

30-Day Analysis Report

This week : 10 Sep to 17 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-16

WEEKLY TRAINING REPORT

Generated : 2026-09-17 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 10 Sep to 17 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Bent Over Row (Barbell) -- 60kg x 12 reps (e1RM 84.0kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume DOWN 16% (10,144 vs 12,099 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 11 Sep 2026 09:47 IST | 71 min

Type : Full Body C -- Friday

Volume : 4,660 kg*reps | 9 sets

Bent Over Row (Barbell): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: -4.7kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: +0.0kg e1RM

Leg Press (Machine): 60kg x 12r x 3 sets (e1RM 84.0kg) vs prior: +14.0kg e1RM

Session 2: Wednesday 16 Sep 2026 10:41 IST | 44 min

Type : Full Body B -- Wednesday

Volume : 5,484 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (20 Aug-27 Aug): [#####] 14,387 kg*reps 3 sess

Wk -2 (27 Aug-03 Sep): [#####.....] 4,372 kg*reps 1 sess

Wk -1 (03 Sep-10 Sep): [#####.....] 12,099 kg*reps 3 sess

This wk (10 Sep-17 Sep): [#####.....] 10,144 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : DOWN -4.7kg vs 28 Aug

Next session : 57.0kg x 12 reps

[C] Leg Press (Machine)

Best this week : 60kg x 12 reps (e1RM 84.0kg)

vs prior : UP +14.0kg vs 28 Aug

Next session : 62.5kg x 12 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : SAME as 09 Sep

Next session : 45kg x 8 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : SAME as 26 Aug

Next session : 20kg x 10 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -32.7kg vs 09 Sep

Next session : 47.5kg x 12 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 04 Sep

Next session : 10kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : SAME as 26 Aug

Next session : 43kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 26 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		3		14		11		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		0		6		6		CRITICAL
Rear Delts		3		8		5		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		9		14		5		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 6 | Pull sets: 12 | Ratio pull:push = 2.00 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (20 Aug-27 Aug): 3 sessions

Wk -2 (27 Aug-03 Sep): 1 sessions

Wk -1 (03 Sep-10 Sep): 3 sessions

Time between sessions this week:

Fri 11 Sep 09:47 -> Wed 16 Sep 10:41: 121h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	3	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	9	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.
Active training weeks logged : 10
Weeks since last deload : 10 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W17 (started 2026-05-24; 116 days elapsed = 17 weeks rounded up)
Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+			
Thu 10 Sep	Push B	(no session)	MISSED
Fri 11 Sep	Pull B	Pull -- INFERRED	OK (Row + Rear Delt Fly present)
Sat 12 Sep	Legs B	(no session)	MISSED
Sun 13 Sep	REST	(rest)	OK
Mon 14 Sep	Push A	(no session)	MISSED
Tue 15 Sep	Pull A	(no session)	MISSED
Wed 16 Sep	Legs A	Push+Legs mix -- INFERRED	MISMATCH (OHP+curls, no Hip Thrust)

Adherence: 17% (1 of 6 non-rest sessions on correct day or correctly inferred)
NOTE: All 9 sessions in the 30-day log carry "Full Body A/B/C" titles -- PPL format
has not been adopted at any point across the full 30-day export period.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 proper Legs sessions this week.
Wed 16 Sep should have been Legs A -- Hip Thrust absent.

*** NOT LOGGED IN ANY SESSION IN ENTIRE 30-DAY PERIOD. CRITICAL ***

Core stabiliser (all sessions): 0 of 2 sessions -- Back Extension logged as warmup only
(0 working sets) in both sessions. No Dead Bug, Bird-Dog,
or Plank logged in ANY of the 9 sessions this month. CRITICAL.
Rear delt work in Pull sessions: 1 of 1 inferred Pull sessions -- Fri 11 Sep had
Rear Delt Reverse Fly 3 x 12 @ 10kg. OK.
Sessions over 60 min : 1 -- Fri 11 Sep = 71 min (limit: 60 min). FLAGGED.
Also note: Fri 04 Sep = 251 min (prior week; likely timer error).

LATERAL RAISE (V-TAPER KPI):

This week : NONE (0 sets -- not performed in either session)
Prior week : 10kg x 15 reps (Mon 07 Sep, Full Body A -- best set)

Trend : DOWN

Note: Lateral Raise has been stuck at 10kg x 15 reps since 24 Aug -- zero weight progression across the entire 30-day export. Skipped entirely this week.

7. KEY INSIGHTS

RECOVERY AT 44:

This week's two sessions -- Fri 11 Sep (Pull-type: Row + Rear Delt Fly + Leg Press, 09:47 IST) and Wed 16 Sep (Push+Legs mix: OHP + Leg Curl + Leg Extension + Bicep Curl + Triceps, 10:41 IST)

* were separated by 121 hours, well above the 48-hour minimum for same-muscle recovery at 44.

No same-muscle pair was trained within a dangerous window this week. However, the issue is the opposite: with only 2 sessions vs 6 target, most muscle groups received zero stimulus this week.

