

30-Day Analysis Report

This week : 05 Aug to 12 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-11

WEEKLY TRAINING REPORT

Generated : 2026-08-12 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 05 Aug to 12 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 5, 0, 1 sessions (avg 2.0)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : Volume UP 198% (8,953 vs 3,000 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 05 Aug 2026 08:54 IST | 51 min

Type : Full Body B -- Wednesday

Volume : 5,973 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM

Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]

Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]

Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +2.8kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Monday 10 Aug 2026 08:59 IST | 42 min

Type : Full Body A -- Monday

Volume : 2,980 kg*reps | 13 sets

Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: -9.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (15 Jul-22 Jul): [#####] 23,925 kg*reps 5 sess

Wk -2 (22 Jul-29 Jul): [.....] 0 kg*reps 0 sess

Wk -1 (29 Jul-05 Aug): [##.....] 3,000 kg*reps 1 sess

This wk (05 Aug-12 Aug): [#####.....] 8,953 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

[C] Overhead Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -3.4kg vs 15 Jul

Next session : 38.0kg x 10 reps

* FLAGS: rep collapse (10->4)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : SAME as 15 Jul

Next session : 75kg x 8 reps

[C] Squat (Barbell)

Best this week : 70kg x 6 reps (e1RM 84.0kg)

vs prior : DOWN -9.3kg vs 13 Jul

Next session : 66.5kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : UP +2.8kg vs 15 Jul

Next session : 11.25kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : DOWN -4.7kg vs 15 Jul

Next session : 66.5kg x 12 reps

* FLAGS: rep collapse (12->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 15 Jul

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		3		6		3		LOW
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (15 Jul-22 Jul): 5 sessions

Wk -2 (22 Jul-29 Jul): 0 sessions

Wk -1 (29 Jul-05 Aug): 1 sessions

Time between sessions this week:

Wed 05 Aug 08:54 -> Mon 10 Aug 08:59: 120h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK

Back	6	10	AT RISK
Shoulders	6	8	AT RISK
Traps	3	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	10	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 5

Weeks since last deload : 5 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W12 (started 2026-05-24; 80 days elapsed, rounded up = 12 weeks)

Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+-----+			
Wed 05 Aug	Legs A	Full Body B (INFERRED)	MISMATCH
Thu 06 Aug	Push B	--	MISSED
Fri 07 Aug	Pull B	--	MISSED
Sat 08 Aug	Legs B	--	MISSED
Sun 09 Aug	REST	--	OK
Mon 10 Aug	Push A	Full Body A (INFERRED)	MISMATCH
Tue 11 Aug	Pull A	--	MISSED

Adherence: 0% (0 of 2 sessions on correct PPL type; 4 non-rest days with no session)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions -- Hip Thrust NOT LOGGED -- MISSING all week

Core stabiliser (all sessions): 0 of 2 sessions -- Dead Bug / Bird-Dog absent from both sessions

Rear delt work in Pull sessions: 0 of 0 Pull sessions this week -- rear delt sets = 0 vs 8/week target

Sessions over 60 min : None -- Wed 05 Aug 51 min OK, Mon 10 Aug 42 min OK

LATERAL RAISE (V-TAPER KPI):

This week: 10kg x 14 reps | Prior week: 10kg x 14 reps | Trend: SAME

7. KEY INSIGHTS

RECOVERY AT 44:

