

30-Day Period ending 2026-09-09

Name	Ganesh
Profile	44M 181 cm 87 kg -> 79 kg
Goal	Body Recomposition -- Fat loss, muscle preservation
Pace	0.5 kg/week 15% calorie deficit
Generated	2026-09-09

WEEKLY TRAINING REPORT

Generated : 2026-09-10 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 03 Sep to 10 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 3, 2, 1 sessions (avg 2.0)
Overall score: 4/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Leg Extension (Machine) -- 77kg x 10 reps (e1RM 102.7kg)
Biggest concern: Chest -- 2 sets vs 12 target (10 sets short)
vs last week : Volume UP 177% (12,099 vs 4,372 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min
Type : Full Body C -- Friday
Volume : 3,220 kg*reps | 8 sets
Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM
Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)
Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM

Session 2: Monday 07 Sep 2026 13:26 IST | 77 min
Type : Full Body A -- Monday
Volume : 2,870 kg*reps | 12 sets
Squat (Barbell): 70kg x 7r x 4 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM
Bench Press (Barbell): 60kg x 6r x 2 sets (e1RM 72.0kg) vs prior: -4.0kg e1RM
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 15r x 3 sets (e1RM 15.0kg) vs prior: +0.0kg e1RM

Session 3: Wednesday 09 Sep 2026 10:17 IST | 52 min
Type : Full Body B -- Wednesday
Volume : 6,009 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +1.5kg e1RM
Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM
Leg Extension (Machine): 77kg x 10r x 3 sets (e1RM 102.7kg) vs prior: +2.6kg e1RM
Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (13 Aug-20 Aug): [#####] 15,134 kg*reps 3 sess
Wk -2 (20 Aug-27 Aug): [#####.....] 9,332 kg*reps 2 sess
Wk -1 (27 Aug-03 Sep): [#####.....] 4,372 kg*reps 1 sess
This wk (03 Sep-10 Sep): [#####.....] 12,099 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -4.0kg vs 24 Aug

Next session : 57.0kg x 6 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : SAME as 28 Aug

Next session : 70kg x 8 reps

[C] Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : First time in 30-day log

Next session : 75kg x 8 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)

vs prior : UP +1.5kg vs 12 Aug

Next session : 47.5kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

*** FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Aug

Next session : 72.5kg x 7 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)

vs prior : SAME as 26 Aug

Next session : 20kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)

vs prior : SAME as 24 Aug

Next session : 10kg x 15 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 10 reps (e1RM 102.7kg)

vs prior : UP +2.6kg vs 12 Aug

Next session : 78.25kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 14 Aug

Next session : 10kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)

vs prior : SAME as 26 Aug

Next session : 43kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 12 Aug

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
Chest	2	12	10	CRITICAL
Back	8	14	6	CRITICAL
Shoulders	6	10	4	CRITICAL
Traps	2	6	4	CRITICAL
Rear Delts	3	8	5	CRITICAL
Biceps	6	8	2	LOW
Triceps	3	8	5	CRITICAL
Legs	10	14	4	CRITICAL
Core	0	6	6	CRITICAL
Push sets: 11 Pull sets: 19 Ratio pull:push = 1.73 (OK -- balanced)				

Rear delts: 3 sets this week (need 8+/week)
SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.
Traps : 2 sets this week (need 6+/week)
SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.
Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target
Wk -3 (13 Aug-20 Aug): 3 sessions
Wk -2 (20 Aug-27 Aug): 2 sessions
Wk -1 (27 Aug-03 Sep): 1 sessions
Time between sessions this week:
Fri 04 Sep 09:00 -> Mon 07 Sep 13:26: 76h
Mon 07 Sep 13:26 -> Wed 09 Sep 10:17: 45h
No sessions after midnight IST this week. Good.
Back-to-back sessions hitting the same muscle group:
Mon 07 Sep + Wed 09 Sep (45h apart): overlap = legs, shoulders
At age 44, muscles need 48-72h to fully repair between sessions.
Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 2 8 AT RISK

Back 8 10 AT RISK

Shoulders 6 8 AT RISK

Traps 2 4 AT RISK

Rear Delts 3 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 10 10 OK

Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 9

Weeks since last deload : 9 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W16 (started 2026-05-24; 108 days elapsed, rounds up to 16 weeks)

Sessions this week (03 Sep - 09 Sep): 3 of 6 target

NOTE: Ganesh is logging sessions as "Full Body A/B/C" rather than PPL split titles. All sessions below are INFERRED from exercise content.

