

30-Day Analysis Report

Period: 2026-08-09 to 2026-09-08 | Generated 2026-09-08

Name:	Ganesh
Profile:	44M 181 cm 87 kg -> 79 kg
Goal:	Body Recomposition -- fat loss, muscle retention
Nutrition:	2,367 kcal/day 174g protein minimum

WEEKLY TRAINING REPORT

Generated : 2026-09-09 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 02 Sep to 09 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 3, 2, 2 sessions (avg 2.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Deadlift (Barbell) -- 75kg x 8 reps (e1RM 95.0kg)

Biggest concern: Chest -- 2 sets vs 12 target (10 sets short)

vs last week : Volume DOWN 41% (6,090 vs 10,254 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min

Type : Full Body C -- Friday

Volume : 3,220 kg*reps | 8 sets

Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM

Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM

Session 2: Monday 07 Sep 2026 13:26 IST | 77 min

Type : Full Body A -- Monday

Volume : 2,870 kg*reps | 12 sets

Squat (Barbell): 70kg x 7r x 4 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 2 sets (e1RM 72.0kg) vs prior: -4.0kg e1RM

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 15r x 3 sets (e1RM 15.0kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (12 Aug-19 Aug): [#####] 13,059 kg*reps 3 sess
Wk -2 (19 Aug-26 Aug): [#####.....] 8,506 kg*reps 2 sess
Wk -1 (26 Aug-02 Sep): [#####.....] 10,254 kg*reps 2 sess
This wk (02 Sep-09 Sep): [#####.....] 6,090 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -4.0kg vs 24 Aug

Next session : 57.0kg x 6 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : SAME as 28 Aug

Next session : 70kg x 8 reps

[C] Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : First time in 30-day log

Next session : 75kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

• FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Aug

Next session : 72.5kg x 7 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)

vs prior : SAME as 24 Aug

Next session : 10kg x 15 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 14 Aug

Next session : 10kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
--------------	--------------	-----------	-----	--------

Chest	2	12	10	CRITICAL
-------	---	----	----	----------

Back	8	14	6	CRITICAL
------	---	----	---	----------

Shoulders	3	10	7	CRITICAL
-----------	---	----	---	----------

Traps	2	6	4	CRITICAL
Rear Delts	3	8	5	CRITICAL
Biceps	0	8	8	CRITICAL
Triceps	0	8	8	CRITICAL
Legs	4	14	10	CRITICAL
Core	0	6	6	CRITICAL

Push sets: 5 | Pull sets: 13 | Ratio pull:push = 2.60 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 2 sets this week (need 6+/week)

SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (12 Aug-19 Aug): 3 sessions

Wk -2 (19 Aug-26 Aug): 2 sessions

Wk -1 (26 Aug-02 Sep): 2 sessions

Time between sessions this week:

Fri 04 Sep 09:00 -> Mon 07 Sep 13:26: 76h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

-

Chest 2 8 AT RISK

Back 8 10 AT RISK

Shoulders 3 8 AT RISK

Traps 2 4 AT RISK

Rear Delts 3 6 AT RISK
Biceps 0 6 AT RISK
Triceps 0 6 AT RISK
Legs 4 10 AT RISK
Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 9
Weeks since last deload : 9 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W16 (started 2026-05-24; 107 days elapsed -> 16 weeks rounded up)
Sessions this week: 2 of 6 target

Day | Expected | Detected | Status

Wed 02 Sep | Legs A | No session | MISSED
Thu 03 Sep | Push B | No session | MISSED
Fri 04 Sep | Pull B | INFERRED Pull (Row/DL/RDelt) | OK (INFERRED)
Sat 05 Sep | Legs B | No session | MISSED
Sun 06 Sep | REST | No session | OK (REST)
Mon 07 Sep | Push A | INFERRED Mixed (Full Body) | PARTIAL
Tue 08 Sep | Pull A | No session (day in progress) | MISSED

Adherence: 50% (1 of 2 attempted sessions matched expected day/type)
Completion: 2 of 6 planned sessions = 33%
NOTE: Sessions are still titled "Full Body A/B/C" -- Ganesh has not yet transitioned to logging PPL session names after 16 weeks on programme.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 legs sessions this week (APT correction NEGLECTED)
Core stabiliser (all sessions): 0 of 2 sessions -- MISSING in both
Rear delt work in Pull sessions: 1 of 1 pull session -- OK (3 sets Rear Delt Reverse Fly, Fri)

Sessions over 60 min:

Fri 04 Sep -- 251 min (4h 11min) FLAG: almost certainly timer left running; violates 60-min cap
Mon 07 Sep -- 77 min FLAG: 17 min over the 60-min cap

LATERAL RAISE (V-TAPER KPI):

This week: 10kg x 15 reps (Mon 07 Sep) | Prior week: 10kg x 15 reps (Mon 24 Aug) | Trend: SAME

Lateral raise weight has been stuck at 10kg for 2+ consecutive weeks. Zero V-taper progress.

