

# 30-Day Analysis Report

This week : 17 May to 24 May 2026

## ATHLETE PROFILE

**Name:** Ganesh  
**Profile:** 44M | 181 cm | 87 kg -> 79 kg  
**Goal:** Body Recomposition - Fat loss, muscle preservation  
**Pace:** 0.5 kg/week | 15% calorie deficit

*Generated on 2026-05-24*

## WEEKLY TRAINING REPORT

Generated : 2026-05-24 19:36 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 17 May to 24 May 2026

### 1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 6, 5, 6 sessions (avg 5.7)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Seated Cable Row - V Grip (Cable) -- 77kg x 10 reps (e1RM 102.7kg)

Biggest concern: Legs -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 84% (8,025 vs 50,673 kg\*reps)

### 2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 18 May 2026 08:28 IST | 42 min

Type : Monday: Pull (Cult)

Volume : 7,825 kg\*reps | 19 sets

Seated Cable Row - V Grip (Cable): 77kg x 10r x 3 sets (e1RM 102.7kg) vs prior: +2.6kg e1RM

Pull Up: 0kg x 7r x 4 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Shrug (Smith Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: +0.0kg e1RM

Face Pull: 24.9kg x 16r x 3 sets (e1RM 38.2kg) vs prior: -1.6kg e1RM

Hammer Curl (Dumbbell): 12.5kg x 10r x 3 sets (e1RM 16.7kg) vs prior: +0.5kg e1RM

Cable Crunch: 35kg x 15r x 3 sets (e1RM 52.5kg) vs prior: +0.0kg e1RM [FLAG: weight drop 35kg->30kg]

Session 2: Tuesday 19 May 2026 08:43 IST | 78 min

Type : Tuesday: Push (Cult)

Volume : 200 kg\*reps | 1 sets

Shoulder Press (Dumbbell): 20kg x 10r x 1 sets (e1RM 26.7kg) vs prior: -1.3kg e1RM

### 4-WEEK VOLUME TREND

Wk -3 (26 Apr-03 May): [#####] 52,352 kg\*reps 6 sess

Wk -2 (03 May-10 May): [#####.....] 40,120 kg\*reps 5 sess

Wk -1 (10 May-17 May): [#####.] 50,673 kg\*reps 6 sess

This wk (17 May-24 May): [###.....] 8,025 kg\*reps 2 sess

### 3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Pull Up

Best this week : 0kg x 7 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 7 reps

\* FLAGS: 0kg logged -- check entry

[C] Seated Cable Row - V Grip (Cable)

Best this week : 77kg x 10 reps (e1RM 102.7kg)

vs prior : UP +2.6kg vs 11 May

Next session : 79.5kg x 10 reps

[C] Shoulder Press (Dumbbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : DOWN -1.3kg vs 16 May

Next session : 19.0kg x 10 reps

[I] Cable Crunch

Best this week : 35kg x 15 reps (e1RM 52.5kg)

vs prior : SAME as 11 May

Next session : 35kg x 15 reps

\* FLAGS: weight drop (35kg->30kg)

[I] Face Pull

Best this week : 24.9kg x 16 reps (e1RM 38.2kg)

vs prior : DOWN -1.6kg vs 11 May

Next session : 23.65kg x 16 reps

[I] Hammer Curl (Dumbbell)

Best this week : 12.5kg x 10 reps (e1RM 16.7kg)

vs prior : SAME as 11 May

Next session : 13.75kg x 10 reps

[I] Shrug (Smith Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : SAME as 11 May

Next session : 70kg x 12 reps

## 4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

\* +-----+-----+-----+-----

|            |  |   |  |    |  |    |  |          |
|------------|--|---|--|----|--|----|--|----------|
| Chest      |  | 0 |  | 12 |  | 12 |  | CRITICAL |
| Back       |  | 7 |  | 14 |  | 7  |  | CRITICAL |
| Shoulders  |  | 1 |  | 10 |  | 9  |  | CRITICAL |
| Traps      |  | 3 |  | 6  |  | 3  |  | LOW      |
| Rear Delts |  | 3 |  | 8  |  | 5  |  | CRITICAL |
| Biceps     |  | 3 |  | 8  |  | 5  |  | CRITICAL |
| Triceps    |  | 0 |  | 8  |  | 8  |  | CRITICAL |
| Legs       |  | 0 |  | 14 |  | 14 |  | CRITICAL |
| Core       |  | 6 |  | 6  |  | 0  |  | OK       |

