

30-Day Analysis Report

This week : 01 Aug to 08 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-08

WEEKLY TRAINING REPORT

Generated : 2026-08-08 05:01 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 01 Aug to 08 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target
Prior 3 weeks: 5, 2, 0 sessions (avg 2.3)
Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.
Biggest win : Leg Extension (Machine) -- 70kg x 12 reps (e1RM 98.0kg)
Biggest concern: Chest -- 3 sets vs 12 target (9 sets short)
vs last week : No prior week data in 30-day log

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 03 Aug 2026 08:25 IST | 82 min
Type : Full Body A -- Monday
Volume : 3,000 kg*reps | 13 sets
Squat (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg) vs prior: -21.3kg e1RM
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: -8.2kg e1RM [FLAG: rep collapse 10->6]
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM

Session 2: Wednesday 05 Aug 2026 08:54 IST | 51 min
Type : Full Body B -- Wednesday
Volume : 5,973 kg*reps | 15 sets
Romanian Deadlift (Barbell): 75kg x 8r x 3 sets (e1RM 95.0kg) vs prior: +0.0kg e1RM
Overhead Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -3.4kg e1RM [FLAG: rep collapse 10->4]
Leg Extension (Machine): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: -4.7kg e1RM [FLAG: rep collapse 12->8]
Bicep Curl (Dumbbell): 10kg x 10r x 3 sets (e1RM 13.3kg) vs prior: +0.0kg e1RM
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (11 Jul-18 Jul): [#####] 26,375 kg*reps 5 sess
Wk -2 (18 Jul-25 Jul): [#####.....] 8,490 kg*reps 2 sess
Wk -1 (25 Jul-01 Aug): [.....] 0 kg*reps 0 sess
This wk (01 Aug-08 Aug): [#####.....] 8,973 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -8.2kg vs 13 Jul

Next session : 57.0kg x 6 reps

* FLAGS: rep collapse (10->6)

[C] Overhead Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -3.4kg vs 08 Jul

Next session : 38.0kg x 10 reps

* FLAGS: rep collapse (10->4)

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 75kg x 8 reps (e1RM 95.0kg)

vs prior : SAME as 15 Jul

Next session : 75kg x 8 reps

[C] Squat (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : DOWN -21.3kg vs 13 Jul

Next session : 57.0kg x 6 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 10 reps (e1RM 13.3kg)

vs prior : SAME as 08 Jul

Next session : 10kg x 10 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)

vs prior : SAME as 13 Jul

Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 70kg x 12 reps (e1RM 98.0kg)

vs prior : DOWN -4.7kg vs 15 Jul

Next session : 66.5kg x 12 reps

* FLAGS: rep collapse (12->8)

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)

vs prior : SAME as 08 Jul

Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		6		14		8		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		3		6		3		LOW
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 12 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 3 sets this week (need 6+/week)

SHORT by 3 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (11 Jul-18 Jul): 5 sessions

Wk -2 (18 Jul-25 Jul): 2 sessions

Wk -1 (25 Jul-01 Aug): 0 sessions

Time between sessions this week:

Mon 03 Aug 08:25 -> Wed 05 Aug 08:54: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	6	10	AT RISK
Shoulders	6	8	AT RISK
Traps	3	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	3	6	AT RISK
Legs	10	10	OK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 4

Weeks since last deload : 4 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W11 (started 2026-05-24; 76 days elapsed, rounded up = 11 weeks)

Sessions this week: 2 of 6 target

Day	Expected	Detected	Status
* +-----+			

Mon 03 Aug | Push A | Full Body A (INFERRED: Mixed) | MISS

Wed 05 Aug | Legs A | Full Body B (INFERRED: Mixed) | MISS

Adherence: 0% (0 of 2 sessions on correct day type)

NOTE: Ganesh is following the old Full Body split, not the PPL programme.

Sessions for Tue 04 Aug (Pull A), Thu 06 Aug (Push B), Fri 07 Aug (Pull B), and Sat 01 Aug (Legs B) were completely missed.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : N/A -- no dedicated Legs sessions this week.

Both Full Body sessions included leg exercises (Squat, Leg Extension, RDL) but neither contained Hip Thrust. MISSING from all leg-inclusive sessions.

Core stabiliser (all sessions): 0 of 2 sessions -- no Dead Bug, Bird-Dog, or Plank.

T8-T12 kyphosis corrective protocol absent for the entire week.

Rear delt work in Pull sessions: 0 Pull sessions this week (programme not followed).

No rear delt exercises (Face Pull, Rear Delt Fly) in any session.

Weekly rear delt tally: 0 sets vs 8-set target.

Sessions over 60 min: Mon 03 Aug -- 82 min (OVER by 22 min; target is 60 min max)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 14 reps | Prior week: no data (0 sessions Jul 25-Aug 1)

Last recorded before this week: 10kg x 14 reps (Mon 13 Jul -- 3 weeks ago)

Trend: SAME -- stuck at 10kg x 14 for at least 3 weeks. No V-taper progression.

