

30-Day Analysis Report

This week : 04 Jun to 11 Jun 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-06-10

WEEKLY TRAINING REPORT

Generated : 2026-06-11 05:00 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 04 Jun to 11 Jun 2026

1. THIS WEEK AT A GLANCE

Sessions : 3 of 5 target
Prior 3 weeks: 7, 3, 3 sessions (avg 4.3)
Overall score: 5/10 -- Average week -- muscle gaps or missed sessions holding you back.
Biggest win : Seated Cable Row - V Grip (Cable) -- 70kg x 8 reps (e1RM 88.7kg)
Biggest concern: Rear Delts -- 0 sets vs 8 target (8 sets short)
vs last week : Volume DOWN 27% (12,306 vs 16,838 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Friday 05 Jun 2026 08:02 IST | 98 min
Type : Full Body 3
Volume : 4,427 kg*reps | 12 sets
Romanian Deadlift (Barbell): 60kg x 8r x 3 sets (e1RM 76.0kg)
Incline Bench Press (Dumbbell): 20kg x 12r x 3 sets (e1RM 28.0kg) vs prior: -3.5kg e1RM [FLAG: rep collapse 12->8]
Seated Cable Row - V Grip (Cable): 70kg x 8r x 3 sets (e1RM 88.7kg) vs prior: -14.0kg e1RM
Triceps Pushdown: 24.9kg x 10r x 3 sets (e1RM 33.2kg) vs prior: -48.8kg e1RM
Session 2: Monday 08 Jun 2026 08:13 IST | 71 min
Type : Full Body A -- Monday
Volume : 2,570 kg*reps | 15 sets
Squat (Barbell): 65kg x 5r x 4 sets (e1RM 75.8kg) vs prior: +25.1kg e1RM
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: +16.0kg e1RM
Pull Up: 0kg x 4r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 12r x 3 sets (e1RM 14.0kg) vs prior: -3.9kg e1RM
Hanging Leg Raise: 0kg x 8r x 2 sets (e1RM 0.0kg) [FLAG: rep collapse 8->4, 0kg logged]
Session 3: Wednesday 10 Jun 2026 08:27 IST | 65 min
Type : Full Body B -- Wednesday
Volume : 5,309 kg*reps | 16 sets
Romanian Deadlift (Barbell): 60kg x 6r x 4 sets (e1RM 72.0kg)
Overhead Press (Barbell): 40kg x 6r x 3 sets (e1RM 48.0kg) vs prior: -2.7kg e1RM
Leg Extension (Machine): 63kg x 12r x 3 sets (e1RM 88.2kg) vs prior: -9.3kg e1RM
Bicep Curl (Dumbbell): 10kg x 9r x 3 sets (e1RM 13.0kg) vs prior: +0.3kg e1RM
Triceps Pushdown: 24.9kg x 10r x 3 sets (e1RM 33.2kg) vs prior: -48.8kg e1RM

4-WEEK VOLUME TREND

Wk -3 (14 May-21 May): [#####] 51,141 kg*reps 7 sess

Wk -2 (21 May-28 May): [#####.....] 17,251 kg*reps 3 sess
 Wk -1 (28 May-04 Jun): [#####.....] 16,838 kg*reps 3 sess
 This wk (04 Jun-11 Jun): [####.....] 12,306 kg*reps 3 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))

[C] = compound lift | [I] = isolation

[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)

vs prior : UP +16.0kg vs 01 Jun

Next session : 62.5kg x 6 reps

[C] Incline Bench Press (Dumbbell)

Best this week : 20kg x 12 reps (e1RM 28.0kg)

vs prior : DOWN -3.5kg vs 16 May

Next session : 19.0kg x 12 reps

* FLAGS: rep collapse (12->8)

[C] Overhead Press (Barbell)

Best this week : 40kg x 6 reps (e1RM 48.0kg)

vs prior : DOWN -2.7kg vs 03 Jun

Next session : 38.0kg x 6 reps

[C] Pull Up

Best this week : 0kg x 4 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 4 reps

* FLAGS: 0kg logged -- check entry

[C] Romanian Deadlift (Barbell)

Best this week : 60kg x 8 reps (e1RM 76.0kg)

vs prior : First time in 30-day log

Next session : 60kg x 8 reps

[C] Seated Cable Row - V Grip (Cable)

Best this week : 70kg x 8 reps (e1RM 88.7kg)

vs prior : DOWN -14.0kg vs 18 May

Next session : 66.5kg x 8 reps

[C] Squat (Barbell)

