

WEEKLY TRAINING REPORT

Generated : 2026-08-04 08:25 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 29 Jul to 05 Aug 2026

30-Day Analysis Report

This week : 29 Jul to 05 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 5, 4, 0 sessions (avg 3.0)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Squat (Barbell) -- 60kg x 6 reps (e1RM 72.0kg)

Biggest concern: Back -- 3 sets vs 14 target (11 sets short)

vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min

Type : Full Body A -- Monday

Volume : 3,000 kg*reps | 13 sets 44M | 181 cm | 87 kg -> 79 kg

Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (08 Jul-15 Jul): [#####] 23,437 kg*reps 5 sess

Wk -2 (15 Jul-22 Jul): [#####] 21,340 kg*reps 4 sess

Wk -1 (22 Jul-29 Jul): [.....] 0 kg*reps 0 sess

This wk (29 Jul-05 Aug): [##.....] 3,000 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

*** FLAGS: rep collapse (10->6)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

*** FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -21.3kg vs 13 Jul

Next session : 57.0kg x 6 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

Chest | 3 | 12 | 9 | CRITICAL

Back | 3 | 14 | 11 | CRITICAL

Shoulders | 3 | 10 | 7 | CRITICAL

Traps | 0 | 6 | 6 | CRITICAL

Rear Delts | 0 | 8 | 8 | CRITICAL

Biceps | 0 | 8 | 8 | CRITICAL

Triceps | 0 | 8 | 8 | CRITICAL

Legs | 4 | 14 | 10 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 6 | Pull sets: 3 | Ratio pull:push = 0.50 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target

Wk -3 (08 Jul-15 Jul): 5 sessions

Wk -2 (15 Jul-22 Jul): 4 sessions

Wk -1 (22 Jul-29 Jul): 0 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 3 8 AT RISK

Back 3 10 AT RISK

Shoulders 3 8 AT RISK

Traps 0 4 AT RISK

Rear Delts 0 6 AT RISK

Biceps 0 6 AT RISK

Triceps 0 6 AT RISK

Legs 4 10 AT RISK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 4

Weeks since last deload : 4 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W11 (started 2026-05-24; 72 days elapsed -> 11 weeks rounded up)

Sessions this week: 1 of 6 target

NOTE: All sessions are labelled "Full Body A/B/C" not PPL labels.

Detection below is exercise-based (INFERRED).

Day | Expected | Detected | Status

Wed 29 Jul | Legs A | No session | MISSED

Thu 30 Jul | Push B | No session | MISSED

Fri 31 Jul | Pull B | No session | MISSED

Sat 01 Aug | Legs B | No session | MISSED

Sun 02 Aug | Rest | No session | REST OK

Mon 03 Aug | Push A | Full Body A (INFERRED: mixed) | MISMATCH

Tue 04 Aug | Pull A | No session | MISSED

Adherence: 0% (0 of 1 attempted sessions matched expected PPL day/type)

Completion: 1 of 6 planned sessions (16.7%)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 Legs sessions this week

*** ALERT: Hip Thrust has not appeared in ANY

session in the last 30 days (0 of 10 sessions).

MANDATORY for APT correction -- do not skip.

Core stabiliser (all sessions): 0 of 1 sessions

No Dead Bug, Bird-Dog, or Plank logged.
T8-T12 kyphosis corrective missed this week.
Rear delt work in Pull sessions: N/A -- 0 Pull sessions this week
Last logged: 10 Jul and 17 Jul (Rear Delt Reverse Fly)
Sessions over 60 min: Mon 03 Aug -- 82 min (22 min over 60-min target)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps (03 Aug)
Prior 7 days (22-28 Jul): No sessions logged
Last prior : 10kg x 14 reps (13 Jul)
Trend: SAME (stagnant for 3+ weeks -- V-taper KPI is not progressing)

