

30-Day Analysis Report

This week : 30 Aug to 06 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-05

WEEKLY TRAINING REPORT

Generated : 2026-09-06 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 30 Aug to 06 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Deadlift (Barbell) -- 75kg x 8 reps (e1RM 95.0kg)

Biggest concern: Legs -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 77% (3,220 vs 13,704 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min

Type : Full Body C -- Friday

Volume : 3,220 kg*reps | 8 sets

Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM

Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)

Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM

4-WEEK VOLUME TREND

Wk -3 (09 Aug-16 Aug): [#####.] 13,059 kg*reps 3 sess

Wk -2 (16 Aug-23 Aug): [#####.....] 5,056 kg*reps 1 sess

Wk -1 (23 Aug-30 Aug): [#####] 13,704 kg*reps 3 sess

This wk (30 Aug-06 Sep): [#####.....] 3,220 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : SAME as 28 Aug

Next session : 70kg x 8 reps

[C] Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : First time in 30-day log

Next session : 75kg x 8 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 14 Aug

Next session : 10kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		5		14		9		CRITICAL
Shoulders		0		10		10		CRITICAL
Traps		2		6		4		CRITICAL
Rear Delts		3		8		5		CRITICAL
Biceps		0		8		8		CRITICAL
Triceps		0		8		8		CRITICAL
Legs		0		14		14		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 0 | Pull sets: 10 | Ratio pull:push = 0.00 (LOW -- add more pulling work)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 2 sets this week (need 6+/week)

SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target

Wk -3 (09 Aug-16 Aug): 3 sessions

Wk -2 (16 Aug-23 Aug): 1 sessions

Wk -1 (23 Aug-30 Aug): 3 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day,

you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	5	10	AT RISK
Shoulders	0	8	AT RISK
Traps	2	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	0	6	AT RISK
Triceps	0	6	AT RISK
Legs	0	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.

Active training weeks logged : 8

Weeks since last deload : 8 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W15 (started 2026-05-24; 104 days elapsed, rounded up)

Sessions this week: 1 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+			
Sun 30 Aug	REST	No session	OK (scheduled rest)
Mon 31 Aug	Push A	No session	MISSED
Tue 01 Sep	Pull A	No session	MISSED
Wed 02 Sep	Legs A	No session	MISSED
Thu 03 Sep	Push B	No session	MISSED
Fri 04 Sep	Pull B	Pull (INFERRED)	OK -- BOR + Deadlift + Rear Delt Fly
Sat 05 Sep	Legs B	No session	MISSED

Adherence: 16.7% (1 of 6 sessions on correct day or correctly inferred)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 Legs sessions this week (Wed + Sat both MISSED)

NOTE: Hip Thrust absent from ALL 30 days of log. APT gap.

Core stabiliser (all sessions): 0 of 1 sessions -- MISSING from Fri 04 Sep

Dead Bug / Bird-Dog absent from ALL sessions in 30-day log.

Rear delt work in Pull sessions: 1 of 1 pull sessions -- OK (Rear Delt Reverse Fly, Fri 04 Sep)

Sessions over 60 min: Fri 04 Sep -- 251 min (FLAG: 4x over 60-min session limit)

LATERAL RAISE (V-TAPER KPI):

This week: Not logged | Prior week: 10kg x 15 reps (Mon 24 Aug) | Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44:

Only one session logged this week: Friday 04 Sep (Pull-type, "Full Body C"). The prior session was Friday 28 Aug -- a 7-day gap, well clear of the 48h same-muscle minimum. No same-muscle conflicts this week. However, the Sep 04 session ran for 251 minutes (4 h 11 min) -- more than 4x the 60-min target. Sessions beyond 90 minutes sharply elevate cortisol, blunt testosterone, and increase connective-tissue injury risk at 44. A 251-min session almost certainly involved extended rest periods, poor gym flow, or distractions -- but the physiological cost is real regardless of cause.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 15 of the programme (started 2026-05-24) -- almost four months in. Adherence this week is 16.7% (1 of 6 sessions). The only session that happened was Friday, meaning Mon/Tue/Wed/Thu/Sat were all missed. The sessions themselves are still titled "Full Body A/B/C" -- suggesting the PPL split transition may not have been made in the gym template. The pattern of missing Mon-Thu is now a recurring theme across the 30-day log (3 sessions one week, 1 the next, never close to 6). Weekday mornings appear to be the primary blocker.

CORRECTIVE COMPLIANCE:

Hip Thrust (APT correction -- mandatory every Legs day) has not appeared in a single session across the full 30-day log. Both Legs days were missed this week, so Hip Thrust was never attempted. Without regular Hip Thrust work, anterior pelvic tilt persists: the hip flexors stay short, the glutes stay inhibited, and lower-back compression during every squat and deadlift increases -- a significant injury risk compounded by age. Rear delt sets this week: 3 of the 8-set weekly target. At 44, if front shoulder muscles (bench, overhead press) remain materially stronger than rear delts, the rotator cuff loses its stabilising balance: the humeral head drifts forward under load, narrowing the subacromial space. Over months this creates impingement, then partial tears. 3 sets is not enough. Core stabilisers (Dead Bug, Bird-Dog) have also never been logged -- the T8-T12 kyphosis corrective is being skipped every single session.

LATERAL RAISE -- V-TAPER KPI:

Lateral Raise was not performed this week (Down from 10kg x 15 reps the prior Monday). This matters specifically for Ganesh because love handles sit at approximately lat-width

level, visually collapsing the waist-to-shoulder ratio. Wider lateral delts are the fastest way to improve the V-taper without touching body fat. A stalled or absent lateral raise means the visual ratio is not improving.

