

30-Day Analysis Report

This week : 18 Jul to 25 Jul 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-07-24

WEEKLY TRAINING REPORT

Generated : 2026-07-25 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 18 Jul to 25 Jul 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 5, 4, 4 sessions (avg 4.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Seated Shoulder Press (Machine) -- 90kg x 8 reps (e1RM 114.0kg)

Biggest concern: Back -- 1 sets vs 14 target (13 sets short)

vs last week : Volume DOWN 59% (8,490 vs 20,855 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Saturday 18 Jul 2026 08:12 IST | 86 min

Type : Chest Shoulder-- Saturday

Volume : 6,570 kg*reps | 15 sets

Incline Chest Press (Machine): 30kg x 11r x 3 sets (e1RM 41.0kg) vs prior: +1.0kg e1RM

Seated Shoulder Press (Machine): 90kg x 8r x 3 sets (e1RM 114.0kg) vs prior: +3.0kg e1RM

Chest Fly (Machine): 65kg x 10r x 3 sets (e1RM 86.7kg) vs prior: +10.7kg e1RM

Bicep Curl (Machine): 25kg x 10r x 3 sets (e1RM 33.3kg) vs prior: +0.0kg e1RM

Skullcrusher (Dumbbell): 20kg x 12r x 3 sets (e1RM 28.0kg) vs prior: +7.0kg e1RM

Session 2: Monday 20 Jul 2026 08:36 IST | 16 min

Type : Full Body A -- Monday

Volume : 1,920 kg*reps | 7 sets

Squat (Barbell): 40kg x 6r x 3 sets (e1RM 48.0kg) vs prior: -45.3kg e1RM

Bench Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -26.9kg e1RM

Pull Up: 0kg x 6r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

4-WEEK VOLUME TREND

Wk -3 (27 Jun-04 Jul): [#####] 24,761 kg*reps 5 sess

Wk -2 (04 Jul-11 Jul): [#####....] 20,172 kg*reps 4 sess

Wk -1 (11 Jul-18 Jul): [#####....] 20,855 kg*reps 4 sess

This wk (18 Jul-25 Jul): [#####.....] 8,490 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -26.9kg vs 13 Jul
 Next session : 38.0kg x 10 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)
 vs prior : First time in 30-day log
 Next session : 0kg x 6 reps
 * FLAGS: 0kg logged -- check entry

[C] Seated Shoulder Press (Machine)

Best this week : 90kg x 8 reps (e1RM 114.0kg)
 vs prior : UP +3.0kg vs 11 Jul
 Next session : 92.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 40kg x 6 reps (e1RM 48.0kg)
 vs prior : DOWN -45.3kg vs 13 Jul
 Next session : 38.0kg x 6 reps

[I] Bicep Curl (Machine)

Best this week : 25kg x 10 reps (e1RM 33.3kg)
 vs prior : SAME as 04 Jul
 Next session : 25kg x 10 reps

[I] Chest Fly (Machine)

Best this week : 65kg x 10 reps (e1RM 86.7kg)
 vs prior : UP +10.7kg vs 11 Jul
 Next session : 66.25kg x 10 reps

[I] Incline Chest Press (Machine)

Best this week : 30kg x 11 reps (e1RM 41.0kg)
 vs prior : UP +1.0kg vs 04 Jul
 Next session : 31.25kg x 11 reps

[I] Skullcrusher (Dumbbell)

Best this week : 20kg x 12 reps (e1RM 28.0kg)
 vs prior : UP +7.0kg vs 11 Jul
 Next session : 21.25kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
* +-----+-----+-----+-----				
Chest	9	12	3	LOW
Back	1	14	13	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	0	6	6	CRITICAL
Rear Delts	0	8	8	CRITICAL
Biceps	3	8	5	CRITICAL
Triceps	0	8	8	CRITICAL
Legs	3	14	11	CRITICAL
Core	0	6	6	CRITICAL

Push sets: 12 | Pull sets: 4 | Ratio pull:push = 0.33 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (27 Jun-04 Jul): 5 sessions

