

30-Day Analysis Report

This week : 14 Jul to 21 Jul 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition - Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-07-20

WEEKLY TRAINING REPORT

Generated : 2026-07-21 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 14 Jul to 21 Jul 2026

1. THIS WEEK AT A GLANCE

Sessions : 4 of 5 target

Prior 3 weeks: 5, 4, 4 sessions (avg 4.3)

Overall score: 6/10 -- Good week -- one or two areas need attention (see below).

Biggest win : Seated Shoulder Press (Machine) -- 90kg x 8 reps (e1RM 114.0kg)

Biggest concern: Rear Delts -- 2 sets vs 8 target (6 sets short)

vs last week : Volume UP 7% (21,340 vs 19,987 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 15 Jul 2026 08:50 IST | 93 min

Type : Full Body B -- Wednesday

Volume : 6,160 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +4.0kg e1RM

Overhead Press (Barbell): 47.25kg x 6r x 3 sets (e1RM 56.7kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 77kg x 10r x 3 sets (e1RM 102.7kg) vs prior: +4.7kg e1RM

Bicep Curl (Dumbbell): 7.5kg x 12r x 3 sets (e1RM 10.5kg) vs prior: -2.8kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Friday 17 Jul 2026 08:55 IST | 70 min

Type : Full Body C -- Friday

Volume : 6,690 kg*reps | 14 sets

Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM

Deadlift (Barbell): 80kg x 7r x 3 sets (e1RM 98.7kg) vs prior: +2.7kg e1RM

Shrug (Barbell): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: +7.0kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 2 sets (e1RM 14.3kg) vs prior: +0.0kg e1RM

Crunch (Machine): 25kg x 12r x 3 sets (e1RM 35.0kg) vs prior: +14.0kg e1RM

Session 3: Saturday 18 Jul 2026 08:12 IST | 86 min

Type : Chest Shoulder-- Saturday

Volume : 6,570 kg*reps | 15 sets

Incline Chest Press (Machine): 30kg x 11r x 3 sets (e1RM 41.0kg) vs prior: +1.0kg e1RM

Seated Shoulder Press (Machine): 90kg x 8r x 3 sets (e1RM 114.0kg) vs prior: +3.0kg e1RM

Chest Fly (Machine): 65kg x 10r x 3 sets (e1RM 86.7kg) vs prior: +10.7kg e1RM

Bicep Curl (Machine): 25kg x 10r x 3 sets (e1RM 33.3kg) vs prior: +0.0kg e1RM

Skullcrusher (Dumbbell): 20kg x 12r x 3 sets (e1RM 28.0kg) vs prior: +7.0kg e1RM

Session 4: Monday 20 Jul 2026 08:36 IST | 16 min

Type : Full Body A -- Monday

Volume : 1,920 kg*reps | 7 sets

Squat (Barbell): 40kg x 6r x 3 sets (e1RM 48.0kg) vs prior: -45.3kg e1RM

Bench Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -26.9kg e1RM

Pull Up: 0kg x 6r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

4-WEEK VOLUME TREND

Wk -3 (23 Jun-30 Jun): [#####] 22,454 kg*reps 5 sess

Wk -2 (30 Jun-07 Jul): [#####....] 18,876 kg*reps 4 sess

Wk -1 (07 Jul-14 Jul): [#####....] 19,987 kg*reps 4 sess

This wk (14 Jul-21 Jul): [#####.] 21,340 kg*reps 4 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -26.9kg vs 13 Jul

Next session : 38.0kg x 10 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Jul

Next session : 72.5kg x 7 reps

[C] Deadlift (Barbell)

Best this week : 80kg x 7 reps (e1RM 98.7kg)

vs prior : UP +2.7kg vs 10 Jul

Next session : 82.5kg x 7 reps

[C] Overhead Press (Barbell)

Best this week : 47.25kg x 6 reps (e1RM 56.7kg)

vs prior : SAME as 08 Jul

Next session : 47.25kg x 6 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

*** FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : UP +4.0kg vs 08 Jul

Next session : 77.5kg x 8 reps

[C] Seated Shoulder Press (Machine)