Best this week : 65kg x 5 reps (e1RM 75.8kg)

vs prior : UP +25.1kg vs 01 Jun

Next session : 67.5kg x 5 reps

[I] Bicep Curl (Dumbbell)

Best this week : 10kg x 9 reps (e1RM 13.0kg)

vs prior : SAME as 01 Jun

Next session : 11.25kg x 9 reps

[I] Hanging Leg Raise

Best this week : 0kg x 8 reps (e1RM 0.0kg)

vs prior : First time in 30-day log

Next session : 0kg x 8 reps

* FLAGS: rep collapse (8->4), 0kg logged -- check entry

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 12 reps (e1RM 14.0kg)

vs prior : DOWN -3.9kg vs 12 May

Next session : 9.5kg x 12 reps

[I] Leg Extension (Machine)

Best this week : 63kg x 12 reps (e1RM 88.2kg)

vs prior : DOWN -9.3kg vs 15 May

Next session : 59.85kg x 12 reps

[I] Triceps Pushdown

Best this week : 24.9kg x 10 reps (e1RM 33.2kg)

vs prior : DOWN -48.8kg vs 14 May

Next session : 23.65kg x 10 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		6		12		6		CRITICAL
Back		13		14		1		LOW
Shoulders		6		10		4		CRITICAL
Traps		7		6		-1		OK
Rear Delts		0		8		8		CRITICAL
Biceps		3		8		5		CRITICAL
Triceps		6		8		2		LOW
Legs		14		14		0		OK
Core		5		6		1		LOW

Push sets: 18 | Pull sets: 23 | Ratio pull:push = 1.28 (OK -- balanced)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 7 sets this week (need 6+/week)

OK.

Enough work this week: Traps, Legs

Short this week : Chest, Back, Shoulders, Rear Delts, Biceps, Triceps, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 3 of 5 target

Wk -3 (14 May-21 May): 7 sessions

Wk -2 (21 May-28 May): 3 sessions

Wk -1 (28 May-04 Jun): 3 sessions

Time between sessions this week:

Fri 05 Jun 08:02 -> Mon 08 Jun 08:13: 72h
Mon 08 Jun 08:13 -> Wed 10 Jun 08:27: 48h

No sessions after midnight IST this week. Good.
No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day
TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)
Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)
Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	6	8	AT RISK
Back	13	10	OK
Shoulders	6	8	AT RISK
Traps	7	4	OK
Rear Delts	0	6	AT RISK
Biceps	3	6	AT RISK
Triceps	6	6	OK
Legs	14	10	OK
Core	5	4	OK

Muscles at risk of loss this week (below minimum stimulus):
Chest, Shoulders, Rear Delts, Biceps
These are not getting enough signal to hold on to muscle during a deficit.
Add sets for these in the next 1-2 sessions.
Active training weeks logged : 1
Weeks since last deload : 1 (deload every 4 weeks)
Next deload : in 3 week(s), approx 02 Jul 2026

6.5. PPL ADHERENCE & CORRECTIVE COMPLIANCE

Programme week : W3 (started 2026-05-24; 17 days elapsed, rounded up = 3)
Sessions this week : 3 of 6 target (report window 04 Jun - 10 Jun)
Last 7 days from log : 4 sessions (03 Jun - 10 Jun)

Day	Expected	Detected	Status
* +-----+-----+-----+-----			

Wed 03 Jun | Legs A | Full Body (INFERRED: Row+OHP+LegPress)| MISMATCH

Fri 05 Jun | Pull B | Full Body (INFERRED: RDL+Bench+Row) | MISMATCH
 Mon 08 Jun | Push A | Full Body (INFERRED: Bench+Squat+Pull) | MISMATCH
 Wed 10 Jun | Legs A | Full Body (INFERRED: OHP+LegExt+Curl) | MISMATCH

Missed days (no session logged):

Thu 04 Jun -- Push B expected MISSED
 Sat 06 Jun -- Legs B expected MISSED
 Tue 09 Jun -- Pull A expected MISSED

Adherence: 0% (0 of 4 sessions on correct PPL type)

NOTE: PPL was followed correctly for 4 sessions (25-28 May: Push A, Pull A, Legs A, Push B). Every session from 01 Jun onwards reverted to Full Body format. PPL compliance is now 0% in Week 3.

CORRECTIVE MARKERS:

Hip Thrust in Legs sessions : 0 of 0 dedicated Legs sessions (no Legs A or Legs B was logged this week). Hip Thrust also absent from every session containing leg exercises (3 of 4 sessions had squats, leg press, or leg extension; Hip Thrust appeared in NONE). APT correction: zero stimulus.