HARD FLAGS:

1. SESSION DURATION: Fri 04 Sep logged at 251 min -- 4x the 60-min target. Must be fixed.
2. 0kg LOGGED: Session 7 (Fri 28 Aug), Rear Delt Fly sets 2-3 logged at 0kg. Either a data entry error or the weight was dropped entirely mid-set. Sets at 0kg give no signal.
3. ADHERENCE COLLAPSE: 1 of 6 sessions this week -- the lowest week in the 30-day window.
4. HIP THRUST NEVER LOGGED: 0 appearances across all 30 days. APT correction not happening.
5. CORE CORRECTIVES NEVER LOGGED: Dead Bug / Bird-Dog absent from every session in 30 days. T8-T12 kyphosis work is being skipped systematically.

OVERALL VERDICT: DECLINING

This week -- 1 session, 3,220 kg*reps -- is materially worse than last week (3 sessions, 13,704 kg*reps). Volume down 77%. The mandatory correctives (Hip Thrust, Dead Bug) have never been logged. V-taper KPI (Lateral Raise) not performed. The deload flag (8 active weeks, overdue at week 4) was not deliberately executed. W15 was a de facto very-low-volume week but not a structured deload, so W16 should be a planned deload before returning to full PPL at W17.

8. PLAN FOR NEXT WEEK

Programme week: W16 of PPL x2 (DELOAD WEEK -- 8 active weeks logged, overdue)

Deload rule: 2 working sets per exercise, same weights as last best log.

Correctives remain at 3 sets (therapeutic, low load).

Hip Thrust introduced this week at conservative start weight.

MONDAY 07 Sep -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell)	2 x 8 @ 60kg	(deload -- held at Aug-24 best)
Lateral Raise (Dumbbell)	2 x 12 @ 10kg	(V-TAPER KPI -- do not skip)
Triceps Pushdown	2 x 11 @ 27.2kg	
Dead Bug	3 x 10	-- MANDATORY (T8-T12 corrective)

Watch-point: Keep Bench Press grip neutral and control the eccentric 3 seconds.

Session must finish within 60 min -- warm-up + 4 exercises + cool-down only.

TUESDAY 08 Sep -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell)	2 x 8 @ 70kg	(deload -- held at Aug-28/Sep-04 best)
Lat Pulldown (Machine)	2 x 6 @ 66kg	(deload)
Bicep Curl (Barbell)	2 x 10 @ 20kg	(deload)
Rear Delt Reverse Fly (DB)	2 x 12 @ 10kg	(rear delt health -- do not skip)
Dead Bug	3 x 10	-- MANDATORY

Watch-point: Log every set weight accurately -- 0kg sets provide no training signal.

WEDNESDAY 09 Sep -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust MANDATORY)

Hip Thrust (Barbell)	3 x 10 @ 40kg	-- MANDATORY APT correction (conservative start; not in 30-day log)
----------------------	---------------	--

Squat (Barbell) 2 x 6 @ 70kg (deload)
Leg Extension (Machine) 2 x 9 @ 70kg (deload -- use 70kg, not 77, for joint care)
Seated Leg Curl (Machine) 2 x 9 @ 36kg (deload -- use 36kg; rep collapse at 43kg)
Bird-Dog 3 x 10 each side -- MANDATORY (T8-T12 corrective)

Watch-point: Hip Thrust must be logged with actual weight -- do not record 0kg.
Drive through heels; posterior pelvic tilt at top of each rep to activate glutes.

THURSDAY 10 Sep -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 7 @ 45kg (deload -- held at Aug best)
Lateral Raise (Dumbbell) 2 x 12 @ 10kg (V-TAPER KPI -- second hit this week)
Triceps Pushdown 2 x 11 @ 27.2kg
Dead Bug 3 x 10 -- MANDATORY

Watch-point: OHP: keep ribs down, core braced. Do not hyperextend lumbar under load.

FRIDAY 11 Sep -- Pull B (Back + Rear Delts + Biceps -- Rear Delt work MANDATORY)

Bent Over Row (Barbell) 2 x 8 @ 70kg (deload)
Deadlift (Barbell) 2 x 8 @ 75kg (deload -- first logged session this cycle)
Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg -- MANDATORY rear delt session
Bicep Curl (Barbell) 2 x 9 @ 20kg (deload)
Dead Bug 3 x 10 -- MANDATORY

Watch-point: Deadlift -- brace hard, neutral spine. 75kg is manageable; log every rep.

SATURDAY 12 Sep -- Legs B (Glutes + Hamstrings + Single-Leg -- Hip Thrust MANDATORY)

Hip Thrust (Barbell) 3 x 10 @ 40kg -- MANDATORY APT correction
Leg Press (Machine) 2 x 12 @ 50kg (deload)
Seated Leg Curl (Machine) 2 x 9 @ 36kg (deload)
Bulgarian Split Squat (DB) 2 x 10 @ 10kg each hand (conservative start -- not in log)
Bird-Dog 3 x 10 each side -- MANDATORY

Watch-point: Hip Thrust form check -- avoid lumbar overextension at the top.
Second Legs day of the week: if fatigue is high, drop volume by 1 set, do NOT skip.

+-----+		
Deload	: needed this week -- W16 is the planned deload	
	(8 active weeks logged; overdue since Week 12)	
	Next full-load cycle: W17, from Mon 14 Sep 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
