

This week : 18 Sep to 25 Sep 2026

ATHLETE PROFILE

Name: Ganesh

Profile: 44M | 181 cm | 87 kg -> 79 kg

Goal: Body Recomposition -- Fat loss, muscle preservation

Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-24

POWERED BY HEVY AGENT * CLAUDE AI

WEEKLY TRAINING REPORT

Generated : 2026-09-25 05:11 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 18 Sep to 25 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 2, 3, 2 sessions (avg 2.3)
Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Bent Over Row (Barbell) -- 60kg x 11 reps (e1RM 82.0kg)
Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)
vs last week : Volume UP 2% (10,380 vs 10,144 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 18 Sep 2026 10:44 IST | 62 min
Type : Full Body C -- Friday
Volume : 1,320 kg*reps | 2 sets
Bent Over Row (Barbell): 60kg x 11r x 2 sets (e1RM 82.0kg) vs prior: -6.7kg e1RM
Session 2: Monday 21 Sep 2026 12:53 IST | 102 min
Type : Mon - Bench, Pull-ups, Shrugs, Lat Raise
Volume : 4,020 kg*reps | 12 sets
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: +0.0kg e1RM [FLAG: rep collapse 12->6]
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Shrug (Barbell): 50kg x 15r x 3 sets (e1RM 75.0kg)
Lateral Raise (Dumbbell): 12.5kg x 12r x 3 sets (e1RM 17.5kg) vs prior: +2.5kg e1RM
Session 3: Wednesday 23 Sep 2026 12:57 IST | 73 min
Type : Wed - OHP, Back Ext, Legs, Triceps
Volume : 5,040 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM
Back Extension (Hyperextension): 0kg x 12r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Seated Leg Curl (Machine): 43kg x 10r x 3 sets (e1RM 57.3kg) vs prior: +1.4kg e1RM
Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (28 Aug-04 Sep): [#####...] 10,254 kg*reps 2 sess
Wk -2 (04 Sep-11 Sep): [#####] 12,099 kg*reps 3 sess
Wk -1 (11 Sep-18 Sep): [#####...] 10,144 kg*reps 2 sess
This wk (18 Sep-25 Sep): [#####...] 10,380 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))
[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : SAME as 07 Sep

Next session : 60kg x 6 reps

* FLAGS: rep collapse (12->6)

[C] Bent Over Row (Barbell)

Best this week : 60kg x 11 reps (e1RM 82.0kg)

vs prior : DOWN -6.7kg vs 28 Aug

Next session : 57.0kg x 11 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : SAME as 09 Sep

Next session : 45kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[I] Back Extension (Hyperextension)

Best this week : 0kg x 12 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 12 reps

* FLAGS: 0kg logged -- check entry

[I] Lateral Raise (Dumbbell)

Best this week : 12.5kg x 12 reps (e1RM 17.5kg)

vs prior : UP +2.5kg vs 07 Sep

Next session : 13.75kg x 12 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -32.7kg vs 09 Sep

Next session : 47.5kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 10 reps (e1RM 57.3kg)

vs prior : UP +1.4kg vs 26 Aug

Next session : 44.25kg x 10 reps

[I] Shrug (Barbell)

Best this week : 50kg x 15 reps (e1RM 75.0kg)

vs prior : First time in 30-day log

Next session : 50kg x 15 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 26 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

Chest | 3 | 12 | 9 | CRITICAL

Back | 5 | 14 | 9 | CRITICAL

Shoulders | 6 | 10 | 4 | CRITICAL

Traps | 3 | 6 | 3 | LOW

Rear Delts | 0 | 8 | 8 | CRITICAL

Biceps | 3 | 8 | 5 | CRITICAL

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 6 | 14 | 8 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 12 | Pull sets: 11 | Ratio pull:push = 0.92 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (28 Aug-04 Sep): 2 sessions

Wk -2 (04 Sep-11 Sep): 3 sessions

Wk -1 (11 Sep-18 Sep): 2 sessions

Time between sessions this week:

Fri 18 Sep 10:44 -> Mon 21 Sep 12:53: 74h

Mon 21 Sep 12:53 -> Wed 23 Sep 12:57: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK

Back 5 10 AT RISK
Shoulders 6 8 AT RISK
Traps 3 4 AT RISK
Rear Delts 0 6 AT RISK
Biceps 3 6 AT RISK
Triceps 3 6 AT RISK
Legs 6 10 AT RISK
Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 11

Weeks since last deload : 11 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W18 (started 2026-05-24; 123 days elapsed = 17.57 weeks, rounded up)

Sessions this week: 3 of 6 target

Day | Expected | Detected | Status

Fri 18 Sep | Pull B | Pull (INFERRED) | OK -- Bent Over Row confirms pull

Mon 21 Sep | Push A | Push (INFERRED) | OK -- Bench + OHP + Lateral Raise confirm push

Wed 23 Sep | Legs A | Push+Legs (INFERRED) | WRONG -- OHP+Triceps added to Legs day

Adherence: 67% (2 of 3 attempted sessions matched expected day type)

