####.....] 13,059 kg*reps 3 sess

Wk -1 (17 Aug-24 Aug): [#####.....] 5,056 kg*reps 1 sess

This wk (24 Aug-31 Aug): [#####.....] 13,704 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 8 reps (e1RM 76.0kg)

vs prior : UP +4.0kg vs 03 Aug

Next session : 62.5kg x 8 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : UP +2.4kg vs 14 Aug

Next session : 72.5kg x 8 reps

[C] Lat Pulldown (Machine)

Best this week : 66kg x 6 reps (e1RM 79.2kg)

vs prior : SAME as 14 Aug

Next session : 66kg x 6 reps

[C] Leg Press (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : SAME as 14 Aug

Next session : 50kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)

vs prior : SAME as 12 Aug

Next session : 45kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

- FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 6 reps (e1RM 84.0kg)

vs prior : SAME as 10 Aug

Next session : 70kg x 6 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : UP +0.7kg vs 12 Aug

Next session : 21.25kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)

vs prior : SAME as 03 Aug

Next session : 11.25kg x 15 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 9 reps (e1RM 100.1kg)

vs prior : SAME as 12 Aug

Next session : 77kg x 9 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : DOWN -1.0kg vs 14 Aug

Next session : 9.5kg x 10 reps

- FLAGS: 0kg logged -- check entry

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : UP +9.1kg vs 19 Aug

Next session : 44.25kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 05 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

• +-----+-----+-----+-----

Chest | 3 | 12 | 9 | CRITICAL

Back | 8 | 14 | 6 | CRITICAL

Shoulders | 6 | 10 | 4 | CRITICAL

Traps | 0 | 6 | 6 | CRITICAL

Rear Delts | 3 | 8 | 5 | CRITICAL

Biceps | 6 | 8 | 2 | LOW

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 13 | 14 | 1 | LOW

Core | 0 | 6 | 6 | CRITICAL

Push sets: 12 | Pull sets: 17 | Ratio pull:push = 1.42 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (03 Aug-10 Aug): 2 sessions

Wk -2 (10 Aug-17 Aug): 3 sessions

Wk -1 (17 Aug-24 Aug): 1 sessions

Time between sessions this week:

Mon 24 Aug 10:40 -> Wed 26 Aug 08:24: 46h

Wed 26 Aug 08:24 -> Fri 28 Aug 11:03: 51h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Mon 24 Aug + Wed 26 Aug (46h apart): overlap = legs, shoulders

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK

Back 8 10 AT RISK

Shoulders 6 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 3 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 13 10 OK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 8

Weeks since last deload : 8 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W14 (started 2026-05-24; Mon 24 Aug 2026 = start of Week 14)

Sessions this week: 3 of 6 target

NOTE: All workout titles use 'Full Body A/B/C' naming -- no PPL keyword present in any title. Session types inferred from dominant exercises.

Day | Expected | Detected | Status

• +-----+-----+-----

Mon 24 Aug | Push A | INFERRED Push (mixed) | PARTIAL -- also Squat+Pull Up

Tue 25 Aug | Pull A | -- | MISSED

Wed 26 Aug | Legs A | INFERRED Mixed | PARTIAL -- OHP+Tricep dominate

Thu 27 Aug | Push B | -- | MISSED

Fri 28 Aug | Pull B | INFERRED Pull | OK -- Row+Lat Pulldown+Rear Delt

Sat 29 Aug | Legs B | -- | MISSED

Sun 30 Aug | REST | Rest | OK

Adherence: 33% (2 of 6 expected sessions matched correct type on correct day;

3 expected sessions not attempted; Wed session logged on Legs A day

but dominated by Push/Arms rather than Legs)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 Legs-day sessions -- MISSING on Wed 26 Aug
Sat 29 Aug Legs B session not attempted at all.
Hip Thrust has ZERO appearances in the 30-day log.
Core stabiliser (all sessions): 0 of 3 sessions -- Dead Bug / Bird-Dog absent
in all three sessions (T8-T12 kyphosis uncorrected
all week; Back Extension warmup sets do not count --
0 working sets and wrong movement pattern).
Rear delt work in Pull sessions: 1 of 1 pull sessions -- Fri 28 Aug has Rear Delt
Reverse Fly BUT sets 2 and 3 logged at 0kg (data
error -- only 1 valid set of 10kg x 10 out of 3).
Sessions over 60 min: None (Mon 28 min OK; Wed 57 min OK; Fri 8 min -- FLAG:
8 min for 11 sets is physically impossible; possible
incomplete session or Hevy app data entry error).

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 15 reps | Prior week (17-23 Aug): NOT LOGGED
Last logged prior: 10 Aug -- 10kg x 14 reps | Trend: SAME
(10kg weight unchanged for 4+ weeks. One more rep than 10 Aug but no load increase.
V-taper KPI is stalled. All 3 sets this week hit 15 reps -- progression to 11.25kg
is due next session.)

