

30-Day Analysis Report

This week : 13 Sep to 20 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-19

WEEKLY TRAINING REPORT

Generated : 2026-09-20 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 13 Sep to 20 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Bent Over Row (Barbell) -- 60kg x 11 reps (e1RM 82.0kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume DOWN 50% (6,804 vs 13,539 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 16 Sep 2026 10:41 IST | 44 min

Type : Full Body B -- Wednesday

Volume : 5,484 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Friday 18 Sep 2026 10:44 IST | 62 min

Type : Full Body C -- Friday

Volume : 1,320 kg*reps | 2 sets

Bent Over Row (Barbell): 60kg x 11r x 2 sets (e1RM 82.0kg) vs prior: -6.7kg e1RM

4-WEEK VOLUME TREND

Wk -3 (23 Aug-30 Aug): [#####] 13,704 kg*reps 3 sess

Wk -2 (30 Aug-06 Sep): [####.....] 3,220 kg*reps 1 sess

Wk -1 (06 Sep-13 Sep): [#####.] 13,539 kg*reps 3 sess

This wk (13 Sep-20 Sep): [#####.....] 6,804 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 60kg x 11 reps (e1RM 82.0kg)

vs prior : DOWN -6.7kg vs 28 Aug

Next session : 57.0kg x 11 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)
 vs prior : SAME as 09 Sep
 Next session : 45kg x 8 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)
 vs prior : SAME as 26 Aug
 Next session : 20kg x 10 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)
 vs prior : DOWN -32.7kg vs 09 Sep
 Next session : 47.5kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)
 vs prior : SAME as 26 Aug
 Next session : 43kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 26 Aug
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		2		14		12		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		0		6		6		CRITICAL
Rear Delts		0		8		8		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		6		14		8		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 6 | Pull sets: 8 | Ratio pull:push = 1.33 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
 Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (23 Aug-30 Aug): 3 sessions

Wk -2 (30 Aug-06 Sep): 1 sessions

Wk -1 (06 Sep-13 Sep): 3 sessions

Time between sessions this week:

Wed 16 Sep 10:41 -> Fri 18 Sep 10:44: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	2	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	6	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 10

Weeks since last deload : 10 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W17 (started 2026-05-24; 118 days elapsed = 17 weeks rounded up)
Sessions this week: 2 of 6 target

NOTE: Session titles this week use 'Full Body A/B/C' labels -- no PPL keywords found. Types inferred from exercises. Ganesh has not yet adopted PPL session labels in the app; the Full Body template is still being used.

Day | Expected | Detected | Status
* +-----+-----+-----

Wed 16 Sep | Legs A | INFERRED: Full Body | MISMATCH -- mixed push/pull/

	(OHP + Triceps +		legs in one session; no PPL
	Legs + Biceps)		alignment

Fri 18 Sep | Pull B | INFERRED: Pull B | INFERRED OK (partial --

	(Row only)		only 2 working sets)
--	------------	--	----------------------

Missed entirely: Mon 14 Sep (Push A), Tue 15 Sep (Pull A),
Thu 17 Sep (Push B), Sat 19 Sep (Legs B)

Adherence: 50% (1 of 2 sessions on correct day type)
* 2 of 6 target sessions attended (33% weekly attendance)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- 0 dedicated Legs sessions logged this week. Legs A (Wed) was replaced by Full Body; Legs B (Sat) was missed entirely. APT correction skipped for the full week.

Core stabiliser (all sessions): 0 of 2 sessions -- Dead Bug / Bird-Dog absent both Wed and Fri.

Rear delt work in Pull sessions: 0 of 1 pull sessions -- Fri session had Bent Over Row only; no Face Pull or Rear Delt Fly logged.