Wk -2 (04 Jul-11 Jul): 4 sessions

Wk -1 (11 Jul-18 Jul): 4 sessions

Time between sessions this week:

Sat 18 Jul 08:12 -> Mon 20 Jul 08:36: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	9	8	OK
Back	1	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	0	6	AT RISK
Legs	3	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Next deload : in 2 week(s), approx 08 Aug 2026

Trend : DOWN -- V-taper KPI exercise absent this week entirely

7. KEY INSIGHTS

RECOVERY AT 44:

Only one same-muscle session pair exists this week: Saturday 18 Jul (Chest/Shoulder Push) and Monday 20 Jul (Bench Press + full body). Gap: 08:12 -> 08:36 = 48h 24min. This just clears the 48h minimum required for chest recovery at 44. However, the Monday session's massive bench press drop (65kg -> 40kg) suggests the chest had not fully recovered despite clearing the time threshold -- likely compounded by the Saturday session running 86 minutes with no warm-down and no sleep buffer built in. Every other muscle group had well over 48h rest due to sessions being missed entirely.

PPL ADHERENCE AND PROGRAMME AGE:

Adherence this week: 0% (0 of 2 sessions matched the expected PPL day-type). This is Week 9 of the PPL x2 programme (started 2026-05-24) yet all sessions are still logged as "Full Body A / B / C" and "Chest Shoulder -- Saturday". The PPL structure is not being executed. The pattern is clear: only Saturday and Monday sessions are being completed consistently; Tuesday-Friday is a consistent blank. With 2/6 sessions this week (vs 4/6, 4/6, 5/6 in prior weeks), this is the worst adherence week since the programme started. Saturday-only and Monday-only training won't deliver the PPL volume targets for any muscle group.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate for APT: 0/0 legs sessions (no legs day completed all week). The Anterior Pelvic Tilt corrective was untouched for the 7th consecutive day. Rear delts: 0 sets this week vs the 8-set weekly target. This matters acutely at age 44: the front deltoid (anterior) is heavily loaded in Chest/Shoulder sessions and gets trained in every push movement. When the rear deltoid (posterior) falls significantly behind in strength, the rotator cuff tendons are pulled forward into a position of chronic internal rotation. Over months, this compresses the supraspinatus tendon against the acromion on every overhead or pressing movement -- the classic setup for impingement. At 44, once impingement sets in, recovery takes weeks and training is interrupted. 0 rear delt sets this week is a risk accumulator. Core stabiliser presence: 0 of 2 sessions. No Dead Bug or Bird-Dog in any session this week -- the T8-T12 kyphosis correction protocol is being skipped entirely.

LATERAL RAISE TREND (V-TAPER KPI):

V-taper KPI is moving DOWN this week: not logged at all vs 10kg x 14 reps last week. This matters specifically for Ganesh because love handles currently sit at lat-width level -- the visual V-taper depends on the medial deltoid (hit by lateral raises) widening the shoulder silhouette beyond that level. No lateral raise reps

this week means zero stimulus for the one muscle that drives the body shape goal.
Progression from prior weeks (10kg x 12 -> 13 -> 14 reps) has stalled.

HARD FLAGS FROM SESSION DATA:

FLAG 1 -- MAJOR WEIGHT REGRESSION (Mon 20 Jul):

Squat: 80kg (Mon 13 Jul) -> 40kg (Mon 20 Jul). Drop of 50%. No injury note in log. Session lasted only 16 minutes. Either health issue, equipment issue, or severe de-motivation. Needs explanation before next squat session.

FLAG 2 -- BENCH PRESS REGRESSION (Mon 20 Jul):

Bench: 65kg x 7 (Mon 13 Jul) -> 40kg x 10 (Mon 20 Jul). e1RM drop from 80.2kg to 53.3kg (-33%). Same likely cause as squat regression above.

FLAG 3 -- SESSION OVER 60 MIN (Sat 18 Jul):

86 minutes. Programme cap is 60 min (including posture reset + warm-up + main + cool-down). 26 minutes over limit. No cool-down time left at this duration; cortisol stays elevated and recovery is compromised.

