

30-Day Analysis Report

30-Day Period ending 2026-09-15

Ganesh | Week 17 of PPL x2

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-15

WEEKLY TRAINING REPORT

Generated : 2026-09-16 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 09 Sep to 16 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 2, 2, 2 sessions (avg 2.0)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 77kg x 10 reps (e1RM 102.7kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume UP 75% (10,669 vs 6,090 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 09 Sep 2026 10:17 IST | 52 min

Type : Full Body B -- Wednesday

Volume : 6,009 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +1.5kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 77kg x 10r x 3 sets (e1RM 102.7kg) vs prior: +2.6kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Friday 11 Sep 2026 09:47 IST | 71 min

Type : Full Body C -- Friday

Volume : 4,660 kg*reps | 9 sets

Bent Over Row (Barbell): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: -4.7kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: +0.0kg e1RM

Leg Press (Machine): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: +14.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (19 Aug-26 Aug): [#####.....] 8,506 kg*reps 2 sess

Wk -2 (26 Aug-02 Sep): [#####.] 10,254 kg*reps 2 sess

Wk -1 (02 Sep-09 Sep): [#####.....] 6,090 kg*reps 2 sess

This wk (09 Sep-16 Sep): [#####] 10,669 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : DOWN -4.7kg vs 28 Aug

Next session : 57.0kg x 12 reps

[C] Leg Press (Machine)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : UP +14.0kg vs 28 Aug
Next session : 62.5kg x 12 reps

[C] Overhead Press (Barbell)
Best this week : 45kg x 8 reps (e1RM 57.0kg)
vs prior : UP +1.5kg vs 19 Aug
Next session : 47.5kg x 8 reps

[I] Bicep Curl (Barbell)
Best this week : 20kg x 10 reps (e1RM 26.7kg)
vs prior : SAME as 26 Aug
Next session : 20kg x 10 reps

[I] Leg Extension (Machine)
Best this week : 77kg x 10 reps (e1RM 102.7kg)
vs prior : UP +2.6kg vs 26 Aug
Next session : 78.25kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)
Best this week : 10kg x 12 reps (e1RM 14.0kg)
vs prior : SAME as 04 Sep
Next session : 10kg x 12 reps

[I] Seated Leg Curl (Machine)
Best this week : 43kg x 9 reps (e1RM 55.9kg)
vs prior : SAME as 26 Aug
Next session : 43kg x 9 reps

[I] Triceps Pushdown
Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
vs prior : SAME as 26 Aug
Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
Chest	0	12	12	CRITICAL
Back	3	14	11	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	0	6	6	CRITICAL
Rear Delts	3	8	5	CRITICAL
Biceps	6	8	2	LOW
Triceps	3	8	5	CRITICAL
Legs	9	14	5	CRITICAL
Core	0	6	6	CRITICAL
Push sets: 6 Pull sets: 12 Ratio pull:push = 2.00 (OK -- balanced)				
Rear delts: 3 sets this week (need 8+/week)				
SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.				
Traps : 0 sets this week (need 6+/week)				
SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.				
Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core				

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (19 Aug-26 Aug): 2 sessions

Wk -2 (26 Aug-02 Sep): 2 sessions

Wk -1 (02 Sep-09 Sep): 2 sessions

Time between sessions this week:

Wed 09 Sep 10:17 -> Fri 11 Sep 09:47: 47h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Wed 09 Sep + Fri 11 Sep (47h apart): overlap = legs, other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 0 8 AT RISK

Back 3 10 AT RISK

Shoulders 3 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 3 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 9 10 AT RISK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 10

Weeks since last deload : 10 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W17 (started 2026-05-24; 115 days elapsed, 16.4 weeks -> rounded up)
Sessions this week: 2 of 6 target

NOTE: Hevy logs show "Full Body A/B/C" titles, not PPL titles. Types inferred from exercises where no PPL keyword (push/pull/legs a/b) found in title.

Day | Expected | Detected | Status

-----+-----+-----+-----
Wed 09 Sep | Legs A | Full Body B (INFERRED: Mixed) | MISMATCH
Thu 10 Sep | Push B | (no session) | MISSED
Fri 11 Sep | Pull B | Full Body C (INFERRED: Pull B) | OK (inferred)
Sat 12 Sep | Legs B | (no session) | MISSED
Sun 13 Sep | Rest | Rest | OK
Mon 14 Sep | Push A | (no session) | MISSED
Tue 15 Sep | Pull A | (no session) | MISSED

Adherence: 17% (1 of 6 planned sessions on correct day or correctly inferred)
Pattern note: Wed+Fri only -- Mon, Thu, Sat, Tue all missed consistently.

