

30-Day Analysis Report

This week : 10 Jun to 17 Jun 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-06-17

WEEKLY TRAINING REPORT

Generated : 2026-06-17 10:18 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 10 Jun to 17 Jun 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 4, 3, 3 sessions (avg 3.3)
Overall score: 5/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Leg Extension (Machine) -- 70kg x 10 reps (e1RM 93.3kg)
Biggest concern: Rear Delts -- 3 sets vs 8 target (5 sets short)
vs last week : Volume UP 2% (12,589 vs 12,306 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 12 Jun 2026 08:20 IST | 70 min
Type : Full Body C -- Friday
Volume : 4,695 kg*reps | 16 sets
Bent Over Row (Barbell): 60kg x 5r x 4 sets (e1RM 70.0kg) vs prior: -3.3kg e1RM
Deadlift (Barbell): 70kg x 5r x 3 sets (e1RM 81.7kg)
Incline Bench Press (Dumbbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: -1.3kg e1RM
Chest Fly (Machine): 45kg x 12r x 3 sets (e1RM 63.0kg) vs prior: +0.0kg e1RM
Rear Delt Reverse Fly (Dumbbell): 7.5kg x 15r x 3 sets (e1RM 11.2kg)
Session 2: Monday 15 Jun 2026 08:22 IST | 68 min
Type : Full Body A -- Monday
Volume : 2,620 kg*reps | 14 sets
Squat (Barbell): 65kg x 5r x 4 sets (e1RM 75.8kg) vs prior: +0.0kg e1RM
Bench Press (Barbell): 60kg x 5r x 3 sets (e1RM 70.0kg) vs prior: -2.0kg e1RM
Pull Up: 0kg x 5r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: -0.3kg e1RM
Hanging Leg Raise: 0kg x 5r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Session 3: Wednesday 17 Jun 2026 08:35 IST | 36 min
Type : Full Body B -- Wednesday
Volume : 5,274 kg*reps | 16 sets
Romanian Deadlift (Barbell): 60kg x 7r x 4 sets (e1RM 74.0kg) vs prior: -2.0kg e1RM
Overhead Press (Barbell): 45kg x 6r x 3 sets (e1RM 54.0kg) vs prior: +3.3kg e1RM
Leg Extension (Machine): 70kg x 10r x 3 sets (e1RM 93.3kg) vs prior: +5.1kg e1RM
Bicep Curl (Dumbbell): 7.5kg x 12r x 3 sets (e1RM 10.5kg) vs prior: -2.5kg e1RM
Triceps Pushdown: 27.2kg x 9r x 3 sets (e1RM 35.4kg) vs prior: +2.2kg e1RM

4-WEEK VOLUME TREND

Wk -3 (20 May-27 May): [#####] 17,451 kg*reps 4 sess

Wk -2 (27 May-03 Jun): [#####.] 16,838 kg*reps 3 sess
 Wk -1 (03 Jun-10 Jun): [#####.....] 12,306 kg*reps 3 sess
 This wk (10 Jun-17 Jun): [#####.....] 12,589 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 5 reps (e1RM 70.0kg)

vs prior : DOWN -2.0kg vs 08 Jun

Next session : 57.0kg x 5 reps

[C] Bent Over Row (Barbell)

Best this week : 60kg x 5 reps (e1RM 70.0kg)

vs prior : DOWN -3.3kg vs 03 Jun

Next session : 57.0kg x 5 reps

[C] Deadlift (Barbell)

Best this week : 70kg x 5 reps (e1RM 81.7kg)

vs prior : First time in 30-day log

Next session : 70kg x 5 reps

[C] Incline Bench Press (Dumbbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : DOWN -1.3kg vs 25 May

Next session : 19.0kg x 10 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 6 reps (e1RM 54.0kg)

vs prior : UP +3.3kg vs 03 Jun

Next session : 47.5kg x 6 reps

[C] Pull Up

Best this week : 0kg x 5 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 5 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 60kg x 7 reps (e1RM 74.0kg)

vs prior : DOWN -2.0kg vs 05 Jun

Next session : 57.0kg x 7 reps

[C] Squat (Barbell)

