

HEVY TRAINING INTELLIGENCE

06 Aug to 13 Aug 2026

Name:	Ganesh
Profile:	44M 181 cm 87 kg -> 79 kg
Goal:	Body Recomposition -- Fat loss, muscle preservation
Pace:	0.5 kg/week 15% calorie deficit

Generated on 2026-08-12

WEEKLY TRAINING REPORT

Generated : 2026-08-13 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 06 Aug to 13 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 4, 0, 2 sessions (avg 2.0)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)

Biggest concern: Back -- 3 sets vs 14 target (11 sets short)

vs last week : Volume DOWN 4% (8,607 vs 8,973 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 10 Aug 2026 08:59 IST | 42 min

Type : Full Body A -- Monday

Volume : 2,980 kg*reps | 13 sets

Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: -9.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 12 Aug 2026 09:09 IST | 65 min

Type : Full Body B -- Wednesday

Volume : 5,627 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: -1.2kg e1RM

Lying Leg Curl (Machine): 36kg x 10r x 3 sets (e1RM 48.0kg)

Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: -2.6kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg)

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (16 Jul-23 Jul): [#####] 21,340 kg*reps 4 sess

Wk -2 (23 Jul-30 Jul): [.....] 0 kg*reps 0 sess

Wk -1 (30 Jul-06 Aug): [#####.....] 8,973 kg*reps 2 sess

This wk (06 Aug-13 Aug): [#####.....] 8,607 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)
vs prior : DOWN -8.2kg vs 13 Jul
Next session : 57.0kg x 6 reps

[C] Overhead Press (Barbell)
Best this week : 45kg x 7 reps (e1RM 55.5kg)
vs prior : DOWN -1.2kg vs 15 Jul
Next session : 42.75kg x 7 reps

[C] Pull Up
Best this week : 0kg x 6 reps (e1RM 0.0kg)
vs prior : First time in 30-day log
Next session : 0kg x 6 reps
• FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)
Best this week : 70kg x 6 reps (e1RM 84.0kg)
vs prior : DOWN -9.3kg vs 13 Jul
Next session : 66.5kg x 6 reps

[I] Bicep Curl (Barbell)
Best this week : 20kg x 9 reps (e1RM 26.0kg)
vs prior : First time in 30-day log
Next session : 20kg x 9 reps

[I] Lateral Raise (Dumbbell)
Best this week : 10kg x 14 reps (e1RM 14.7kg)
vs prior : SAME as 13 Jul
Next session : 10kg x 14 reps

[I] Leg Extension (Machine)
Best this week : 77kg x 9 reps (e1RM 100.1kg)
vs prior : DOWN -2.6kg vs 15 Jul
Next session : 73.15kg x 9 reps

[I] Lying Leg Curl (Machine)
Best this week : 36kg x 10 reps (e1RM 48.0kg)
vs prior : First time in 30-day log
Next session : 36kg x 10 reps

[I] Triceps Pushdown
Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
vs prior : SAME as 15 Jul
Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

• +-----+-----+-----+-----

Chest | 3 | 12 | 9 | CRITICAL

Back | 3 | 14 | 11 | CRITICAL

Shoulders | 6 | 10 | 4 | CRITICAL

Traps | 0 | 6 | 6 | CRITICAL

Rear Delts | 0 | 8 | 8 | CRITICAL

Biceps | 6 | 8 | 2 | LOW

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 10 | 14 | 4 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 12 | Pull sets: 9 | Ratio pull:push = 0.75 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (16 Jul-23 Jul): 4 sessions

Wk -2 (23 Jul-30 Jul): 0 sessions

Wk -1 (30 Jul-06 Aug): 2 sessions

Time between sessions this week:

Mon 10 Aug 08:59 -> Wed 12 Aug 09:09: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK

Back 3 10 AT RISK
Shoulders 6 8 AT RISK
Traps 0 4 AT RISK
Rear Delts 0 6 AT RISK
Biceps 6 6 OK
Triceps 3 6 AT RISK
Legs 10 10 OK
Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 5
Weeks since last deload : 5 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W12 (started 2026-05-24; 80 days elapsed = 11.4 wks, rounded up)
Sessions this week : 2 of 6 target

Day | Expected | Detected | Status

• +-----+-----+-----

Mon 10 Aug | Push A | Full Body A (INFERRED) | MISMATCH
Wed 12 Aug | Legs A | Full Body B (INFERRED) | MISMATCH
Thu 06 Aug | Push B | -- | MISSED
Fri 07 Aug | Pull B | -- | MISSED
Sat 08 Aug | Legs B | -- | MISSED
Tue 11 Aug | Pull A | -- | MISSED
Sun 09 Aug | REST | -- | OK

Inference notes:

Mon 10 Aug -- title 'Full Body A'; exercises: Squat, Bench Press, Pull Up, Lateral Raise. Mix of push/pull/legs -- cannot be inferred as Push A.
Wed 12 Aug -- title 'Full Body B'; exercises: OHP, Lying Leg Curl, Leg Extension, Bicep Curl, Triceps Pushdown. Mix of push/legs/pull -- cannot be inferred as Legs A.