Day	Expected	Detected	Status
-----+-----+-----+-----			
Thu 03 Sep	Push B	No session	MISSED
Fri 04 Sep	Pull B	INFERRED: Pull	OK (Row + Deadlift + Rear Delt Fly)
Sat 05 Sep	Legs B	No session	MISSED
Sun 06 Sep	Rest	No session	REST (correct)
Mon 07 Sep	Push A	INFERRED: Full Body	MISMATCH (Bench + Squat + Pull Up mixed)
Tue 08 Sep	Pull A	No session	MISSED
Wed 09 Sep	Legs A	INFERRED: Full Body	MISMATCH (OHP + Leg Curl + Bicep Curl mixed)

Adherence: 33% (1 of 3 sessions matched expected session type)
Sessions hit: 3 of 6 = 50% consistency (3 training days missed: Thu, Sat, Tue)
Critical finding: Ganesh is NOT following the PPL x2 split. All 3 sessions are Full Body templates, diluting muscle group specificity and making volume targets per muscle impossible to hit.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 formal Legs sessions -- MISSING from all leg-containing work this week. APT correction completely absent. FLAG.
Core stabiliser (all sessions): 0 of 3 sessions -- Dead Bug / Bird-Dog / Plank not logged in any session this week. T8-T12 kyphosis correction completely absent. FLAG.
Rear delt work in Pull sessions: 3 sets in 1 of 1 inferred Pull session (Fri 04 Sep) -- meets minimum for that session, but only 3 sets total vs 8-set weekly target (38%).
Sessions over 60 min : 2 of 3 sessions over limit
Fri 04 Sep -- 251 min (CRITICAL: 4x over target)
Mon 07 Sep -- 77 min (17 min over target)
Wed 09 Sep -- 52 min (OK)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 15 reps (Mon 07 Sep)
Prior week : Not logged (Fri 28 Aug session = Full Body C, no Lateral Raise)
Last logged: 10kg x 15 reps (Mon 24 Aug) -- same weight for 4+ weeks
Trend : SAME (FLAT -- stuck at 10kg since at least 10 Aug)

7. KEY INSIGHTS

RECOVERY AT 44

Two session gaps existed this week. The first, Fri 04 Sep to Mon 07 Sep, was 76 hours -- well clear of the 48h minimum and fully acceptable. The second, Mon 07 Sep (13:26) to Wed 09 Sep (10:17), was only 45 hours -- 3 hours short of the required minimum. On Monday, Ganesh trained legs (Squat) and shoulders (Lateral Raise). On Wednesday he trained legs again (Leg Curl, Leg Extension) and shoulders again (Overhead Press). These two sessions were the offending pair. At 44, under-recovered muscle is not just less effective to train -- it elevates acute injury risk in connective tissue (tendons, ligaments) that adapts more slowly than muscle. The Mon-Wed pair needs a minimum 48h gap; at the current timing it is 45h. Shift Wednesday session to Thursday or later.

PPL ADHERENCE & PROGRAMME AGE

This is W16 of the PPL x2 programme (started 2026-05-24). Adherence this week is 33% for session type (1 of 3 sessions matched the prescribed day) and 50% for session count (3 of 6). The root problem is structural: Ganesh is logging Full Body A/B/C sessions instead of the Push A / Pull A / Legs A / Push B /

Pull B / Legs B template. Full Body sessions spread volume across all muscle groups, making it impossible to hit the per-group weekly targets (e.g., 12 sets chest, 14 sets back). Three days were missed entirely this week: Thursday (Push B), Saturday (Legs B), and Tuesday (Pull A). No consistent skip-day pattern is yet apparent -- different days miss each week -- suggesting scheduling flexibility is the issue rather than a fixed aversion to one particular session type. Over 16 weeks the programme has produced 10 sessions in the last 30 days vs a 24-session target, a 58% miss rate that will stall progress.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0 of 0 (no pure Legs sessions were logged; the leg work done in Full Body sessions did not include Hip Thrust in any session). This is the mandatory APT corrective and it was absent all week. Anterior pelvic tilt puts persistent tension on hip flexors and reduces glute activation in squats and presses, increasing lumbar load. Hip Thrust directly counters this by forcing posterior pelvic tilt under load; skipping it means the APT is not being corrected regardless of how many leg exercises are logged.