Best this week : 65kg x 5 reps (e1RM 75.8kg)

vs prior : SAME as 08 Jun

Next session : 65kg x 5 reps

[I] Bicep Curl (Dumbbell)

Best this week : 7.5kg x 12 reps (e1RM 10.5kg)

vs prior : DOWN -2.5kg vs 10 Jun

Next session : 7.12kg x 12 reps

[I] Chest Fly (Machine)

Best this week : 45kg x 12 reps (e1RM 63.0kg)

vs prior : SAME as 25 May

Next session : 45kg x 12 reps

[I] Hanging Leg Raise

Best this week : 0kg x 5 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 5 reps

* FLAGS: 0kg logged -- check entry

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 28 May

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 10 reps (e1RM 93.3kg)

vs prior : UP +5.1kg vs 10 Jun

Next session : 71.25kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 7.5kg x 15 reps (e1RM 11.2kg)

vs prior : First time in 30-day log

Next session : 7.5kg x 15 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 9 reps (e1RM 35.4kg)

vs prior : UP +2.2kg vs 05 Jun

Next session : 28.45kg x 9 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

Chest		9	12	3	LOW
Back		14	14	0	OK
Shoulders		6	10	4	CRITICAL
Traps		7	6	-1	OK
Rear Delts		3	8	5	CRITICAL
Biceps		3	8	5	CRITICAL
Triceps		3	8	5	CRITICAL
Legs		11	14	3	LOW
Core		1	6	5	CRITICAL

Push sets: 18 | Pull sets: 27 | Ratio pull:push = 1.50 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 7 sets this week (need 6+/week)

OK.

Enough work this week: Back, Traps

Short this week : Chest, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (20 May-27 May): 4 sessions

Wk -2 (27 May-03 Jun): 3 sessions

Wk -1 (03 Jun-10 Jun): 3 sessions

Time between sessions this week:

Fri 12 Jun 08:20 -> Mon 15 Jun 08:22: 72h

Mon 15 Jun 08:22 -> Wed 17 Jun 08:35: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	9	8	OK
Back	14	10	OK
Shoulders	6	8	AT RISK
Traps	7	4	OK
Rear Delts	3	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	11	10	OK
Core	1	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Shoulders, Rear Delts, Biceps, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 1

Weeks since last deload : 1 (deload every 4 weeks)

Next deload : in 3 week(s), approx 08 Jul 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W4 (started 2026-05-24; 24 days elapsed, rounded up to week 4)

Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
-----+-----+-----+-----			
Fri 12 Jun	Pull B	Full Body C (INFERRED)	MISS -- row+deadlift+chest mix
Mon 15 Jun	Push A	Full Body A (INFERRED)	MISS -- squat+bench+pull-ups blend
Wed 17 Jun	Legs A	Full Body B (INFERRED)	MISS -- OHP+RDL+leg ext, no hip thrust

Missed days in window: Thu 11 Jun (Push B), Sat 13 Jun (Legs B), Tue 16 Jun (Pull A)

Adherence: 0% (0 of 3 logged sessions matched expected PPL day type)

NOTE: Since Week 2 of the programme Ganesh has been logging Full Body A/B/C sessions instead of the prescribed PPL split. All three sessions this week are INFERRED based on exercise content; none match their expected PPL day category.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions this week -- MISSING
(No Hip Thrust logged in any of the 14 sessions across the full 30-day log.
APT correction has not been addressed a single time since the programme began.)

Core stabiliser (all sessions): 0 of 3 sessions
(Bird-Dog / Dead Bug / Plank absent in all three sessions this week.
Bird-Dog was present in Week 1 PPL sessions but dropped when switching to Full Body.)

Rear delt work in Pull sessions: 0 dedicated Pull B sessions logged this week.
Rear delt work appeared in 1 of 3 sessions (Fri 12 Jun -- Rear Delt Reverse Fly x 3 sets).
Mon 15 Jun and Wed 17 Jun had zero rear delt exercises.