7. KEY INSIGHTS

RECOVERY AT 44

Two inter-session gaps this week: Mon 24 Aug (10:40) to Wed 26 Aug (08:24) = 45h 44min,
and Wed 26 Aug (08:24) to Fri 28 Aug (11:03) = 50h 39min. Only one of two gaps cleared
the 48h minimum. The Monday and Wednesday sessions both hit shoulders -- Lateral Raise
on Monday, Overhead Press on Wednesday -- with only 46h between them. At 44, shoulder
musculature and rotator cuff tendons require a full 48-72h repair window. Training them
under 48h apart adds accumulated fatigue without triggering the repair-and-growth response,
and raises rotator cuff strain risk. The Wednesday session should have started no earlier
than Tuesday 10:40 to clear the 48h floor for shoulders. The Wed-Fri gap (51h) was fine.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 14 of the PPL x2 programme (started 2026-05-24). Three of six expected
sessions were attempted (50% coverage), and only 2 of 6 matched the correct type for
the day (33% PPL adherence). The Monday/Wednesday/Friday full-body rotation has repeated
every week with no transition to the PPL split. Tuesday, Thursday, and Saturday are
consistently skipped -- these are the Pull A, Push B, and Legs B days. At Week 14, this
is a structural pattern, not a random miss. The 6-day PPL commitment requires scheduling
all six sessions in the 6-9 PM IST window with no exceptions. Missing Sat Legs B means
Hip Thrust has also not been done on Saturdays, compounding the APT correction deficit.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0 of 1 Legs-day sessions -- 0%. Reviewing the full 30-day log, Hip Thrust has not appeared in any of the 9 sessions logged. Fourteen programme weeks in, APT correction has not started. Anterior pelvic tilt puts the lumbar spine in chronic extension; the squat and leg press volume being logged actively reinforce the tilt unless countered by hip-dominant glute work. The Hip Thrust loads the gluteus maximus through full hip extension range, directly opposing the hip flexor tightness at the root of APT. Without it, squatting volume worsens posture over time rather than correcting it. Core stabiliser (Dead Bug or Bird-Dog for T8-T12 kyphosis) was absent in all 3 sessions this week -- 0 of 3. Rear delt total this week: 3 sets logged, but 2 were at 0kg (data error on Fri 28 Aug), leaving 1 valid set against an 8-set-per-week target. If anterior deltoids stay significantly stronger than rear deltoids over months, the humerus rotates forward in the glenoid socket. This compresses the supraspinatus tendon against the acromion on each shoulder elevation -- the mechanism behind rotator cuff impingement, which is slow to heal and common in men over 40.

LATERAL RAISE TREND -- V-TAPER KPI

Lateral Raise this week: 10kg x 15 reps across 3 sets. No lateral raise was logged in the prior week (17-23 Aug). The last comparable data point is 10 Aug: 10kg x 14 reps. The weight has been 10kg for at minimum four weeks; the rep count moved from 14 to 15 but no load progression has occurred. The V-taper KPI is STALLED. For Ganesh specifically, the love handles currently sit at lat-width level, meaning the shoulder silhouette has no width advantage over the waist. Medial delt hypertrophy -- driven by progressive lateral raise overload -- is the primary mechanism for widening the shoulder line and creating that ratio. This week all 3 sets hit 15 reps, which triggers the progression rule: move to 11.25kg next session and log carefully whether reps hold.

HARD FLAGS

1. Friday 28 Aug session duration: 8 minutes for 11 working sets of Bent Over Row, Leg Press, Lat Pulldown, and Rear Delt Fly is physically impossible. Either the session was ended early and logged as complete, or the Hevy timestamp has a data entry error. Investigate before the next session.
2. Rear Delt Reverse Fly (Fri 28 Aug): sets 2 and 3 logged at 0kg. Only set 1 at 10kg x 10 is valid. Correct the Hevy entry immediately -- 0kg entries corrupt the rolling e1RM and progression tracking for this critical exercise.
3. Mon 24 Aug to Wed 26 Aug: 46h gap for shoulders -- below the 48h recovery minimum. OHP on Wednesday should not have been programmed this close to Monday's shoulder work.
4. Hip Thrust: zero appearances in the entire 30-day log across all 9 sessions. APT correction has not begun despite 14 programme weeks elapsed.
5. Core stabiliser (Dead Bug / Bird-Dog): absent in all 3 sessions this week -- 0 of 3. The T8-T12 kyphosis corrective has not been executed in any session on record.
6. Deload overdue by 4 weeks: section 6 flags 8 weeks since last deload against a 4-week cycle. CNS and connective tissue fatigue accumulate invisibly -- strength and volume data do not capture it. W15 must be a full deload.

OVERALL VERDICT

Volume rose 171% week-on-week (13,704 vs 5,056 kg*reps) and session count improved from 1 to 3. Bench Press e1RM moved up 4kg, Bent Over Row up 2.4kg, and Seated Leg Curl up 9.1kg. These are positive signals. However, PPL adherence is 33%, both corrective priorities (Hip Thrust, Core stabiliser) have a 0% compliance rate, the Lateral Raise

KPI is stalled at 10kg for four weeks, and a deload is 4 weeks overdue. Volume improvement is narrow without the structural changes. Overall verdict: HOLDING.