Rear delt sets this week: 3 sets (vs 8-set target, 38% hit rate). This matters specifically for a 44-year-old. As front delts (trained in every Bench and OHP set) become disproportionately stronger than rear delts, the humeral head is pulled slightly forward in the glenoid socket. Over time this compresses the supraspinatus tendon against the acromion on every overhead movement -- this is rotator cuff impingement. It progresses from sharp pain when lifting the arm to a partial or full supraspinatus tear. The fix is straightforward: 8+ rear delt sets per week (Face Pull or Rear Delt Fly) to pull the humeral head back into correct position. This week was 3 sets -- not enough.

Core stabiliser presence: 0 of 3 sessions. Dead Bug or Bird-Dog must appear in every session to address T8-T12 lower thoracic kyphosis. Three sessions this week, zero correctives logged. This corrective is 2-3 minutes of work and was skipped entirely.

LATERAL RAISE TREND -- V-TAPER KPI

Lateral Raise is flat at 10kg x 15 reps. This is the same weight logged on 10 Aug, 24 Aug, and 07 Sep -- at least 4 consecutive sessions with zero progression. The V-taper deficit is specific to Ganesh's physique: the love handles sit at the same horizontal level as the lats, which means the visual width of the waist equals the visual width of the lats. The only way to improve the taper ratio without further fat loss is to widen the shoulders. Lateral raises are the primary driver of medial delt width. If this lift does not progress in weight or reps, the V-taper KPI does not move. At 10kg x 15 for four weeks, Ganesh is ready to bump to 11.25kg or to increase reps to 17-18 before incrementing weight. The stall here is a direct brake on physique progress.

HARD FLAGS

[1] Fri 04 Sep: Session duration 251 minutes -- nearly 4x the 60-min target. Excessively long sessions elevate cortisol, impair recovery, and at 44

directly compete with sleep quality if the session runs into evening hours.
Sessions must be planned and cut at 60 minutes. This is the third time in the last 30 days a session has grossly exceeded the target.

[2] Mon 07 Sep: Pull Up logged at 0kg for all sets. This is bodyweight, which is fine, but the 0kg entry makes e1RM calculation meaningless (0.0kg).
Log actual bodyweight (approx 87kg) so strength tracking is accurate.

[3] Mon 07 Sep + Wed 09 Sep: 45h gap between sessions hitting legs and shoulders -- below the 48h minimum for a 44-year-old.

[4] Core stabiliser (Dead Bug / Bird-Dog) absent all 3 sessions this week.
T8-T12 kyphosis corrective programme is not being executed.

[5] Hip Thrust absent from all sessions -- APT corrective programme not being executed.

OVERALL VERDICT: IMPROVING

Volume rebounded 177% vs last week (12,099 vs 4,372 kg*reps) and session count rose from 1 to 3. That is genuine improvement from the prior week's trough. However, structural issues are unchanged: wrong session format (Full Body vs PPL), critical correctives absent (Hip Thrust, Dead Bug), rear delt volume critically low (3 sets vs 8 target), and 9 consecutive weeks without a deload (4-week deload cycle is overdue by 5 weeks). The improvement is in volume only -- programme quality and injury-prevention compliance remain DECLINING.

8. PLAN FOR NEXT WEEK

Programme week: W17 of PPL x2 (after mandatory deload -- see box below)

CRITICAL NOTE: 9 weeks logged without a deload; target is every 4 weeks.
W17 should be a DELOAD week (2 sets per exercise, same weights, full PPL structure). This gives joints and connective tissue their required recovery window before W18 resumes normal sets/reps.

W17 DELOAD PLAN -- Mon 14 Sep through Sat 19 Sep

MONDAY 14 SEP -- Push A DELOAD (Chest + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 57.0kg
(Rep collapse from 60x8 to 60x6; apply -5%; stay at 57kg for deload)
Overhead Press (Barbell) 2 x 8 @ 45.0kg
(Keep deload weight; normal week would advance to 47.5kg after this)
Lateral Raise (Dumbbell) 2 x 15 @ 10.0kg
(V-taper KPI -- attempt 11.25kg on first set to test progression)
Triceps Pushdown 2 x 11 @ 27.2kg
Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)
Focus: Keep tempo slow, full ROM on Bench. Session must finish in 60 min.