7. KEY INSIGHTS

RECOVERY AT 44

Only one session this week (Mon 03 Aug), so no intra-week same-muscle recovery risk. Looking at the broader 30-day log, the tightest same-muscle pair is the Chest/Shoulder session on Sat 11 Jul (08:04) followed by Bench Press on Mon 13 Jul (08:40) -- a gap of approximately 48.5 hours for chest and anterior shoulder. This just clears the 48-hour minimum and is the only borderline pair in the log. All other same-muscle pairs (Bench 13 Jul -> 03 Aug, Back 17 Jul -> next session) are separated by 7-21 days, well clear of the floor. At 44, even a borderline-close session can blunt adaptation if sleep or nutrition is off -- 48h must be a firm floor.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 11 of the PPL x2 programme (started 2026-05-24). Adherence this week is 0%: the one session logged ("Full Body A -- Monday") does not match the PPL Push A template expected on Monday. Five of six planned sessions were missed entirely. The pattern of failure is not day-specific -- it is total: the programme has still not been adopted in PPL format after 11 weeks, and entire weeks are being dropped (Week -1 had 0 sessions, W11 has 1). The rolling 4-week session average is $(5 + 4 + 0 + 1) / 4 = 2.5$ sessions per week against the 6-session target.

CORRECTIVE COMPLIANCE

Hip Thrust has not been logged in any of the 10 sessions across the last 30 days. Without Hip Thrust, the pelvis remains in anterior tilt, overloading the lower back on squats and deadlifts and inhibiting glute activation -- exactly the exercises that dominate the current log. Rear delt sets this week: 0 vs the 8-per-week target -- 8 sets short. Over 30 days, only 5 rear delt sets appear (sessions 3 and 7 only). At 44, if the anterior deltoid and pectorals stay significantly stronger than the rear deltoid, the rotator cuff is pulled forward in the glenoid socket, narrowing the subacromial space. This begins as shoulder pain on pressing movements and can progress to rotator cuff tears. Core stabiliser (Dead Bug / Bird-Dog / Plank) logged this week: 0 of 1

sessions -- the T8-T12 kyphosis correction is not being done.

LATERAL RAISE TREND -- V-TAPER KPI

Lateral Raise is stuck at exactly 10kg x 14 reps. The exercise has appeared in three sessions over the 30-day log (06 Jul at 10x13, 13 Jul at 10x14, 03 Aug at 10x14), and has not moved in weight since early July. This matters specifically for Ganesh because the love handles sit at the same visual width as the lats -- without the shoulder caps widening from heavier lateral raises, the waist-to-shoulder ratio will not improve regardless of how much fat is lost. The weight must move to 11.25kg this week.

HARD FLAGS

1. Bench Press e1RM dropped from 80.2kg (13 Jul) to 72.0kg (03 Aug) -- down 8.2kg. Likely cause: zero sessions in the week of 22-29 Jul (full detraining week). Bench also shows pyramid loading (40/50/60kg) rather than consistent working sets -- the 60kg x 6 top set is the ceiling, not the floor.
2. Squat e1RM dropped from 93.3kg (13 Jul) to 72.0kg (03 Aug) -- down 21.3kg, the sharpest regression in the log. Same cause as above.
3. Pull Up logged as 0kg in all 10 sets across multiple sessions. Bodyweight reps should be logged as 0kg in Hevy, which is correct, but confirm whether these are unassisted or band-assisted -- the log gives no signal either way.
4. Session duration 82 min on 03 Aug (22 min over the 60-min target). Cause is likely excessive warmup sets and long rest periods. Trim to 2 warmup sets per compound, 90s rest on isolations, 2 min on compounds.
5. Hip Thrust absent from all 10 sessions in 30 days -- APT correction is being skipped entirely.

OVERALL VERDICT: DECLINING

Volume : 3,000 kg*reps this week vs. 23,437 (wk 08 Jul) -- down 87%.
Strength : Bench e1RM -8.2kg, Squat e1RM -21.3kg vs. 30-day peak.
Adherence: 1 of 6 sessions = 16.7%.
Corrective: Hip thrust 0%, core stabiliser 0%, rear delts 0% this week.
All four dimensions have declined from the programme's best weeks.

