

30-Day Analysis Report

This week : 20 Aug to 27 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-26

WEEKLY TRAINING REPORT

Generated : 2026-08-27 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 20 Aug to 27 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 2, 2, 2 sessions (avg 2.0)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)

Biggest concern: Back -- 3 sets vs 14 target (11 sets short)

vs last week : Volume DOWN 2% (9,332 vs 9,508 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 24 Aug 2026 10:40 IST | 28 min

Type : Full Body A -- Monday

Volume : 3,450 kg*reps | 13 sets

Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: +0.0kg e1RM

Bench Press (Barbell): 60kg x 8r x 3 sets (e1RM 76.0kg) vs prior: +4.0kg e1RM

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 15r x 3 sets (e1RM 15.0kg) vs prior: +0.3kg e1RM

Session 2: Wednesday 26 Aug 2026 08:24 IST | 57 min

Type : Full Body B -- Wednesday

Volume : 5,882 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +9.1kg e1RM

Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: +0.0kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.7kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (30 Jul-06 Aug): [#####] 8,973 kg*reps 2 sess

Wk -2 (06 Aug-13 Aug): [#####] 8,607 kg*reps 2 sess

Wk -1 (13 Aug-20 Aug): [#####] 9,508 kg*reps 2 sess

This wk (20 Aug-27 Aug): [#####] 9,332 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 8 reps (e1RM 76.0kg)
 vs prior : UP +4.0kg vs 03 Aug
 Next session : 62.5kg x 8 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)
 vs prior : SAME as 12 Aug
 Next session : 45kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)
 vs prior : First time in 30-day log
 Next session : 0kg x 6 reps
 * FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 6 reps (e1RM 84.0kg)
 vs prior : SAME as 10 Aug
 Next session : 70kg x 6 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)
 vs prior : UP +0.7kg vs 12 Aug
 Next session : 21.25kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 15 reps (e1RM 15.0kg)
 vs prior : SAME as 03 Aug
 Next session : 11.25kg x 15 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 9 reps (e1RM 100.1kg)
 vs prior : SAME as 12 Aug
 Next session : 77kg x 9 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)
 vs prior : UP +9.1kg vs 19 Aug
 Next session : 44.25kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 05 Aug
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		3		14		11		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		0		6		6		CRITICAL

Rear Delts		0		8		8		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 9 | Ratio pull:push = 0.75 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (30 Jul-06 Aug): 2 sessions

Wk -2 (06 Aug-13 Aug): 2 sessions

Wk -1 (13 Aug-20 Aug): 2 sessions

Time between sessions this week:

Mon 24 Aug 10:40 -> Wed 26 Aug 08:24: 46h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Mon 24 Aug + Wed 26 Aug (46h apart): overlap = legs, shoulders

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus, and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK

Back	3	10	AT RISK
Shoulders	6	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	10	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Core
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.
Active training weeks logged : 7
Weeks since last deload : 7 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.
Deload weeks let joints and connective tissue recover.
You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W14 (started 2026-05-24; 94 days elapsed = 14 weeks rounded up)
Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
*	+-----+	+-----+	

Mon 24 Aug | Push A | Full Body A (INFERRED: mixed) | MISMATCH -- not PPL format
Wed 26 Aug | Legs A | Full Body B (INFERRED: mixed) | MISMATCH -- not PPL format

Note: Both sessions were logged as "Full Body A/B" titles -- no PPL keyword found.
Exercises in Session 7: Squat (Legs), Bench Press (Push), Pull Up (Pull), Lateral Raise (Push).
Exercises in Session 8: OHP (Push), Leg Curl (Legs), Leg Extension (Legs), Bicep Curl (Pull),
Triceps Pushdown (Push).
Neither session maps cleanly to a single PPL type. All 8 sessions in the 30-day log are "Full Body"
format -- PPL programme not being executed.
Adherence: 0% (0 of 2 sessions matched correct PPL type)
Completion: 33% (2 of 6 scheduled sessions completed this week)
Missed days: Tue 25 Aug (Pull A), Thu-Sat 20-22 Aug (Push B, Pull B, Legs B) -- 4 PPL sessions
missed

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions -- MISSING (no Legs sessions done; Hip
Thrust not performed at all this week; APT correction not happening)
Core stabiliser (all sessions): 0 of 2 sessions -- MISSING (no dead bug, bird-dog, or plank in any
session; T8-T12 kyphosis protocol not followed)

Rear delt work in Pull sessions: 0 of 0 Pull sessions -- MISSING (no rear delt exercises in any session this week)

Sessions over 60 min: None (Mon 24 Aug: 28 min; Wed 26 Aug: 57 min -- both within target)

LATERAL RAISE (V-TAPER KPI):

This week: 10kg x 15 reps | Prior week (13-19 Aug): not performed | vs last done (Mon 10 Aug): 10kg x 14 reps | Trend: UP (reps 14->15; weight FLAT at 10kg for 3+ weeks -- weight progression stalled)