Best this week : 90kg x 8 reps (e1RM 114.0kg)

vs prior : UP +3.0kg vs 11 Jul

Next session : 92.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 40kg x 6 reps (e1RM 48.0kg)

vs prior : DOWN -45.3kg vs 13 Jul

Next session : 38.0kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 7.5kg x 12 reps (e1RM 10.5kg)
vs prior : DOWN -2.8kg vs 08 Jul
Next session : 7.12kg x 12 reps

[I] Bicep Curl (Machine)
Best this week : 25kg x 10 reps (e1RM 33.3kg)
vs prior : SAME as 04 Jul
Next session : 25kg x 10 reps

[I] Chest Fly (Machine)
Best this week : 65kg x 10 reps (e1RM 86.7kg)
vs prior : UP +10.7kg vs 11 Jul
Next session : 66.25kg x 10 reps

[I] Crunch (Machine)
Best this week : 25kg x 12 reps (e1RM 35.0kg)
vs prior : UP +14.0kg vs 10 Jul
Next session : 26.25kg x 12 reps

[I] Incline Chest Press (Machine)
Best this week : 30kg x 11 reps (e1RM 41.0kg)
vs prior : UP +1.0kg vs 04 Jul
Next session : 31.25kg x 11 reps

[I] Leg Extension (Machine)
Best this week : 77kg x 10 reps (e1RM 102.7kg)
vs prior : UP +4.7kg vs 08 Jul
Next session : 78.25kg x 10 reps

[I] Rear Delt Reverse Fly (Dumbbell)
Best this week : 10kg x 13 reps (e1RM 14.3kg)
vs prior : SAME as 10 Jul
Next session : 10kg x 13 reps

[I] Shrug (Barbell)
Best this week : 70kg x 12 reps (e1RM 98.0kg)
vs prior : UP +7.0kg vs 10 Jul
Next session : 71.25kg x 12 reps

[I] Skullcrusher (Dumbbell)
Best this week : 20kg x 12 reps (e1RM 28.0kg)
vs prior : UP +7.0kg vs 11 Jul
Next session : 21.25kg x 12 reps

[I] Triceps Pushdown
Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
vs prior : SAME as 08 Jul
Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
* +-----+-----+-----+-----				
Chest	9	12	3	LOW
Back	10	14	4	CRITICAL
Shoulders	6	10	4	CRITICAL

Traps | 9 | 6 | -3 | OK

Rear Delts | 2 | 8 | 6 | CRITICAL

Biceps | 6 | 8 | 2 | LOW

Triceps | 3 | 8 | 5 | CRITICAL

Legs | 9 | 14 | 5 | CRITICAL

Core | 3 | 6 | 3 | LOW

Push sets: 18 | Pull sets: 27 | Ratio pull:push = 1.50 (OK -- balanced)

Rear delts: 2 sets this week (need 8+/week)

SHORT by 6 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 9 sets this week (need 6+/week)

OK.

Enough work this week: Traps

Short this week : Chest, Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 4 of 5 target

Wk -3 (23 Jun-30 Jun): 5 sessions

Wk -2 (30 Jun-07 Jul): 4 sessions

Wk -1 (07 Jul-14 Jul): 4 sessions

Time between sessions this week:

Wed 15 Jul 08:50 -> Fri 17 Jul 08:55: 48h

Fri 17 Jul 08:55 -> Sat 18 Jul 08:12: 23h [FLAG: only 23h rest, same muscles: other]

Sat 18 Jul 08:12 -> Mon 20 Jul 08:36: 48h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Fri 17 Jul + Sat 18 Jul (23h apart): overlap = other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle This wk Min Status

Chest 9 8 OK

Back 10 10 OK

Shoulders 6 8 AT RISK

Traps 9 4 OK

Rear Delts 2 6 AT RISK

Biceps 6 6 OK

Triceps 3 6 AT RISK

Legs 9 10 AT RISK

Core 3 4 AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Shoulders, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 2

Weeks since last deload : 2 (deload every 4 weeks)