Push sets: 1 | Pull sets: 16 | Ratio pull:push = 16.00 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much

stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Enough work this week: Core

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

## 5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (26 Apr-03 May): 6 sessions

Wk -2 (03 May-10 May): 5 sessions

Wk -1 (10 May-17 May): 6 sessions

Time between sessions this week:

Mon 18 May 08:28 -> Tue 19 May 08:43: 24h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

## 6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

## WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

| Muscle     | This wk | Min | Status  |
|------------|---------|-----|---------|
| Chest      | 0       | 8   | AT RISK |
| Back       | 7       | 10  | AT RISK |
| Shoulders  | 1       | 8   | AT RISK |
| Traps      | 3       | 4   | AT RISK |
| Rear Delts | 3       | 6   | AT RISK |
| Biceps     | 3       | 6   | AT RISK |
| Triceps    | 0       | 6   | AT RISK |
| Legs       | 0       | 10  | AT RISK |
| Core       | 6       | 4   | OK      |

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 1

Weeks since last deload : 1 (deload every 4 weeks)

Next deload : in 3 week(s), approx 14 Jun 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W1 (started 2026-05-24; today is Day 1, Sunday REST --  
PPL x2 formal training begins Mon 25 May 2026)

Sessions this week: 2 of 6 target

NOTE: Both sessions (Mon 18 May, Tue 19 May) occurred before the PPL x2 start date under the old Cult/Drona split. Adherence is mapped against the PPL x2 template retroactively to establish a baseline.

| Day                                                                         | Expected | Detected          | Status                           |
|-----------------------------------------------------------------------------|----------|-------------------|----------------------------------|
| * +-----+-----+-----                                                        |          |                   |                                  |
| Mon 18 May                                                                  | Push A   | Pull A (INFERRED) | WRONG -- Pull done on Push A day |
| Tue 19 May                                                                  | Pull A   | Push (INFERRED)   | WRONG + INCOMPLETE (1 set only)  |
| Wed 20 May -- Sat 23 May : No sessions (4 consecutive days missed)          |          |                   |                                  |
| Adherence: 0% (0 of 2 sessions on correct PPL type; 4 of 6 sessions missed) |          |                   |                                  |

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 legs sessions this week.

APT correction absent for all 7 days. CRITICAL.

Core stabiliser (all sessions): 1 of 2 sessions

(Mon 18 May: Cable Crunch -- OK)

(Tue 19 May: not logged -- incomplete session)

Rear delt work in Pull sessions: 1 of 1 pull sessions

(Mon 18 May: Face Pull 3 sets -- OK)

Running weekly total: 3 of 8 target sets (37%)

Sessions over 60 min: Tue 19 May -- 78 min (18 min OVER the 60-min cap)

LATERAL RAISE (V-TAPER KPI):

This week : none performed (0 sets)

Prior week : 12.5kg x 13 reps (Dumbbell, best of 3 consistent sets; Tue 12 May & Sat 16 May)

35kg x 9 reps (Machine, Thu 14 May -- rep collapse on set 3)

Trend : DOWN

Note: No lateral raises of any kind performed this week. V-taper stimulus absent for 7 days. This is the primary KPI to restore in W2.

7. KEY INSIGHTS

RECOVERY AT 44

The only two sessions this week were Mon 18 May (Pull, 08:28) and Tue 19 May (Push, 08:43) -- a gap of 24 hours 15 minutes. Because these sessions trained different muscle groups (pulling muscles vs. pushing muscles), the same-muscle 48h rule was technically not violated, and the report confirms no back-to-back same-muscle pairs. However, 24h between consecutive training days is compressed systemic recovery for a 44-year-old athlete. More damaging was the pattern that followed: four days of zero training (Wed-Sat), meaning rest was bunched in the wrong place rather than distributed evenly. From a same-muscle standpoint, the last Pull session before Mon 18 May was Mon 11 May -- a 7-day gap -- which is well within safe limits. No 48h same-muscle violations this week.