7. KEY INSIGHTS

RECOVERY AT 44:

This week's only session pair was Mon 24 Aug (10:40 IST) to Wed 26 Aug (08:24 IST) -- a gap of 45.7 hours (1 day 21 h 44 min). This is 2.3 hours short of the 48h minimum. Both sessions hit shoulders (Lateral Raise on Monday, OHP on both) and legs (Squat on Monday, Leg Curl + Leg Extension on Wednesday). Repeating these muscles before 48h recovery adds fatigue rather than stimulus and raises injury risk at 44. One other breach exists in the 30-day log: Wed 12 Aug to Fri 14 Aug was 47.7h -- barely under. Sessions separated by 5+ days (e.g. Fri 14 Aug to Wed 19 Aug) were fine. Target: start all sessions at 6 PM IST so a Mon/Wed split runs Mon 18:00 to Wed 18:00 = exactly 48h.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 14 of a PPL x2 programme (started 2026-05-24). Adherence to the PPL split is 0%

* every single session logged across 30 days is "Full Body A/B/C", not Push/Pull/Legs. Only Monday and Wednesday slots are being used consistently; Thursday, Friday, and Saturday are systematically absent. At Week 14, the programme structure should now be well-established. Continuing full-body sessions defeats the periodization design of PPL -- muscle groups are not getting sufficient dedicated volume per session for hypertrophy, and the push/pull balance worsens (pull:push ratio 0.75 this week vs 0.80 target).

CORRECTIVE COMPLIANCE:

Hip Thrust: 0 sessions out of any Legs sessions this week (no dedicated Legs sessions were done). Across 30 days, Hip Thrust has NEVER appeared in the log. Anterior pelvic tilt goes uncorrected for 14 weeks. The Hip Thrust is mandatory every Legs day per the programme.

Rear delts: 0 sets this week vs 8-set target (8 sets short). In plain English: the front of the shoulder (anterior deltoid) gets trained every Push session via OHP and Bench, but the rear of the shoulder (posterior deltoid) gets nothing. At 44, when the front shoulder muscles stay significantly stronger than the rear, the humeral head is pulled forward in the socket during pressing movements, pinching the supraspinatus tendon and biceps tendon against the acromion -- this is rotator cuff impingement syndrome, which at this age progresses to tendinopathy or a partial tear within months of neglect. Add Face Pulls or Rear Delt Flies immediately.

Core stabiliser: 0 of 2 sessions. Dead Bug or Bird-Dog must appear in every session to address lower thoracic kyphosis at T8-T12. This has been consistently absent.

LATERAL RAISE TREND:

The V-taper KPI is moving UP in reps (14 to 15) but the weight has been flat at 10kg since at least 3 August -- over 3 weeks. The next progression is 11.25kg. This matters specifically for Ganesh because the love handles sit at lat-width level, collapsing the visual ratio between shoulders and waist. Lateral deltoid width from lateral raises is the fastest-acting tool to widen the shoulder silhouette and restore the V-shape. A stalled weight means no new stimulus for deltoid growth. With 15 reps achieved cleanly this week, move to 11.25kg next session.

HARD FLAGS:

1. Recovery breach: Mon 24 Aug to Wed 26 Aug = 45.7h gap (2.3h short of 48h minimum) -- shoulders and legs overlap between sessions.
2. 0kg logged on Pull Ups across all 3 sessions (9 sets) -- progress cannot be tracked; this appears to be an entry error. Bodyweight should be logged (approx 87kg or current weight).
3. Hip Thrust absent for 14 consecutive weeks -- APT correction protocol never executed.
4. Core corrective (Dead Bug / Bird-Dog) absent in every session across the entire log -- T8-T12 kyphosis protocol completely ignored.
5. Deload overdue by 10 weeks: 7 weeks since last tracked deload vs 4-week target. Connective tissue and joints accumulate fatigue that muscles do not signal -- deload NOW.
6. Lateral Raise weight stalled at 10kg for 3+ weeks -- primary V-taper KPI not progressing.

OVERALL VERDICT: HOLDING

Volume DOWN 2% vs last week (9,332 vs 9,508 kg*reps). Session count identical: 2/week for 4 straight weeks. No improvement in corrective compliance, PPL adherence, or recovery quality versus prior weeks. No worsening either. A flat bottom -- the programme is being maintained at a minimal level but key structural improvements (PPL execution, correctives, deload) remain unaddressed at Week 14.