Wed 09 Sep inference detail:
OHP (shoulder press -> Push) + Triceps Pushdown (-> Push)
Seated Leg Curl + Leg Extension (-> Legs)
Bicep Curl (curl -> Pull)
Result: True Full Body mix -- cannot classify as any single PPL type.
Expected Legs A -- MISMATCH.

Fri 11 Sep inference detail:
Bent Over Row (row -> Pull) + Rear Delt Fly (-> Pull/rear delts)
Leg Press (leg press -> Legs)
Dominant theme: Pull (2 of 3 exercises); core Pull B components present
(Back compound + Rear Delt Fly). Classified INFERRED Pull B.

CORRECTIVE MARKERS:
Hip Thrust in Legs sessions : 0 of 0 Legs PPL sessions done this week
MISSING -- No Legs A or Legs B session completed. Hip Thrust entirely absent.
CRITICAL: APT correction skipped for the entire week.

Core stabiliser (Dead Bug / Bird-Dog / Plank):
Wed 09 Sep : NOT present
Fri 11 Sep : NOT present
Score: 0 of 2 sessions -- T8-T12 kyphosis corrective missing all week.

Rear delt work in Pull sessions:
Fri 11 Sep : Rear Delt Reverse Fly 3 sets x 10-12 reps -- PRESENT
Score: 1 of 1 inferred Pull sessions -- OK for sessions completed.
Weekly total: 3 sets vs 8-set target. Short by 5 sets.

Sessions over 60 min:
Wed 09 Sep : 52 min -- OK
Fri 11 Sep : 71 min -- OVER (11 min above 60-min target)

LATERAL RAISE (V-TAPER KPI):

This week : NOT PERFORMED (0 sets logged in Wed 09 Sep or Fri 11 Sep sessions)

Prior week : 10kg x 15 reps (Mon 07 Sep, 3 working sets)

Trend : DOWN (exercise not performed this week)

Note: Love handles sit at lat-width level -- lateral delt width is the primary visual lever for V-taper. Skipping lateral raises stalls this KPI.

7. KEY INSIGHTS

RECOVERY AT 44

This week had two sessions: Wed 09 Sep 10:17 IST and Fri 11 Sep 09:47 IST.

The gap was 47 hours 30 minutes -- 30 minutes short of the 48-hour minimum required for muscle repair at 44. Leg muscles were trained in BOTH sessions (Leg Extension + Seated Leg Curl on Wed; Leg Press on Fri), meaning legs were hit again before they had cleared the 48h recovery window. That specific pair -- Wed legs exercises into Fri Leg Press -- is the offender. Every other session pair in the 30-day log had at least 2 days between same-muscle work, so this was not a recurring pattern, but it does flag the Wed+Fri back-to-back scheduling as a structural risk when both sessions include leg volume.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 17 of the PPL x2 programme (started 2026-05-24). The programme is now over four months old and the adherence rate this week was 17% (1 of 6 planned sessions matched the correct PPL type on the correct day). The four-week session count is 2, 2, 2, 2 -- a perfectly flat line at exactly one-third of the 6-session target. The missed-day pattern is telling: Monday, Thursday, Saturday, and Tuesday are consistently skipped. Only Wednesday and Friday are hit reliably. The programme is effectively being run as a 2-day Full Body split, not PPL. Push A, Push B, and Legs B have had near-zero representation across the last month.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0%. There were no Legs A or Legs B sessions, meaning the mandatory APT-correction exercise was not performed at all. Scanning the full 30-day log, Hip Thrust does not appear even once. Anterior pelvic tilt left uncorrected at 44 loads the lumbar spine and tightens the hip flexors progressively -- it compounds with every squat and deadlift that is performed without glute activation from hip thrusts. Core stabiliser presence was also 0 of 2 sessions this week: neither Dead Bug nor Bird-Dog appeared in any log, leaving the T8-T12 lower thoracic kyphosis entirely unaddressed. Rear delt sets reached 3 this week (all in the Fri session), still 5 short of the 8-set weekly target. To be direct: at 44, when the anterior deltoid and pectoral are consistently trained while the posterior cuff is neglected, the humeral head migrates forward in the glenoid socket over time. This reduces the subacromial space and leads to rotator cuff impingement -- a slow-onset injury that tends to announce itself with catching pain during overhead press or lateral raise, by which time structural damage is already underway.

