

30-Day Analysis Report

This week : 14 Sep to 21 Sep 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-09-20

WEEKLY TRAINING REPORT

Generated : 2026-09-21 05:00 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 14 Sep to 21 Sep 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target

Prior 3 weeks: 3, 1, 3 sessions (avg 2.3)

Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Bent Over Row (Barbell) -- 60kg x 11 reps (e1RM 82.0kg)

Biggest concern: Chest -- 0 sets vs 12 target (12 sets short)

vs last week : Volume DOWN 50% (6,804 vs 13,539 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 16 Sep 2026 10:41 IST | 44 min

Type : Full Body B -- Wednesday

Volume : 5,484 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 8r x 3 sets (e1RM 57.0kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 43kg x 9r x 3 sets (e1RM 55.9kg) vs prior: +0.0kg e1RM

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -32.7kg e1RM

Bicep Curl (Barbell): 20kg x 10r x 3 sets (e1RM 26.7kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

Session 2: Friday 18 Sep 2026 10:44 IST | 62 min

Type : Full Body C -- Friday

Volume : 1,320 kg*reps | 2 sets

Bent Over Row (Barbell): 60kg x 11r x 2 sets (e1RM 82.0kg) vs prior: -6.7kg e1RM

4-WEEK VOLUME TREND

Wk -3 (24 Aug-31 Aug): [#####] 13,704 kg*reps 3 sess

Wk -2 (31 Aug-07 Sep): [####.....] 3,220 kg*reps 1 sess

Wk -1 (07 Sep-14 Sep): [#####.] 13,539 kg*reps 3 sess

This wk (14 Sep-21 Sep): [#####.....] 6,804 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bent Over Row (Barbell)

Best this week : 60kg x 11 reps (e1RM 82.0kg)

vs prior : DOWN -6.7kg vs 28 Aug

Next session : 57.0kg x 11 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 8 reps (e1RM 57.0kg)
 vs prior : SAME as 09 Sep
 Next session : 45kg x 8 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 10 reps (e1RM 26.7kg)
 vs prior : SAME as 26 Aug
 Next session : 20kg x 10 reps

[I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)
 vs prior : DOWN -32.7kg vs 09 Sep
 Next session : 47.5kg x 12 reps

[I] Seated Leg Curl (Machine)

Best this week : 43kg x 9 reps (e1RM 55.9kg)
 vs prior : SAME as 26 Aug
 Next session : 43kg x 9 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 26 Aug
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		0		12		12		CRITICAL
Back		2		14		12		CRITICAL
Shoulders		3		10		7		CRITICAL
Traps		0		6		6		CRITICAL
Rear Delts		0		8		8		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		6		14		8		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 6 | Pull sets: 8 | Ratio pull:push = 1.33 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (24 Aug-31 Aug): 3 sessions

Wk -2 (31 Aug-07 Sep): 1 sessions

Wk -1 (07 Sep-14 Sep): 3 sessions

Time between sessions this week:

Wed 16 Sep 10:41 -> Fri 18 Sep 10:44: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	2	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	6	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 11

Weeks since last deload : 11 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W17 (started 2026-05-24; 119 days elapsed = 17 complete weeks)

Sessions this week : 2 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----+-----+			
Mon 14 Sep	Push A	--	MISSED
Tue 15 Sep	Pull A	--	MISSED
Wed 16 Sep	Legs A	Full Body B (INFERRED: Mixed Push+Legs)	OFF-PLAN
Thu 17 Sep	Push B	--	MISSED
Fri 18 Sep	Pull B	Full Body C (INFERRED: Pull partial)	PARTIAL
Sat 19 Sep	Legs B	--	MISSED
Sun 20 Sep	Rest	Rest (no session)	OK

Adherence: 50% session-type match (1 of 2 sessions near expected day muscle group)

17% weekly (1 of 6 planned sessions close to correct type)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 1 legs-containing session -- MISSING on Wed 16 Sep

Core stabiliser (all sessions): 0 of 2 sessions (no Dead Bug or Bird-Dog logged either day)

Rear delt work in Pull sessions: 0 of 1 pull session (Fri: Bent Over Row only, no rear delt fly)

Sessions over 60 min : Fri 18 Sep -- 62 min (2 min over; only 2 working sets logged)

LATERAL RAISE (V-TAPER KPI):

This week: not logged (0 sets) | Prior week: 10kg x 15 reps (Mon 07 Sep) | Trend: DOWN

7. KEY INSIGHTS

Recovery at 44: Only two sessions this week make the recovery picture simple -- Wed 16 Sep (10:41 IST) and Fri 18 Sep (10:44 IST) were exactly 48h 3min apart, which clears the 48-hour minimum required between same-muscle sessions. No same-muscle back-to-back conflict this week. However, the concern this week is under-stimulus rather than under-recovery: eight of nine tracked muscle groups received fewer working sets than the minimum needed to retain muscle on a calorie deficit. With 11 consecutive weeks of training and no deload, connective tissue fatigue is accumulating regardless of the low training frequency.

PPL adherence and programme age: This is Week 17 of the PPL x2 programme (started 2026-05-24). Adherence is 17% for the week (1 of 6 planned sessions carried out in roughly the right muscle group). The session titles still say "Full Body A/B/C" -- the old three-day template -- 17 weeks into a six-day PPL programme. Monday, Tuesday, Thursday and Saturday are being skipped in every recent week; the only training days are Wednesday and Friday. This is a systemic pattern, not a one-off week, and means the PPL programme structure is not being executed at all.