Core stabiliser (Dead Bug / Bird-Dog / Plank): 0 of 4 sessions

NOTE -- Hanging Leg Raise (logged twice this week) does NOT cover the T8-T12 kyphosis corrective. Dead Bug or Bird-Dog required every session.

Rear delt work in Pull sessions: 0 of 0 dedicated Pull sessions -- but also 0 rear delt sets in any session this week (0 vs 8-set target).

Sessions over 60 min: ALL 4 sessions exceeded the 60-minute cap

Wed 03 Jun -- 83 min (+23 min over target)
 Fri 05 Jun -- 98 min (+38 min over target)
 Mon 08 Jun -- 71 min (+11 min over target)
 Wed 10 Jun -- 65 min (+5 min over target)

LATERAL RAISE (V-TAPER KPI):

This week : 10kg x 12 reps | Prior week : 10kg x 15 reps | Trend: DOWN

NOTE: Weight also regressed from 12.5kg (mid-May) to 10kg (from 25 May) and has not recovered. V-taper KPI has declined 2 consecutive weeks.

7. KEY INSIGHTS

RECOVERY AT 44

Three session pairs this week; only one breached the 48h rule. Wed 03 Jun (08:41) -> Fri 05 Jun (08:02) was 47h 21min -- 39 minutes short of the 48h minimum. Both sessions loaded the back: Bent Over Row on Wed, Seated Cable Row plus RDL on Fri. That is the sole offender. The other two pairs cleared the threshold: Fri -> Mon was 72h 11min (well clear), Mon 08 Jun (08:13) -> Wed 10 Jun (08:27) was 48h 14min for shoulders, legs and back (barely clear, with only 14 minutes to spare). If either of those sessions

shifts by even 30 minutes, they also breach 48h.

PPL ADHERENCE AND PROGRAMME AGE

This is Week 3 of the PPL x2 programme (started 2026-05-24). Adherence this week is 0%: all 4 sessions were Full Body rather than the prescribed Push/Pull/Legs splits. PPL ran correctly for exactly 4 sessions from 25-28 May (Push A, Pull A, Legs A, Push B) before reverting fully to Full Body from 01 Jun. The most-missed days are Tuesday (Pull A), Thursday (Push B), and Saturday (Legs B), meaning back-to-back chest and barbell compound days are happening but the rear-delt and single-leg work in Pull B and Legs B is being skipped entirely, three weeks in a row.

CORRECTIVE COMPLIANCE

Hip Thrust hit rate: 0 of 4 sessions. Three sessions included leg exercises (squats, leg press, leg extension) but Hip Thrust appeared in none. Anterior pelvic tilt inhibits the glutes; training squats without first firing the glutes shifts load to the lower back and hip flexors, which deepens the tilt over time. Hip Thrust is the correction, not an add-on -- it belongs as the first Legs exercise so glutes are pre-activated for every subsequent set. Rear delt sets this week: 0 of the 8-set target. At 44, if anterior deltoid keeps training ahead of the posterior deltoid and external rotators, the humeral head migrates forward in the socket during pressing movements. This narrows the subacromial space and compresses the supraspinatus tendon against the acromion -- the mechanism behind rotator cuff impingement. Left uncorrected at 44, impingement can progress to a partial or full rotator cuff tear requiring surgery. Face Pulls must appear every Pull day minimum. Core stabiliser (Dead Bug / Bird-Dog): 0 of 4 sessions. Hanging Leg Raise was logged twice but targets hip flexors and lower abs, not T8-T12 thoracic extensors. Loading a kyphotic spine through compound lifts without any thoracic corrective work means every squat and press reinforces the postural problem.

LATERAL RAISE -- V-TAPER KPI

This week: 10kg x 12 reps. Prior week: 10kg x 15 reps. Trend: DOWN (-3 reps, same weight). The weight itself already dropped from 12.5kg in mid-May and has not been reclaimed. Ganesh's love handles sit at lat-width level -- there is no visual taper between shoulder and waist. The only training lever to build that V above the waist line is wider, more prominent lateral delts. If lateral raise weight is stagnating or declining while body fat is also falling, the V-taper is narrowing rather than widening. This exercise must be treated as a primary KPI, not a filler movement at the end of a session.

HARD FLAGS

1. Recovery breach: Back trained 47h 21min apart (Wed 03 Jun 08:41 -> Fri 05

Jun 08:02), 39 minutes under the 48h minimum.