8. PLAN FOR NEXT WEEK

Programme week: W15 (Week 15 of PPL x2 -- DELOAD WEEK)

- * DELOAD IS MANDATORY THIS WEEK: 2 sets per exercise, hold all weights ***
- * Deload lets joints, tendons, and the central nervous system recover. ***
- * You will return stronger in Week 16. ***

MONDAY 27 Aug -- Push A (Chest + Shoulders + Triceps) [DELOAD]

Bench Press (Barbell)	2 sets x 8 reps @ 60kg
Overhead Press (Barbell)	2 sets x 7 reps @ 45kg
Lateral Raise (Dumbbell)	2 sets x 15 reps @ 10kg [try 11.25kg if 15 reps felt easy last session]
Triceps Pushdown	2 sets x 11 reps @ 27.2kg
Face Pull (Cable/Band)	2 sets x 12 reps @ ~10kg [NEW -- rear delt deficit, rotator cuff protection]

MANDATORY: Dead Bug 3 x 10 -- do not skip (T8-T12 kyphosis correction, every Push session)

Key focus: Deload discipline -- reduce to 2 sets; do not push to add weight. The goal is tissue recovery, not performance. Face Pull form: elbows at shoulder height, pull to ears.

TUESDAY 28 Aug -- Pull A (Back + Biceps) [DELOAD]

Pull Up (Bodyweight) 2 sets x 6 reps @ bodyweight [LOG actual bodyweight, not 0kg]

Bent Over Row (Barbell) 2 sets x 7 reps @ 70kg

Bicep Curl (Barbell) 2 sets x 10 reps @ 20kg

Rear Delt Reverse Fly (DB) 2 sets x 13 reps @ 10kg [MANDATORY -- rear delt structural need]

MANDATORY: Bird-Dog 3 x 10 each side -- do not skip

Key focus: Pull-ups must have actual body weight entered in Hevy -- this is the only compound back movement without external load and 0kg makes the e1RM meaningless.

WEDNESDAY 29 Aug -- Legs A (Quads + Hamstrings + Glutes) [DELOAD]

Hip Thrust (Barbell) 2 sets x 10 reps @ 60kg [MANDATORY APT correction -- first time logged; start at 60kg]

Squat (Barbell) 2 sets x 6 reps @ 70kg

Leg Extension (Machine) 2 sets x 9 reps @ 77kg

Seated Leg Curl (Machine) 2 sets x 9 reps @ 43kg

MANDATORY: Dead Bug 3 x 10 -- do not skip

Key focus: Hip Thrust form is the entire point of this exercise -- drive through heels, squeeze glutes hard at the top, do NOT hyperextend the lower back. 60kg is conservative; increase to 80kg once form is confirmed over 2-3 sessions.

THURSDAY 30 Aug -- Push B (Shoulders primary + Chest variation + Triceps) [DELOAD]

Overhead Press (Barbell) 2 sets x 7 reps @ 45kg

Bench Press (Barbell) 2 sets x 8 reps @ 60kg

Lateral Raise (Dumbbell) 2 sets x 15 reps @ 10kg [V-taper KPI]

Triceps Pushdown 2 sets x 11 reps @ 27.2kg

Face Pull (Cable/Band) 2 sets x 12 reps @ 10kg [MANDATORY -- rear delt protection]

MANDATORY: Bird-Dog 3 x 10 each side -- do not skip

Key focus: Second Push session of the week -- same weights as Monday, same 2 sets. The deload works only if intensity is genuinely reduced; resist the urge to add a set.

FRIDAY 31 Aug -- Pull B (Back + Rear Delts + Biceps) [DELOAD]

Bent Over Row (Barbell) 2 sets x 7 reps @ 70kg

Lat Pulldown (Machine) 2 sets x 6 reps @ 66kg

Rear Delt Reverse Fly (DB) 2 sets x 13 reps @ 10kg [MANDATORY -- front/rear delt ratio]

Face Pull (Cable/Band) 2 sets x 12 reps @ 10kg [MANDATORY -- rotator cuff health]

Bicep Curl (Barbell) 2 sets x 10 reps @ 20kg

MANDATORY: Dead Bug 3 x 10 -- do not skip

Key focus: Rear delt is the #1 structural priority at 44. Get both Rear Delt Fly AND Face Pull in this session. If front delts stay disproportionately stronger, rotator cuff impingement risk rises on every future OHP and Bench set.

SATURDAY 1 Sep -- Legs B (Glutes + Hamstrings + Single-Leg + Rack Pull) [DELOAD]

Hip Thrust (Barbell) 2 sets x 10 reps @ 60kg [MANDATORY APT correction]

Romanian Deadlift (Barbell) 2 sets x 8 reps @ 75kg

Leg Press (Machine) 2 sets x 12 reps @ 50kg

Seated Leg Curl (Machine) 2 sets x 9 reps @ 43kg

MANDATORY: Bird-Dog 3 x 10 each side -- do not skip
Key focus: Second Hip Thrust session this week -- APT requires consistent stimulus, not occasional. Two Legs days with Hip Thrust per week is the minimum to see postural change.

+-----+		
Deload	: needed this week -- next full load Week 16, ~7 Sep	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
