

30-Day Analysis Report

This week : 01 Sep to 08 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-07

WEEKLY TRAINING REPORT

Generated : 2026-09-08 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 01 Sep to 08 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target
Prior 3 weeks: 3, 2, 2 sessions (avg 2.3)
Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.
Biggest win : Deadlift (Barbell) -- 75kg x 8 reps (e1RM 95.0kg)
Biggest concern: Chest -- 2 sets vs 12 target (10 sets short)
vs last week : Volume DOWN 41% (6,090 vs 10,254 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 04 Sep 2026 09:00 IST | 251 min
Type : Full Body C -- Friday
Volume : 3,220 kg*reps | 8 sets
Bent Over Row (Barbell): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: +0.0kg e1RM
Deadlift (Barbell): 75kg x 8r x 2 sets (e1RM 95.0kg)
Rear Delt Reverse Fly (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -0.3kg e1RM
Session 2: Monday 07 Sep 2026 13:26 IST | 77 min
Type : Full Body A -- Monday
Volume : 2,870 kg*reps | 12 sets
Squat (Barbell): 70kg x 7r x 4 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM
Bench Press (Barbell): 60kg x 6r x 2 sets (e1RM 72.0kg) vs prior: -4.0kg e1RM
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 15r x 3 sets (e1RM 15.0kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (11 Aug-18 Aug): [#####] 13,059 kg*reps 3 sess
Wk -2 (18 Aug-25 Aug): [#####.....] 8,506 kg*reps 2 sess
Wk -1 (25 Aug-01 Sep): [#####.....] 10,254 kg*reps 2 sess
This wk (01 Sep-08 Sep): [#####.....] 6,090 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))
[C] = compound lift | [I] = isolation
[C] Bench Press (Barbell)
Best this week : 60kg x 6 reps (e1RM 72.0kg)
vs prior : DOWN -4.0kg vs 24 Aug

Next session : 57.0kg x 6 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : SAME as 28 Aug

Next session : 70kg x 8 reps

[C] Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : First time in 30-day log

Next session : 75kg x 8 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Aug

Next session : 72.5kg x 7 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)

vs prior : SAME as 24 Aug

Next session : 10kg x 15 reps

[I] Rear Delt Reverse Fly (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : SAME as 14 Aug

Next session : 10kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		2		12		10		CRITICAL
Back		8		14		6		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		2		6		4		CRITICAL
Rear Delts		3		8		5		CRITICAL
Biceps		0		8		8		CRITICAL
Triceps		0		8		8		CRITICAL
Legs		4		14		10		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 5 | Pull sets: 13 | Ratio pull:push = 2.60 (OK -- balanced)

Rear delts: 3 sets this week (need 8+/week)

SHORT by 5 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 2 sets this week (need 6+/week)

SHORT by 4 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (11 Aug-18 Aug): 3 sessions

Wk -2 (18 Aug-25 Aug): 2 sessions

Wk -1 (25 Aug-01 Sep): 2 sessions

Time between sessions this week:

Fri 04 Sep 09:00 -> Mon 07 Sep 13:26: 76h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	2	8	AT RISK
Back	8	10	AT RISK
Shoulders	3	8	AT RISK
Traps	2	4	AT RISK
Rear Delts	3	6	AT RISK
Biceps	0	6	AT RISK
Triceps	0	6	AT RISK
Legs	4	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 9

Weeks since last deload : 9 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W16 (started 2026-05-24; 107 days elapsed, rounded up)

Sessions this week: 2 of 6 target

NOTE: Neither session carries a PPL title (Push A/B, Pull A/B, Legs A/B).

Both sessions are titled 'Full Body' -- session type is INFERRED from exercises.