Next deload : in 2 week(s), approx 04 Aug 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W9 (started 2026-05-24; 57 days elapsed, rounded up = 9 weeks)

Sessions this week: 4 of 6 target

Day | Expected | Detected | Status

* +-----+-----+-----+-----+

Tue 14 Jul | Pull A | No session | MISSED

Wed 15 Jul | Legs A | Full Body B (INFERRED: Mixed) | MISMATCH

Thu 16 Jul | Push B | No session | MISSED

Fri 17 Jul | Pull B | Full Body C (INFERRED: Pull) | PARTIAL MATCH

Sat 18 Jul | Legs B | Chest Shoulder (INFERRED: Push) | MISMATCH

Sun 19 Jul | REST | No session | OK

Mon 20 Jul | Push A | Full Body A (INFERRED: Mixed) | PARTIAL

Adherence: 17% (1 of 6 scheduled sessions matched the expected PPL type)

NOTE: Sessions are still titled "Full Body A/B/C" and "Chest Shoulder" -- not PPL session names. Tuesday (Pull A) and Thursday (Push B) are skipped every week.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions this week

(both Legs days replaced -- Legs A Wed replaced by

Full Body B; Legs B Sat replaced by Chest Shoulder)

MISSING all week -- APT correction absent.

Core stabiliser (all sessions): 0 of 4 sessions

(Machine Crunch on Fri is core volume, not a stabiliser;

no Dead Bug, Bird-Dog, or Plank logged this week)

Rear delt work in Pull sessions: 1 of 1 pull-type sessions (Fri 17 Jul: 2 sets

Rear Delt Reverse Fly) -- 2 sets total vs 8 target

Sessions over 60 min : 3 of 4

Wed 15 Jul: 93 min (33 min over limit)
 Fri 17 Jul: 70 min (10 min over limit)
 Sat 18 Jul: 86 min (26 min over limit)
 Mon 20 Jul: 16 min (session cut short -- not a full session)

LATERAL RAISE (V-TAPER KPI):

This week: NOT LOGGED | Prior week: 10.0kg x 14 reps (Mon 13 Jul) | Trend: DOWN

7. KEY INSIGHTS

Recovery at 44:

Friday 17 Jul to Saturday 18 Jul is the only session pair that breached the 48-hour minimum, with only 23 hours between them. Friday (Full Body C) loaded the rear delts, upper back, and traps. Saturday (Chest Shoulder) pressed the front deltoid at 90kg x 8 on the Seated Shoulder Press -- front and rear deltoids share the rotator cuff attachment. At 44, the shoulder joint needs 48-72 hours to re-stabilise micro-damaged rotator cuff fibres before reloading. The 23-hour gap added compressive load to tissue that had not yet recovered. All other pairs cleared 48 hours: Wed-to-Fri was exactly 48 hours, Sat-to-Mon was exactly 48 hours. One violation, not a pattern -- but the Fri-to-Sat pairing must be separated by at least one rest day going forward.

PPL adherence and programme age:

This week scored 17% PPL type-adherence (1 of 6 sessions matched the expected session type) and 67% session attendance (4 of 6 sessions completed). This is Week 9 of the PPL programme (started 2026-05-24), yet session titles remain "Full Body A", "Full Body B", "Full Body C", and "Chest Shoulder" -- not Push A / Pull A / Legs A / Push B / Pull B / Legs B. The PPL split has not been adopted in structure or naming. Tuesday (Pull A) and Thursday (Push B) are consistently skipped across all four weeks of the log. Legs B on Saturday is repeatedly replaced with chest-shoulder work. These are not occasional misses -- they are structural gaps that eliminate 2-3 sessions per week and leave the Pull A, Push B, and Legs B slots empty every cycle.