Corrective compliance: Hip Thrust was not logged in the one session (Wed 16 Sep) that included leg work. Without Hip Thrust, the hip-extensor pattern that counters anterior pelvic tilt goes unconditioned; APT keeps the lumbar spine in chronic extension under load, concentrating shear stress on the L4-L5 discs -- a significant injury risk at 44. Core stabilisers (Dead Bug,

Bird-Dog) were absent in both sessions -- 0 of 2 -- leaving the T8-T12 hyperkyphosis corrective protocol unfulfilled. Rear delt sets this week: 0 vs the 8-set weekly target. With front delts far stronger than rear, the humeral head migrates anteriorly under load; at 44 this path leads directly to supraspinatus impingement and rotator cuff partial tears that take 6-12 months to resolve.

Lateral raise trend: The V-taper KPI is moving DOWN -- zero lateral raise sets this week, and the prior-week best was already stalled at 10kg x 15 reps. This matters specifically for Ganesh because the love handles sit at lat-width level, which collapses the visual shoulder-to-waist ratio. Lateral raise progression is the fastest single lever to widen that ratio; a stalled or absent lateral raise means the V-taper deficit does not improve regardless of fat loss.

Hard flags: (1) Leg Extension dropped from 77kg x 10 reps (09 Sep) to 50kg x 12 (16 Sep) -- a 35% e1RM collapse (-32.7kg) in one week, either a weight adjustment error or significant fatigue/soreness. (2) Fri 18 Sep: a 62-minute session produced only 2 working sets (Bent Over Row) -- the session appears abandoned after warm-up, spending 62 minutes for effectively nothing. (3) DELOAD CRITICALLY OVERDUE: 11 weeks of continuous training vs the recommended 4-week cycle; connective tissue and passive structures have had no recovery window for nearly three months. (4) Zero core stabiliser sets logged anywhere in the 30-day window -- the T8-T12 kyphosis corrective has not been executed at all.

Overall verdict: This week is worse than last week on every metric -- session count down (2 vs 3), volume down 50% (6,804 vs 13,539 kg*reps), PPL adherence still near-zero at W17, and every corrective compliance marker at 0%. The deload is critically overdue and must happen in W18.

OVERALL: DECLINING

8. PLAN FOR NEXT WEEK

Programme week: W18 of PPL x2

- * DELOAD WEEK -- 2 sets per main exercise, same weights, effort ~6/10 ***
- * Corrective exercises (Dead Bug, Bird-Dog) kept at 3x10 -- these are therapeutic, not load-based ***

MONDAY -- Push A (Chest + Shoulders + Triceps)

Bench Press (Barbell) 2 x 8 @ 60kg
 Overhead Press (Barbell) 2 x 8 @ 45kg
 Lateral Raise (Dumbbell) 2 x 15 @ 10kg <- V-taper KPI; log every set
 Triceps Pushdown 2 x 11 @ 27.2kg
 Dead Bug 3 x 10 -- do not skip (T8-T12 kyphosis corrective)

Key focus: re-establish Monday as a training day; deload means controlled tempo, not max effort

TUESDAY -- Pull A (Back compound + Biceps)

Bent Over Row (Barbell) 2 x 11 @ 60kg
 Lat Pulldown (Machine) 2 x 6 @ 66kg
 Bicep Curl (Barbell) 2 x 10 @ 20kg
 Pull Up 2 x 6 @ 0kg
 Dead Bug 3 x 10 -- do not skip

Key focus: complete both back compounds; deload means slow eccentric on rows

WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Barbell) 2 x 10 @ 40kg <- MANDATORY APT corrective; no prior log, start

conservative

- Squat (Barbell) 2 x 7 @ 70kg
- Seated Leg Curl (Machine) 2 x 9 @ 43kg
- Leg Extension (Machine) 2 x 12 @ 50kg (rep collapse flagged last week; no increase)
- Bird-Dog 3 x 10 -- do not skip (T8-T12 kyphosis corrective)
- Key focus: Hip Thrust is the single non-negotiable -- if only one exercise happens, it is this

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

- Overhead Press (Barbell) 2 x 8 @ 45kg (shoulders primary on Push B)
- Bench Press (Barbell) 2 x 8 @ 60kg (chest variation)
- Lateral Raise (Dumbbell) 2 x 15 @ 10kg <- V-taper KPI; log every set
- Triceps Pushdown 2 x 11 @ 27.2kg
- Dead Bug 3 x 10 -- do not skip
- Key focus: OHP must come first -- this is a shoulder-dominant day, not chest-dominant

FRIDAY -- Pull B (Back + Rear Delts + Biceps)

- Bent Over Row (Barbell) 2 x 11 @ 60kg
- Rear Delt Reverse Fly (DB) 2 x 12 @ 10kg <- MANDATORY; 0 rear delt sets this week
- Bicep Curl (Barbell) 2 x 10 @ 20kg
- Dead Bug 3 x 10 -- do not skip
- Key focus: Rear Delt Reverse Fly is mandatory for rotator cuff protection at 44; do not leave the gym on Friday without logging at least 2 sets

SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg)

- Hip Thrust (Barbell) 2 x 10 @ 40kg <- MANDATORY APT corrective
- Leg Press (Machine) 2 x 12 @ 60kg
- Seated Leg Curl (Machine) 2 x 9 @ 43kg
- Bird-Dog 3 x 10 -- do not skip
- Key focus: second Hip Thrust day of W18 -- most important APT corrective rep of the week; treat it as the main event, not a warm-up

+-----+		
Deload	: needed this week -- next due Week 22, ~18 Oct 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