FLAG 4 -- ZERO CORRECTIVE EXERCISES ALL WEEK:

No Dead Bug, Bird-Dog, Hip Thrust, or Rear Delt work in any session.

All three corrective priorities (kyphosis, APT, rear delts) unaddressed.

FLAG 5 -- PULL-UP LOGGED AS 0kg:

Pull-Up is bodyweight and correctly records 0kg in Hevy. However the session cut to 16 minutes means only 1 set of pull-ups was completed (vs the usual 3 sets) before the session ended.

OVERALL VERDICT: DECLINING

Volume down 59% vs last week (8,490 vs 20,855 kg*reps). Sessions at 2 of 6 target vs 4 of 6 the prior two weeks. Zero corrective compliance. Strength regression on two major compounds. PPL adherence at 0%. Lateral Raise KPI absent. Every tracked dimension is worse than last week.

8. PLAN FOR NEXT WEEK

Programme week: W10 (Week 10 of PPL x2)

Dates: Monday 27 Jul -- Saturday 01 Aug 2026

NOTE: Monday session squat/bench weight regression (40kg) is almost certainly anomalous. Base weights revert to last solid performance (Mon 13 Jul for squat/bench; Sat 18 Jul for chest/shoulder exercises). If there is a genuine injury, reduce to comfortable range-of-motion first before adding load.

MONDAY 27 JUL -- Push A (Chest primary + Shoulders, Triceps)

Bench Press (Barbell) 4 x 8 @ 65kg

(Recalibrate from Mon 13 Jul base -- do not carry Mon 20 regression forward)

Incline Chest Press (Machine) 3 x 11 @ 31.25kg

(Sat 18 Jul: 30kg x 11, all sets hit target -- isolation +1.25kg)

Chest Fly (Machine) 3 x 10 @ 66kg
 (Sat 18 Jul: 65kg x 10, all sets hit -- isolation +1.25kg, rounded)
 Lateral Raise (Dumbbell) 3 x 12 @ 10kg [V-TAPER KPI -- do not skip]
 (Last logged Mon 13 Jul: 10kg x 14 reps. Missed this week entirely.
 Drop back to 12 reps at 10kg to re-establish; progress reps before weight)
 Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg
 (Sat 18 Jul: 20kg x 12, all sets hit -- isolation +1.25kg)
 Mandatory corrective: Dead Bug 3 x 10 -- do not skip (T8-T12 kyphosis)
 Key focus: Keep total session under 60 min. Bench before machine work.
 Bench drop on Mon 20 Jul was likely fatigue/anomaly -- reset at
 65kg and confirm form before pushing past it.

TUESDAY 29 JUL -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 4 x 7 @ 72.5kg
 (Fri 17 Jul: 70kg x 7, all sets hit -- compound +2.5kg)
 Pull Up 3 x 6 @ bodyweight
 (Logged as 0kg -- bodyweight. Hold reps at 6 until 3 clean sets done.
 Aim for full range of motion, chin over bar each rep)
 Bicep Curl (Machine) 3 x 10 @ 26kg
 (Sat 18 Jul: 25kg x 10, all 3 sets hit -- isolation +1.25kg, rounded to 26)
 Bicep Curl (Dumbbell) 3 x 12 @ 7.5kg
 (Last logged Wed 15 Jul: 7.5kg x 12, stable -- no change yet)
 Mandatory corrective: Dead Bug 3 x 10 -- do not skip
 Key focus: This is the first dedicated Pull session in the PPL format.
 Prioritise row over pull-up if time is short. Protect the 48h
 gap -- do not schedule this same day as Monday.

WEDNESDAY 30 JUL -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 x 10 @ 50kg [MANDATORY -- APT correction]
 (No prior log. Conservative start at 50kg. This exercise is non-negotiable
 for anterior pelvic tilt. Do it first while energy is high)
 Squat (Barbell) 4 x 6 @ 70kg
 (Mon 13 Jul: 80kg x 5 (2 sets only, short session). Revert to Mon 6 Jul
 base of 70kg x 6 for full 4 sets. Do not use Mon 20 Jul's 40kg)
 Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
 (Wed 15 Jul: 75kg x 8, all sets hit -- compound +2.5kg)
 Leg Extension (Machine) 3 x 10 @ 78kg
 (Wed 15 Jul: 77kg x 10, all sets hit -- isolation +1.25kg, rounded to 78)
 Mandatory corrective: Dead Bug 3 x 10 -- do not skip
 Key focus: Hip Thrust first, then squat. Session must finish under 60 min --
 clip one leg extension set if needed, never clip Hip Thrust.

