

30-Day Analysis Report

This week : 03 Aug to 10 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-09

WEEKLY TRAINING REPORT

Generated : 2026-08-10 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 03 Aug to 10 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 5, 1, 0 sessions (avg 2.0)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)

Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)

vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min

Type : Full Body A -- Monday

Volume : 3,000 kg*reps | 13 sets

Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM

Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]

Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]

Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 05 Aug 2026 08:54 IST | 51 min

Type : Full Body B -- Wednesday

Volume : 5,973 kg*reps | 15 sets

Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM

Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]

Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]

Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +2.8kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (13 Jul-20 Jul): [#####] 27,425 kg*reps 5 sess

Wk -2 (20 Jul-27 Jul): [#.....] 1,920 kg*reps 1 sess

Wk -1 (27 Jul-03 Aug): [.....] 0 kg*reps 0 sess

This wk (03 Aug-10 Aug): [#####.....] 8,973 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

* FLAGS: rep collapse (10->6)

[C] Overhead Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -3.4kg vs 15 Jul

Next session : 38.0kg x 10 reps

* FLAGS: rep collapse (10->4)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : SAME as 15 Jul

Next session : 75kg x 8 reps

[C] Squat (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -21.3kg vs 13 Jul

Next session : 57.0kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : UP +2.8kg vs 15 Jul

Next session : 11.25kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : DOWN -4.7kg vs 15 Jul

Next session : 66.5kg x 12 reps

* FLAGS: rep collapse (12->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 15 Jul

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		3		6		3		LOW
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (13 Jul-20 Jul): 5 sessions

Wk -2 (20 Jul-27 Jul): 1 sessions

Wk -1 (27 Jul-03 Aug): 0 sessions

Time between sessions this week:

Mon 03 Aug 08:25 -> Wed 05 Aug 08:54: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Core stabiliser (all sessions): 0 of 2 sessions -- no dead bug, bird-dog, or plank logged. T8-T12 kyphosis correction not occurring. FLAG: MISSING.

Rear delt work in Pull sess : 0 of 0 pull sessions -- 0 rear delt sets logged this week vs 8-set weekly target. FLAG: CRITICAL -- 8 sets short.

Sessions over 60 min : 1 of 2 -- Mon 03 Aug ran 82 min (22 min over)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps | Prior week (Jul 27-Aug 2): no sessions
Last logged: 10kg x 14 reps (Mon 13 Jul -- 3 weeks prior, same result)
Trend: SAME -- flat for 3+ weeks. V-taper KPI stagnant.

7. KEY INSIGHTS

RECOVERY AT 44:

This week had only two sessions -- Mon 03 Aug (08:25) and Wed 05 Aug (08:54). The gap between them was exactly 48h, which meets the minimum 48h recovery floor for same-muscle overlap. However, both sessions were mixed full-body sessions, meaning chest, back, and legs all appeared in both. Technically the 48h gap is just barely sufficient, but only because the load was split across Full Body A and Full Body B formats. Had Ganesh trained the same compound lifts back-to-back with less than 48h, the rotator cuff and knee connective tissue would be at risk. At 44, tendons and ligaments heal 30-40% slower than at 25. The PPL split solves this by design: each muscle group gets 72h+ rest between sessions. The current Full Body format with only 48h separation is the minimum acceptable, not the target.

PPL ADHERENCE -- W11 OF PROGRAMME:

This is Week 11 of the PPL x2 programme (started 2026-05-24), and the prescribed split still has not been adopted. Both sessions this week used "Full Body" labels with no PPL structure. Session completion is 2 of 6 (33%), and type adherence is 0% -- neither session matched its scheduled PPL day. The missed pattern is clear: Tuesday, Thursday, Friday, and Saturday sessions are consistently not happening. Only Monday and (sometimes) Wednesday see training. This suggests gym access or energy is highest earlier in the week, with the second half of the week consistently lost. Without the back half (Pull B and Legs B), rear delts, glutes, and hamstrings are chronically undertrained. Week 11 with a 33% session rate means roughly 40 planned sessions have been missed since programme start -- a substantial structural gap in the body recomposition plan.

CORRECTIVE COMPLIANCE:

Hip Thrust (APT): 0 of 0 dedicated legs sessions this week -- but zero hip thrusts logged in any session format at all. Anterior pelvic tilt is not being corrected. Over time, untreated APT causes lower-back overextension during squats and deadlifts, increasing disc compression risk. At 87kg with body recomp as the goal, hip thrust is non-negotiable in every legs session.