## PPL ADHERENCE AND PROGRAMME AGE

Adherence this week: 0% (0 of 2 sessions matched the correct PPL session type). This is W1 of the PPL x2 programme, which formally starts tomorrow (Mon 25 May). Both sessions this week were done under the old Cult schedule: "Monday: Pull" and "Tuesday: Push," which is the direct reverse of the PPL x2 schedule (Mon = Push A, Tue = Pull A). Additionally, 4 of 6 target sessions were missed entirely (Wed through Sat). The most persistent gap in the 30-day log is the Wed-Sat block, suggesting a structural barrier on weekday evenings or Saturdays rather than random variation. The first full PPL x2 week (Mon 25 May - Sat 30 May) must hit all 6 sessions to establish the new pattern.

## CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0% -- no legs sessions were completed at all, so the glute-posterior chain received zero stimulus for 7 days. Anterior pelvic tilt (APT) means the hip flexors are chronically shortened and the glutes are neurologically inhibited. Weekly Hip Thrust is the primary corrective force counteracting this tilt; skipping it for a full week allows the pattern to reassert itself. Rear delt sets: 3 of 8 target this week (37.5%). When anterior deltoids are significantly stronger than the rear deltoids, the humeral head migrates forward in the glenohumeral socket during pressing and overhead movements. At age 44, cartilage and tendon recovery is slower, meaning this anterior-posterior imbalance compounds into rotator cuff impingement over months, not years. Face Pull and Rear Delt Reverse Fly must appear in every Pull session. Core stabiliser presence: 1 of 2 sessions (50%) -- Cable Crunch on Monday only.

## LATERAL RAISE TREND -- V-TAPER KPI

Trend this week: DOWN. Zero lateral raise sets performed vs. 12.5kg x 13 reps (Dumbbell) in the prior week. Lateral Raise at the Machine reached 35kg x 9 reps (Thu 14 May, prior week) but showed rep collapse. For Ganesh specifically, the love handles sit at exactly the same width as the lats, visually collapsing the waist-to-shoulder ratio regardless of body fat level. The only structural fix is lateral deltoid hypertrophy -- which requires consistent, progressive lateral raises every Push session. One missed week sets the KPI back; two missed weeks

erases adaptation. Target for W2: Dumbbell LR at 13.75kg, all 3 sets x 12 reps.

## HARD FLAGS

- \* Tue 19 May: 78-minute session with only 1 working set logged (Shoulder Press 20kg x 10). Either the workout was abandoned after the first exercise, or significant data entry was missed. If the session was real, the missing log is a tracking failure -- unlogged work cannot be progressed.
- \* Pull Up: 0kg recorded across all Pull sessions (bodyweight not entered in Hevy). Pull Ups count toward volume but cannot be load-progressed without accurate bodyweight data. Enter actual bodyweight in the app.
- \* Zero legs sessions this week: Hip Thrust, Leg Press, Romanian Deadlift, and Hip Abduction all at 0 sets vs. 14-set weekly target. Every major leg pattern missed.
- \* Tue 19 May: 78 min duration = 18 min over the 60-min per-session cap.
- \* Cable Crunch (Mon 18 May): Weight dropped from 35kg (set 1) to 30kg (sets 2-3) mid-session -- suggests fatigue from starting too heavy or insufficient warm-up.

## OVERALL VERDICT: DECLINING

This week is the worst in the 30-day log. 2 sessions vs. prior 3-week average of 5.7 sessions. Volume DOWN 84% (8,025 vs. 50,673 kg\*reps last week). All muscle groups below weekly maintenance minimums except core. The Tue 19 May session was effectively empty. Corrective markers (Hip Thrust, rear delts, core) were all below target. The programme formally begins tomorrow -- the W2 targets below are the first real test of the PPL x2 structure.