On a 417 kcal/day calorie deficit, zero-stimulus muscles (Chest, Traps, Core: 0 sets each) are candidates for catabolism -- the body strips them for fuel. Recovery management is fine; session frequency is the real threat.

PPL ADHERENCE AND PROGRAMME AGE:

Adherence this week: 17% (1 of 6 training days matched). This is W17 of the PPL x2 programme (started 2026-05-24) -- 17 weeks in, and the PPL format has never been adopted. All 9 sessions in the 30-day log carry "Full Body A/B/C" titles, not PPL session names. The most-missed days are Thursday (Push B) and Saturday (Legs B), both weekend-adjacent, suggesting a consistent pattern of skipping the back half of each week. This week only Fri and Wed had sessions; Mon and Tue were fully skipped. At the current 2-session-per-week pace, many muscle groups receive stimulus once every 10-14 days -- insufficient for recomp at any age, let alone 44.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate: 0% -- not logged in a single session across the entire 30-day export.

Without Hip Thrust as the primary glute activation movement, anterior pelvic tilt goes uncorrected. APT maintains chronically shortened hip flexors, which pulls the lumbar spine into extension and increases shear load on L4-L5 and L5-S1 discs. At 44 this risk compounds; over months it contributes to lower-back pain that can sideline training entirely.

Rear delt sets this week: 3 (target: 8/week, short by 5 sets). When front deltoids develop faster than rear deltoids -- which is exactly what overhead pressing without face pulls or reverse flies produces -- the humeral head migrates forward in the glenoid socket under load. At 44, this translates to supraspinatus tendinopathy: the classic rotator cuff impingement injury seen in men who press heavy but neglect posterior shoulder work.

Core stabiliser presence: 0 of 2 sessions (0% across all 9 sessions in 30 days). Dead Bug and Bird-Dog are the prescribed T8-T12 kyphosis correctives. They cost 3-4 minutes per session and have simply never been logged.

LATERAL RAISE TREND -- V-TAPER KPI:

The V-taper KPI is DOWN: no lateral raises logged this week (0 sets) after 10kg x 15 reps in

the prior week (Mon 07 Sep). Worse, the exercise has been stuck at 10kg x 15 reps since 24 Aug

* zero weight progression across 30 days. This matters specifically for Ganesh because his love handles currently sit at lat-width level, collapsing the visual ratio between shoulder width and waist width. Until lateral raises progress to 12-14kg and volume hits 6+ sets/week, shoulder caps cannot visually outgrow the midsection. The KPI is stalled and this week was skipped entirely -- the wrong direction.

HARD FLAGS:

1. Session 5 (Fri 04 Sep): 251-minute duration logged. Whether this is a timer error or an actual 4h 11m gym session, it is a red flag. A real session that long drives cortisol far above baseline for hours, suppressing testosterone and impairing overnight recovery at 44.
2. Session 8 (Fri 11 Sep): 71 min -- over the 60-minute session cap. Warm-up + main + cool-down must fit within 60 min. Excess duration in later sets likely reflects rest intervals creeping past 3 min; use a timer.
3. Leg Extension collapse: 77kg x 10 (Wed 09 Sep) to 50kg x 12 (Wed 16 Sep) -- a 35% load drop in 7 days with no rep gain. This is the most dramatic strength regression in the log. Possible causes: different machine stack, fatigue accumulation, or the Sep 09 weight was unsustainable. Needs investigation at next Legs session.
4. 0kg Rear Delt Reverse Fly: Session 4 (Fri 28 Aug) -- Sets 2 and 3 logged at 0kg (Set 1: 10kg x 10). Likely a logging error; if actual, 2 of 3 sets were wasted.
5. Session timing: All 9 sessions logged between 08:24 and 13:26 IST. Programme target is 6-9 PM IST. Afternoon sessions align better with testosterone peaks and neuromuscular readiness.

OVERALL VERDICT: DECLINING

Volume DOWN 16% week-over-week (10,144 vs 12,099 kg*reps). Session count DOWN (2 vs 3 prior week). No corrective compliance in 17 programme weeks. V-taper KPI static for 30 days, then skipped. All muscle groups except Biceps are below minimum stimulus for muscle retention on a calorie deficit. This week is worse than last week across volume, session frequency, corrective compliance, and V-taper KPI execution.

8. PLAN FOR NEXT WEEK

Programme week: W18 (Week 18 of PPL x2) -- *** DELOAD WEEK ***

Deload protocol: 2 working sets per exercise. Weights unchanged from current best.

All sessions must include the mandatory corrective for that day. No exceptions.

MONDAY 21 Sep -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell)	2 sets x 8 reps @ 60kg
Overhead Press (Barbell)	2 sets x 8 reps @ 45kg
Lateral Raise (Dumbbell)	2 sets x 15 reps @ 10kg [V-TAPER KPI -- do not skip]
Triceps Pushdown	2 sets x 11 reps @ 27.2kg
Dead Bug	2 sets x 10 reps [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: Bench and OHP both held target reps at current weight. Post-deload (W19), add +2.5kg to Bench (62.5kg) and hold OHP at 45kg until all 3 sets hit 8 reps cleanly. Lateral Raise: hold 10kg but target 3 sets x 15 consistently before progressing.