Rear Delts (shoulder health): 0 sets this week vs the 8-set weekly minimum. This is critical at 44. When front shoulder muscles (anterior and lateral delts) are significantly stronger than rear delts, the shoulder joint is pulled forward in the socket. This impingement position narrows the subacromial space -- the small gap where the rotator cuff tendons pass. Under load (bench press, overhead press), those tendons grind against the acromion. The result is rotator cuff tendinopathy and eventually a partial tear, which at 44 takes 6-12 months to recover from. Face pulls and rear delt flies are injury prevention, not optional accessory work.

Core stabiliser (T8-T12 kyphosis): 0 of 2 sessions had dead bug, bird-dog, or plank. The lower thoracic kyphosis (T8-T12) is a posture issue that worsens under load without active stabilisation. Dead Bug and Bird-Dog train the deep spinal stabilisers (multifidus, transverse abdominis) that hold the lumbar-thoracic junction neutral during heavy compound lifts. Without this, the kyphosis worsens under barbell squats and deadlifts.

LATERAL RAISE -- V-TAPER KPI:

Flat at 10kg x 14 reps since July 13 -- three weeks of zero progression. This matters specifically for Ganesh because love handles currently sit at the same horizontal level as the lat-width, visually collapsing the waist-to-shoulder ratio. Wider delts are the fastest route to an improved V-taper on a body recomp -- they can show progress in 4-6 weeks of consistent loading. At 10kg for 14 reps with no progression, the delts are not being challenged. The target is to reach 15kg x 12 reps over the next 4-6 weeks (+1.25kg per week when all sets are hit). This is the number-one visual KPI to track.

HARD FLAGS:

1. BENCH PRESS rep collapse: 40x10, 50x10, 60x6 -- the pyramid format masks the collapse. At 60kg, reps dropped from 10 (at lighter loads) to 6. Prior best was 65kg x 7 (Jul 13). This session was -5kg and -1 rep. Likely cause: 14-day gap since last bench session (Jul 20 to Aug 3).
2. OVERHEAD PRESS rep collapse: 40x10 (fine), then 45x5, 45x4. Jumped 2.5kg past the working weight and fell apart. Prior best was 47.25x6 (Jul 15). Losing strength after layoff weeks.
3. LEG EXTENSION rep collapse: 70x12, 70x11, 70x8. Three-set decline from 12 to 8 reps indicates accumulated fatigue within the session, possibly because session was already 60+ minutes at this point.
4. MON 03 AUG DURATION: 82 minutes -- 22 minutes over the 60-minute cap. Long sessions at 44 elevate cortisol, which antagonises testosterone and

muscle protein synthesis. Warm-up and correctives must be trimmed to stay under 60 minutes.

5. PULL UP logged at 0kg: Correct for bodyweight, but the e1RM reads 0.0kg. Hevy cannot track bodyweight-only strength progress accurately. Consider logging bodyweight (87kg) as the load for pull ups so trend is trackable.

OVERALL VERDICT: IMPROVING

Volume went from 0 sessions (Wk -1) to 2 sessions this week. That is better than the prior two weeks (1 session, 0 sessions). However, 2 of 6 sessions is still critically low -- worse than the 5-session peak from Wk -3. No correctives, no PPL structure, no rear delt work, and one over-time session are significant gaps. The direction is improving; the distance to the target remains very large.

8. PLAN FOR NEXT WEEK

Programme week: W12 (Week 12 of PPL x2 -- first week running the full split)

Note: A deload was flagged for W11 (5 active training weeks). Since W11 only produced 2 informal sessions rather than a structured deload, treat the first 2 sessions of W12 at reduced volume (2 working sets each, same weights), then build to 3 sets from Wednesday onward.

MONDAY -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 57kg

[rep collapse last week; 5% drop from 60kg; rebuild to 3 sets at 57kg]

Incline Chest Press (Machine) 2 x 10 @ 30kg

[last logged Jul 18 at 30x11; light week, maintain load]

Lateral Raise (Dumbbell) 2 x 12 @ 11.25kg

[V-TAPER KPI -- upgrade from 10kg; all sets hit 14 reps last week]

Triceps Pushdown 2 x 11 @ 28.5kg

[+1.25kg from 27.2kg; all sets hit 11 reps this week]

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: Keep total session to 50 min. Rest 2 min between compound sets, 90 sec between isolation sets. Do not attempt 60kg on bench this week.