This week had two sessions: Wed 05 Aug (08:54) and Mon 10 Aug (08:59). The only same-muscle pair -- Romanian Deadlift (back/traps) on Wednesday and Pull Up (back) on Monday -- was separated by 120 hours, well clear of the 48-hour minimum. No back-to-back same-muscle risk this week. However the real recovery concern runs the other direction: a 120-hour gap between sessions means CNS freshness is sitting unused. With only 2 sessions vs a 6-session target, the compounds (Squat, Bench, OHP) are declining from underuse stimulus, not from overtraining fatigue. Squat e1RM dropped 9.3kg and Bench e1RM dropped 8.2kg since the last solid training block in mid-July -- detraining, not overreaching.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week W12 of the PPL x2 programme (started 2026-05-24). Adherence this week: 0% -- both sessions were labelled and structured as Full Body (A and B), not PPL Push/Pull/Legs. Only 2 of 6 target sessions were completed. Missed days: Thursday (Push B), Friday (Pull B), Saturday (Legs B), and Tuesday (Pull A is still outstanding as of report date). The missed cluster of Thu-Sat is consistent across recent weeks, suggesting an evening schedule gap or weekend fatigue. Twelve weeks into the programme and the PPL structure has not been adopted -- the full-body format is persisting as the de-facto routine.

CORRECTIVE COMPLIANCE:

Hip Thrust: zero sessions, zero reps this week. No dedicated Legs session in PPL format was logged, so no structural slot existed to mandate the Hip Thrust. Anterior pelvic tilt (APT) remains unaddressed. Dead Bug / Bird-Dog: absent from both sessions (0 of 2 -- lower thoracic kyphosis T8-T12 corrective not performed). Rear delt sets: 0 this week vs 8/week target. At 44, with OHP at ~53kg e1RM and rear delt reverse fly at 14kg e1RM, the front-to-rear shoulder ratio is sharply imbalanced. Sustained anterior shoulder dominance narrows the subacromial space -- the rotator cuff tendons pass through that space. Repeated compression causes impingement, and at 44, rotator cuff tendons heal significantly more slowly than at 30. This is not a distant risk -- it is accumulating now.

LATERAL RAISE TREND (V-TAPER KPI):

Lateral Raise has been logged at 10kg x 14 reps for three consecutive appearances: Mon 13 Jul, Mon 03 Aug, Mon 10 Aug. The V-taper KPI is FLAT for at least 4 weeks. For Ganesh, love handles sit at lat-width level, meaning the visual waist-to-shoulder ratio is already collapsed. Shoulder width increasing via lateral raise progression is the primary visual lever available without structural change. At 10kg stagnant for a month, no silhouette change is occurring. Next session: try 11.25kg. If all 3 sets hit 14 reps, keep it at 11.25kg the following week.

HARD FLAGS:

1. Overhead Press rep collapse (Wed 05 Aug): Set 1 = 40kg x 10, Set 2 = 45kg x 5, Set 3 = 45kg x 4. A 12.5% weight jump within the same session after warm-up caused immediate failure. Base next session on 38kg (5% cut from 40kg per rep-collapse rule).
2. Leg Extension rep collapse (Wed 05 Aug): 70kg x 12 -> 70kg x 11 -> 70kg x 8. Three sets at same weight produced a 33% rep drop. Drop to 66.5kg next session.
3. Squat e1RM -9.3kg: from 93.3kg (Mon 13 Jul) to 84.0kg (Mon 10 Aug) -- 4 weeks of insufficient training stimulus showing up as compound strength loss.
4. Bench Press e1RM -8.2kg: from 80.2kg (Mon 13 Jul) to 72.0kg (Mon 10 Aug). Same cause.
5. Deload OVERDUE: 5 active training weeks since last structured deload. Programme mandates every 4 weeks. Joints and connective tissue fatigue accumulates even at low session volumes -- the risk is asymmetric load on tendons and ligaments, not just muscular fatigue.

OVERALL VERDICT: DECLINING

Volume is nominally up 198% vs last week (which was a single session), but the absolute level (2 sessions, 8,953 kg*reps) is critically below target. All three tested compounds are trending down. PPL adherence is 0% at Week 12 of the programme. Every corrective exercise category (Hip Thrust, Dead Bug/Bird-Dog, Rear Delt work) returned 0 compliance this week. DECLINING.