LATERAL RAISE TREND

The V-taper KPI is moving DOWN. Lateral raises were not performed at all this week; the prior week best was 10kg x 15 reps. The weight has been stuck at 10kg for the entire visible 30-day log (24 Aug and 07 Sep both show 10kg x 15r with no progression). Love handles sitting at lat-width level means the visual ratio is collapsed from the side -- the shoulder width that would create the V-shape is not exceeding the waist measurement. Until lateral raise weight moves meaningfully past 12.5-15kg for 12-15 reps, the V-taper visual will not shift. This is the single most important isolation exercise for body recomposition aesthetics for Ganesh and it is currently both progressing too slowly and being skipped entirely in some weeks.

HARD FLAGS

1. SESSION TIMER ERROR: Fri 04 Sep logged 251 minutes (4 hrs 11 min). This is physiologically implausible as a training session. The Hevy timer was almost certainly left running after training ended. Duration data for that session is invalid and should not be used in recovery calculations.
2. RECOVERY VIOLATION: Wed 09 Sep + Fri 11 Sep -- legs overlap, 47.5h gap (0.5h below the 48h minimum). Minor but documented.
3. SESSION OVER 60 MIN: Fri 11 Sep ran 71 minutes, 11 min over the 60-minute programme cap. With only 3 exercises logged, this suggests long rest periods -- a sign of session drift that should be corrected.
4. HIP THRUST: Zero occurrences in the entire 30-day log. APT correction is categorically absent. This is a programme compliance failure, not a minor omission.
5. BENCH PRESS REP COLLAPSE: Mon 07 Sep saw bench drop to 60kg x 6r from the prior 60kg x 8r (Mon 24 Aug). Plan calls for a 5% weight reduction to 57kg for next bench session to rebuild rep quality before progressing.

OVERALL VERDICT: HOLDING

Volume improved 75% week-on-week (10,669 vs 6,090 kg*reps) driven by stronger leg extension and leg press numbers. However, the session count is unchanged at 2 of 6 (now four consecutive weeks at this level), PPL adherence is 17%, corrective compliance is 0% for Hip Thrust and core stabilisers, and the V-taper lateral raise KPI is not progressing.

Volume being up on 2 sessions is a marginal positive inside a pattern of chronic under-training. The programme requires 6 sessions. Until adherence climbs above 4 sessions/week, strength and recomp progress will be severely blunted. Verdict: HOLDING -- not declining, but not moving forward either.

8. PLAN FOR NEXT WEEK

Programme week: W18 (Week 18 of PPL x2 -- W17 served as informal deload)

Progression rules applied:

Compound (+2.5kg if all working sets hit target reps)

Isolation (+1.25kg if all working sets hit target reps)

Rep collapse: -5% on weight before progressing

No log in 30 days: conservative start weight listed

MONDAY 21 Sep -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 3 x 8 @ 57.0kg
[rep collapse: 60kg -> 6r on 07 Sep; -5% = 57kg; rebuild quality first]
Overhead Press (Barbell) 3 x 8 @ 47.5kg
[45kg x 8r all sets hit on 09 Sep; compound +2.5kg]
Lateral Raise (Dumbbell) 3 x 15 @ 11.25kg
[10kg x 15r all sets hit on 07 Sep; isolation +1.25kg; round up to 12kg if dumbbells not available in 1.25kg increments]
Triceps Pushdown 3 x 11 @ 28.5kg
[27.2kg x 11r all sets hit on 09 Sep; isolation +1.25kg]
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)
Key focus: Rebuild bench press with strict 8-rep form at 57kg. Do not grind reps -- if set 3 drops to 5 reps, the 5% cut was correct and next week maintain the same weight.

TUESDAY 22 Sep -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 3 x 12 @ 62.5kg
[60kg x 12r all 3 sets hit on 11 Sep; compound +2.5kg]
Lat Pulldown (Machine) 3 x 8 @ 66kg
[last logged 28 Aug at 66kg x 6r x 2 sets only; increase to 3 sets x 8r]
Pull Up (Bodyweight) 3 x 6
[maintain; add weight when all sets reach 8r]
Bicep Curl (Barbell) 3 x 10 @ 21.25kg
[20kg x 10r all sets hit on 09 Sep; isolation +1.25kg]
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)
Key focus: Bent over row at 62.5kg is a new high -- keep the torso braced at 45 degrees and pull to the lower sternum, not the navel. Row form breaks down first under load.

