

WEEKLY TRAINING REPORT

Generated : 2026-08-23 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 16 Aug to 23 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 0, 2, 3 sessions (avg 1.7)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 50kg x 12 reps (e1RM 70.0kg)

Biggest concern: Back -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 61% (5,056 vs 13,059 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 19 Aug 2026 09:12 IST | 32 min

Type : Full Body B -- Wednesday

Volume : 5,056 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 36kg x 9r x 3 sets (e1RM 46.8kg) [FLAG: rep collapse 9->6]

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -30.1kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 24.9kg x 11r x 3 sets (e1RM 34.0kg) vs prior: -3.2kg e1RM

4-WEEK VOLUME TREND

Wk -3 (26 Jul-02 Aug): [.....] 0 kg*reps 0 sess

Wk -2 (02 Aug-09 Aug): [#####.....] 8,973 kg*reps 2 sess

Wk -1 (09 Aug-16 Aug): [#####] 13,059 kg*reps 3 sess

This wk (16 Aug-23 Aug): [#####.....] 5,056 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)

vs prior : SAME as 12 Aug

Next session : 45kg x 7 reps

Wk -2 (02 Aug-09 Aug): 2 sessions

Wk -1 (09 Aug-16 Aug): 3 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

=====

6. BODY RECOMPOSITION CHECK

=====

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

•

Chest 0 8 AT RISK

Back 0 10 AT RISK

Shoulders 3 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 0 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 6 10 AT RISK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 6

Weeks since last deload : 6 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

=====

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

=====

Programme week: W13 (started 2026-05-24; 12 full weeks elapsed, now in week 13)

Sessions this week: 1 of 6 target

Day | Expected | Detected | Status

• +-----+-----+-----

Mon 17 Aug | Push A | NOT LOGGED | MISSED

Tue 18 Aug | Pull A | NOT LOGGED | MISSED

Wed 19 Aug | Legs A | Full Body B | WRONG (UNTRACKED -- mixed Push/Legs/Pull, no PPL keyword)

Thu 20 Aug | Push B | NOT LOGGED | MISSED

Fri 21 Aug | Pull B | NOT LOGGED | MISSED

Sat 22 Aug | Legs B | NOT LOGGED | MISSED (today -- not yet logged)

Adherence: 0% (0 of 1 logged sessions matched expected PPL type)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions -- leg work done in Full Body B on Wed 19 Aug with NO Hip Thrust (MISSING -- APT correction skipped)

Core stabiliser (all sessions): 0 of 1 sessions -- no Dead Bug, Bird-Dog, or Plank logged this week (CRITICAL)

Rear delt work in Pull sessions: 0 of 0 dedicated Pull sessions -- no rear delt work this week

Sessions over 60 min : None (Wed 19 Aug was 32 min -- OK)

LATERAL RAISE (V-TAPER KPI):

This week: None logged | Prior week (9-15 Aug): 10kg x 14 reps | Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44:

Only 1 session this week (Wed 19 Aug, 32 min), so same-muscle recovery gaps are not the issue -- the issue is absence. Looking at the prior week, the tightest pair was Session 4 (Full Body B, Wed 12 Aug at 09:09 IST) and Session 5 (Full Body C, Fri 14 Aug at 08:49 IST): gap of 47h 40min -- just 20 minutes short of the required 48h minimum. Both sessions worked shoulders (OHP) and leg muscles, making this a minor flag. All other inter-session gaps across the 30-day log clear 48h comfortably. At 44, even a 20-minute shortfall compounds recovery debt that shows up as rep collapse -- and rep collapse (Seated Leg Curl 9 -> 6, Leg Extension 77kg -> 50kg) is exactly what appeared this week.

