

30-Day Analysis Report

Ganesh · 44M · 181cm · 87kg → 79kg target

Goal: Body Recomposition – Fat loss, muscle preservation

Programme: PPL x2 (6 days/week) · Started 2026-05-24 · Week 9

Deficit: 2,367 kcal/day · 174g protein minimum

Generated: 2026-07-22

WEEKLY TRAINING REPORT

Generated : 2026-07-23 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 16 Jul to 23 Jul 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target

Prior 3 weeks: 5, 4, 4 sessions (avg 4.3)

Overall score: 5/10 – Average week – muscle gaps or missed sessions holding you back.

Biggest win : Seated Shoulder Press (Machine) – 90kg x 8 reps (e1RM 114.0kg)

Biggest concern: Legs – 3 sets vs 14 target (11 sets short)

vs last week : Volume DOWN 23% (15,180 vs 19,685 kg*reps)

2. THIS WEEK – SESSION BY SESSION

Session 1: Friday 17 Jul 2026 08:55 IST | 70 min

Type : Full Body C – Friday

Volume : 6,690 kg*reps | 14 sets

Bent Over Row (Barbell): 70kg x 7r x 3 sets (e1RM 86.3kg) vs prior: +2.3kg e1RM

Deadlift (Barbell): 80kg x 7r x 3 sets (e1RM 98.7kg) vs prior: +2.7kg e1RM

Shrug (Barbell): 70kg x 12r x 3 sets (e1RM 98.0kg) vs prior: +7.0kg e1RM

Rear Delt Reverse Fly (Dumbbell): 10kg x 13r x 2 sets (e1RM 14.3kg) vs prior: +0.0kg e1RM

Crunch (Machine): 25kg x 12r x 3 sets (e1RM 35.0kg) vs prior: +14.0kg e1RM

Session 2: Saturday 18 Jul 2026 08:12 IST | 86 min

Type : Chest Shoulder– Saturday

Volume : 6,570 kg*reps | 15 sets

Incline Chest Press (Machine): 30kg x 11r x 3 sets (e1RM 41.0kg) vs prior: +1.0kg e1RM

Seated Shoulder Press (Machine): 90kg x 8r x 3 sets (e1RM 114.0kg) vs prior: +3.0kg e1RM

Chest Fly (Machine): 65kg x 10r x 3 sets (e1RM 86.7kg) vs prior: +10.7kg e1RM

Bicep Curl (Machine): 25kg x 10r x 3 sets (e1RM 33.3kg) vs prior: +0.0kg e1RM

Skullcrusher (Dumbbell): 20kg x 12r x 3 sets (e1RM 28.0kg) vs prior: +7.0kg e1RM

Session 3: Monday 20 Jul 2026 08:36 IST | 16 min

Type : Full Body A – Monday

Volume : 1,920 kg*reps | 7 sets
Squat (Barbell): 40kg x 6r x 3 sets (e1RM 48.0kg) vs prior: -45.3kg e1RM
Bench Press (Barbell): 40kg x 10r x 3 sets (e1RM 53.3kg) vs prior: -26.9kg e1RM
Pull Up: 0kg x 6r x 1 sets (e1RM 0.0kg) [FLAG: 0kg logged]

4-WEEK VOLUME TREND

Wk -3 (25 Jun-02 Jul): [#####] 25,325 kg*reps 5 sess
Wk -2 (02 Jul-09 Jul): [#####.....] 19,422 kg*reps 4 sess
Wk -1 (09 Jul-16 Jul): [#####.....] 19,685 kg*reps 4 sess
This wk (16 Jul-23 Jul): [#####.....] 15,180 kg*reps 3 sess

3. STRENGTH — HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 40kg x 10 reps (e1RM 53.3kg)

vs prior : DOWN -26.9kg vs 13 Jul

Next session : 38.0kg x 10 reps

[C] Bent Over Row (Barbell)

Best this week : 70kg x 7 reps (e1RM 86.3kg)

vs prior : UP +2.3kg vs 10 Jul

Next session : 72.5kg x 7 reps

[C] Deadlift (Barbell)