Sessions over 60 min: Fri 18 Sep -- 62 min (2 min over 60-min limit)

LATERAL RAISE (V-TAPER KPI):

This week: not logged (0 sets) | Prior week: 10kg x 15 | Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44:

Only two sessions this week: Wed 16 Sep at 10:41 IST and Fri 18 Sep at 10:44 IST -- a gap of exactly 48h 3min. That just clears the 48-hour minimum, but only by 3 minutes. Both sessions overlapped on biceps (Bicep Curl on Wed, Bent Over Row on Fri engages biceps secondarily), giving those muscles the absolute floor of recovery time. At 44, connective tissue and neuromuscular recovery is slower than in younger athletes; the 48h minimum is a floor, not

a comfortable margin. Ideal same-muscle gap is 72h. No sessions were logged after midnight. The previous session pair (Fri 11 Sep to Wed 16 Sep = 119h) gave full recovery before this week began.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 17 of the programme (started 2026-05-24). Attendance this week was 2 of 6 target sessions (33%). Both sessions used Full Body templates (Full Body B on Wed, Full Body C on Fri), not the PPL split that Week 17 requires. Missed days: Monday Push A, Tuesday Pull A, Thursday Push B, Saturday Legs B. The pattern across the 30-day log is clear -- the midweek Wed/Fri slots are the most consistently hit, while the Monday and Saturday bookend sessions are the most frequently skipped. This means chest (Monday Push A) and single-leg/glute-focused work (Saturday Legs B) are getting near zero dedicated volume week after week.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate this week: 0 of 0 (Legs sessions were not logged). APT correction was skipped entirely -- Legs A replaced by Full Body B, Legs B not logged. Rear delt sets this week: 0 of the 8-set weekly target. When the anterior deltoid (front of shoulder) keeps accumulating strength through Overhead Press and Bench Press while the posterior deltoid and rotator cuff muscles receive zero work, the shoulder girdle is pulled into chronic forward (internal) rotation. At 44 this creates a narrowing of the subacromial space

- * the gap between the humerus and the acromion bone -- through which the supraspinatus tendon passes. With a narrowed gap and an imbalanced joint, every rep of Overhead Press loads that tendon against bone. The result is rotator cuff impingement: pain, reduced range of motion, and eventually partial tears. Face Pulls and Rear Delt Flys are the single cheapest insurance against this. Core stabiliser presence rate: 0 of 2 sessions. Dead Bug or Bird-Dog was absent both days, leaving the T8-T12 kyphosis pattern uncorrected during loaded exercises.

LATERAL RAISE TREND:

The V-taper KPI moved DOWN -- zero Lateral Raise sets logged this week, against 10kg x 15 reps x 3 sets last week (Mon 07 Sep). This matters specifically for Ganesh because the love handles sit at the same horizontal level as the lat width, which means the current silhouette reads as a cylinder rather than a V. The only way to create a V-taper without major fat loss is to widen the shoulders -- medial delt growth from Lateral Raise is the primary driver of that. Every week the Lateral Raise is skipped, that gap between shoulder width and waist width stays flat.

HARD FLAGS:

1. Leg Extension collapse: best this week was 50kg x 12 (Wed 16 Sep), down from 77kg x 10 (Wed 09 Sep) -- a 32.7kg e1RM drop (102.7kg to 70.0kg) in seven days. This is either a significant machine setting change or genuine strength regression; either way it needs investigation next session.
2. Triceps Pushdown rep collapse: Wed 16 Sep, Set 3 dropped to 9 reps after two sets of 11. The 5% drop protocol applies: target weight drops to ~26kg next session.
3. Session 9 (Fri 18 Sep) ran 62 minutes but contained only 2 working sets (Bent Over Row x2). A 62-minute session with 2 sets indicates a very long warm-up or significant rest times -- well above the 60-min cap for what was effectively an incomplete session.
4. Rear delt cumulative deficit: the 30-day log shows 9 rear delt sets total. Target is 8 sets per week, so in 4 weeks that target is 32 sets -- the actual count is 28% of target. Rotator cuff risk is building.
5. Bent Over Row e1RM down 6.7kg this week (82.0kg vs 88.7kg on 28 Aug), continuing a strength regression trend on the programme's primary back compound.

OVERALL VERDICT: DECLINING

Volume fell 50% week-on-week (6,804 vs 13,539 kg*reps). Sessions dropped from 3 to 2 against a 6-session target. Corrective compliance was 0% across all three markers (hip thrust, core, rear delts). The Lateral Raise KPI moved down. Strength is regressing on Bent Over Row and Leg Extension. A deload is overdue (10 weeks without one; protocol requires every 4 weeks) and must happen next week to prevent further decline.

