

30-Day Analysis Report

This week : 15 Aug to 22 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-21

WEEKLY TRAINING REPORT

Generated : 2026-08-22 05:01 IST

User : Ganesh | 44M | 181cm | 87kg -> 79kg

This week : 15 Aug to 22 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 1 of 5 target

Prior 3 weeks: 0, 2, 3 sessions (avg 1.7)

Overall score: 1/10 -- Below par -- low sessions or major muscle imbalances this week.

Biggest win : Leg Extension (Machine) -- 50kg x 12 reps (e1RM 70.0kg)

Biggest concern: Back -- 0 sets vs 14 target (14 sets short)

vs last week : Volume DOWN 61% (5,056 vs 13,059 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Wednesday 19 Aug 2026 09:12 IST | 32 min

Type : Full Body B -- Wednesday

Volume : 5,056 kg*reps | 15 sets

Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: +0.0kg e1RM

Seated Leg Curl (Machine): 36kg x 9r x 3 sets (e1RM 46.8kg) [FLAG: rep collapse 9->6]

Leg Extension (Machine): 50kg x 12r x 3 sets (e1RM 70.0kg) vs prior: -30.1kg e1RM

Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg) vs prior: +0.0kg e1RM

Triceps Pushdown: 24.9kg x 11r x 3 sets (e1RM 34.0kg) vs prior: -3.2kg e1RM

4-WEEK VOLUME TREND

Wk -3 (25 Jul-01 Aug): [.....] 0 kg*reps 0 sess

Wk -2 (01 Aug-08 Aug): [#####.....] 8,973 kg*reps 2 sess

Wk -1 (08 Aug-15 Aug): [#####] 13,059 kg*reps 3 sess

This wk (15 Aug-22 Aug): [#####.....] 5,056 kg*reps 1 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)

vs prior : SAME as 12 Aug

Next session : 45kg x 7 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)

vs prior : SAME as 12 Aug

Next session : 20kg x 9 reps

- [I] Leg Extension (Machine)

Best this week : 50kg x 12 reps (e1RM 70.0kg)

vs prior : DOWN -30.1kg vs 12 Aug

Next session : 47.5kg x 12 reps
- [I] Seated Leg Curl (Machine)

Best this week : 36kg x 9 reps (e1RM 46.8kg)

vs prior : First time in 30-day log

Next session : 36kg x 9 reps

* FLAGS: rep collapse (9->6)
- [I] Triceps Pushdown

Best this week : 24.9kg x 11 reps (e1RM 34.0kg)

vs prior : DOWN -3.2kg vs 05 Aug

Next session : 23.65kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group	Sets this wk	Target/wk	Gap	Status
* +-----+-----+-----+-----				
Chest	0	12	12	CRITICAL
Back	0	14	14	CRITICAL
Shoulders	3	10	7	CRITICAL
Traps	0	6	6	CRITICAL
Rear Delts	0	8	8	CRITICAL
Biceps	6	8	2	LOW
Triceps	3	8	5	CRITICAL
Legs	6	14	8	CRITICAL
Core	0	6	6	CRITICAL

Push sets: 6 | Pull sets: 6 | Ratio pull:push = 1.00 (OK -- balanced)

Rear delts: 0 sets this week (need 8+ /week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+ /week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core
Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 1 of 5 target
Wk -3 (25 Jul-01 Aug): 0 sessions
Wk -2 (01 Aug-08 Aug): 2 sessions
Wk -1 (08 Aug-15 Aug): 3 sessions
No sessions after midnight IST this week. Good.
No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	0	8	AT RISK
Back	0	10	AT RISK
Shoulders	3	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK
Biceps	6	6	OK
Triceps	3	6	AT RISK
Legs	6	10	AT RISK
Core	0	4	AT RISK

Muscles at risk of loss this week (below minimum stimulus):

Chest, Back, Shoulders, Traps, Rear Delts, Triceps, Legs, Core

These are not getting enough signal to hold on to muscle during a deficit.

Add sets for these in the next 1-2 sessions.

Active training weeks logged : 6

Weeks since last deload : 6 (deload every 4 weeks)

*** DELOAD THIS WEEK ***

Cut all sets to 2 per exercise. Keep weights the same.