Sessions over 60 min: Fri 12 Jun (70 min, over by 10 min)
Mon 15 Jun (68 min, over by 8 min)
Wed 17 Jun (36 min -- OK)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps (Mon 15 Jun)

Prior week: 10kg x 12 reps (Mon 08 Jun)

Trend: SAME (weight flat at 10kg for 4+ weeks; reps improved 12->14 but no weight progress)

7. KEY INSIGHTS

RECOVERY AT 44

The two inter-session gaps this week were 72h (Fri 12 Jun 08:20 -> Mon 15 Jun 08:22) and 48h (Mon 15 Jun 08:22 -> Wed 17 Jun 08:35). The 72h gap is solid. The 48h gap is the bare minimum and was shared across overlapping compound muscles: Monday had Bench Press (chest/triceps) and Lateral Raise (shoulders); Wednesday had Overhead Press (shoulders) and Romanian Deadlift (back). Shoulders received exactly 48h between sessions -- right on the floor, zero margin. At 44, connective tissue and neural recovery lag behind the 48h that works at 25. Every session pair cleared the minimum, but the tight Wed-Fri-Mon-Wed cadence with full-body overlap is pushing the limits. No same-muscle violation was logged, but any additional training density without rest-day discipline will cross the line.

PPL ADHERENCE -- WEEK 4 OF THE PROGRAMME

Adherence this week: 0% (0 of 3 sessions matched the expected PPL day type). The programme entered Week 4 (started 2026-05-24) having already abandoned the PPL split since Week 2. Sessions are being logged as Full Body A, Full Body B, Full Body C -- not the prescribed Push A / Pull A / Legs A / Push B / Pull B / Legs B. Only Week 1 (25-28 May) had genuine PPL session titles. The most consistently missed day is Saturday (Legs B -- skipped every week). Tuesday (Pull A) was missed 3 of 4 weeks. Thursday (Push B) was missed 2 of 4 weeks. The pattern points to a scheduling problem mid-week and at weekends, leaving the programme condensed into 3 full-body sessions rather than the intended 6 PPL sessions.

CORRECTIVE COMPLIANCE

Hip Thrust (APT): Zero Hip Thrust sets in the entire 30-day log. Not once. Anterior pelvic tilt increases the forward lean on squats and deadlifts, compresses the lumbar facets, and chronically shortens the hip flexors -- all of which worsen under load over time. Hip Thrust is the primary APT corrective in this programme and has been skipped every single session.

Core stabiliser (T8-T12 kyphosis): Dead Bug and Bird-Dog appeared in the PPL sessions during Week 1 but dropped completely when Full Body sessions replaced the PPL split. 0 of 3 sessions this week had a core stabiliser. These exercises train spinal extensors in a gravity-unloaded position -- unique because they do not load the thoracic spine while it is in flexion (unlike rows or pull-downs, which do). Removing them means the kyphosis correction is getting zero dedicated work.

Rear delts: 3 sets this week vs 8-set weekly target -- 5 sets short. Front delts are being hit via Overhead Press (3 sets Wed), Lateral Raise (3 sets Mon), and Bench Press (3 sets Mon). If internal rotators (anterior delt, pecs) stay disproportionately stronger than external rotators (rear delt, infraspinatus), the humeral head migrates anteriorly during pressing -- a classic setup for rotator cuff impingement. At 44, this is not a hypothetical risk; it is a load-bearing joint under cumulative stress every week.

LATERAL RAISE TREND -- V-TAPER KPI

The Lateral Raise is flat at 10kg for four consecutive weeks. Best reps this cycle: 15 reps (28 May), then 12 reps (8 Jun), then 14 reps (15 Jun). The weight has not moved. For Ganesh, whose love handles sit at the same visual width as the lats, the V-taper ratio only improves when the shoulders physically widen -- and that requires actual Lateral Raise weight progression. Flat KPI for four weeks means the visual ratio has not improved since the programme began.

