

30-Day Period ending 2026-09-04

Name	Ganesh
Profile	44M 181 cm 87 kg -> 79 kg
Goal	Body Recomposition -- Fat loss, muscle preservation
Pace	0.5 kg/week 15% calorie deficit
Generated	2026-09-04

WEEKLY TRAINING REPORT

Generated : 2026-09-05 05:00 IST
 User : Ganesh | 44M | 181cm | 87kg -> 79kg
 This week : 29 Aug to 05 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target
 Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)
 Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.
 Biggest win : Deadlift (Barbell) -- 75kg x 8 reps (e1RM 95.0kg)
 Biggest concern: Legs -- 0 sets vs 14 target (14 sets short)
 vs last week : Volume DOWN 77% (3,220 vs 13,704 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min
 Type : Full Body C -- Friday
 Volume : 3,220 kg*reps | 8 sets
 Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM
 Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)
 Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM

4-WEEK VOLUME TREND

Wk -3 (08 Aug-15 Aug): [#####] 13,059 kg*reps 3 sess
 Wk -2 (15 Aug-22 Aug): [#####.....] 5,056 kg*reps 1 sess
 Wk -1 (22 Aug-29 Aug): [#####] 13,704 kg*reps 3 sess
 This wk (29 Aug-05 Sep): [#####.....] 3,220 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))
 [C] = compound lift | [I] = isolation
 [C] Bent Over Row (Barbell)
 Best this week : 70kg x 8 reps (e1RM 88.7kg)
 vs prior : SAME as 28 Aug
 Next session : 70kg x 8 reps
 [C] Deadlift (Barbell)
 Best this week : 75kg x 8 reps (e1RM 95.0kg)
 vs prior : First time in 30-day log
 Next session : 75kg x 8 reps
 [I] Rear Delt Reverse Fly (Dumbbell)
 Best this week : 10kg x 12 reps (e1RM 14.0kg)
 vs prior : SAME as 14 Aug
 Next session : 10kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
Chest	0	12	12	CRITICAL
Back	5	14	9	CRITICAL
Shoulders	0	10	10	CRITICAL
Traps	2	6	4	CRITICAL
Rear Delts	3	8	5	CRITICAL
Biceps	0	8	8	CRITICAL
Triceps	0	8	8	CRITICAL
Legs	0	14	14	CRITICAL
Core	0	6	6	CRITICAL

-----+-----+-----+-----+-----

Chest | 0 | 12 | 12 | CRITICAL

Back | 5 | 14 | 9 | CRITICAL

Shoulders | 0 | 10 | 10 | CRITICAL

Traps | 2 | 6 | 4 | CRITICAL

Rear Delts | 3 | 8 | 5 | CRITICAL

Biceps | 0 | 8 | 8 | CRITICAL

Triceps | 0 | 8 | 8 | CRITICAL

Legs | 0 | 14 | 14 | CRITICAL

Core | 0 | 6 | 6 | CRITICAL

Push sets: 0 | Pull sets: 10 | Ratio pull:push = 0.00 (LOW -- add more pulling work)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 2 sets this week (need 6+/week)

SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target

Wk -3 (08 Aug-15 Aug): 3 sessions

Wk -2 (15 Aug-22 Aug): 1 sessions

Wk -1 (22 Aug-29 Aug): 3 sessions

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 0 8 AT RISK

Back 5 10 AT RISK

Shoulders 0 8 AT RISK
 Traps 2 4 AT RISK
 Rear Delts 3 6 AT RISK
 Biceps 0 6 AT RISK
 Triceps 0 6 AT RISK
 Legs 0 10 AT RISK
 Core 0 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):
 Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
 These are not getting enough signal to hold on to muscle during a deficit.
 Add sets for these in the next 1-2 sessions.

Active training weeks logged : 8
 Weeks since last deload : 8 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
 Deload weeks let joints and connective tissue recover.
 You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W15 (started 2026-05-24; 103 days elapsed -> rounded up)
 Sessions this week: 1 of 6 target (29 Aug to 05 Sep 2026)

Day	Expected	Detected	Status
-----+-----+-----+-----			
Fri 04 Sep	Pull B	Full Body C	(INFERRED INFERRED
	Pull -- Row, Deadlift,		
	Rear Delt Fly)		

Missed days this week (no session logged):
 Sat 29 Aug -- Legs B -- MISSED
 Mon 31 Aug -- Push A -- MISSED
 Tue 01 Sep -- Pull A -- MISSED
 Wed 02 Sep -- Legs A -- MISSED
 Thu 03 Sep -- Push B -- MISSED

Adherence: 17% (1 of 6 planned sessions completed; 1 INFERRED correct type)