Best this week : 80kg x 7 reps (e1RM 98.7kg)

vs prior : UP +2.7kg vs 10 Jul

Next session : 82.5kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 6 reps

*** FLAGS: 0kg logged — check entry

[C] Seated Shoulder Press (Machine)

Best this week : 90kg x 8 reps (e1RM 114.0kg)

vs prior : UP +3.0kg vs 11 Jul

Next session : 92.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 40kg x 6 reps (e1RM 48.0kg)

vs prior : DOWN -45.3kg vs 13 Jul

Next session : 38.0kg x 6 reps

[I] Bicep Curl (Machine)

Best this week : 25kg x 10 reps (e1RM 33.3kg)

vs prior : SAME as 04 Jul

Next session : 25kg x 10 reps

[I] Chest Fly (Machine)

Best this week : 65kg x 10 reps (e1RM 86.7kg)

vs prior : UP +10.7kg vs 11 Jul

Next session : 66.25kg x 10 reps

[I] Crunch (Machine)

Best this week : 25kg x 12 reps (e1RM 35.0kg)

vs prior : UP +14.0kg vs 10 Jul
Next session : 26.25kg x 12 reps

[I] Incline Chest Press (Machine)
Best this week : 30kg x 11 reps (e1RM 41.0kg)
vs prior : UP +1.0kg vs 04 Jul
Next session : 31.25kg x 11 reps

[I] Rear Delt Reverse Fly (Dumbbell)
Best this week : 10kg x 13 reps (e1RM 14.3kg)
vs prior : SAME as 10 Jul
Next session : 10kg x 13 reps

[I] Shrug (Barbell)
Best this week : 70kg x 12 reps (e1RM 98.0kg)
vs prior : UP +7.0kg vs 10 Jul
Next session : 71.25kg x 12 reps

[I] Skullcrusher (Dumbbell)
Best this week : 20kg x 12 reps (e1RM 28.0kg)
vs prior : UP +7.0kg vs 11 Jul
Next session : 21.25kg x 12 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
Chest	9	12	3	LOW
Back	7	14	7	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	6	6	0	OK
Rear Delts	2	8	6	CRITICAL
Biceps	3	8	5	CRITICAL
Triceps	0	8	8	CRITICAL
Legs	3	14	11	CRITICAL
Core	3	6	3	LOW

Push sets: 12 | Pull sets: 18 | Ratio pull:push = 1.50 (OK -- balanced)

Rear delts: 2 sets this week (need 8+/week)

SHORT by 6 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 6 sets this week (need 6+/week)

OK.

Enough work this week: Traps

Short this week : Chest, Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (25 Jun-02 Jul): 5 sessions

Wk -2 (02 Jul-09 Jul): 4 sessions

Wk -1 (09 Jul-16 Jul): 4 sessions

Time between sessions this week:

Fri 17 Jul 08:55 -> Sat 18 Jul 08:12: 23h [FLAG: only 23h rest, same muscles: other]

Sat 18 Jul 08:12 -> Mon 20 Jul 08:36: 48h

No sessions after midnight IST this week. Good.

Back-to-back sessions hitting the same muscle group:

Fri 17 Jul + Sat 18 Jul (23h apart): overlap = other

At age 44, muscles need 48-72h to fully repair between sessions.

Training a muscle before it has recovered adds fatigue, not stimulus,
and raises injury risk. Rearrange sessions to respect the recovery window.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
-----	-----	-----	-----
Chest	9	8	OK
Back	7	10	AT RISK
Shoulders	3	8	AT RISK
Traps	6	4	OK
Rear Delts	2	6	AT RISK
Biceps	3	6	AT RISK
Triceps	0	6	AT RISK
Legs	3	10	AT RISK
Core	3	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Back, Shoulders, Rear Delts, Biceps, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 2

Weeks since last deload : 2 (deload every 4 weeks)

Next deload : in 2 week(s), approx 06 Aug 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week: W9 (started 2026-05-24; 59 days elapsed, 8.4 weeks rounded up)