7. KEY INSIGHTS

RECOVERY AT 44:

The week produced exactly one same-muscle pair to assess. Monday Aug 3 (08:25 IST) and Wednesday Aug 5 (08:54 IST) were separated by precisely 48 hours -- the absolute minimum required for muscle recovery at 44. Both sessions hit the same major groups (squat and bench Monday; RDL, OHP, and leg extension Wednesday), meaning back, legs, chest, and shoulders each had exactly 48h of recovery. The floor was cleared, but by one hour. No violations, but no buffer either. Going forward, avoid scheduling the same movement pattern on consecutive days.

PPL ADHERENCE AND PROGRAMME AGE:

This is W11 of the PPL x2 programme (started 2026-05-24). Adherence this week is 0%

* both sessions used the old Full Body template (Full Body A on Monday, Full Body B on Wednesday) rather than the PPL split. Four sessions were missed entirely: Tuesday Pull A, Thursday Push B, Friday Pull B, and Saturday Legs B. The Saturday slot has now been empty in every week visible in the 30-day log -- no Saturday session exists anywhere in the data. This is not random; Saturdays are structurally not happening. The 4-week trend: 5 sessions, 2, 0, 2. With a 6/week target (24/month), Ganesh is averaging 2.3 sessions/week -- less than 40% of the programme target.

CORRECTIVE COMPLIANCE:

Hip Thrust hit rate: 0 of 0 dedicated Legs sessions (no PPL Legs sessions ran).

Both Full Body sessions included leg work (squat, leg extension, RDL) without Hip Thrust -- APT correction is receiving zero attention in W11.

Core stabiliser presence: 0 of 2 sessions. No Dead Bug, Bird-Dog, or Plank was logged in either session. The T8-T12 lower thoracic kyphosis corrective is being completely skipped, compounding the postural issue every week it is absent.

Rear delt count: 0 sets vs the 8-set target. At 44, sustained front-delt dominance places chronic anterior shear force on the humeral head. The infraspinatus and teres minor must work overtime to stabilise the joint during overhead pressing. Without rear delt reinforcement, this imbalance grows over months and can progress to impingement syndrome -- pain during any overhead movement and, in worse cases, partial rotator cuff tears requiring months of rehab.

LATERAL RAISE TREND (V-TAPER KPI):

The Lateral Raise is stuck at 10kg x 14 reps with no change since July 13 -- a plateau of at least 3 weeks. For Ganesh, the visual problem is precise: love handles sit at exactly lat-width level, collapsing the shoulder-to-waist ratio. The lateral delt cap is the only muscle that can widen the top of the frame relative to the waist. Until lateral raise weight progresses beyond 10kg (target: 12-14kg within the next 4-6 weeks), the V-taper cannot improve. At 10kg/14 reps, Ganesh can sustain higher reps -- try 10kg x 16-18 to force a strength adaptation, then move to 12kg.

HARD FLAGS:

1. OHP rep collapse (Wed 05 Aug): Set 1 at 40kg hit 10 reps cleanly; Sets 2-3 jumped to 45kg and collapsed to 5 and 4 reps respectively. A 60% rep collapse within one session signals too-aggressive weight jump. Reset: 40kg across all 3 sets next time.
2. Leg Extension rep collapse (Wed 05 Aug): Set 1 at 70kg hit 12 reps; Set 3 fell to 8 reps. Drop 5% to 66.5kg next session -- do not restore 70kg until 3 x 12 is clean.
3. Session over 60 min (Mon 03 Aug): 82 minutes, 22 over the programme limit. Warm-up or inter-set rest is running long. Cap rest periods at 90 seconds for isolation, 2 minutes for compound.
4. Core: 0 sets in both sessions this week. T8-T12 kyphosis correction received zero stimulus -- Dead Bug or Bird-Dog must appear in every session without exception.
5. Rear delts: 0 sets vs 8-set target. This is the highest clinical risk factor given Ganesh's age and the amount of overhead pressing being done.

OVERALL VERDICT: DECLINING

Volume this week: 8,973 kg*reps from 2 sessions -- similar to two weeks ago (8,490) but far below the 26,375 peak three weeks ago. PPL adherence: 0%. All corrective markers absent. Rear delts untrained. The programme in its prescribed PPL format is not being followed in W11.

8. PLAN FOR NEXT WEEK

Programme week: W12 (Week 12 of PPL x2)

NOTE: Report flagged a deload for W11. With only 2 low-volume sessions this week, the body has had adequate passive recovery. W12 resumes at adjusted working weights -- no additional deload needed.