Day	Expected	Detected	Status
* +-----+-----+-----+			
Tue 01 Sep	Pull A	--	MISSED
Wed 02 Sep	Legs A	--	MISSED
Thu 03 Sep	Push B	--	MISSED
Fri 04 Sep	Pull B	Pull (INFERRED)	OK (Row, Deadlift, Rear Delt Fly)
Sat 05 Sep	Legs B	--	MISSED
Sun 06 Sep	REST	--	OK (rest day)
Mon 07 Sep	Push A	Full Body (INFERRED)	MISMATCH (Squat+Bench+PullUp mixed)

Adherence: 17% (1 of 6 planned Mon-Sat sessions on correct day or correctly inferred)

Of sessions actually logged: 50% (1 of 2 sessions matched expected type)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 designated legs sessions logged this week.

Squats present in Mon session (Full Body A) but NO

Hip Thrust logged. APT correction missed this week.

Core stabiliser (all sessions): 0 of 2 sessions (no Dead Bug, Bird-Dog, or Plank

found in either Fri or Mon session -- CRITICAL MISS)

Rear delt work in Pull sessions: 1 of 1 pull sessions -- Rear Delt Reverse Fly

3 sets on Fri 04 Sep. Still short of 8-set/week target

(3 sets this week; need 5 more for the week).

Sessions over 60 min : BOTH sessions exceeded the 60-min limit

* Fri 04 Sep: 251 min (191 min over limit -- FLAG)

* Mon 07 Sep: 77 min (17 min over limit -- FLAG)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 15 reps (Mon 07 Sep, Session 9)

Prior week : No lateral raise logged in Aug 25-31 window

Last prior data: 10kg x 15 reps (Mon 24 Aug -- Session 5)

Trend : SAME (no weight or rep progression since at least 24 Aug)

7. KEY INSIGHTS

RECOVERY AT 44:

Only two sessions this week: Fri 04 Sep (09:00 IST) and Mon 07 Sep (13:26 IST) -- a 76-hour gap, comfortably above the 48-hour minimum. No same-muscle pairs were trained within 48h this week. Between the last session of the prior week (Fri 28 Aug, 11:03) and Fri 04 Sep (09:00), the gap was 165h -- also fine. The one active concern is the 251-minute session on Friday: a 4-hour gym session elevates cortisol far beyond what a focused 60-minute session would. At 44, prolonged elevated cortisol suppresses testosterone and impairs muscle protein synthesis. That session likely left Ganesh more fatigued than trained, which may partly explain the 3-day gap before returning on Monday.

PPL ADHERENCE AND PROGRAMME AGE:

Adherence this week is 17% -- 1 of 6 planned sessions executed on the correct day and type. This is W16 of the PPL x2 programme (started 2026-05-24), yet both sessions are still labelled 'Full Body' and mix Push/Pull/Legs into a single workout. The programme has been active for 15 full weeks; the PPL split has not been adopted. The pattern this week is the same as prior weeks: sessions gravitate to Friday and Monday, with 4 of 6 planned days missed (Tue Pull A, Wed Legs A, Thu Push B, Sat Legs B all skipped). Until the PPL split is followed, muscle-group volume will remain unbalanced and recovery will be unplanned.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate this week: 0%. No dedicated Legs session (Legs A or Legs B) was logged, and the Monday Full Body session did not include a Hip Thrust. This means zero APT correction work for the entire week -- the anterior pelvic tilt remains unaddressed. Over time, unresolved APT increases lumbar loading, raises lower-back injury risk, and makes it harder to activate glutes effectively on squats and deadlifts. Rear delt sets were 3 this week (target 8+). The risk of training the anterior deltoid disproportionately stronger than the posterior: the rotator cuff muscles (infraspinatus, teres minor) that hold the humeral head in the socket become relatively weak. At 44, this imbalance raises the likelihood of impingement, shoulder instability, or labrum stress during pressing movements. Core stabiliser work: 0 of 2 sessions -- the T8-T12 kyphosis correction protocol (Dead Bug / Bird-Dog) was completely absent.