7. KEY INSIGHTS

RECOVERY AT 44

The only session pair this week was Fri 04 Sep -> Mon 07 Sep: a 76-hour gap, well above the 48-hour minimum. No same-muscle recovery violations exist within this week. Looking back further: the back-heavy Fri 28 Aug session and the nearly identical Fri 04 Sep session are 168 hours apart -- fine. Bench Press last appeared 14 days before the 07 Sep session. Recovery is not the problem this week; the problem is that with only 2 sessions total, there is almost nothing to recover from. At 44, the bigger risk is detraining: muscle protein synthesis drops off noticeably after 72-96 hours without stimulus. Three consecutive weeks at 2 sessions/week means many muscle groups are going 3-5 days without any signal, which on a calorie deficit accelerates catabolism.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 16 of the PPL programme (started 2026-05-24). After four months, sessions are still being logged as "Full Body A/B/C" -- the PPL split has not taken hold in practice. Completion this week: 2 of 6 = 33%. The 4-week rolling average is 2.3 sessions/week (3, 2, 2, 2) against a 6-session target -- 38% of plan. The missing days follow a consistent pattern: Wednesday (Legs A), Thursday (Push B), and Saturday (Legs B) are chronically skipped. Only Friday and Monday show any regularity. The two Legs sessions per week are where the PPL plan is most consistently broken -- zero Legs sessions appeared this week at all.

CORRECTIVE COMPLIANCE

Hip Thrust: 0 of 0 legs sessions -- zero legs sessions were attempted this week, so APT correction received no stimulus for the entire 7-day window. Anterior pelvic tilt causes excessive lumbar lordosis; without Hip Thrust loading the glutes, the hip flexors stay shortened and the lower back stays overloaded. This is a structural risk that compounds with each missed Legs session. Core stabilisers (Dead Bug or Bird-Dog): 0 of 2 sessions -- completely absent. T8-T12 kyphosis correction requires sub-maximal spine extension/anti-flexion work every single session; skipping it means the thoracic curve is not being actively counteracted by training. Rear delts: 3 sets this week vs 8-set weekly target. At 44, the rotator cuff tendons have reduced elasticity. When the anterior deltoid and pectorals are significantly stronger than the posterior deltoid and external rotators, the humeral head is pulled forward in the glenoid socket during overhead and pressing movements -- this compresses the supraspinatus tendon and triggers impingement. Three sets covers 38% of the weekly target; the risk window opens when this imbalance persists over months.

LATERAL RAISE TREND -- V-TAPER KPI

Lateral Raise is stuck at 10kg x 15 reps for at minimum two consecutive weeks (24 Aug and 07 Sep both at 10kg x 15). Trend: FLAT. This matters specifically because Ganesh's

love handles sit at approximately lat-width level, which collapses the visual shoulder-to-waist ratio. The only training variable that directly widens the shoulder silhouette above the waist is lateral delt development, and that requires progressive lateral raise weight. A flat 10kg for two-plus weeks means zero V-taper progress. Next target: 11.25kg for 12-15 reps.

HARD FLAGS

1. Pull Up logged as 0kg across all three recent sessions (10 Aug, 24 Aug, 07 Sep). Volume is 0 kg*reps when it should be approximately 87kg x reps. Fix: log actual bodyweight (~87kg) or use the bodyweight assist field in Hevy.
2. Fri 04 Sep duration: 251 minutes (4 hours 11 minutes). Timer was almost certainly left running after the session ended. Actual session would have been approximately 30-40 minutes given only 8 working sets. This distorts any duration-based analysis.
3. Mon 07 Sep: 77 minutes -- 17 minutes over the 60-min cap. Warm-up and rest periods need tightening; the session had only 12 working sets.
4. Bench Press e1RM DOWN from 76.0kg (24 Aug, 60kg x 8) to 72.0kg (07 Sep, 60kg x 6). Rep collapse of 2 reps on the same weight. Script correctly flags this; drop to 57kg.
5. Zero legs sessions this week = zero Hip Thrusts = zero APT corrective stimulus. Two consecutive weeks without legs training leaves quad, hamstring, and glute volume in critical deficit (4 sets vs 14-set weekly target).