Sessions this week: 3 of 6 target

Day	Expected	Detected	Status
-----	-----	-----	-----
Thu 16 Jul	Push B	--	MISSED
Fri 17 Jul	Pull B	Pull B (INFERRED)	OK (rows, deadlift, rear delts)
Sat 18 Jul	Legs B	Push (INFERRED)	WRONG -- push session on Legs B day
Sun 19 Jul	REST	--	REST OK
Mon 20 Jul	Push A	Full Body (INFERRED)	WRONG -- mixed (squat+bench+pull-up), 16 min only

Tue 21 Jul	Pull A	--	MISSED
Wed 22 Jul	Legs A	--	MISSED

Adherence: 33% (1 of 3 sessions on correct day or correctly inferred)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 legs sessions -- Legs A and Legs B BOTH MISSED;
APT correction not addressed this week at all
Core stabiliser (all sessions): 1 of 3 sessions (Crunch Machine, Fri 17 Jul only);
no Dead Bug or Bird-Dog logged -- specific T8-T12
corrective absent all week
Rear delt work in Pull sessions: 1 of 1 pull sessions (Rear Delt Reverse Fly x2 sets, Fri 17 Jul); only 2 sets this week vs 8+ target
Sessions over 60 min : 2 of 3 -- Fri 17 Jul (70 min), Sat 18 Jul (86 min)

LATERAL RAISE (V-TAPER KPI):

This week : None performed
Prior week : 10.0kg x 14 reps (Mon 13 Jul, all 3 sets)
Trend : DOWN (exercise skipped entirely this week)

7. KEY INSIGHTS

RECOVERY AT 44

The only sub-48h session pair this week was Fri 17 Jul (08:55) to Sat 18 Jul (08:12): 23 hours apart. Friday's session was back-and-trap dominant (rows, deadlift, shrugs); Saturday was chest-and-shoulder dominant (incline press, machine fly, shoulder press). While the primary muscle groups differ, the anterior deltoid fires in both sessions as a stabiliser, and the 23h gap is well below the 48-72h minimum required at 44 for full connective-tissue recovery. The second pair, Sat 18 Jul -> Mon 20 Jul (48h), just cleared the minimum, but Monday included barbell bench press -- loading the same chest that was worked 48h earlier (Incline Press + Chest Fly on Saturday). That pair is on the edge. Every same-muscle pair clears 48h only barely or not at all this week.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 9 of PPL x2 (started 2026-05-24). Three sessions happened versus a 6/week target -- 50% session compliance. Of those three sessions, only one fell on the correct programme day (Fri = Pull B). The other two deviated: Saturday became a push/chest session instead of mandatory Legs B, and Monday was a diluted 16-minute full-body instead of Push A. Tuesday, Wednesday, and Thursday were all missed. The consistent miss pattern across recent weeks is Legs days being skipped or displaced by push sessions -- suggesting a training preference bias that is working against the corrective plan. W8 had 4 sessions with similar misalignment. The legs deficit is cumulative.

CORRECTIVE COMPLIANCE

Hip thrust hit rate this week: 0% -- both Legs A (Wed) and Legs B (Sat) were skipped entirely. Hip Thrust is mandatory to address anterior pelvic tilt (APT). APT means the pelvis tilts forward, causing the hip flexors to stay chronically tight and the glutes to underfire. Over time this compresses the lumbar discs during compound lifts and flattens the glute profile. Missing both Legs days means zero APT work for the entire week.

Rear delt sets: 2 this week versus the 8-set weekly target -- 25% of target. This matters more at 44 than it might look: every set of chest press and shoulder press

strengthens the anterior deltoid. The rear delt is the posterior counterbalance. When front shoulder muscles remain significantly stronger than rear delts, the humeral head (ball of the shoulder joint) is pulled forward in the socket under load. This is the exact mechanism of rotator cuff impingement -- the tendons of the rotator cuff get pinched between the humeral head and the acromion. Impingement at 44 often means months off training, not days.

Core stabiliser: 0 of 3 sessions contained a Dead Bug or Bird-Dog -- the specific movements that resist excessive spinal extension at T8-T12. Machine Crunch appeared once (Fri) but trains trunk flexion rather than anti-extension. Without Dead Bug or Bird-Dog, the lower thoracic kyphosis correction is receiving zero direct work.