PPL ADHERENCE AND PROGRAMME AGE:

Week 13 of the PPL x2 programme (started 2026-05-24) and adherence this week is 0%. The only session logged -- Full Body B on Wednesday -- is a holdover from the pre-PPL Full Body template and does not match the Legs A day it replaced. Over the last four weeks, session counts are 0, 2, 3, 1 (average 1.5/week against a 6/week target). The most consistently skipped days are the second half of the week: no Thursday, Friday, or Saturday session has been logged in the 30-day window. The programme is in name only right now -- the training pattern is Full Body 2-3x/week, not PPL 6x/week.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate this week: 0% (not logged despite leg work on Wed 19 Aug). APT (anterior pelvic tilt) builds silently when the hip flexors stay dominant and the glutes get no dedicated loading. Hip Thrust is the single most effective corrective for this. Core stabiliser (Dead Bug / Bird-Dog) was 0 of 1 sessions this week -- the T8-T12 thoracic kyphosis cue is being ignored entirely. Rear delt sets: 0 this week vs the 8-set target. When the front deltoid (worked by every OHP and bench) stays significantly stronger than the rear delt, the humeral head migrates forward in the socket under load. At 44, the rotator cuff tendons have less elasticity to absorb this shear force, and impingement typically follows within 6-12 weeks of sustained imbalance. Rear delt work is non-negotiable.

LATERAL RAISE TREND (V-TAPER KPI):

No Lateral Raise logged this week -- trend is DOWN. The best recent set remains 10kg x 14 (Mon 10 Aug and Mon 3 Aug -- the same weight both weeks, no progression in 3 weeks). Ganesh's love handles sit at approximately lat-width level, meaning the waist and lat silhouette are the same width and the V-taper is effectively absent. Lateral raises widen the shoulder cap, which is the only way to visually narrow the waist without losing bodyweight. Until lateral raise weight progresses above 10kg, the V-taper deficit will not improve. This is the single highest-priority isolation lift for physique goals.

HARD FLAGS:

- Seated Leg Curl rep collapse: 9 -> 6 on set 3 (Wed 19 Aug). Weight not yet too heavy but fatigue is accumulating within the set. Rest longer between sets (3 min).
- Leg Extension load dropped from 77kg (Wed 12 Aug) to 50kg (Wed 19 Aug): a 35% drop in one week, the largest single-exercise regression in the log. Not a deload
 - this appears to be a reset to an easier weight. Investigate machine settings.
- No Hip Thrust in any session this week despite 6 leg-targeted sets: APT correction is being actively skipped.
- No core stabiliser (Dead Bug / Bird-Dog) in any session this week: T8-T12 kyphosis corrective is being actively skipped.
- Session count dropped to 1 from 3 (prior week): programme is decelerating in week 13 -- the opposite of the pattern needed as the programme matures.

OVERALL VERDICT: DECLINING

Volume is down 61% week-on-week (5,056 vs 13,059 kg*reps). Strength is regressing on Leg Extension (-35%) and Triceps Pushdown (-8%). Adherence to PPL is 0%. All corrective markers (Hip Thrust, core, rear delts) missed. The one positive -- OHP held at 45kg x 7 -- is not enough to offset the broader decline.

=====

8. PLAN FOR NEXT WEEK

=====

Programme week: W14 (Week 14 of PPL x2)

NOTE: The system flags a deload as overdue (6 weeks since last deload; cycle is every 4 weeks). Given that this week was already very low volume (1 session, 32 min), the deload is considered served. Begin Week 14 with normal working weights.

•
MONDAY -- Push A (Chest primary + Shoulders + Triceps)

•
Bench Press (Barbell) 3 x 6 @ 62.5kg
(last: 60kg x 6, all sets clean -- compound +2.5kg)
Overhead Press (Barbell) 3 x 7 @ 45kg
(last: 45kg x 7 x 2 sessions -- no rep gain yet, hold weight)
Lateral Raise (Dumbbell) 3 x 14 @ 10kg
(V-TAPER KPI -- missed last week; hold weight, nail all 14 reps cleanly before adding 1.25kg. Do not skip this exercise.)
Triceps Pushdown 3 x 11 @ 24.9kg
(was 27.2kg, rep collapsed and reduced; hold 24.9kg until 3x11 clean)
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)
Focus: get every rep of Bench at 62.5kg. If set 3 drops below 5 reps, hold at 60kg next session. Lateral Raise is non-negotiable this session.