HARD FLAGS FROM SESSION DATA

1. Bench Press e1RM regressed: 72.0kg (8 Jun) -> 70.0kg (15 Jun). One week of volume deficit is likely the cause; at 60kg x 5r, the bar speed dropped. Flag before it becomes a trend.
2. Bicep Curl dropped from 10kg x 8r (1 Jun) to 7.5kg x 12r (17 Jun). e1RM fell -2.5kg over 2.5 weeks. The rep scheme changed (higher reps at lower weight), but the 10kg work is gone.
3. Pull Up reps: 8r (26 May, weighted) -> 5r (15 Jun, bodyweight). A real strength regression over 3 weeks even after dropping the added weight. Logged as 0kg both times -- data entry masks actual bodyweight load.
4. Fri 12 Jun Chest Fly (Machine): Set 3 dropped to 10 reps vs 12 reps in Sets 1-2. Rep collapse at 45kg. Weight should not progress until all 3 sets consistently hit 12 reps.
5. Overhead Triceps Extension (Thu 28 May): Set 1 logged as 24kg x 111 reps -- clear data entry error (should be 11 reps). Inflates volume data; check Hevy entry and correct.
6. No Hip Thrust in 30 days of logging -- APT correction entirely absent from the programme.

OVERALL VERDICT

Volume is technically UP 2% vs last week (12,589 vs 12,306 kg*reps), but remains 28% below the programme's strongest week (17,451 kg*reps in Week 1). Session count SAME at 3 vs 6 target. PPL adherence: 0%. Corrective compliance: 0% (hip thrust, bird-dog, core stabiliser all absent). Two compound lifts regressing (bench, bicep). Two sessions over the 60-min cap.

VERDICT: DECLINING

8. PLAN FOR NEXT WEEK

Programme week: W5 (Week 5 of PPL x2, 22-28 Jun 2026)

CRITICAL INSTRUCTION: Return to the PPL split. No more Full Body sessions.

Each session below must be logged with its PPL title in Hevy (e.g. "Monday -- Push A").

MONDAY 22 JUN -- Push A (Chest + Shoulders + Triceps)

Bird Dog 3 x 10 each side @ 0kg -- do not skip (T8-T12 corrective)

Bench Press (Barbell) 3 x 5 @ 62.5kg (was 60kg x 5r x 3 -- all sets hit, +2.5kg)

Incline Bench Press (Dumbbell) 3 x 10 @ 22.5kg (was 20kg x 10r x 3 -- all hit, +2.5kg)

Chest Fly (Machine) 3 x 12 @ 45kg (Set 3 collapsed to 10r on 12 Jun -- hold weight)

Lateral Raise (Dumbbell) 3 x 15 @ 10kg (weight flat; target 15r to unlock next +1.25kg)

Triceps Pushdown 3 x 9 @ 28.5kg (was 27.2kg x 9r x 3 -- all hit, +1.25kg)

Face Pull 3 x 15 @ 24.9kg (rear delt complement; keep in Push A)

Watch-point: If Bench at 62.5kg shows grinding reps by Set 3, strip to 60kg -- do NOT grind through bad reps. Rep quality at 44 matters more than the number on the bar.

TUESDAY 23 JUN -- Pull A (Back + Biceps)

Dead Bug 3 x 10 @ 0kg -- do not skip (T8-T12 corrective)

Pull Up 4 x 6 @ 0kg (was 5r; add 1 rep per set)

Bent Over Row (Barbell) 4 x 5 @ 62.5kg (was 60kg x 5r x 4 -- all hit, +2.5kg)

Shrug (Smith Machine) 3 x 12 @ 70kg (hold; consistent for 4 weeks)

Face Pull 3 x 15 @ 24.9kg (mandatory rear delt; Pull A owns this)

Hammer Curl (Dumbbell) 3 x 10 @ 12.5kg (biceps have regressed; rebuild from May 18 best)
 Chest Supported Y Raise 3 x 12 @ 5kg (scapular stabiliser; reinforce rear delt health)
 Watch-point: Bicep work is in regression. Hammer Curl at 12.5kg is the re-entry point --
 do not skip sets. Ensure full supination at the top of each rep.