Programme sessions hit out of 6 target: 3 (50%)

Missed days this week:

Sat 19 Sep -- Legs B (skipped)

Tue 22 Sep -- Pull A (skipped)

Thu 24 Sep -- Push B (today; not yet logged as of report time)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 legs sessions -- MISSING on Wed 23 Sep (APT correction skipped)

Core stabiliser (all sessions): 0 of 3 sessions -- no Dead Bug, Bird-Dog or Plank logged any session

Rear delt work in Pull sessions: 0 of 1 pull sessions -- no Face Pull or Rear Delt Fly on Fri 18 Sep

Sessions over 60 min: ALL THREE sessions exceeded limit

Fri 18 Sep: 62 min (2 min over)

Mon 21 Sep: 102 min (42 min over -- critical)

Wed 23 Sep: 73 min (13 min over)

LATERAL RAISE (V-TAPER KPI):

This week: 12.5kg x 12 | Prior week (11-17 Sep): none logged | Last logged: 07 Sep 10kg x 15 | Trend: UP (+2.5kg)

7. KEY INSIGHTS

RECOVERY AT 44:

Three sessions this week, two adjacent pairs. Fri 18 Sep (Pull: Bent Over Row) -> Mon 21 Sep (Push: Bench + Shoulders) = 74h gap, different muscle groups, fully adequate. Mon 21 Sep (Push: Bench, Lateral Raise, Triceps) -> Wed 23 Sep (OHP, Triceps, Legs) = exactly 48h gap, which is the minimum. Triceps and shoulders were hit in both sessions with only 48h between them. At 44 connective tissue recovers slower than muscle fibre, so 48h is the floor not a target. Every pair cleared the 48h minimum, but the Mon-Wed pairing left zero recovery margin for shoulders and triceps. Spread those sessions to at least 72h whenever possible.

PPL ADHERENCE AND PROGRAMME AGE:

This is W18 of the PPL x2 programme (started 2026-05-24). Only 3 of 6 sessions were completed this week (50% of target). Of those 3, 2 matched the expected PPL type for the day (67% hit rate among attempted sessions). The missing day pattern is consistent: Saturdays (Legs B) and Tuesdays (Pull A) are the most commonly skipped slots. Wednesday's session drifted away from a pure Legs A format by including OHP and Triceps Pushdown, which belongs in a Push session. At W18 the programme is already well established -- continuing to drift from PPL structure means accumulating imbalances rather than addressing them.

CORRECTIVE COMPLIANCE:

Hip Thrust was skipped in the only Legs session this week (Wed 23 Sep). This is the mandatory APT corrective: without hip thrusters driving the glutes through full extension, the pelvis stays tilted forward, which compresses the lumbar spine and shortens the hip flexors further. Zero core stabiliser sets (Dead Bug or Bird-Dog) were logged across all three sessions this week. These target the T8-T12 thoracic kyphosis assessed in the physique evaluation. Rear delts hit 0 sets this week against a weekly target of 8. At 44, when the anterior deltoid (front shoulder) becomes significantly stronger than the posterior deltoid and rotator cuff complex, the humeral head is pulled forward in the socket. Over time this creates shoulder impingement and eventually rotator cuff tears -- a common, painful, and slow-healing injury in men over 40. Face pulls or rear delt flies every Pull session are non-optional.

LATERAL RAISE TREND:

The V-taper KPI is moving UP. Best set this week: 12.5kg x 12 reps (e1RM 17.5kg), up from 10kg x 15 reps (e1RM 15.0kg) on 07 Sep -- a +2.5kg absolute improvement in two weeks. This matters specifically because Ganesh's love handles sit at lat-width level, collapsing the shoulder-to-waist ratio visually. Wider lateral delts are the primary tool to rebuild that visual V-taper while fat loss happens concurrently. This KPI moving in the right direction is the standout positive of the week.

HARD FLAGS:

1. Bench Press rep collapse: jumped from 50kg x 12 to 60kg (20% load increase) and reps halved to 6. The working weight of 60kg is not yet consolidatable across sets -- drop to 57kg next

session and rebuild.

2. Mon 21 Sep session ran 102 minutes -- 42 minutes over the 60-min programme cap. Overlong sessions elevate cortisol, which suppresses muscle protein synthesis and is especially counterproductive during a calorie deficit at 44. Review exercise selection and rest periods.
3. Leg Extension dropped from 77kg x 10 (09 Sep) to 50kg x 12 (23 Sep) -- a 27kg weight drop with -32.7kg e1RM. Either the machine plate stack was re-set or there was a technique change. Clarify the reason before progressing.
4. Pull Up and Back Extension both logged at 0kg with no note. Bodyweight exercises need a comment or set to be tracked meaningfully -- the 0kg entry makes trend analysis impossible.
5. No Hip Thrust in any Legs session. No Dead Bug or Bird-Dog in any session. Both correctives were skipped all week.