8. PLAN FOR NEXT WEEK

Programme week: W12 (Week 12 of PPL x2 -- full training block after W11 deload)
W11 was flagged for deload (4 active weeks elapsed) and delivered effectively only 1 session. W12 is a FULL training week with no reduction in volume.
Next deload due: W15, week of ~30 Aug 2026.
MONDAY -- Push A (Chest primary + Shoulders + Triceps)
Bench Press (Barbell) 4 x 6 @ 57.5kg
[Rep collapse flagged -- 5% drop from 60kg; rebuild to 60+ over 2 weeks]
Incline Chest Press (Machine) 3 x 10 @ 31.25kg
[Prev 30kg x 11 all sets (18 Jul) -- +1.25kg isolation]
Lateral Raise (Dumbbell) 3 x 15 @ 11.25kg *** V-TAPER KPI ***
[Prev 10kg x 14 all sets (03 Aug) -- +1.25kg isolation; must move this week]

Triceps Pushdown 3 x 10 @ 28.5kg

[Prev 27.2kg x 11 all sets (15 Jul) -- +1.25kg isolation]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: Rest 90s on isolations, 2 min on Bench. Session must finish under 55 min.

TUESDAY -- Pull A (Back compound + Biceps)

Pull Up (Bodyweight) 3 x 6 @ BW

[Log as 0kg in Hevy; focus on controlled 3s eccentric]

Bent Over Row (Barbell) 3 x 7 @ 72.5kg

[Prev 70kg x 7 all sets (17 Jul) -- +2.5kg compound]

Bicep Curl (Machine) 3 x 10 @ 26.25kg

[Prev 25kg x 10 all sets (18 Jul) -- +1.25kg isolation]

Bird-Dog 3 x 10 (alternating) -- do not skip (T8-T12 corrective)

Key focus: Full range on rows -- chest to bar, shoulders back at the top.

WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 x 10 @ 20kg *** MANDATORY -- APT CORRECTION ***

[Not logged in 30 days -- start with the 20kg bar. Do this FIRST, not last.]

Squat (Barbell) 4 x 6 @ 62.5kg

[Prev 60kg x 6 (03 Aug) -- rebuild, +2.5kg compound only if all 4 sets clean]

Leg Extension (Machine) 3 x 10 @ 78.25kg

[Prev 77kg x 10 all sets (15 Jul) -- +1.25kg isolation]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: Hip Thrust is the most important corrective in the programme -- lead with it.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg

[Prev 90kg x 8 all sets (18 Jul) -- +2.5kg compound]

Chest Fly (Machine) 3 x 10 @ 66.25kg

[Prev 65kg x 10 all sets (18 Jul) -- +1.25kg isolation]

Lateral Raise (Dumbbell) 3 x 15 @ 11.25kg *** V-TAPER KPI ***

[Second lateral raise session this week -- intentional double frequency]

Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg

[Prev 20kg x 12 all sets (18 Jul) -- +1.25kg isolation]

Bird-Dog 3 x 10 (alternating) -- do not skip (T8-T12 corrective)

Key focus: Shoulder Press is the primary lift today -- full warmup, treat it like a PR day.

FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Rear Delt mandatory)

Deadlift (Barbell) 3 x 7 @ 82.5kg

[Prev 80kg x 7 all sets (17 Jul) -- +2.5kg compound]

Rear Delt Reverse Fly (DB) 3 x 13 @ 11.25kg *** MANDATORY REAR DELT ***

[Prev 10kg x 13 all sets (10 Jul) -- +1.25kg isolation; do this SECOND, not last]

Bicep Curl (Dumbbell) 3 x 12 @ 8.75kg

[Prev 7.5kg x 12 all sets (08 Jul, 15 Jul) -- +1.25kg isolation]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Key focus: Rear Delt Fly protects your rotator cuff -- non-negotiable, do not drop.

SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg)

Hip Thrust (Barbell) 3 x 10 @ 30kg *** MANDATORY -- APT CORRECTION ***

[Second hip thrust of the week; if form is solid Wednesday, add 10kg here]

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg

[Prev 75kg x 8 all sets (15 Jul) -- +2.5kg compound]

Shrug (Barbell) 3 x 12 @ 70kg

[Prev 70kg: set 1 hit 12 reps, sets 2-3 dropped to 11 -- not all sets hit, SAME weight]

Bird-Dog 3 x 10 (alternating) -- do not skip (T8-T12 corrective)

Key focus: Slow eccentric on Romanian Deadlift -- 3s down, feel the hamstring load.

| Deload : not yet -- next due Week 15, ~30 Aug 2026 |

| Timing : 6-9 PM IST -- no sessions after midnight |

| Nutrition: 2,367 kcal/day | 174g protein minimum |