Deload weeks let joints and connective tissue recover.

You will come back stronger after the deload.

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W13 (started 2026-05-24; 90 days elapsed = 13 weeks)

Sessions this week : 1 of 6 target

Day	Expected	Detected	Status
* +-----+-----+-----			
Sat 15 Aug	Legs B	No session	MISSED
Sun 16 Aug	REST	No session	REST OK
Mon 17 Aug	Push A	No session	MISSED

Tue 18 Aug | Pull A | No session | MISSED
 Wed 19 Aug | Legs A | Full Body B (INFERRED: Mixed Push+Legs) | OFF-PLAN
 Thu 20 Aug | Push B | No session | MISSED
 Fri 21 Aug | Pull B | No session | MISSED
 Adherence: 0% (0 of 1 sessions matched expected PPL day type)

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 proper Legs sessions -- MISSING on 19 Aug
 (leg work occurred on Wed 19 Aug but contained no Hip Thrust; APT correction unmet)
 Core stabiliser (all sessions): 0 of 1 sessions
 (no Dead Bug, Bird-Dog, or Plank in any session this week; kyphosis correction absent)
 Rear delt work in Pull sessions: 0 of 0 Pull sessions
 (no Pull session logged this week; no rear delt work in the 1 session done)
 Sessions over 60 min: None this week (Wed 19 Aug = 32 min)
 FLAG PRIOR WEEK: Wed 12 Aug session ran 65 min -- 5 min over the 60-min cap

LATERAL RAISE (V-TAPER KPI):

This week : not performed | Prior week: 10kg x 14 reps (Mon 10 Aug) | Trend: DOWN

7. KEY INSIGHTS

RECOVERY AT 44

Within the 30-day log, the sharpest same-muscle gap was Leg Extension:
 Session 3 (Mon 10 Aug 08:59) to Session 4 (Wed 12 Aug 09:09) = exactly 48 hours --
 right at the 44-year-old minimum. The same session pair also loaded biceps within 48h
 (Dumbbell Curl Mon 10 Aug / Barbell Curl Wed 12 Aug). Every other same-muscle pair
 cleared 48h comfortably: Leg Extension Wed 05 to Mon 10 = 120h (OK), OHP Wed 05 to
 Wed 12 = 168h (OK), Bench Press Mon 03 to Mon 10 = 168h (OK). The 48h borderline
 pairs are not flagged as violations, but at 44 the connective tissue recovery window
 is longer than muscle recovery -- aim for 72h on compound leg and shoulder work where
 possible.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 13 of the PPL x2 programme (started 2026-05-24). Adherence this week:
 0% -- only 1 session happened and it was off-plan (Full Body B on a Legs A day).
 Prior weeks show a clear pattern of mid-week gym attendance (Mon, Wed, Fri) while
 Saturday Legs B and Tuesday Pull A are the most consistently skipped days. Over the
 last 4 weeks the session counts were: 0, 2, 3, 1 -- a volatile pattern with no week
 reaching even 50% of the 6-session target. The programme is 13 weeks old but has
 not yet been run as a true PPL split; all logged sessions carry "Full Body" titles,
 meaning the structural muscle-specialisation benefit of PPL is not being captured.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate this week: 0%. No proper Legs A or Legs B session was logged, and the 1 session with leg work (Wed 19 Aug) did not include Hip Thrust. Anterior pelvic tilt will not improve without Hip Thrust in every Legs session -- the glutes are the primary APT corrective and Hip Thrust is the highest-stimulus glute driver. Rear delt sets this week: 0 vs 8-set weekly target -- 8 sets short. At age 44, if anterior shoulder muscles (front delts, pecs) remain chronically stronger than rear delts, the humeral head migrates forward in the socket under load, narrowing the subacromial space and compressing the supraspinatus tendon -- the most common cause of rotator cuff impingement in lifters over 40. The last rear delt work logged was Fri 14 Aug (3 sets of Rear Delt Reverse Fly) -- 7 days ago. Core stabiliser presence: 0 of 1 sessions. Dead Bug or Bird-Dog is still absent from every session; the T8-T12 kyphosis correction remains unaddressed.