NOTE: Session titles use "Full Body A/B/C" not PPL labels. Type is inferred from exercises throughout. The programme requires a switch to PPL naming.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 Legs sessions this week (APT correction COMPLETELY ABSENT)
 Core stabiliser (all sessions): 0 of 1 sessions -- MISSING on Fri 04 Sep
 Rear delt work in Pull sessions: 1 of 1 sessions -- OK (Rear Delt Reverse Fly x3, Fri 04 Sep)
 Sessions over 60 min: Fri 04 Sep at 251 min -- CRITICAL FLAG (4x over limit; check if timer left running)
 Additional flag -- Session 8 (Fri 28 Aug, in prior 7-day window):
 Duration: 8 min -- suspiciously short; likely abandoned or timer stopped early
 Rear Delt Fly sets 2-3 logged at 0kg -- data entry error (or weight removed mid-set)

LATERAL RAISE (V-TAPER KPI):

This week (29 Aug - 04 Sep): NOT PERFORMED -- no data

Prior week (22 Aug - 28 Aug): 10kg x 15 reps (Mon 24 Aug, Session 6)

Trend: DOWN (Lateral Raise skipped entirely this week)

7. KEY INSIGHTS

RECOVERY AT 44 (48h rule):

Only two sessions occurred in the Aug 28-Sep 4 window: Session 8 (Fri 28 Aug, 11:03 IST) and Session 9 (Fri 04 Sep, 09:00 IST). Both targeted back/pull muscles.

The gap between them is 167 hours -- well above the 48h minimum. No same-muscle overlap violation this week. However, the recovery issue at 44 is the inverse one: the body needs repeated stimulus 2-3x per muscle group per week to retain muscle on a calorie deficit. With only 1 session this week, ALL muscle groups are under-stimulated. At 44, muscle protein synthesis rates are lower than at 25; infrequent training means the anabolic window is being left open and empty.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 15 of the PPL x2 programme (started 2026-05-24). Adherence this week is 17% -- 1 of 6 planned sessions. The 4-week rolling pattern shows: 3, 1, 3, 1 sessions -- an alternating high-low pattern suggesting Ganesh drops to near-zero effort every other week. Friday is the only day that appears consistently; Monday appears in good weeks. The entire Tuesday-Thursday block (Pull A, Legs A, Push B) has been structurally absent for the observable period. At 15 weeks in, the programme has not yet been run as designed even once at 6 sessions/week.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate: 0% -- zero Legs sessions in the last 7 days. Anterior Pelvic Tilt (APT) arises from hip flexor dominance and glute weakness. Hip Thrusts are the primary glute-loading corrective. Without them, APT worsens over time, increasing lumbar compression in squats and deadlifts and exaggerating the lower-belly protrusion that blurs the V-taper at the base. Rear delt set count: 3 sets this week against the 8-set target (5 sets short). At 44, if the anterior deltoid (from bench/OHP) consistently outpaces the posterior deltoid and external rotators, the humeral head migrates anteriorly in the glenohumeral socket. The subacromial space narrows, and overhead pressing or reaching movements gradually compress the supraspinatus tendon -- this is rotator cuff impingement, and at 44 with reduced collagen turnover, it is a realistic 6-12 month consequence of sustained imbalance. Core stabiliser presence: 0 of 1 sessions -- Dead Bug or Bird-Dog, the T8-T12 kyphosis corrective, has not appeared in any session in this reporting window.

LATERAL RAISE TREND (V-TAPER KPI):

Lateral Raise was not performed this week (DOWN from 10kg x 15 prior week). This is the primary V-taper metric because Ganesh's love handles sit at the same horizontal level as the lat flare -- collapsing the visual shoulder-to-waist ratio. The only structural fix on the top half is medial deltoid width via Lateral Raise progression. Skipping it for a full week while in a calorie deficit risks both stagnation and

minor isolation-muscle atrophy. Two consecutive missed weeks would represent a meaningful setback. Lateral Raise must appear in every Push session.

HARD FLAGS:

1. Session 9 (Fri 04 Sep): 251 minutes -- 4.2x the 60-min session cap. This almost certainly indicates the Heavy timer was left running between exercises or after the session ended. The actual working time, given 8 sets logged, is likely 30-40 min. Confirm and correct the Heavy entry so future duration data is trustworthy.
2. Session 8 (Fri 28 Aug): 8 minutes for 11 sets -- implausibly short. Either the session was abandoned early or the timer was stopped immediately after the warm-up. Rear Delt Fly sets 2-3 show 0kg logged -- possible form collapse or data error.
3. Zero Legs sessions this week: Hip Thrust (APT), Leg Curl, Leg Extension, Squat -- the entire lower-body corrective and strength block is absent.
4. Zero core work all week: Dead Bug and Bird-Dog have not appeared in ANY session visible in the log. The T8-T12 kyphosis correction is being completely skipped.
5. Deload overdue: the script flags 8 consecutive active weeks with no deload. The standard interval is every 4 weeks. Connective tissue and CNS fatigue accumulate even when session count is low -- deload is structural, not just for high volume.

OVERALL VERDICT: DECLINING

Volume is down 77% week-on-week (3,220 vs 13,704 kg*reps). The alternating 3-1 session pattern continues at W15 with no sign of stabilising at 6 sessions/week. All corrective compliance targets are missed except rear delts (1 of 1 pull sessions covered, but only 3 of 8 target sets across the week). Lateral Raise V-taper KPI skipped. A deload is overdue by 4 weeks. Next week must be a structured deload to reset connective tissue fatigue before attempting full 6-session weeks in W17.