Corrective compliance:

Hip Thrust this week: 0 of 2 Legs sessions (both Legs days skipped or replaced -- APT correction completely absent this week). Anterior pelvic tilt that goes uncorrected concentrates compressive shear force on the lumbar spine during every squat, deadlift, and press. At 44, this translates directly to accelerating lower-back pain risk within weeks. Rear delt sets: 2 total this week vs the 8-per-week target -- 75% short. When the muscles that externally rotate and retract the shoulder (rear delts, rotator cuff) remain significantly weaker than the pressing muscles (front delts, pecs), the humeral head migrates anteriorly under load. A 90kg Seated Shoulder Press with undertrained rear delts means the joint is being loaded far beyond its structural support. At 44, this is the primary mechanism for rotator cuff impingement and subacromial bursitis. Core stabilisers (Dead Bug / Bird-Dog / Plank) appeared in 0 of 4 sessions -- T8-T12 kyphosis correction requires these every session without exception.

Lateral raise trend:

The Lateral Raise was not logged at all this week, dropping from 10kg x 14 reps (Mon 13 Jul) to zero -- trend: DOWN. This is the primary V-taper KPI. Love handles currently sit at lat-width level, which visually collapses the shoulder-to-waist ratio. The only way to widen that visual frame is to build lateral deltoid width, and Lateral Raises must progress week-on-week to drive hypertrophy. Dropping the exercise entirely for a full week breaks stimulus continuity and erases any accumulated adaptation signal. It belongs in every Push session -- non-negotiable.

Hard flags from session data:

Monday 20 Jul (Session 17): 16-minute session with severe load regression. Squat dropped from 80kg (Mon 13 Jul) to 40kg (-50%). Bench Press dropped from 65kg x 7 (Mon 13 Jul) to 40kg x 10 (-38% in working weight). Pull Up limited to 1 set, then session ended at 7 total sets in 16 minutes. This was not a genuine working session -- do not treat 40kg as the new baseline for either lift. The prior working weights (65kg bench, 80kg squat) remain the reference. Pull Up is always logged at 0kg -- weight-based progression is impossible; track reps explicitly or add a weighted vest once 3 x 10 bodyweight is achieved. Three of four sessions exceeded the 60-minute cap (93 min, 70 min, 86 min), indicating session density is too low -- too many rest pauses, not enough compound-to-isolation sequencing.

Overall verdict:

Volume was technically UP 7% vs last week (21,340 vs 19,987 kg*reps), but this masks structural deterioration. PPL adherence stands at 17%, Hip Thrust and core stabilisers were absent all week, the Lateral Raise V-taper KPI was skipped entirely, three sessions ran over 60 minutes, and Monday's session was effectively an aborted warmup. The volume gain came from a few solid compound sets mid-week -- it does not reflect programme health. Verdict: DECLINING

8. PLAN FOR NEXT WEEK

Programme week: W9 of PPL x2

IMPORTANT: Log sessions with correct PPL titles (Push A / Pull A / Legs A / Push B / Pull B / Legs B).

MONDAY 21 Jul -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 3 x 7 @ 65.0kg

(Base: 65kg x 7 from Mon 13 Jul. Monday 20 Jul's 40kg was an aborted session -- not a regression. Do not apply the drop-rule to a warmup-level log. Hold at 65kg and complete all 3 sets before any progression.)

Incline Chest Press (Machine) 3 x 11 @ 31.25kg (+1.25kg from 30kg x 11, Sat 18 Jul)

Chest Fly (Machine) 3 x 10 @ 66.25kg (+1.25kg from 65kg x 10, Sat 18 Jul)

Lateral Raise (Dumbbell) 3 x 14 @ 10.0kg (V-TAPER KPI -- must not be skipped again)

Overhead Press (Barbell) 3 x 6 @ 47.25kg (stalled 2 sessions; audit grip width and bar path before adding weight)

Triceps Pushdown 3 x 11 @ 27.2kg (hold; advance to 28.5kg only if all 3 sets clear 11 clean reps this session)

Dead Bug 3 x 10 -- do not skip (T8-T12 corrective, every session)

Key focus: Complete all 6 exercises within 60 min. Cut the last isolation set if time runs short -- never cut the corrective.