•
TUESDAY -- Pull A (Back compound + Biceps)

•
Bent Over Row (Barbell) 3 x 7 @ 72.5kg
(last: 70kg x 7 x 3 sets clean -- compound +2.5kg)
Pull Up (Bodyweight) 3 x 6 @ 0kg
(consistent -- add 1 rep target: aim for 7 each set)
Lat Pulldown (Machine) 3 x 6 @ 68.5kg
(last: 66kg x 6 x 2 sets -- compound +2.5kg; add the third set)
Bicep Curl (Barbell) 3 x 9 @ 21.25kg
(last: 20kg x 9 x 2 sessions, same weight -- isolation +1.25kg)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12 corrective)
Focus: complete 3 sets on Lat Pulldown (only 2 logged last time). Row at 72.5kg -- reset to 70kg if set 2 drops below 6 reps.

•
WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust mandatory)

•
Hip Thrust (Barbell) 3 x 10 @ 40kg -- MANDATORY APT corrective
(no recent log; start conservative at 40kg, focus on full glute squeeze at top)
Squat (Barbell) 4 x 6 @ 72.5kg
(last: 70kg x 6 x 2 sets clean -- compound +2.5kg)
Leg Extension (Machine) 3 x 9 @ 72.5kg
(last valid: 77kg x 9; dropped to 50kg this week -- return toward 77kg via 72.5kg; if smooth, go back to 77kg the following week)
Lying Leg Curl (Machine) 3 x 10 @ 37.5kg
(last: 36kg x 10 x 3 sets clean -- isolation +1.25kg, rounded to 37.5kg)
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)
Focus: Hip Thrust first, before legs are fatigued. Log every set. Do not substitute Leg Press for Squat -- PPL Legs A is quad-primary.

•
THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

•
Overhead Press (Barbell) 3 x 7 @ 45kg
(shoulders primary this day -- hold weight, shoot for all reps)

Incline Dumbbell Press 3 x 10 @ 20kg per hand
(no recent log -- conservative start as chest variation)
Lateral Raise (Dumbbell) 3 x 14 @ 10kg
(V-TAPER KPI -- repeat from Monday; two lateral raise sessions/week)
Triceps Pushdown 3 x 11 @ 24.9kg
(same as Monday -- consistency before progression)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12 corrective)
Focus: Shoulders are primary today, so OHP goes first. Lateral Raise second. If Monday's lateral raise hit all 14 reps cleanly, try 11.25kg today.

•
FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Face Pull mandatory)

•
Bent Over Row (Barbell) 3 x 7 @ 72.5kg
(same as Tuesday -- reinforcing the compound base)
Face Pull (Cable) 3 x 15 @ 15kg -- MANDATORY rear delt work
(last logged rear delt: Rear Delt Fly 10kg x 13, Fri 14 Aug;
switch to Face Pull for external rotation component -- better for
rotator cuff health at 44; if no cable, use Rear Delt Fly 11.25kg x 13)
Lat Pulldown (Machine) 3 x 6 @ 68.5kg
(repeat from Tuesday)
Bicep Curl (Barbell) 3 x 9 @ 21.25kg
(repeat from Tuesday)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12 corrective)
Focus: Rear delt work is the highest priority on Pull B. Do Face Pull /
Rear Delt Fly before bicep curls. This protects the rotator cuff.

•
SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg + Rack Pull -- Hip Thrust mandatory)

•
Hip Thrust (Barbell) 3 x 10 @ 40kg -- MANDATORY APT corrective
(same as Wednesday -- twice weekly is the minimum for APT correction)
Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
(last: 75kg x 8 x 3 sets clean -- compound +2.5kg)
Leg Press (Machine) 3 x 12 @ 52.5kg
(last: 50kg x 12 x 3 sets clean -- compound +2.5kg)
Seated Leg Curl (Machine) 3 x 9 @ 36kg
(rep collapse flagged 9->6; hold weight, extend rest to 3 min between sets)
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)
Focus: Hip Thrust opens the session while glutes are fresh. RDL is the
primary hip-hinge -- do not rush the eccentric. Log all sets.

+-----+	
Deload : not yet -- served this week (1 session only)	
next due Week 18, approximately 2026-09-19	
Timing : 6-9 PM IST -- no sessions after midnight	
Nutrition: 2,367 kcal/day 174g protein minimum	
+-----+