8. PLAN FOR NEXT WEEK

Programme week: W18 (Week 18 of PPL x2) -- DELOAD WEEK

All sets cut to 2 per exercise. Keep weights the same unless rep collapse was flagged (5% reduction applies). All times 6-9 PM IST.

MONDAY -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 8 @ 57kg

[5% drop from 60kg -- rep collapse on 07 Sep: only 6 reps vs 8 target]

Overhead Press (Barbell) 2 x 8 @ 45kg

Lateral Raise (Dumbbell) 2 x 15 @ 10kg

Triceps Pushdown 2 x 11 @ 26kg

[~5% drop from 27.2kg -- rep collapse Set 3 on 16 Sep: 9 reps vs 11]

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

FOCUS: Technique only on Bench Press -- control the descent to 2 seconds, pause at chest, press. This is deload week: leave 2-3 reps in the tank on every set.

TUESDAY -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 11 @ 60kg

Lat Pulldown (Machine) 2 x 6 @ 66kg

Bicep Curl (Barbell) 2 x 10 @ 20kg
 Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg [mandatory rear delt]
 Dead Bug 3 x 10 -- do not skip

FOCUS: Pull from the elbows, not the hands, on Row and Lat Pulldown. Rear Delt Fly is non-negotiable -- this is the 5th consecutive week with zero or near-zero rear delt work.

WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust MANDATORY)

Squat (Barbell) 2 x 7 @ 70kg
 Leg Extension (Machine) 2 x 12 @ 50kg
 [current working weight as of 16 Sep; investigate the 27kg drop before returning to 77kg -- confirm machine pin position and depth]
 Seated Leg Curl (Machine) 2 x 9 @ 43kg
 Hip Thrust (Barbell) 2 x 10 @ 60kg
 [conservative start -- not logged in the 30-day window; drive through the heel, posterior pelvic tilt at the top, full glute contraction]
 Dead Bug 3 x 10 -- do not skip

FOCUS: Hip Thrust is MANDATORY for APT correction and has been absent for weeks. Start conservative at 60kg and ensure full range and glute activation before loading up.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 8 @ 45kg [shoulders primary]
 Incline Bench Press (BB) 2 x 10 @ 40kg
 [no recent data -- conservative start for chest variation]
 Lateral Raise (Dumbbell) 2 x 15 @ 10kg
 Triceps Pushdown 2 x 11 @ 26kg
 Dead Bug 3 x 10 -- do not skip

FOCUS: Pause at the top of each Lateral Raise -- one full second with arms parallel to the floor. Removes momentum and forces the medial delt to work through the full contraction.

FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Face Pull MANDATORY)

Bent Over Row (Barbell) 2 x 11 @ 60kg
 Face Pull (Cable) 2 x 15 @ 15kg
 [no prior data -- conservative start; pull to the nose, elbows flared, hold 1 second at contraction]
 Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg
 Bicep Curl (Barbell) 2 x 10 @ 20kg
 Dead Bug 3 x 10 -- do not skip

FOCUS: Face Pull is the single most important exercise this week. Rear delt work has been 0 of the 8-set weekly target. This session must have both Face Pull and Rear Delt Fly to begin closing the anterior/posterior imbalance and protect the rotator cuff.

SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg -- Hip Thrust MANDATORY)

Hip Thrust (Barbell) 2 x 10 @ 60kg [mandatory APT correction]
 Leg Press (Machine) 2 x 12 @ 60kg
 Deadlift / Rack Pull (BB) 2 x 8 @ 75kg

[Rack Pull preferred for Legs B; use deadlift if Rack Pull not available]

Dead Bug 3 x 10 -- do not skip

FOCUS: Two Hip Thrust sessions this week (Wed and Sat) is the minimum to begin APT correction. Do not skip Saturday -- Saturday sessions have been the most consistently missed day in the 30-day log.

+-----+		
Deload	: needed this week -- next due Week 22, ~18 Oct 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