LATERAL RAISE TREND (V-TAPER KPI)

No Lateral Raise was performed this week. Prior week best: 10kg x 14 reps (Mon 13 Jul). Trend: DOWN (exercise absent). The lateral raise is the primary lever for widening the visible shoulder silhouette. Ganesh's love handles sit at the same horizontal level as the lat-width, collapsing the visual ratio between shoulder width and waist. Wider, more prominent lateral delts are the single most efficient way to create the illusion of a narrower waist -- without losing any more bodyweight. Skipping lateral raises for an entire week means that KPI stalls.

HARD FLAGS

1. Monday 20 Jul: 16-minute session -- clearly incomplete or aborted. Only 7 working sets logged. Squat dropped from 80kg (13 Jul) to 40kg, Bench dropped from 65kg to 40kg. These are not small adjustments; they are deload-level weights in what should have been a normal training session. Possible gym time constraint or energy crash.
2. Bench Press e1RM dropped 26.9kg in one week (80.2kg -> 53.3kg). This is entirely explained by the aborted Mon session but should be monitored -- if next Monday's bench also underperforms, there is a recovery or nutrition issue to investigate.
3. Sat 18 Jul: 86 minutes -- 43% over the 60-minute session cap. This likely reflects long rest periods rather than extra volume. Long rest at a calorie deficit raises cortisol and can impair fat-loss signalling. Keep rest periods to 90 seconds for isolation and 2-3 minutes max for compounds.
4. No Hip Thrust or Legs session in any form this week. The APT corrective protocol has now been absent for 7 consecutive days.
5. Dead Bug / Bird-Dog absent all week. The T8-T12 kyphosis corrective has not been logged in any session across the 30-day window in its correct form.

OVERALL VERDICT: DECLINING

Volume is down 23% week-on-week (15,180 vs 19,685 kg x reps). Sessions dropped from 4 to 3. PPL adherence is 33% (vs close to 50% prior week). Both corrective priorities (hip thrust, dead bug) are absent. The lateral raise V-taper KPI moved down. The only bright spots this week are Bent Over Row (+2.3kg e1RM), Deadlift (+2.7kg e1RM), and Seated Shoulder Press (90kg x 8, best ever). Those lifts are progressing despite the lower overall volume -- which suggests the body still has capacity. The issue is not fitness; it is consistency and session structure.

8. PLAN FOR NEXT WEEK

Programme week: W10 (Week 10 of PPL x2, Mon 27 Jul - Sat 01 Aug 2026)

MONDAY 27 JUL -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 3 x 8 @ 65kg
(held -- last session hit 7 reps, not 8; need all 3 sets at 8 before +2.5kg)
Incline Chest Press (Machine) 3 x 11 @ 31.25kg
(up from 30kg; all 3 sets hit 11 reps on 18 Jul -- isolation +1.25kg rule)
Chest Fly (Machine) 3 x 10 @ 66.25kg
(up from 65kg; all 3 sets hit 10 reps on 18 Jul)
Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg
(up from 90kg; all 3 sets hit 8 reps on 18 Jul -- compound +2.5kg rule)
Lateral Raise (Dumbbell) 3 x 12 @ 11.25kg
(up from 10kg; all 3 sets hit 14 reps on 13 Jul -- isolation +1.25kg rule)
Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg
(up from 20kg; all 3 sets hit 12 reps on 18 Jul)
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Watch-point: Keep session under 60 min. If time is short, drop Chest Fly rather than cutting Dead Bug. The corrective is non-negotiable.

TUESDAY 28 JUL -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg
(up from 70kg; all 3 sets hit 7 reps on 17 Jul -- compound +2.5kg rule)
Deadlift (Barbell) 3 x 7 @ 82.5kg
(up from 80kg; all 3 sets hit 7 reps on 17 Jul -- compound +2.5kg rule)
Pull Up (Bodyweight) 3 x 6 @ 0kg
(hold; 0kg is bodyweight -- aim for 6 reps each set; add band assist if failing)
Bicep Curl (Dumbbell) 3 x 12 @ 8.75kg
(up from 7.5kg; all 3 sets hit 12 reps on 15 Jul -- isolation +1.25kg rule)
Rear Delt Reverse Fly 3 x 13 @ 10kg
(hold weight; only 2 sets logged on 17 Jul -- get full 3 sets before progressing)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12 corrective)

Watch-point: Rear Delt Reverse Fly MUST be 3 sets, not 2. You need 8 sets/week to protect the rotator cuff; Pull B is the primary opportunity to bank those sets.