LATERAL RAISE -- V-TAPER KPI

Lateral Raise was not performed this week (trend: DOWN). Prior week best was 10kg x 14 reps (Mon 10 Aug). Progress has stalled at 10kg for multiple consecutive weeks. This matters specifically because Ganesh's love handles sit at lat-width level

- * the lateral shoulder caps are the only structure that can visually widen the silhouette above that waist point. Without progressive overload on Lateral Raises, the V-taper deficit will not close regardless of fat loss progress.

HARD FLAGS

1. REP COLLAPSE -- Seated Leg Curl (Wed 19 Aug): reps dropped from 9 to 6 in set 3 at 36kg. Signals either insufficient warm-up or local fatigue from prior Leg Extension sets. Address by reversing exercise order: Leg Curl before Leg Extension.
2. DELOAD OVERDUE -- Report flags 6 active training weeks since last deload; deload threshold is every 4 weeks. However, this week's 1 session effectively served as an unplanned deload. Return to full training loads in Week 14.
3. SESSION OVER 60 MIN -- Wed 12 Aug session ran 65 minutes (5 min over cap). The 60-min ceiling is especially important at 44 because cortisol rises steeply after ~60 min of resistance training, suppressing testosterone recovery and increasing muscle catabolism. Tighten rest periods or cut one accessory set.
4. Leg Extension e1RM COLLAPSED -- from 100.1kg (Wed 12 Aug) to 70.0kg (Wed 19 Aug), a 30kg drop. This is almost certainly a weight-selector or machine reset issue, not a true strength loss. Verify machine weight at the start of the next session before logging.
5. ZERO CHEST, BACK, CORE sets this week (all CRITICAL in the muscle stimulus check). This is the second or third consecutive week with near-zero back work. Under a calorie deficit, back musculature will begin to atrophy if below minimum stimulus (~10 sets/week) for more than 2 consecutive weeks.

OVERALL VERDICT: DECLINING

Week 13 is worse than Week 12 across every metric: sessions (1 vs 3), volume (5,056 vs 13,059 kg*reps), adherence (0% vs partial), and corrective compliance (no Hip Thrust, no core, no rear delts). The trajectory over 4 weeks [0, 2, 3, 1] shows no sustained building pattern. Structural change -- committing to the PPL format with mandatory correctives on every session -- is needed before any progression target is meaningful.

8. PLAN FOR NEXT WEEK

Programme week: W14 -- Week 14 of PPL x2

MONDAY 24 AUG -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 3 x 6 @ 62.5kg

(was 60kg x 6 both sessions; all sets hit target -- compound +2.5kg)

Overhead Press (Barbell) 2 x 10 @ 40kg (accessory -- Shoulders)

Incline Dumbbell Press 3 x 10 @ 16kg (chest variation; conservative start)

Lateral Raise (Dumbbell) 3 x 14 @ 11.25kg

(was 10kg x 14, all sets hit -- isolation +1.25kg; round to nearest 1.25kg DB)

Triceps Pushdown 3 x 11 @ 25kg

(last week: 24.9kg x 11; no rep collapse on triceps -- hold and consolidate)

Dead Bug 3 x 10 -- T8-T12 corrective -- do not skip

Key focus: Keep bench as the first compound. Limit total time to 55 min.

TUESDAY 25 AUG -- Pull A (Back compound + Biceps)

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg

(was 75kg x 8 x 3 sets; all sets hit -- compound +2.5kg)

Pull Up (Bodyweight) 3 x 8 @ BW

(was 0kg x 6 x 3; bodyweight only -- aim for 8 clean reps before adding load)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg

(was 70kg x 7 x 3 sets; all sets hit -- compound +2.5kg)

Bicep Curl (Barbell) 3 x 9 @ 21.25kg

(was 20kg x 9 x 3 sets; all sets hit -- isolation +1.25kg)

Dead Bug 3 x 10 -- T8-T12 corrective -- do not skip

Key focus: RDL is the heaviest move; go first while CNS is fresh. No back work above 65 min total -- cut one bicep set if time is tight.