LATERAL RAISE TREND:

Stuck at 10kg x 15 -- no progression since at least 24 August. This is the primary V-taper KPI. Ganesh's love handles currently sit at lat-width level, which collapses the visual shoulder-to-waist ratio. The lateral raise is the most direct driver of medial delt width: increasing the weight here expands the visual shoulder-cap and creates the illusion of a narrower waist. Being flat at 10kg for 2+ weeks signals the V-taper is not moving. Next session: attempt 11.25kg (or the nearest available weight).

HARD FLAGS:

1. Fri 04 Sep -- 251-minute session: 4+ hours in the gym is counterproductive at any age and especially at 44. Cortisol will remain elevated for hours post-session. Target is 60 minutes max including warm-up and cool-down. This session was 4x over limit.
2. Mon 07 Sep -- 77-minute session: 17 minutes over the 60-min cap.
3. Pull Up 0kg logged in every session: bodyweight pull-ups should not log 0kg -- either the weight field is being left blank or there is a logging error. This makes e1RM tracking impossible. Log actual bodyweight (~87kg) or use '+0kg' notation consistently.
4. Bench Press e1RM DOWN from 76.0kg (Aug 24) to 72.0kg (Sep 7): dropped from 3 sets at 60kg x 8 to only 2 sets at 60kg x 6. Fewer sets and fewer reps = strength signal going backward. This likely reflects fatigue from the 251-min Friday session.
5. Core: 0 sets across both sessions this week. The Dead Bug and Bird-Dog are not optional for T8-T12 kyphosis -- skipping them entirely for a full week allows postural regression.

OVERALL VERDICT: DECLINING

Volume down 41% versus last week (6,090 vs 10,254 kg*reps). Only 2 of 6 sessions completed. All 9 tracked muscle groups are at-risk for catabolism (below minimum stimulus sets). Both mandatory corrective exercises (Hip Thrust, core stabiliser) were completely absent. Neither session stayed within the 60-minute limit -- one ran 251 minutes. Strength is flat or regressing. PPL adherence is at 17%. This is the weakest week in the 30-day log across volume, adherence, and corrective compliance.

8. PLAN FOR NEXT WEEK

Programme week: W17 (Week 17 of PPL x2 -- fresh block after W16 deload)

NOTE: The programme analysis flags a DELOAD for W16 (9 weeks trained). W17 is the start of a new 4-week block. Weights stay the same; rep targets are full.

MONDAY 08 Sep -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 3 x 8 @ 57.5kg

[rep collapse Mon Sep 7: dropped from 8 to 6 reps -- 5% reduction from 60kg]

Overhead Press (Barbell) 3 x 8 @ 45kg

[stable across 3 sessions at 45kg x 7; not all reps hit -- hold]

Lateral Raise (Dumbbell) 3 x 12 @ 11.25kg [V-TAPER KPI]

[stuck at 10kg x 15 for 2+ weeks -- bump to 11.25kg; drop to 12 reps to earn weight]

Triceps Pushdown 3 x 12 @ 27.2kg

[stable -- hold weight, aim for 12 clean reps]

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 correction)

FOCUS: Keep total session under 60 minutes. Log the session end time.

TUESDAY 09 Sep -- Pull A (Back + Biceps)

Bent Over Row (Barbell) 3 x 8 @ 70kg

[stable at 70kg x 8 for 3 sessions -- hold; progress to 72.5kg only if all 3 sets hit 8 clean reps with flat back]

Lat Pulldown (Machine) 3 x 8 @ 66kg

[stable -- hold]

Pull Up (Bodyweight) 3 x 6 @ bodyweight

[log actual bodyweight as the load; 0kg entry makes tracking impossible]

Bicep Curl (Barbell) 3 x 10 @ 20kg

[stable -- hold; if all sets hit 10 reps, progress to 22.5kg next week]

Bird-Dog 3 x 10 each side -- DO NOT SKIP (T8-T12 correction)

FOCUS: Pull A is a pure back-and-biceps day -- no squats, no bench. Keep it strict.