TUESDAY 22 Jul -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg (+2.5kg from 70kg x 7, Fri 17 Jul)

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg (+2.5kg from 75kg x 8, Wed 15 Jul)

Pull Up (Bodyweight) 3 x 6 @ 0kg (hold; target 3 x 8 before adding load)

Bicep Curl (Machine) 3 x 10 @ 26.25kg (+1.25kg from 25kg x 10, Sat 18 Jul)

Bicep Curl (Dumbbell) 3 x 10 @ 10.0kg (move from 7.5kg; expect harder -- drop to 8 reps if needed, build back up)

Dead Bug 3 x 10 -- do not skip

Key focus: Tuesday has been skipped every week for 9 weeks. Show up. Pull A is the session that covers the Back and Biceps deficit -- missing it is the primary reason both groups are SHORT every week.

WEDNESDAY 23 Jul -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 x 10 @ 40.0kg (MANDATORY APT corrective -- no log in 30 days; conservative start; drive hips fully through at the top of each rep)

Squat (Barbell) 3 x 5 @ 80.0kg (base: 80kg x 5 x 2 sets, Mon 13 Jul; target 3 full sets before any progression)

Leg Extension (Machine) 3 x 10 @ 78.25kg (+1.25kg from 77kg x 10, Wed 15 Jul)

Dead Bug 3 x 10 -- do not skip

Key focus: Hip Thrust goes first while lower back is fresh. APT will not correct without consistent Hip Thrusts -- this is the non-negotiable of the session.

THURSDAY 24 Jul -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg (+2.5kg from 90kg x 8, Sat 18 Jul; all sets hit 8 reps -- earned the progression)

Lateral Raise (Dumbbell) 3 x 14 @ 10.0kg (V-TAPER KPI -- second push session of week)

Overhead Press (Barbell) 3 x 6 @ 47.25kg (hold; stalled two sessions in a row)

Incline Chest Press (Machine) 3 x 11 @ 31.25kg (+1.25kg -- chest variation for Push B)

Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg (+1.25kg from 20kg x 12, Sat 18 Jul)

Dead Bug 3 x 10 -- do not skip

Key focus: Thursday is currently always skipped. Show up. The 92.5kg Shoulder Press is a potential personal best -- this session has the biggest single strength gain of the week.

FRIDAY 25 Jul -- Pull B (Back + Rear Delts + Biceps)

Deadlift (Barbell) 3 x 7 @ 82.5kg (+2.5kg from 80kg x 7, Fri 17 Jul)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg (match Pull A weight; vary grip to supinated for a different back stimulus)

Rear Delt Reverse Fly (Dumbbell) 3 x 13 @ 10.0kg (MANDATORY -- add the 3rd set; Fri 17 Jul had only 2; rear delt target is 8 sets/week)

Shrug (Barbell) 3 x 12 @ 70.0kg (hold -- sets 2-3 dropped to 11 reps Fri 17; rep collapse: do not progress until all 3 sets hit 12 reps cleanly)

Bicep Curl (Machine) 3 x 10 @ 26.25kg (+1.25kg from 25kg x 10)

Dead Bug 3 x 10 -- do not skip

Key focus: Rear Delt Reverse Fly is non-negotiable. 2 rear delt sets/week against the 8-target means the front-to-rear shoulder ratio is critically imbalanced for a 44-year-old pressing 90kg overhead. Three sets today contribute to reducing that imbalance.

SATURDAY 26 Jul -- Legs B (Glutes, Hamstrings, Single-Leg)

Hip Thrust (Barbell) 3 x 10 @ 40.0kg (MANDATORY APT corrective -- same start as Legs A; increase to 50kg if Wed goes well)

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg (+2.5kg from 75kg x 8, Wed 15 Jul; primary hamstring/glute driver for Legs B)

Leg Extension (Machine) 3 x 10 @ 78.25kg (+1.25kg from 77kg x 10)

Dead Bug 3 x 10 -- do not skip

Key focus: Saturday has been replaced by Chest Shoulder three weeks running. Legs B is on the schedule -- do not swap it. The Hip Thrust is the single most important movement of the week for posture and APT correction.

```
+-----+
| Deload : not yet -- next due Week 11, ~04 Aug 2026 |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
+-----+
```