THURSDAY 31 JUL -- Push B (Shoulders primary + Chest variation, Triceps)

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg
 (Sat 18 Jul: 90kg x 8, all sets hit -- compound +2.5kg)
 Overhead Press (Barbell) 3 x 6 @ 50kg
 (Wed 15 Jul: 47.25kg x 6, all sets hit -- compound +2.5kg, round to 50kg)

Incline Chest Press (Machine) 3 x 10 @ 31.25kg
(Chest variation for Push B -- same weight as Monday, different rep target)
Lateral Raise (Dumbbell) 3 x 12 @ 10kg [V-TAPER KPI -- 2nd dose]
(Second weekly Lateral Raise exposure. Same weight as Monday to accumulate volume. Do not skip -- this is the primary V-taper driver)
Triceps Pushdown 3 x 11 @ 28kg
(Wed 15 Jul: 27.2kg x 11, all sets hit -- isolation +1.25kg, rounded to 28)
Mandatory corrective: Bird-Dog 3 x 10 each side -- do not skip
Key focus: Seated Shoulder Press is the highest load; do it fresh before OHP.
Thursday is the session most often skipped -- commit to it.

FRIDAY 01 AUG -- Pull B (Back + Rear Delts + Biceps)

Deadlift (Barbell) 3 x 7 @ 82.5kg
(Fri 17 Jul: 80kg x 7, all sets hit -- compound +2.5kg)
Shrug (Barbell) 3 x 12 @ 70kg
(Fri 17 Jul: 70kg x 12 / 11 / 11 -- rep collapse on sets 2-3.
Hold at 70kg until all 3 sets hit 12 reps cleanly)
Rear Delt Reverse Fly (Dumb) 3 x 13 @ 10kg [MANDATORY -- rear delt]
(Fri 17 Jul: 10kg x 13 -- only 2 sets completed. Must complete all 3 sets.
If this was a timing issue, place it earlier in the session this week)
Bicep Curl (Machine) 3 x 10 @ 26kg
(Same as Pull A -- keeps bicep stimulus consistent across both pull days)
Crunch (Machine) 3 x 12 @ 26kg
(Fri 17 Jul: 25kg x 12, all sets hit -- isolation +1.25kg rounded to 26)
Mandatory corrective: Bird-Dog 3 x 10 each side -- do not skip
Key focus: Rear Delt Reverse Fly must be 3 full sets -- this is the only
rear delt work this week and is running 8 sets short. Failure
to hit this means rotator cuff risk accumulates another week.

SATURDAY 02 AUG -- Legs B (Glutes, Hamstrings, Single-Leg)

Hip Thrust (Barbell) 3 x 10 @ 50kg [MANDATORY -- APT correction]
(Second legs session this week. Same weight as Wednesday -- two exposures
per week is the minimum to address established APT at 44)
Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
(Same as Wednesday. Both Legs A and Legs B include RDL for hamstring hit)
Leg Extension (Machine) 3 x 10 @ 78kg
(Same as Wednesday -- quad isolation)
Bulgarian Split Squat 3 x 8 @ 15kg per hand (dumbbell)
(No prior log. Conservative start. Single-leg work for APT and glute
imbalance. If balance is an issue, use bodyweight first set)
Mandatory corrective: Dead Bug 3 x 10 -- do not skip
Key focus: This is historically the most-skipped day. Saturday Legs B must
happen. If gym is unavailable, Hip Thrust with bodyweight + RDL
with any available load still counts. Do not substitute Push.

+-----+

Deload	: not yet -- next due Week 11, ~08 Aug 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	

| Nutrition: 2,367 kcal/day | 174g protein minimum |

+-----+