WEDNESDAY 10 Sep -- Legs A (Quads + Hamstrings + Glutes)

Squat (Barbell) 4 x 8 @ 72.5kg

[hit 70kg x 7 on Mon Sep 7 -- all sets above 6 reps, progress +2.5kg]

Leg Extension (Machine) 3 x 10 @ 77kg

[best was 77kg x 9 -- hold weight, build to 10 reps before progressing]

Seated Leg Curl (Machine) 3 x 10 @ 43kg

[hit 43kg x 9 x 3 on Aug 26 -- hold; progress only after all 3 sets hit 10]

Hip Thrust (Barbell) 3 x 10 @ 60kg MANDATORY (APT correction)

[no recent log -- conservative start at 60kg; increase 5kg per session if form holds]

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 correction)

FOCUS: Hip Thrust is non-negotiable on every Legs A session. Place it third in the workout when glutes are warmed but not exhausted.

THURSDAY 11 Sep -- Push B (Shoulders + Chest variation + Triceps)

Overhead Press (Barbell) 4 x 8 @ 45kg

[Push B is shoulder-primary -- add a 4th set to build shoulder volume]

Bench Press (Barbell) 3 x 8 @ 57.5kg

[chest variation on Push B -- same weight as Monday; progress to 60kg only if all 3 sets hit 8 reps on Monday]

Lateral Raise (Dumbbell) 3 x 12 @ 11.25kg

[second lateral raise session this week to accelerate V-taper KPI]

Triceps Pushdown 3 x 12 @ 27.2kg

Bird-Dog 3 x 10 each side -- DO NOT SKIP (T8-T12 correction)

FOCUS: Two pressing sessions (Mon + Thu) is by design for Push A/B split. Watch for shoulder fatigue -- if overhead press feels heavy, drop to 3 sets and note it.

FRIDAY 12 Sep -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 3 x 8 @ 70kg

Deadlift (Barbell) 3 x 8 @ 75kg

[first logged deadlift Sep 4 at 75kg x 8 x 2 sets -- add a 3rd set this week]

Rear Delt Reverse Fly (DB) 4 x 12 @ 10kg MANDATORY (rear delt / rotator health)

[3 sets hit 12 reps in first 2 sets but dropped to 10 on set 3 on Sep 4 -- hold weight; add a 4th set to push toward 8-set/week rear delt target]

Bicep Curl (Barbell) 3 x 10 @ 20kg

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 correction)

FOCUS: Pull B has the rear delt mandate. 4 sets of rear delt fly + 3 sets of rowing = 7 posterior-chain sets. Combined with Tuesday's Pull A, this pushes weekly rear delt count toward the 8-set minimum.

SATURDAY 13 Sep -- Legs B (Glutes + Hamstrings + Single-Leg + Hip Thrust)

Hip Thrust (Barbell) 3 x 10 @ 65kg MANDATORY (APT correction)

[if Wednesday's session at 60kg felt controlled, move to 65kg Saturday]

Leg Press (Machine) 3 x 12 @ 52.5kg

[hit 50kg x 12 x 3 sets consistently -- progress +2.5kg]

Romanian Deadlift (Barbell) 3 x 10 @ 50kg
[no recent log for this exercise -- conservative start at 50kg]
Single-Leg Romanian Deadlift 3 x 8 each leg @ 15kg dumbbell
[introduce single-leg work for Legs B; start light to learn balance]
Bird-Dog 3 x 10 each side -- DO NOT SKIP (T8-T12 correction)
FOCUS: Hip Thrust is again non-negotiable. Two Hip Thrust sessions this week
(Wed + Sat) is the correct cadence to address APT.

+-----+		
Deload	: W16 (this week) is the deload -- next due W20, ~05 Oct	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