OVERALL VERDICT: HOLDING

Volume slightly up (+2% vs last week: 10,380 vs 10,144 kg*reps). Session count up marginally (3 vs 2 last week). However corrective compliance remains at zero across Hip Thrust, core stabiliser, and rear delt work. PPL structure adherence is still fragile at W18. Deload is overdue by 7 weeks (11 weeks since last deload against a 4-week cycle). Lateral raise progression is the one clear positive. No material worsening but no structural improvement either.

8. PLAN FOR NEXT WEEK

Programme week: W19 of PPL x2 (Sep 28 - Oct 3, 2026)

* DELOAD WEEK -- 11 weeks without deload (target: every 4 weeks) ***

All working sets reduced to 2 per exercise. Weights stay the same.

Do NOT drop weights. Do NOT skip correctives. Purpose: joint and CNS recovery.

MONDAY Sep 28 -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 57kg

(rep collapse last week: 5% drop from 60kg; rebuild at 57kg)

Overhead Press (Barbell) 2 x 8 @ 45kg

(held steady 3 sessions in a row; no increase during deload)

Lateral Raise (Dumbbell) 2 x 12 @ 13.75kg

(progress from 12.5kg -- all sets hit 12 reps last week)

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 2 x 10 -- DO NOT SKIP (T8-T12 kyphosis corrective)

Watch-point: Bench Press form -- full ROM, controlled descent. Diagnose why reps halved at 60kg before attempting 60kg again.

TUESDAY Sep 29 -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 11 @ 57kg

(script suggests 57kg; consolidate here before returning to 60kg)

Pull Up (Bodyweight) 2 x 6 @ bodyweight

(log reps accurately; 0kg entry is not trackable)

Lat Pulldown (Machine) 2 x 6 @ 66kg

(last logged 28 Aug; conservative continuation)

Bicep Curl (Barbell) 2 x 10 @ 20kg

Rear Delt Reverse Fly (Dumbbell) 2 x 12 @ 10kg -- MANDATORY rear delt work

Dead Bug 2 x 10 -- DO NOT SKIP

Watch-point: Rear delt fly is non-optional. Zero rear delt sets last week is a rotator cuff accumulation risk at 44.

WEDNESDAY Sep 30 -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 2 x 10 @ 60kg -- MANDATORY APT CORRECTIVE

(was skipped last week; APT will not self-correct without hip thrusters)

Squat (Barbell) 2 x 7 @ 70kg

(last logged 07 Sep: 70kg x 7; maintain during deload)

Seated Leg Curl (Machine) 2 x 10 @ 44.25kg

(progress from 43kg -- all sets hit target last week)

Leg Extension (Machine) 2 x 12 @ 50kg

(weight dropped from 77kg to 50kg last session -- confirm correct machine weight before assuming a plate error; do not progress until clarified)

Bird-Dog 2 x 10 each side -- DO NOT SKIP

Watch-point: Hip Thrust is mandatory every Legs session. Start session with it if time is short so it cannot be skipped. Keep total under 60 min.

THURSDAY Oct 1 -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 8 @ 45kg

Lateral Raise (Dumbbell) 2 x 12 @ 13.75kg

Bench Press (Barbell) 2 x 6 @ 57kg (same as Monday -- deload)

Triceps Pushdown 2 x 11 @ 27.2kg

Shrug (Barbell) 2 x 15 @ 50kg (first logged this week; maintain)

Dead Bug 2 x 10 -- DO NOT SKIP

Watch-point: Shoulder-dominant session. OHP should be strict press -- no leg drive. Use a mirror or film to catch forward lean that shifts load off delts.

FRIDAY Oct 2 -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 2 x 11 @ 57kg

Face Pull (Cable) or

Rear Delt Reverse Fly 2 x 12 @ 10kg -- MANDATORY (rear delts 0 sets last week)

Lat Pulldown (Machine) 2 x 6 @ 66kg

Bicep Curl (Barbell) 2 x 10 @ 20kg

Dead Bug 2 x 10 -- DO NOT SKIP

Watch-point: Face Pull or Rear Delt Fly must be done -- start with it if time is a concern. Cumulative rear delt deficit increases impingement risk each week it is skipped at this training age and age 44.

SATURDAY Oct 3 -- Legs B (Glutes, Hamstrings, Single-Leg)

Hip Thrust (Barbell) 2 x 10 @ 60kg -- MANDATORY APT CORRECTIVE

Deadlift (Barbell) 2 x 8 @ 75kg

(last logged 04 Sep: 75kg x 8 x 2 sets; maintain during deload)

Leg Press (Machine) 2 x 12 @ 60kg

(last logged 11 Sep: 60kg x 12; maintain)

Seated Leg Curl (Machine) 2 x 10 @ 44.25kg

Bird-Dog 2 x 10 each side -- DO NOT SKIP

Watch-point: Legs B is the most skipped session (Saturdays missed repeatedly). Book a specific gym time Saturday morning. Hip Thrust mandatory -- do not exit

the session without completing it.

| Deload : needed this week -- overdue since W12 (~Jul 12) |
| next deload due W23, ~Oct 25 2026 |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