WEDNESDAY 26 AUG -- Legs A (Quads + Hamstrings + Glutes -- Hip Thrust mandatory)

Hip Thrust (Barbell) 3 x 10 @ 60kg -- MANDATORY APT CORRECTIVE

(no prior log; conservative start -- confirm form before adding load)

Squat (Barbell) 3 x 6 @ 72.5kg

(was 70kg x 6 x 2 sets; both sessions hit -- compound +2.5kg)

Seated Leg Curl (Machine) 3 x 10 @ 34kg

(was 36kg x 9->6 rep collapse; drop ~5% to 34kg; do BEFORE Leg Extension)

Leg Extension (Machine) 3 x 10 @ 60kg

(was 77kg Wk-2 then 50kg this week -- inconsistent; start at 60kg, verify machine weight before logging; do AFTER Leg Curl)

Bird-Dog 3 x 10 each side -- T8-T12 corrective -- do not skip

Key focus: Hip Thrust first, Squat second. Leg Curl before Leg Extension to prevent rep collapse repeat. Verify Leg Extension machine weight before set 1.

THURSDAY 27 AUG -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 7 @ 47.5kg

(was 45kg x 7 x 2 sets in both last Push sessions; all hit -- compound +2.5kg)

Dumbbell Lateral Raise 3 x 14 @ 11.25kg

(as Monday Push A -- V-taper KPI, second session this week)

Cable Chest Fly or Pec Deck 3 x 12 @ 40kg (chest variation; conservative)

Triceps Pushdown 3 x 12 @ 25kg

(consolidate at 25kg; aim for 12 reps before progressing)

Dead Bug 3 x 10 -- T8-T12 corrective -- do not skip

Key focus: OHP is the primary compound today -- push the weight. Keep

Lateral Raises in every Push session to hit the V-taper KPI.

FRIDAY 28 AUG -- Pull B (Back + Rear Delts + Biceps -- Face Pull mandatory)

Bent Over Row (Barbell) 3 x 7 @ 72.5kg

(same as Tuesday -- consolidate at same weight, focus on controlled tempo)

Lat Pulldown (Machine) 3 x 8 @ 66kg

(was 66kg x 6 x 2 sets; did not hit 3 sets -- repeat before progressing)

Face Pull (Cable) 3 x 15 @ 15kg -- MANDATORY rear delt + rotator cuff

(no prior log; conservative start; this is the mandatory Rear Delt corrective)

Rear Delt Reverse Fly (DB) 3 x 13 @ 11.25kg

(was 10kg x 13 x 3 sets; all hit -- isolation +1.25kg; this adds to rear delt count)

Bicep Curl (Barbell) 3 x 9 @ 21.25kg

(same as Tuesday Pull A)

Dead Bug 3 x 10 -- T8-T12 corrective -- do not skip

Key focus: Rear delt total this session should be 6 sets (Face Pull + Reverse Fly).

Combined with Tuesday, that reaches the 8-set/week rear delt target.

SATURDAY 29 AUG -- Legs B (Glutes + Hamstrings + Single-Leg -- Hip Thrust mandatory)

Hip Thrust (Barbell) 3 x 10 @ 60kg -- MANDATORY APT CORRECTIVE

(same as Wednesday; build confidence in form before adding load)

Romanian Deadlift (Barbell) 3 x 8 @ 77.5kg

(same as Tuesday Pull A -- high hip-dominant carry-over; keep load identical)

Leg Press (Machine) 3 x 12 @ 52.5kg

(was 50kg x 12 x 3 sets; all sets hit -- compound +2.5kg)

Bulgarian Split Squat (DB) 3 x 8 @ 10kg each hand (single-leg work; first log)

Bird-Dog 3 x 10 each side -- T8-T12 corrective -- do not skip

Key focus: Hip Thrust is non-negotiable -- set up the bar before anything else.

Bulgarian Split Squat addresses the single-leg deficit called out in Legs B design.

+-----+

Deload	: not yet -- de-facto deload this week (1/6 sessions)	
	Schedule next formal deload Week 17 (~20 Sep 2026)	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	

+-----+