8. PLAN FOR NEXT WEEK

Programme week: W15 (Week 15 of PPL x2) -- DELOAD WEEK

All sets cut to 2 per exercise. Weights unchanged. No new PRs. No pushing for extra reps. Deload purpose: joint and connective tissue recovery after 8 consecutive load weeks.

MONDAY -- Push A (Chest primary + Shoulders + Triceps) [DELOAD]

Bench Press (Barbell) 2 x 8 @ 60kg

(All 3 sets hit 8 reps this week -- full progression due. Hold at 60kg this deload; move to 62.5kg on Week 16 return.)

Overhead Press (Barbell) 2 x 7 @ 45kg

Lateral Raise (Dumbbell) 2 x 15 @ 10kg

(All 3 sets hit 15 reps this week -- move to 11.25kg Week 16. Deload at 10kg.)

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 2 x 10 reps -- mandatory T8-T12 corrective, do not skip

Key focus: deload means controlled, not heavy. Log the Lateral Raise weight precisely so the 11.25kg Week 16 jump is confirmed in data.

TUESDAY -- Pull A (Back compound + Biceps) [DELOAD]

Bent Over Row (Barbell) 2 x 8 @ 70kg

Lat Pulldown (Machine) 2 x 6 @ 66kg

Pull Up 2 x 6 @ bodyweight

(Log as BW in Hevy -- do NOT log as 0kg. 0kg corrupts e1RM tracking.)

Bicep Curl (Barbell) 2 x 10 @ 20kg

Bird-Dog 2 x 10 each side -- mandatory T8-T12 corrective

Key focus: Tuesday is the most consistently skipped day. Deload sessions run 35-40 min with 2 sets each -- there is no scheduling reason to miss this.

WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes) [DELOAD]

Hip Thrust (Barbell) 2 x 10 @ 60kg -- MANDATORY APT correction

(Not logged in 14 weeks of programme history. Set up barbell before anything else. Pad and position before starting the session. Do not skip.)

Squat (Barbell) 2 x 6 @ 70kg

Leg Extension (Machine) 2 x 9 @ 77kg

Seated Leg Curl (Machine) 2 x 9 @ 43kg

Dead Bug 2 x 10 reps -- mandatory T8-T12 corrective

Key focus: Hip Thrust is the entire corrective priority for this session.

If Hip Thrust is skipped again on Wednesday, APT correction is 15 weeks behind.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps) [DELOAD]

Overhead Press (Barbell) 2 x 7 @ 45kg

Lateral Raise (Dumbbell) 2 x 15 @ 10kg

(Second Lateral Raise session this week -- V-taper KPI gets two exposures.)

Incline Bench Press (Barbell) 2 x 8 @ 40kg

(No 30-day log for this variation. Conservative start; note shoulder feel.)

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 2 x 10 reps -- mandatory T8-T12 corrective

Key focus: Thursday has been missed every recorded week. Commit to the

6-9 PM IST slot before Monday starts. Incline Bench replaces flat Bench as Push B chest variation -- cue upper chest, not anterior delt.

FRIDAY -- Pull B (Back + Rear Delts + Biceps) [DELOAD]

Lat Pulldown (Machine) 2 x 6 @ 66kg

Bent Over Row (Barbell) 2 x 8 @ 70kg

Rear Delt Reverse Fly (DB) 2 x 10 @ 10kg

(CRITICAL: fix the Fri 28 Aug Hevy entry first -- sets 2 and 3 must be corrected from 0kg to 10kg. All sets this session must be logged at 10kg.)

Face Pull (Cable) 2 x 15 @ 15kg

(No 30-day log for Face Pull. Start conservative. If cable unavailable, add 2 extra Reverse Fly sets instead. Rear delts at 1 valid set vs 8 target.)

Bicep Curl (Barbell) 2 x 10 @ 20kg

Bird-Dog 2 x 10 each side -- mandatory T8-T12 corrective

Key focus: rear delts are critically undertrained (1 valid set this week vs 8 target). Face Pull + Reverse Fly in the same session is the catch-up mechanism. Both are mandatory this session -- not optional.

SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg + Rack Pull) [DELOAD]

Hip Thrust (Barbell) 2 x 10 @ 60kg -- MANDATORY APT correction

Leg Press (Machine) 2 x 12 @ 50kg

Seated Leg Curl (Machine) 2 x 9 @ 43kg

Bulgarian Split Squat (DB) 2 x 8 @ 15kg each hand

(No 30-day log. Start conservative; note balance and knee tracking.)

Rack Pull (Barbell) 2 x 6 @ 80kg

(No 30-day log. Rack Pull targets traps -- 0 trap sets this week vs 6 target.

Set pins just below knee. Focus on hinge pattern not load.)

Dead Bug 2 x 10 reps -- mandatory T8-T12 corrective

Key focus: Saturday has been missed every recorded week. Legs B plus Rack Pull addresses traps (0 sets this week) and the second mandatory Hip Thrust of the week. Both are non-negotiable.

+-----+
Deload : needed this week (W15) -- OVERDUE at 8 weeks
Timing : 6-9 PM IST -- no sessions after midnight
Nutrition: 2,367 kcal/day 174g protein minimum
+-----+