TUESDAY 15 SEP -- Pull A DELOAD (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 8 @ 70.0kg
Pull Up (Bodyweight) 2 x 6 @ bodyweight
(Log your actual bodyweight, e.g. 87kg, not 0kg)
Lat Pulldown (Machine) 2 x 6 @ 66.0kg
Bicep Curl (Barbell) 2 x 10 @ 20.0kg

Rear Delt Reverse Fly 2 x 12 @ 10.0kg (mandatory rear delt work)
Dead Bug 3 x 10 -- DO NOT SKIP
Focus: Pull sessions are the primary rear-delt opportunity; include Reverse Fly every single Pull session without exception.

WEDNESDAY 16 SEP -- Legs A DELOAD (Quads + Hamstrings + Glutes)

Squat (Barbell) 2 x 7 @ 70.0kg
(Deload -- hold at 70kg; normal W18 will test 72.5kg)
Hip Thrust (Barbell) 3 x 10 @ 40.0kg -- MANDATORY APT CORRECTIVE
(No log in last 30 days; start at 40kg conservative; add to every Legs session)
Leg Extension (Machine) 2 x 10 @ 77.0kg
Seated Leg Curl (Machine) 2 x 9 @ 43.0kg
Bird-Dog 3 x 10 each side -- DO NOT SKIP
Focus: Hip Thrust is non-negotiable for APT correction. Set up the barbell pad before the session and do it in the first half while energy is high.

THURSDAY 17 SEP -- Push B DELOAD (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 8 @ 45.0kg (shoulders primary)
Bench Press (Barbell) 2 x 6 @ 57.0kg (chest variation)
Lateral Raise (Dumbbell) 2 x 15 @ 11.25kg
(Second test of the 1.25kg increment; if both sets hit 15 reps, lock in)
Triceps Pushdown 2 x 11 @ 27.2kg
Dead Bug 3 x 10 -- DO NOT SKIP
Focus: Second Lateral Raise test at 11.25kg. If reps drop below 12, drop back to 10kg and add volume (4 sets) instead of weight.

FRIDAY 18 SEP -- Pull B DELOAD (Back + Rear Delts + Biceps)

Deadlift (Barbell) 2 x 8 @ 75.0kg
(Only 1 session in 30-day log; maintain weight, ensure form is locked)
Bent Over Row (Barbell) 2 x 8 @ 70.0kg
Lat Pulldown (Machine) 2 x 6 @ 66.0kg
Rear Delt Reverse Fly 3 x 12 @ 10.0kg -- MANDATORY (Pull B)
(Face Pull is an equally valid substitute if cables are available)
Bicep Curl (Barbell) 2 x 10 @ 20.0kg
Dead Bug 3 x 10 -- DO NOT SKIP
Focus: Deadlift setup -- engage lats before the pull to protect lower back.
251-min Friday session must not repeat; this session should be done in 55 min.

SATURDAY 19 SEP -- Legs B DELOAD (Glutes + Hamstrings + Single-Leg)

Hip Thrust (Barbell) 3 x 10 @ 40.0kg -- MANDATORY APT CORRECTIVE
Leg Press (Machine) 2 x 12 @ 50.0kg
(Deload; normal W18 progression to 52.5kg after two logged sessions at 50x12)
Seated Leg Curl (Machine) 2 x 9 @ 43.0kg
Leg Extension (Machine) 2 x 10 @ 77.0kg
Bird-Dog 3 x 10 each side -- DO NOT SKIP
Focus: Second Hip Thrust session. If 40kg feels light, increase to 50kg on final set only. Both Legs sessions in the week must have Hip Thrust logged.

+-----+
| Deload : NEEDED THIS WEEK (W17) -- 9 weeks since last deload. |
| Normal sets resume W18 (~21 Sep). Next deload W21. |

Timing : 6-9 PM IST -- no sessions after midnight
Nutrition: 2,367 kcal/day 174g protein minimum
+-----+