TUESDAY -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 7 @ 72.5kg

[Jul 17 = 70x7 all sets hit; +2.5kg compound progression]

Pull Up (Bodyweight) 2 x 6 @ bodyweight

[maintain; log bodyweight (87kg) as load for tracking e1RM correctly]

Bicep Curl (Dumbbell) 2 x 10 @ 11.25kg

[+1.25kg from 10kg; all sets hit 10 reps this week]

Rear Delt Reverse Fly 2 x 12 @ 10kg

[mandatory rear delt -- been absent for >2 weeks; start conservative]

Bird-Dog 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: This is the first rear delt session in weeks. Keep the fly strict -- no momentum, 2-second hold at the top. Shoulder protection takes priority.

WEDNESDAY -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust MANDATORY)

Squat (Barbell) 3 x 8 @ 60kg

[held 60x6 consistently last week; push for 8 reps at same weight]

Hip Thrust (Barbell) 3 x 10 @ 60kg

[MANDATORY for APT -- no prior data; conservative start]

Leg Extension (Machine) 3 x 12 @ 66.5kg

[rep collapse 12->8 last week; 5% drop from 70kg]

Bird-Dog 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: Hip Thrust is the priority -- do not skip to save time. Set up the barbell on the floor and use a bench for support. If gym is busy, use the hip thrust machine at equivalent load. APT correction starts here.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 10 @ 38kg

[rep collapse 10->4 at 45kg last week; 5% drop from first stable working weight of 40kg; rebuild to 40kg when all 3 sets hit 10]

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg

[Jul 18 = 90x8 all sets hit; +2.5kg compound progression]

Chest Fly (Machine) 3 x 10 @ 66.25kg

[Jul 18 = 65x10 all sets hit; +1.25kg isolation progression]

Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg

[Jul 18 = 20x12 all sets hit; +1.25kg isolation progression]

Dead Bug 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: OHP is the diagnostic lift for shoulder strength. At 38kg target all 3 sets at 10 reps. Do not jump weight until three consecutive sessions hold 3 x 10 clean.

FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Face Pull MANDATORY)

Deadlift (Barbell) 3 x 7 @ 82.5kg

[Jul 17 = 80x7 all sets hit; +2.5kg compound progression]

Face Pull (Cable) 3 x 15 @ 15kg

[no prior data; conservative start; MANDATORY rear delt/external rotation]

Rear Delt Reverse Fly 3 x 13 @ 10kg

[second rear delt session this week; cumulative rear delt sets: 5+]

Bicep Curl (Machine) 3 x 10 @ 26.25kg

[Jul 18 = 25x10 all sets hit; +1.25kg isolation progression]

Bird-Dog 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: Face Pull is the highest priority exercise this session. External rotation at 44 directly protects the rotator cuff under all pressing loads. Squeeze shoulder blades at end of each rep. 2-second hold.

SATURDAY -- Legs B (Glutes + Hamstrings + Single-Leg + Trap work)

Hip Thrust (Barbell) 3 x 10 @ 60kg

[MANDATORY APT -- same load as Legs A until form is established]

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg

[this week = 75x8 all sets hit; +2.5kg compound progression]

Shrug (Barbell) 3 x 12 @ 70kg

[Jul 17 = 70x12,11,11; not all sets hit 12; hold weight, build reps]

Single-Leg Romanian Deadlift 3 x 10 per leg @ 15kg

[no prior log; introduce as single-leg posterior chain corrective]

Bird-Dog 3 x 10 -- DO NOT SKIP (T8-T12 corrective)

Focus: Both legs sessions this week must include Hip Thrust. Saturday is the last session of the week -- do not skip. Legs B without a hip thrust defeats the APT correction programme.

+-----+

Deload	: needed this week (W11) -- W11 not properly deloaded	
	(only 2 full-weight sessions). If fatigue accumulates	
	mid-W12, drop to 2 sets/exercise for that session.	
	Next scheduled deload: Week 15, ~06 Sep 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	

+-----+