## 8. PLAN FOR NEXT WEEK

Programme week: W2 of PPL x2 | Mon 25 May to Sat 30 May 2026

Base rule: +2.5kg compounds / +1.25kg isolation if all sets hit target reps.

Drop 5% if rep collapse flagged. First appearance = conservative start.

MONDAY -- Push A (Chest primary + Shoulders + Triceps)

Incline Bench Press (Dumbbell) 4 x 10-12 @ 25kg

(Was 22.5kg x 12 x 4 -- all sets hit; compound +2.5kg)

Shoulder Press (Dumbbell) 3 x 10-12 @ 20kg

(Was 20kg x 12 x 3 on Sat 16 May; this week dropped to x10 in 1 set -- hold weight, rebuild rep consistency before adding load)

Chest Fly (Machine) 3 x 12 @ 52kg

(Was 52kg x 11 x 3 -- not all sets at 12 yet; hold until full 3x12 clean)

Lateral Raise (Dumbbell) 3 x 12 @ 13.75kg [V-TAPER KPI -- do not skip]

(Was 12.5kg x 13 x 3 -- all sets hit; isolation +1.25kg = 13.75kg)

Triceps Pushdown 3 x 12 @ 28.5kg

(Was 27.2kg x 11 x 3 -- all sets hit; isolation +1.25kg = 28.45kg)

Dead Bug 3 x 10 [mandatory T8-T12 corrective -- do not skip]

FOCUS: Lateral Raise is the primary V-taper KPI -- treat it as a main lift, not

a finisher. Monitor Shoulder Press reps; if still falling short of 10 on sets 2-3, flag for a regression review next report.

**TUESDAY -- Pull A (Back compound + Biceps)**

Seated Cable Row - V Grip (Cable) 3 x 10 @ 79.5kg

(Was 77kg x 10 x 3 -- all sets hit; compound +2.5kg = 79.5kg)

Pull Up 4 x 7 (bodyweight -- enter actual BW in Heavy)

(Hold until 3 consecutive sets hit 10 reps; focus on full range of motion)

Shrug (Smith Machine) 3 x 12 @ 72.5kg

(Was 70kg x 12 x 3 -- all sets hit; isolation +1.25kg -> round to 72.5kg)

Face Pull 3 x 15 @ 26.15kg

(Was 24.9kg x 16 x 3 -- all sets hit; isolation +1.25kg = 26.15kg)

Hammer Curl (Dumbbell) 3 x 10 @ 13.75kg

(Was 12.5kg x 10 x 3 -- all sets hit; isolation +1.25kg = 13.75kg)

Cable Crunch 3 x 15 @ 32.5kg

(Was 35kg -> 30kg weight drop mid-session; stabilise at 32.5kg before progressing)

Dead Bug 3 x 10 [mandatory corrective]

FOCUS: 79.5kg on Cable Row is a new high; if form degrades after rep 8, drop to 77kg and add a 4th set for volume compensation.

**WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes, Hip Thrust mandatory)**

Hip Thrust (Machine) 3 x 12 @ 22.5kg [MANDATORY APT CORRECTION]

(Was 20kg x 13 x 3 -- all sets hit; compound +2.5kg = 22.5kg. Do this first.)

Leg Press (Machine) 3 x 12 @ 62.5kg

(Was 60kg x 12 x 3 -- all sets hit; compound +2.5kg = 62.5kg)

Romanian Deadlift (Dumbbell) 3 x 10 @ 42.5kg

(Was 40kg x 11 x 3 -- all sets hit; compound +2.5kg = 42.5kg)

Sissy Squat (Weighted) 3 x 12 (bodyweight -- increase reps toward 15 before adding load)

Hip Abduction (Machine) 3 x 10 @ 86.25kg

(Was 85kg x 10 x 3 -- all sets hit; isolation +1.25kg = 86.25kg)

Hip Adduction (Machine) 3 x 10 @ 46.25kg

(Was 45kg x 10 x 3 -- all sets hit; isolation +1.25kg = 46.25kg)

Dead Bug 3 x 10 [mandatory corrective]

FOCUS: Hip Thrust is non-negotiable -- APT correction depends on it every Legs session. If the machine is occupied, use a bench and barbell variant.

**THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)**

Seated Shoulder Press (Machine) 3 x 10 @ 82.5kg

(Was 80kg x 10 x 3 -- all sets hit; compound +2.5kg = 82.5kg)

Chest Press (Machine) 4 x 12 @ 61.25kg

(Was 60kg x 12 x 4 -- all sets hit; isolation +1.25kg = 61.25kg; if machine increments in 2.5kg, use 62.5kg)

Lateral Raise (Machine) 3 x 10 @ 35kg [hold -- rep collapse flagged]

(Was 35kg x 9/9/8 -- set 3 collapsed to 8; hold weight, target all 3x10)

Triceps Pushdown 3 x 12 @ 57kg [dropped from 60kg]  
(Was 60kg x 11/11/9 -- rep collapse on set 3; drop 5% = 57kg;  
rebuild to 3x12 before returning to 60kg)

Dead Bug 3 x 10 [mandatory corrective]

FOCUS: Triceps Pushdown back to 57kg this session -- full range, pause at full extension, no elbow flare. Return to 60kg only when all 3 sets hit 12.

FRIDAY -- Pull B (Back + Rear Delts + Biceps, Face Pull mandatory)

Lat Pulldown (Machine) 3 x 10 @ 62.5kg  
(Was 60kg x 11 x 3 -- all sets hit; compound +2.5kg = 62.5kg)

Rear Delt Reverse Fly (Machine) 4 x 12 @ 51.25kg  
(Was 50kg x 11 x 4 -- all sets hit; isolation +1.25kg = 51.25kg)

Face Pull 3 x 15 @ 26.15kg [MANDATORY rear delt target]  
(Combined with Reverse Fly above = 7 rear delt sets; aim for 8 by adding 1 extra Reverse Fly set if time permits)

Bicep Curl (Machine) 3 x 12 @ 25kg [hold -- rep decline flagged]  
(Was 25kg x 12/11/10 -- gradual rep decline across sets; hold until all 3x12)

Shrug (Smith Machine) 3 x 12 @ 72.5kg  
(Traps coverage to close the weekly gap)

Dead Bug 3 x 10 [mandatory corrective]

FOCUS: Rear delts are the primary health risk at 44. Both Reverse Fly AND Face Pull must be completed. Combined with Monday's Face Pull (3 sets), this week total rear delt: 9 sets -- first time meeting the 8-set minimum.

SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg + Rack Pull, Hip Thrust mandatory)

Hip Thrust (Machine) 3 x 12 @ 22.5kg [MANDATORY APT CORRECTION]  
(Same progression as Legs A -- do this first)

Deadlift (Trap bar / Rack Pull) 3 x 9 @ 97.5kg  
(Was 95kg x 9 x 2 sets -- both sets hit; compound +2.5kg = 97.5kg)

Leg Press (Machine) 3 x 10 @ 72.5kg  
(Was 70kg x 10 x 3 -- all sets hit; compound +2.5kg = 72.5kg)

Seated Leg Curl (Machine) 3 x 10 @ 43kg [hold -- not yet at 10 reps]  
(Was 43kg x 8 x 3 -- below 10-rep target; hold weight, focus on reps)

Bulgarian Split Squat 3 x 8 per leg (bodyweight -- NEW exercise)  
(Single-leg pattern required for Legs B; conservative BW start. Add 5kg barbell hold once 3x10 per leg is clean)

Dead Bug 3 x 10 [mandatory corrective]

FOCUS: Saturday Legs B is the session most frequently skipped in the 30-day log.  
Book the 6-9 PM slot now. Hip Thrust and Deadlift are the non-negotiables if time is tight -- drop Split Squat before dropping either of those.

+-----+

|            |                                                  |  |
|------------|--------------------------------------------------|--|
| Deload     | : not yet -- next due Week 5, approx 14 Jun 2026 |  |
| Timing     | : 6-9 PM IST -- no sessions after midnight       |  |
| Nutrition: | 2,367 kcal/day   174g protein minimum            |  |