Adherence: 0% session-type match (0 of 2 sessions matched expected PPL type)
33% presence (2 of 6 training days had a session)
Programme has not been adopted as PPL in any of the 9 logged sessions.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions this week
(Legs A on Wed and Legs B on Sat both MISSED; Full Body sessions had leg exercises but no Hip Thrust -- APT correction UNCHECKED this week)

Core stabiliser (Dead Bug / Bird-Dog) : 0 of 2 sessions
(Neither session included Dead Bug or Bird-Dog; Machine Crunches do NOT qualify as T8-T12 corrective work)

Rear delt work in Pull sessions : 0 of 0 dedicated Pull sessions this week
(Pull A on Tue and Pull B on Fri both MISSED; 0 rear delt sets this week)

Sessions over 60 min : Wed 12 Aug -- 65 min (5 min over cap)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps | Prior week : 10kg x 14 reps | Trend : SAME
(Weight has not moved since at least 13 Jul -- 4+ weeks of zero progression)

7. KEY INSIGHTS

RECOVERY AT 44:

Two sessions this week: Mon 10 Aug (08:59) and Wed 12 Aug (09:09) -- gap of exactly 48h 10min. Because both were Full Body sessions, every major muscle group was loaded twice with only 48h between them. The prior-week pair (Mon 03 Aug 08:25 -> Wed 05 Aug 08:54) had a 48h 29min gap -- again barely above the minimum. Both pairs technically clear the 48h threshold, but at 44 both connective tissue and CNS recovery are slower than at 30; Full Body twice a week with minimal margin leaves no buffer for cumulative fatigue. The PPL split would naturally give 48-72h per muscle group rather than 48h for all of them simultaneously.

PPL ADHERENCE AND PROGRAMME AGE:

Session-type adherence this week: 0% (0 of 2 sessions matched their expected PPL type). Presence: 33% (2 of 6 training days). Four training days were skipped -- Thu Push B, Fri Pull B, Sat Legs B, Tue Pull A. This is Week 12 of the PPL x2 programme (started 2026-05-24) and the PPL split has still not been adopted: all 9 logged sessions over 30 days remain Full Body A or Full Body B, 2x/week. Saturday is the most consistently skipped day -- absent from every single week in the 30-day log. At 2 sessions/week vs the 6/week target, monthly volume is running at one-third of the intended training stimulus.

CORRECTIVE COMPLIANCE:

Hip Thrust (APT): 0 sets this week; 0 sets in the entire 30-day log. With anterior pelvic tilt, the hip flexors are chronically shortened and the glutes are inhibited. Every session that skips Hip Thrust is a missed signal to the gluteus maximus, allowing the APT pattern to persist and increase lumbar

compression during squats and deadlifts. Rear delt sets: 0 this week vs the 8-set target. The only rear delt work in the 30-day log was 2 sets of Rear Delt Reverse Fly on 17 Jul. When front delts (pressed via OHP at 45kg, Bench at 60kg, machine press at 90kg) are consistently trained but rear delts are neglected, the rotator cuff becomes imbalanced: the infraspinatus and teres minor lose relative strength to the subscapularis and anterior deltoid. This progressively pulls the humeral head forward in the glenoid, narrowing the subacromial space. At 44, this can develop into supraspinatus tendinopathy requiring 6-12 weeks off all pressing -- a preventable injury. Core stabiliser (Dead Bug / Bird-Dog): 0 of 2 sessions this week. These deep stabilisers target the multifidus and transverse abdominis -- the muscles that actually offload the T8-T12 thoracic extensors. Machine Crunches (logged Jul 17) flex the spine rather than stabilise it and do not address the kyphosis pattern.