8. PLAN FOR NEXT WEEK

Programme week: W13 (Week 13 of PPL x2 -- DELOAD WEEK, overdue from W12)

This is a mandatory deload. All main lifts: 2 sets per exercise, weights as listed.

Corrective exercises remain at 3 sets -- do not skip them during deload.

MONDAY 17 AUG -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell)	2x6 @ 60kg
Overhead Press (Barbell)	2x10 @ 38kg [rep collapse -> 5% reduction from 40kg]
Chest Fly (Machine)	2x10 @ 65kg
Lateral Raise (Dumbbell)	2x14 @ 10kg [V-taper KPI]
Triceps Pushdown	2x11 @ 27.2kg
Dead Bug	3x10 -- do not skip (T8-T12 corrective)

Key focus: OHP weight is 38kg, not 45kg. The prior session jumped 12.5% within one session and collapsed to 4 reps. Two clean sets at 38kg are worth more than a failed attempt at 45kg.

TUESDAY 18 AUG -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell)	2x7 @ 70kg
Pull Up (Bodyweight)	2x6 @ 0kg [track reps accurately; 0kg is Heavy's bodyweight entry]
Bicep Curl (Dumbbell)	2x10 @ 10kg
Dead Bug	3x10 -- do not skip

Key focus: First dedicated Pull A session in PPL format. Log Pull Up reps reliably -- these numbers are needed to know when to progress to weighted pull-ups.

WEDNESDAY 19 AUG -- Legs A (Quads + Hamstrings + Glutes)

Squat (Barbell)	2x6 @ 70kg
Leg Extension (Machine)	2x10 @ 66.5kg [rep collapse -> 5% cut from 70kg]

Hip Thrust (Barbell) 2x10 @ 60kg [MANDATORY -- conservative start, not in log 30+ days]

Dead Bug 3x10 -- do not skip

Key focus: Hip Thrust is non-negotiable on every Legs session. 60kg is a safe starting weight -- focus on hip drive and glute activation, not lower back extension. APT will not correct without this lift in the programme.

THURSDAY 20 AUG -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 2x8 @ 90kg

Incline Chest Press (Machine) 2x11 @ 30kg

Lateral Raise (Dumbbell) 2x14 @ 10kg [second lateral raise session this week]

Skullcrusher (Dumbbell) 2x12 @ 20kg

Dead Bug 3x10 -- do not skip

Key focus: Two lateral raise sessions per week is intentional -- the V-taper KPI has been stagnant for 4 weeks. More weekly stimulus is needed to break the plateau.

FRIDAY 21 AUG -- Pull B (Back + Rear Delts + Biceps)

Deadlift (Barbell) 2x7 @ 80kg

Rear Delt Reverse Fly (DB) 3x13 @ 10kg [MANDATORY -- keep 3 sets even in deload]

Bicep Curl (Machine) 2x10 @ 25kg

Dead Bug 3x10 -- do not skip

Key focus: Rear Delt Reverse Fly is non-negotiable on every Pull B session. Zero rear delt sets this week makes this urgent. Three sets, not two -- the deficit is critical and rear delt work is low-fatigue enough to hold full volume through a deload.

SATURDAY 22 AUG -- Legs B (Glutes + Hamstrings + Single-Leg)

Hip Thrust (Barbell) 2x10 @ 60kg [MANDATORY -- second Legs session this week]

Romanian Deadlift (Barbell) 2x8 @ 75kg

Bulgarian Split Squat (DB) 2x8 per leg @ 10kg each hand [conservative start]

Shrug (Barbell) 2x12 @ 70kg [traps deficit]

Dead Bug 3x10 -- do not skip

Key focus: Hip Thrust mandatory. Drive through the hips -- if lower back is loading more than glutes, reduce weight. Shrug is included to address the ongoing traps deficit (3 sets vs 6/week target).

+-----+

Deload	: needed W13 (overdue from W12); next due W17, ~14 Sep	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	

+-----+