* MONDAY -- Push A (Chest + Shoulders + Triceps) ---

Bench Press (Barbell) 3 x 6 @ 57kg

[Compound; -5% from 60kg due to rep collapse Aug 3]

Incline Chest Press (Machine) 3 x 10 @ 31.25kg

[Isolation; +1.25kg from 30kg; all sets hit 11 reps Jul 18]

Overhead Press (Barbell) 3 x 10 @ 40kg

[Compound; reset from 45kg -- collapse to 4 reps Aug 5; 40kg hit 10 cleanly]

Lateral Raise (Dumbbell) 3 x 16 @ 10kg

[Isolation; plateau at 14 reps since Jul 13 -- push reps to 16-18 before moving to 12kg]

Skullcrusher (Dumbbell) 3 x 12 @ 22.5kg

[Isolation; +1.25kg from 20kg -- all sets hit 12 reps Jul 18; round to 22.5kg]

Dead Bug 3 x 10 -- do not skip (T8-T12 kyphosis correction)

FOCUS: Keep bench strict at 57kg. OHP at 40kg only -- no jumping to 45kg until 3 x 10 is clean.

* TUESDAY -- Pull A (Back + Biceps) ---

Bent Over Row (Barbell) 3 x 7 @ 72.5kg

[Compound; +2.5kg from 70kg -- all sets hit 7 reps Jul 17]

Pull Up (Bodyweight) 3 x 6

[Compound; 0kg is correct for bodyweight; add 1 rep per session if possible]

Bicep Curl (Dumbbell) 3 x 10 @ 10kg

[Isolation; SAME for 4 weeks -- focus on full contraction and slow negative]

Face Pull (Cable) 3 x 15 @ 15kg

[Isolation; MANDATORY rear delt corrective -- no prior data; conservative start]

Dead Bug 3 x 10 -- do not skip

FOCUS: Face Pull is the non-negotiable. Rear delt gap is the highest clinical risk.

* WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes -- Hip Thrust mandatory) ---

Hip Thrust (Barbell) 3 x 12 @ 60kg

[Compound; MANDATORY APT correction -- no prior data; conservative start]

Squat (Barbell) 3 x 6 @ 57kg

[Compound; -5% from 60kg due to rep collapse; focus on depth over load]

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg

[Compound; +2.5kg from 75kg -- all 3 sets hit 8 reps this week]

Leg Extension (Machine) 3 x 12 @ 66.5kg

[Isolation; -5% from 70kg due to rep collapse Aug 5 -- hold until 3 x 12 clean]

Dead Bug 3 x 10 -- do not skip

FOCUS: Hip Thrust goes first, before any other movement. Log it or the session does not count.

* THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps) ---

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg

[Compound; +2.5kg from 90kg -- all sets hit 8 reps Jul 18]

Chest Fly (Machine) 3 x 10 @ 66.25kg

[Isolation; +1.25kg from 65kg -- all sets hit 10 reps Jul 18; use nearest stack]

Incline Chest Press (Machine) 3 x 10 @ 31.25kg

[Isolation; same Push A progression]

Triceps Pushdown 3 x 11 @ 28.45kg

[Isolation; +1.25kg from 27.2kg -- all sets hit 11 reps; use nearest cable stack]

Dead Bug 3 x 10 -- do not skip

FOCUS: Shoulder sets take priority if time is tight -- Push B is a shoulder day.

* FRIDAY -- Pull B (Back + Rear Delts + Biceps -- Rear Delt work mandatory) ---

Deadlift (Barbell) 3 x 7 @ 82.5kg

[Compound; +2.5kg from 80kg -- all sets hit 7 reps Jul 17]

Bent Over Row (Barbell) 3 x 7 @ 72.5kg

[Compound; same progression as Pull A]

Rear Delt Reverse Fly (Dumbbell) 3 x 13 @ 10kg

[Isolation; MANDATORY -- only 2 sets logged Jul 17; ensure all 3 sets this session]

Shrug (Barbell) 3 x 10 @ 70kg
[Isolation; SAME -- reps inconsistent Jul 17 (12/11/11); hold until 3 x 12 clean]
Bicep Curl (Machine) 3 x 10 @ 22.5kg
[Isolation; -5% from 25kg due to rep collapse on set 3 Jul 18]
Dead Bug 3 x 10 -- do not skip

FOCUS: Rear Delt Fly is non-negotiable. All 3 sets. This is the impingement-risk muscle.

* SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg -- Hip Thrust mandatory) ---

Hip Thrust (Barbell) 3 x 12 @ 60kg
[Compound; MANDATORY APT correction -- same start as Legs A Wednesday]
Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
[Compound; same progression as Legs A]
Leg Extension (Machine) 3 x 12 @ 66.5kg
[Isolation; same as Legs A]
Squat (Barbell) 3 x 6 @ 57kg
[Compound; same reduction as Legs A]
Dead Bug 3 x 10 -- do not skip

WARNING: Saturdays have been missed in every week of the 30-day log. Set a gym alarm.

Hip Thrust goes first. APT correction is cumulative -- missing it twice a week every week is actively working against the programme's postural goals.

+-----+		
Deload	: not yet -- W11 was effectively low volume (2 sess).	
	Next scheduled deload: Week 15, approx 29 Aug 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