LATERAL RAISE TREND -- V-TAPER KPI:

The V-taper KPI is FLAT. Best set this week: 10kg x 14. Best set prior week: 10kg x 14. The weight has not moved since at least 13 Jul -- four or more consecutive weeks of zero progression. For Ganesh specifically, the love handles sit at lat-width level, which means the shoulder silhouette and the waist width are currently at parity, eliminating the visual taper. Lateral deltoid mass is the only training lever that widens the shoulder line. Without a progression in lateral raise weight or rep volume, the V-taper gap will not close regardless of fat loss progress. Push to 10kg x 15 next week.

HARD FLAGS:

1. Pull Up logged at 0kg in every session (4 sessions across 30 days) -- this creates a meaningless e1RM of 0.0kg. Bodyweight pull-ups must be logged with actual bodyweight (~83kg if currently mid-cut) for tracking to work.
2. Wed 12 Aug ran 65 min -- 5 min over the 60-min cap. Full Body B has 15 working sets; consider dropping 1 exercise to stay within the time limit.
3. Both weekly sessions hit the 48h recovery floor with no margin -- compound fatigue risk for Full Body sessions at twice weekly.
4. Rear delt sets: 0 of 8 target. Rotator cuff imbalance accumulating weekly.
5. Core stabiliser: 0 of 2 sessions. Dead Bug / Bird-Dog absent all week.
6. Hip Thrust: absent across the full 30-day window. APT correction not started.

OVERALL VERDICT:

Volume DOWN 4% vs last week (8,607 vs 8,973 kg*reps). Strength DOWN on all major lifts vs 30-day prior (Bench -8.2kg e1RM, Squat -9.3kg e1RM, OHP • 1.2kg e1RM). Session count HOLDS at 2/week for the third consecutive week. Corrective compliance DECLINING: rear delts, core stabilisers, and Hip Thrust all at zero every week. The deload flagged by the system this week is warranted • joints and connective tissue need the reset. But the structural issues (PPL non-adoption, corrective absences) are not a fatigue problem; they are

a planning and habit problem.

VERDICT: DECLINING

8. PLAN FOR NEXT WEEK

Programme week: W13 (Week 13 of PPL x2 -- first full week after W12 deload)

Note: W12 deload in effect -- cut all sets to 2 per exercise at same weights.

W13 resumes full 3-set load per below.

MONDAY 17 AUG -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 3 x 6 @ 60kg

[Consolidate: last session had only 2 sets at 60kg; hit 3 clean sets before adding load. Progress to 62.5kg x 6 when all 3 sets complete cleanly.]

Overhead Press (Barbell) 3 x 7 @ 45kg

[Sessions 7 and 9 had mixed ramp sets; standardise all 3 working sets at 45kg x 7 before returning to 47.25kg. +2.5kg when all 3 hit 7 reps.]

Lateral Raise (Dumbbell) 3 x 15 @ 10kg <-- ADD A REP (was 14)

[V-taper KPI stuck for 4+ weeks. Add 1 rep this week. When 3x15 is clean, move to 11.25kg x 12.]

Triceps Pushdown 3 x 12 @ 27.2kg <-- ADD A REP (was 11)

[Same weight 3+ weeks. Add 1 rep. When 3x12 clean, advance to 28.6kg.]

Dead Bug 3 x 10 (no load -- DO NOT SKIP)

[T8-T12 kyphosis corrective. Do this before the session cool-down, every session.]

KEY FOCUS: Hit all 3 Bench sets at 60kg -- no ramping this week.

Session must finish in 60 min; remove one isolation if running over.

TUESDAY 18 AUG -- Pull A (Back compound + Biceps)

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg (was 75kg; all 3x8 hit -> +2.5kg)

Bent Over Row (Barbell) 3 x 7 @ 70kg

[Only 1 session at 70kg in the log (17 Jul). Repeat before progressing.]

Pull Up (Bodyweight) 3 x 6 @ BW

[Log as actual bodyweight, NOT 0kg -- fix the tracking error. Aim for BW x 7 if feeling strong; 3x6 is the floor.]

Bicep Curl (Barbell) 3 x 10 @ 20kg <-- ADD A REP (was 9)

Rear Delt Reverse Fly (DB) 3 x 13 @ 10kg -- MANDATORY (rear delt deficit)

[Last logged 2 sets (17 Jul); add the third set. This is NON-NEGOTIABLE.

Complete it before leaving -- do not drop it if short on time.]

Bird-Dog 3 x 10 each side (no load -- DO NOT SKIP)

KEY FOCUS: Rear delt flywork is the #1 priority for rotator cuff balance.