WEDNESDAY 23 Sep -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust MANDATORY)

Hip Thrust (Barbell) 3 x 10 @ 50kg
[NOT logged in last 30 days; conservative start; establish movement pattern before loading -- posteriorly tilt pelvis at the top, squeeze glutes hard for 1 second. This exercise directly corrects APT.]
Squat (Barbell) 4 x 8 @ 70kg
[70kg x 7r on 07 Sep -- one rep short; maintain weight, hit 8r cleanly]
Leg Extension (Machine) 3 x 10 @ 78.25kg
[77kg x 10r all sets hit on 09 Sep; isolation +1.25kg]
Seated Leg Curl (Machine) 3 x 9 @ 44.25kg
[43kg x 9r all sets hit on 09 Sep; isolation +1.25kg]
Bird-Dog 3 x 10 each side -- DO NOT SKIP (T8-T12 corrective)
Key focus: Hip Thrust is the priority exercise today -- do it second after a short warmup, while fresh. If 50kg feels too easy, that is expected on session 1; quality and depth of glute activation matters more than load.

THURSDAY 24 Sep -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 8 @ 47.5kg
[same base as Monday -- both Push sessions progress together]
Lateral Raise (Dumbbell) 3 x 15 @ 11.25kg
[same as Monday -- V-taper KPI: do not skip this exercise]
Incline Dumbbell Press 3 x 10 @ 20kg per hand
[no recent log; conservative start for chest variation on Push B]
Triceps Pushdown 3 x 11 @ 28.5kg
[same base as Monday]
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)
Key focus: Thursday Push B is the most frequently skipped session --
show up. OHP at 47.5kg on a second consecutive push session will feel
harder than Monday; that is expected and not a regression.

FRIDAY 25 Sep -- Pull B (Back + Rear Delts + Biceps -- Rear Delt Fly MANDATORY)

Bent Over Row (Barbell) 3 x 12 @ 62.5kg
[same as Tuesday]
Rear Delt Reverse Fly 3 x 12 @ 10kg
[on 11 Sep: 10kg x 12r (2 sets) + 10kg x 10r (1 set) -- not all sets
hit 12r; maintain weight until all 3 sets cleanly reach 12r]
Face Pull (Cable) 3 x 15 @ light (start ~20kg cable stack)
[no recent log; mandatory for posterior cuff health; adds rear delt
sets toward the 8-set/week target]
Bicep Curl (Barbell) 3 x 10 @ 21.25kg
[same as Tuesday]
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)
Key focus: This session must hit 6 rear delt sets total (3 Rear Delt Fly
+ 3 Face Pull). Rear delts at 3 sets/week vs 8-set target is the key
shoulder health risk marker. Friday Pull B is the primary fix.

SATURDAY 26 Sep -- Legs B (Glutes + Hamstrings + Single-Leg + Hip Thrust MANDATORY)

Hip Thrust (Barbell) 3 x 10 @ 50kg
[second session at 50kg -- if Wed felt controlled, ready to move to
60kg; if not, maintain 50kg and focus on glute squeeze at top]
Leg Press (Machine) 3 x 12 @ 62.5kg
[60kg x 12r all 3 sets hit on 11 Sep; compound +2.5kg]
Romanian Deadlift 3 x 10 @ 40kg
[no recent log; conservative start; keep slight knee bend, hinge at
hips, feel hamstring stretch -- do not round the lower back]
Seated Leg Curl (Machine) 3 x 9 @ 44.25kg
[same as Wednesday]
Bird-Dog 3 x 10 each side -- DO NOT SKIP (T8-T12 corrective)
Key focus: Hip Thrust is mandatory again today -- both Legs sessions
must include it every week until APT is corrected. Saturday is the
session most likely to be skipped; blocking it in the calendar
on Friday night is the only reliable fix.

+-----+

Deload : not yet -- W17 served as informal deload (2 sessions,
low volume). Next formal deload: W22, ~18 Oct 2026
Timing : 6-9 PM IST -- no sessions after midnight
Nutrition: 2,367 kcal/day 174g protein minimum
+-----+