WEDNESDAY 24 JUN -- Legs A (Quads, Hamstrings, Glutes)

Bird Dog 3 x 10 each side @ 0kg -- do not skip (T8-T12 corrective)
 HIP THRUST (BARBELL) 3 x 10 @ 60kg *** MANDATORY -- APT correction ***
 (First time in the log; conservative start; drive hips fully to neutral, hold 1 sec at top)
 Deadlift (Trap Bar) 3 x 8 @ 97.5kg (was 95kg x 8r x 3 -- all hit, +2.5kg)
 Leg Press (Machine) 3 x 12 @ 72.5kg (was 70kg x 12r x 3 -- all hit, +2.5kg)
 Seated Leg Curl (Machine) 3 x 9 @ 44kg (was 43kg x 9r x 3 -- all hit, +1.25kg -> 44.25)
 Dead Bug 3 x 10 @ 0kg (second corrective; legs sessions get both bird-dog and dead bug)

Watch-point: Hip Thrust is the priority today. Do it first after warm-up while CNS is fresh.
 Keep the 60-min cap -- remove Single Leg Press if time is tight rather than cutting Hip Thrust.

THURSDAY 25 JUN -- Push B (Shoulders + Chest variation + Triceps)

Bird Dog 3 x 10 each side @ 0kg -- do not skip (T8-T12 corrective)
 Seated Overhead Press (Dumbbell) 4 x 10 @ 20kg (was 17.5kg x 10r x 4 -- all hit, +2.5kg)
 (This is a meaningful jump; drop to 17.5kg for sets 3-4 if form breaks)
 Lateral Raise (Dumbbell) 3 x 15 @ 10kg (same as Push A; target 15r consistently)
 Face Pull 3 x 15 @ 24.9kg
 Chest Supported Y Raise (DB) 3 x 12 @ 5kg (or 6kg if 5kg is too easy)
 Upright Row (Cable) 3 x 10 @ 20kg (was 18.1kg -- compound +2.5kg -> 20.6kg; use 20kg)
 Overhead Triceps Extension (Cable) 3 x 11 @ 25kg (was 24kg x 11r x 3 -- isolation +1.25kg -> 25.25)
 Watch-point: The Push B shoulder focus means Overhead Press is the barometer. If the jump
 to 20kg dumbbells feels uncontrolled, regress one set -- do not compromise shoulder health.

FRIDAY 26 JUN -- Pull B (Back + Rear Delts + Biceps)

Dead Bug 3 x 10 @ 0kg -- do not skip (T8-T12 corrective)
 Bent Over Row (Barbell) 4 x 5 @ 62.5kg (same as Pull A; back volume critical)
 Lat Pulldown (Cable) 3 x 12 @ 54.5kg (was 52kg x 12r x 3 on 1 Jun -- all hit, +2.5kg)
 FACE PULL (MANDATORY) 3 x 15 @ 24.9kg (Pull B owns rear delt -- non-negotiable)
 Rear Delt Reverse Fly (DB) 3 x 12 @ 7.5kg (Set 3 collapsed to 12r on 12 Jun; hold weight)
 Bicep Curl (Dumbbell) 3 x 12 @ 7.5kg (hold current level; rebuild rep quality)
 Seated Incline Curl (Dumbbell) 3 x 10 @ 7.5kg (add 3rd set; was 2 sets on 26 May)
 Watch-point: Rear delt total for the week must hit 8+ sets across Pull A and Pull B combined.
 Face Pull (Pull A: 3 sets, Pull B: 3 sets) + Rear Delt Reverse Fly (Pull B: 3 sets) = 9 sets.
 Do not substitute or skip.

SATURDAY 27 JUN -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Bird Dog 3 x 10 each side @ 0kg -- do not skip (T8-T12 corrective)
 HIP THRUST (BARBELL) 3 x 10 @ 60kg *** MANDATORY -- APT correction ***
 (Repeat Legs A weight to ingrain the movement pattern before loading)
 Romanian Deadlift (Barbell) 4 x 7 @ 62.5kg (was 60kg x 7r x 4 -- all hit, +2.5kg)
 Rack Pull 3 x 5 @ 60kg (last heavy set was 70kg on 26 May but form broke;
 restart conservative)
 Seated Leg Curl (Machine) 3 x 9 @ 44kg (72h from Legs A -- safe to hit same weight)

Single Leg Press (Machine) 3 x 10 @ 0kg (bodyweight; focus on single-leg stability)

Watch-point: Saturdays have been skipped every week of this programme. This is the single most important session to protect this week. Hip Thrust on Saturday is as mandatory as on Wednesday -- APT will not improve with only one hip thrust per week.

+-----+		
Deload	: not yet -- next due Week 7, approx 06 Jul 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