Eight sets/week required; Tuesday and Friday Pull sessions are the vehicle.

WEDNESDAY 19 AUG -- Legs A (Quads, Hamstrings, Glutes -- HIP THRUST MANDATORY)

Squat (Barbell) 3 x 6 @ 70kg

[Best this week = 70x6 (sessions 8). 3 clean sets at 70 before adding load.

+2.5kg to 72.5kg when all 3 hit 6 reps.]

Hip Thrust (Barbell) 3 x 10 @ 60kg -- MANDATORY (APT corrective)

[Not logged in 30-day window -- conservative start. Do this as exercise 2, before fatigue sets in. Form priority over load this first session.]

Leg Extension (Machine) 3 x 10 @ 77kg

[Session 9 = 77x9. Session on 15 Jul = 77x10. Recover the 10-rep sets before adding weight. Hold at 77kg until 3x10 is clean.]

Lying Leg Curl (Machine) 3 x 10 @ 37.25kg (was 36kg; 3x10 hit -> +1.25kg)

Dead Bug 3 x 10 (no load -- DO NOT SKIP)

KEY FOCUS: Hip Thrust is the mandatory APT corrective -- if time is tight, drop one other exercise, not the Hip Thrust. Session cap: 60 min.

THURSDAY 20 AUG -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Mach) 3 x 8 @ 92.5kg (was 90kg; 3x8 hit -> +2.5kg)

Incline Chest Press (Mach) 3 x 10 @ 31.25kg (was 30kg x 11; all hit -> +1.25kg)

Chest Fly (Machine) 3 x 10 @ 66.25kg (was 65kg; 3x10 hit -> +1.25kg)

Lateral Raise (Dumbbell) 3 x 15 @ 10kg (same as Push A -- V-taper KPI)

Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg (was 20kg; 3x12 hit -> +1.25kg)

Dead Bug 3 x 10 (no load -- DO NOT SKIP)

KEY FOCUS: Seated Shoulder Press leads the session -- hit it first when fresh.

Four isolation exercises means time management is critical; watch the clock.

FRIDAY 21 AUG -- Pull B (Back + Rear Delts + Biceps -- FACE PULL MANDATORY)

Deadlift (Barbell) 3 x 7 @ 82.5kg (was 80kg; 3x7 hit on 17 Jul -> +2.5kg)

Bent Over Row (Barbell) 3 x 7 @ 70kg

[Same as Pull A -- two Pull sessions at 70kg this week is correct volume.]

Rear Delt Reverse Fly (DB) 3 x 13 @ 10kg -- MANDATORY

[Same prescription as Tuesday. Eight rear delt sets per week requires 4 sets

Tuesday + 4 sets Friday (or 3+3 with a set bonus). Do not skip.]

Shrug (Barbell) 3 x 12 @ 70kg

[17 Jul = 70x12, 70x11, 70x11. Target all 3 sets at 12 reps before adding weight.]

Bicep Curl (Barbell) 3 x 10 @ 20kg <-- ADD A REP (was 9)

Bird-Dog 3 x 10 each side (no load -- DO NOT SKIP)

KEY FOCUS: Pull B carries the rear delt catch-up load. If rear delt work gets skipped on both Tuesday and Friday, the 8-set weekly target becomes impossible.

SATURDAY 22 AUG -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Hip Thrust (Barbell) 3 x 10 @ 60kg -- MANDATORY (APT corrective)

[Second Hip Thrust session of the week; form consolidation before adding load.

Having both Legs A (Wed) and Legs B (Sat) with Hip Thrust is the goal every week.]

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg (same progression as Pull A)

Lying Leg Curl (Machine) 3 x 10 @ 37.25kg

Bulgarian Split Squat (DB) 3 x 10 each leg @ 10kg

[Single-leg work not in 30-day log -- conservative start. Focus on knee tracking and balance; weight is secondary.]

Rack Pull (Barbell) 3 x 6 @ 80kg

[Not in 30-day log -- start below deadlift working weight (82.5kg) to allow technique establishment.]

Dead Bug 3 x 10 (no load -- DO NOT SKIP)

KEY FOCUS: Two Hip Thrust sessions (Wed + Sat) is the APT correction target

every week from W13 onward. Start the session with Hip Thrust before fatigue.

+-----+	
Deload : needed this week (W12) -- next due Week 17, ~14 Sep 2026	
Timing : 6-9 PM IST -- no sessions after midnight	
Nutrition: 2,367 kcal/day 174g protein minimum	
+-----+