KEY FOCUS: First proper PPL session. Dead Bug is new -- learn the movement (exhale fully, press lower back to floor, extend opposite arm and leg slowly). Duration target: 45-50 min.

TUESDAY 22 Sep -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 sets x 12 reps @ 60kg
 Lat Pulldown (Machine) 2 sets x 6 reps @ 66kg
 Bicep Curl (Barbell) 2 sets x 10 reps @ 20kg
 Rear Delt Reverse Fly 2 sets x 12 reps @ 10kg
 Bird-Dog 2 sets x 10 reps/side [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: Row previously hit 70kg x 8; dropped to 60kg this week. Post-deload, re-test at 65kg x 8 (not straight back to 70kg). Lat Pulldown and Rear Delt Fly are secondary -- keep form strict before adding load.

KEY FOCUS: Rear delt fly protects the rotator cuff. This is Pull A, so do it after Row and Lat Pulldown while you still have grip strength.

WEDNESDAY 23 Sep -- Legs A (Quads + Hamstrings -- Hip Thrust MANDATORY)

Hip Thrust (Barbell) 2 sets x 12 reps @ 40kg [MANDATORY APT corrective]
 Squat (Barbell) 2 sets x 7 reps @ 70kg
 Leg Extension (Machine) 2 sets x 12 reps @ 50kg
 Seated Leg Curl (Machine) 2 sets x 9 reps @ 43kg
 Dead Bug 2 sets x 10 reps [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: Hip Thrust at 40kg is conservative (not logged in 30+ days). Post-deload, progress to 50kg if both sets complete 12 reps with full glute lock-out at the top.

Leg Extension: start at 50kg (current level after the collapse from 77kg). Do NOT attempt 77kg again until 3 consecutive sessions hit 50kg x 12 with no rep drop.

KEY FOCUS: Hip Thrust is the single most important exercise in this session for APT correction. Set the bar up and load it before squats. Hip Thrust comes first.

THURSDAY 24 Sep -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 sets x 8 reps @ 45kg
 Bench Press (Barbell) 2 sets x 6 reps @ 60kg
 Lateral Raise (Dumbbell) 2 sets x 15 reps @ 10kg [V-TAPER KPI -- do not skip]
 Triceps Pushdown 2 sets x 11 reps @ 27.2kg
 Bird-Dog 2 sets x 10 reps/side [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: Push B is shoulder-led -- OHP leads, Bench is the chest variation. Same weights as Monday Push A; difference is exercise order and intent (shoulder width over chest thickness).

KEY FOCUS: Keep under 60 min. With 2 sets per exercise at deload volume, 5 exercises should complete in 40-45 min including rest intervals of 90-120 sec. Set a timer.

FRIDAY 25 Sep -- Pull B (Back + Rear Delts + Biceps -- Rear Delt Fly MANDATORY)

Bent Over Row (Barbell) 2 sets x 12 reps @ 60kg
 Rear Delt Reverse Fly 2 sets x 12 reps @ 10kg [MANDATORY -- never skip Pull B]
 Pull Up 2 sets x 6 reps @ bodyweight
 Bicep Curl (Barbell) 2 sets x 10 reps @ 20kg
 Dead Bug 2 sets x 10 reps [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: This week's Pull B (Fri 11 Sep) had rear delt fly -- good. Maintain that.

Bicep Curl: holding 20kg x 10 for 4 sessions straight -- post-deload, increase to 22.5kg if both deload sets complete 10 reps without form breakdown.

KEY FOCUS: Rear delt fly is the most critical corrective in Pull B. You currently have 3 rear delt sets/week vs the 8-set target -- this session plus Tuesday's 2 sets begin to close that gap. Protect the rotator cuff.

SATURDAY 26 Sep -- Legs B (Glutes + Hamstrings -- Hip Thrust MANDATORY)

- Hip Thrust (Barbell) 2 sets x 12 reps @ 40kg [MANDATORY APT corrective]
- Leg Press (Machine) 2 sets x 12 reps @ 60kg
- Seated Leg Curl (Machine) 2 sets x 9 reps @ 43kg
- Leg Extension (Machine) 2 sets x 12 reps @ 50kg
- Bird-Dog 2 sets x 10 reps/side [T8-T12 corrective -- do not skip]

PROGRESSION NOTE: Leg Press hit 60kg x 12 this week (vs 50kg prior) -- good progression. Post-deload, add +2.5kg to Leg Press (62.5kg) if both deoload sets complete 12 reps.

Seated Leg Curl: holding 43kg x 9. Post-deload, add +1.25kg if both sets complete 9 reps.

KEY FOCUS: This is the second Hip Thrust session of the week. Two sessions per week is the minimum dose for APT correction through glute-dominant hip extension. Do not substitute Leg Press or any other exercise -- Hip Thrust is the only one that directly loads the hip in full extension against gravity.

+-----+		
Deload	: needed this week -- W18 is DELOAD (10 wks accrued)	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