WEDNESDAY 29 JUL -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 3 x 8 @ 40kg -- MANDATORY (APT correction)
(no prior log -- conservative start; this corrective is the most important lift in this session; do it first, before squats, while freshest)
Squat (Barbell) 3 x 6 @ 75kg
(dropped 5% from 80kg -- rep collapse on 13 Jul at 80kg, only 2 sets completed)
Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
(up from 75kg; all 3 sets hit 8 reps on 15 Jul -- compound +2.5kg rule)
Leg Extension (Machine) 3 x 10 @ 78kg
(up from 77kg; all 3 sets hit 10 reps on 15 Jul -- isolation +1.25kg rule)
Bird-Dog 3 x 10 each side -- do not skip (T8-T12 corrective)

Watch-point: Hip Thrust first. Squat second. Do not swap the order. The glute activation from Hip Thrust will improve squat depth and stability.

THURSDAY 30 JUL -- Push B (Shoulders primary + Chest variation + Triceps)

Seated Shoulder Press (Machine) 3 x 8 @ 92.5kg
(same progression as Push A -- shoulders are the primary target today)
Overhead Press (Barbell) 3 x 6 @ 47.25kg
(hold -- failed to hit all 3 sets at 47.25kg on 15 Jul; need consistency first)
Incline Chest Press (Machine) 3 x 11 @ 31.25kg
Lateral Raise (Dumbbell) 3 x 12 @ 11.25kg

(shoulders primary day -- get all 3 sets clean at 11.25kg before 12.5kg)
Skullcrusher (Dumbbell) 3 x 12 @ 21.25kg
Dead Bug 3 x 10 -- do not skip (T8-T12 corrective)

Watch-point: This is the key session for closing the Lateral Raise gap.
If 11.25kg is too light at 12 reps, do 15 reps instead of jumping weight mid-set.

FRIDAY 01 AUG -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg
Deadlift (Barbell) 3 x 7 @ 82.5kg
Shrug (Barbell) 3 x 12 @ 70kg
(hold -- sets 2 and 3 dropped to 11 reps on 17 Jul; hit all 3 at 12 first)
Rear Delt Reverse Fly 3 x 13 @ 10kg
(Face Pull or Rear Delt Fly MANDATORY for Pull B -- do not substitute)
Bicep Curl (Dumbbell) 3 x 12 @ 8.75kg
Bird-Dog 3 x 10 each side -- do not skip

Watch-point: This session is the second chance to hit rear delt sets. Combined with Tuesday's 3 sets, this week should reach 6 of the 8 rear delt sets needed. If time allows, add a second rear delt exercise (e.g. Face Pull 2 x 15).

SATURDAY 02 AUG -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Hip Thrust (Barbell) 3 x 8 @ 40kg -- MANDATORY (APT correction)
Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg
Leg Extension (Machine) 3 x 10 @ 78kg
Rack Pull (Barbell) 3 x 6 @ 80kg
(no prior log -- conservative start; position the bar at knee height)
Single-Leg Romanian Deadlift 3 x 8 each side @ 15kg
(no prior log -- conservative start; focus on balance and hip hinge)
Bird-Dog 3 x 10 each side -- do not skip

Watch-point: Legs B has the most exercises this week. Start with Hip Thrust, then heavy compound (Rack Pull), then accessories. If short on time, cut Single-Leg RDL before cutting Hip Thrust.

+-----+
| Deload : not yet -- next due Week 11, ~06 Aug 2026 |
| Timing : 6-9 PM IST -- no sessions after midnight |
| Nutrition: 2,367 kcal/day | 174g protein minimum |
+-----+