8. PLAN FOR NEXT WEEK

Programme week: W16 (Week 16 of PPL x2 -- DELOAD WEEK)

** DELOAD PROTOCOL: 2 working sets per exercise, same weights, no PRs **

** Deload repairs connective tissue, CNS, and tendon load tolerance. **

** After W16 deload, return to full volume in W17 (Sep 14 onwards). **

MONDAY 07 Sep -- Push A (Chest primary + Shoulders + Triceps) [DELOAD]

Bench Press (Barbell) 2 x 8 @ 60kg

Overhead Press (Barbell) 2 x 8 @ 40kg (drop to 40kg -- deload entry point)

Lateral Raise (Dumbbell) 2 x 15 @ 10kg (V-TAPER KPI -- do not skip)

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 2 x 10 -- MANDATORY (kyphosis T8-T12 corrective, do not skip)

Session cap: 45 min. Key focus: Lateral Raise MUST be logged; this is the V-taper KPI that was skipped entirely this week. Light weight, full range, slow tempo.

TUESDAY 08 Sep -- Pull A (Back compound + Biceps) [DELOAD]

Bent Over Row (Barbell) 2 x 8 @ 70kg

Lat Pulldown (Machine) 2 x 6 @ 66kg

Pull Up 2 x 6 @ BW

Bicep Curl (Barbell) 2 x 10 @ 20kg

Rear Delt Reverse Fly 2 x 12 @ 10kg -- MANDATORY (rear delt corrective)

Dead Bug 2 x 10 -- MANDATORY

Session cap: 45 min. Key focus: Rear Delt Fly is non-negotiable. This session provides 2 of the 8 rear delt sets needed per week for shoulder joint health.

WEDNESDAY 09 Sep -- Legs A (Quads + Hamstrings + Glutes) [DELOAD]

Squat (Barbell) 2 x 6 @ 70kg

Hip Thrust (Barbell) 2 x 10 @ 40kg -- MANDATORY (APT corrective, conservative start)

Leg Extension (Machine) 2 x 9 @ 77kg

Seated Leg Curl (Machine) 2 x 9 @ 43kg

Dead Bug 2 x 10 -- MANDATORY

Session cap: 50 min. Key focus: Hip Thrust is the single most important exercise in this session. APT has had ZERO correction this week. 40kg is a conservative start -- if this feels easy, note it and increase to 60kg in W17.

THURSDAY 10 Sep -- Push B (Shoulders primary + Chest variation + Triceps) [DELOAD]

Overhead Press (Barbell) 2 x 7 @ 45kg (shoulder primary -- aim for 2 clean sets)

Bench Press (Barbell) 2 x 8 @ 60kg (chest variation)

Lateral Raise (Dumbbell) 2 x 12 @ 10kg (V-TAPER KPI -- second session this week)

Triceps Pushdown 2 x 11 @ 27.2kg

Dead Bug 2 x 10 -- MANDATORY

Session cap: 45 min. Key focus: OHP. Target is 2 x 8 @ 45kg -- if both sets hit 8 clean reps, the W17 Push B session increases to 47.5kg. Track this carefully.

FRIDAY 11 Sep -- Pull B (Back + Rear Delts mandatory + Biceps) [DELOAD]

Bent Over Row (Barbell) 2 x 8 @ 70kg

Deadlift (Barbell) 2 x 8 @ 75kg

Rear Delt Reverse Fly 2 x 12 @ 10kg -- MANDATORY (face pull also acceptable)

Bicep Curl (Barbell) 2 x 10 @ 20kg

Dead Bug 2 x 10 -- MANDATORY

Session cap: 45 min. Key focus: Rear delts and Deadlift. Rear Delt Fly brings the weekly rear delt total to 6 sets -- still below the 8-set target, but better than 3. In W17, add one extra Rear Delt Fly set per pull session to hit 8+.

SATURDAY 12 Sep -- Legs B (Glutes + Hamstrings + Single-Leg) [DELOAD]

Hip Thrust (Barbell) 2 x 10 @ 40kg -- MANDATORY (APT corrective -- second hit)

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

Leg Press (Machine) 2 x 12 @ 50kg

Seated Leg Curl (Machine) 2 x 9 @ 43kg

Dead Bug 2 x 10 -- MANDATORY

Session cap: 50 min. Key focus: Second Hip Thrust session of the week. Both Legs sessions MUST include Hip Thrust -- this is the APT correction protocol. If both happen, W16 will be the first week in the log with correct APT compliance.

+-----+

| Deload : needed this week -- OVERDUE at W16 (next due W20, |

| ~12 Oct 2026, if deload is executed in W16) |

| Timing : 6-9 PM IST -- no sessions after midnight |

| Nutrition: 2,367 kcal/day | 174g protein minimum |

+-----+