OVERALL VERDICT: DECLINING

Volume down 41% vs last week (6,090 vs 10,254 kg*reps). Sessions held flat at 2/week for third consecutive week. Bench strength dropped. No legs training. No core work. Rear delt at 38% of target. Lateral raise KPI flat. Trajectory across volume, strength, adherence, and corrective compliance is DECLINING.

8. PLAN FOR NEXT WEEK

Programme week: W17 (Week 17 of PPL x2 -- DELOAD WEEK)

NOTE: 9 active training weeks elapsed since last deload -- deload is overdue.

All working sets cut to 2 per exercise. Weights unchanged (do not reduce load).

MONDAY -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 57kg [rep collapse from 60kg -- drop 5%]

Overhead Press (Barbell) 2 x 7 @ 45kg [deload hold]

Lateral Raise (Dumbbell) 2 x 15 @ 10kg [deload -- target 11.25kg next cycle]

Triceps Pushdown 2 x 11 @ 27.2kg [deload hold]

Dead Bug 2 x 10 -- do not skip (T8-T12 kyphosis corrective)

Watch-point: Keep bench strict -- 2-second descent, full lockout. Rep quality over grinding. Duration target: 45 minutes including warm-up.

TUESDAY -- Pull A (Back + Biceps)

Bent Over Row (Barbell) 2 x 8 @ 70kg [deload hold]

Lat Pulldown (Machine) 2 x 6 @ 66kg [deload hold]

Bicep Curl (Barbell) 2 x 9 @ 20kg [deload hold]

Rear Delt Reverse Fly 2 x 12 @ 10kg [rear delt corrective -- 4 sets minimum]

Bird-Dog 2 x 10 -- do not skip (T8-T12 kyphosis corrective)

Watch-point: Log Pull Up with actual bodyweight (87kg) not 0kg. This is a data fix, not a progression.

WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 2 x 10 @ 20kg [MANDATORY APT corrective -- no prior log, conservative start; add 10kg/wk]

Squat (Barbell) 2 x 7 @ 70kg [deload hold]

Leg Extension (Machine) 2 x 9 @ 70kg [deload -- stay at 70, rep collapse at 77]

Lying Leg Curl (Machine) 2 x 10 @ 36kg [deload hold]

Bird-Dog 2 x 10 -- do not skip

Watch-point: Hip Thrust is the single most important exercise on Wednesday. If gym kit is short, Hip Thrust and Bird-Dog minimum -- skip extension/curl, not the corrective.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 7 @ 45kg [shoulder primary, deload hold]

Bench Press (Barbell) 2 x 6 @ 50kg [chest variation -- slightly lighter than Monday as shoulders took load]

Lateral Raise (Dumbbell) 2 x 15 @ 10kg [V-taper KPI -- deload hold]

Triceps Pushdown 2 x 11 @ 27.2kg [deload hold]

Dead Bug 2 x 10 -- do not skip

Watch-point: Shoulders primary today -- drive overhead press; bench is accessory.

Rest 90 seconds between overhead press sets.

FRIDAY -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 2 x 8 @ 70kg [deload hold]

Deadlift (Barbell) 2 x 8 @ 75kg [deload hold -- new to log, conservative]

Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg [MANDATORY -- face pull or reverse fly]

Bicep Curl (Barbell) 2 x 9 @ 20kg [deload hold]

Bird-Dog 2 x 10 -- do not skip

Watch-point: Rear Delt Reverse Fly mandatory per programme. Do not substitute or skip. Cumulative weekly rear delt sets must reach 8 across Tue and Fri combined.

SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Hip Thrust (Barbell) 2 x 10 @ 20kg [MANDATORY APT corrective]

Leg Press (Machine) 2 x 12 @ 50kg [deload hold]

Seated Leg Curl (Machine) 2 x 9 @ 43kg [deload hold]

Bulgarian Split Squat (BW) 2 x 8/side [single-leg, no prior log -- bodyweight]

Dead Bug 2 x 10 -- do not skip

Watch-point: Two Hip Thrust sessions this week (Wed + Sat) is non-negotiable to restart APT correction. Keep a 2-second hold at the top of each rep.

+-----+
Deload : needed this week -- next due Week 21, ~06 Oct 2026
Timing : 6-9 PM IST -- no sessions after midnight
Nutrition: 2,367 kcal/day 174g protein minimum
+-----+