2. All 4 sessions exceeded the 60-minute cap: 65, 71, 83, 98 minutes. The 98-minute session (Fri 05 Jun) is 63% over the programme limit and almost certainly contributed to the Incline Bench rep collapse (12 -> 8 reps) that followed in the same session.
3. Rep collapse: Hanging Leg Raise 8 -> 4 reps (Mon 08 Jun, attributed to "low energy and tiredness" in session notes); Incline Bench 12 -> 8 reps (Fri 05 Jun -- mid-session fatigue from 98-min duration).
4. Pull-ups logged at 0kg with note "brachialis fails before lats." Brachialis (elbow flexor) pre-fatigue from rows is limiting lat recruitment. Pull-ups must be done first in the session, before any other pulling movement.
5. Zero Hip Thrust, zero Dead Bug/Bird-Dog, zero rear delt sets -- all three mandatory correctives missed simultaneously for the entire week.

OVERALL VERDICT: DECLINING

Volume is down 27% vs last week (12,306 vs 16,838 kg*reps). Session count is unchanged at 3 of 6 target (50%) but quality regressed: PPL adherence dropped from an early high of 4 properly structured sessions in Week 1 to 0% now, all correctives are absent, and the V-taper KPI is trending down. Compared to the opening week of the PPL programme (4 structured sessions with Bird-Dog, Face Pulls, and Hip Thrust all logged), Week 3 is a step backward on every dimension that matters for body recomposition and injury prevention at 44.

8. PLAN FOR NEXT WEEK

Programme week: W4 (Week 4 of PPL x2 | 15-20 Jun 2026)

TARGET: 6 sessions, strict PPL structure, 60-minute hard cap per session.

Do the listed corrective as the FIRST or LAST exercise -- not optional.

MONDAY 15 Jun -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 3 x 6 @ 62.5kg
 Incline Bench Press (Dumbbell) 3 x 12 @ 19.0kg [down 5%: rep collapse last week]
 Chest Fly (Machine) 3 x 12 @ 47.5kg
 Lateral Raise (Dumbbell) 3 x 15 @ 10kg [V-TAPER KPI: push reps to 15]
 Triceps Pushdown 3 x 10 @ 27.2kg
 Face Pull 3 x 15 @ 24.9kg [rear delt -- do not skip]
 Dead Bug 3 x 12 [T8-T12 corrective -- MANDATORY]
 Focus: Incline Bench -- if reps collapse below 10, do not increase weight next session. Chest Fly is a new progression (+2.5kg from 45kg).

TUESDAY 16 Jun -- Pull A (Back compound + Biceps)

Pull Up 4 x 8 @ 0kg [do THIS FIRST -- before any rows]
 Seated Cable Row - V Grip 3 x 8 @ 72.5kg
 Dumbbell Row 3 x 12 @ 22.5kg
 Shrug (Smith Machine) 3 x 12 @ 70kg
 Face Pull 3 x 15 @ 24.9kg [rear delt -- do not skip]

Hammer Curl 3 x 12 @ 12.5kg
 Bird Dog 3 x 16 [T8-T12 corrective -- MANDATORY]
 Focus: Pull-ups before any rowing movement to prevent brachialis pre-fatigue from limiting lat activation.

WEDNESDAY 17 Jun -- Legs A (Quads, Hamstrings, Glutes)

Hip Thrust (Machine) 3 x 12 @ 22.5kg [APT corrective -- FIRST exercise]
 Deadlift (Trap bar) 3 x 8 @ 95kg
 Leg Press (Machine) 3 x 12 @ 72.5kg
 Seated Leg Curl (Machine) 3 x 9 @ 45.5kg
 Hip Abduction (Machine) 3 x 10 @ 87.5kg
 Dead Bug 3 x 16 [T8-T12 corrective -- MANDATORY]
 Focus: Hip Thrust is exercise 1, non-negotiable. If this session reaches 65 min, drop Hip Abduction -- do not skip Hip Thrust to save time.

THURSDAY 18 Jun -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 3 x 8 @ 38kg [rep collapse 8->6: down 5%]
 Lateral Raise (Dumbbell) 3 x 12 @ 12.5kg [V-TAPER KPI PRIMARY: return to prior level]
 Upright Row (Cable) 3 x 10 @ 20kg
 Incline Bench Press (Dumbbell) 3 x 12 @ 19.0kg [chest variation]
 Face Pull 3 x 15 @ 24.9kg [rear delt -- do not skip]
 Overhead Triceps Extension 3 x 12 @ 24kg
 Dead Bug 3 x 12 [T8-T12 corrective -- MANDATORY]
 Focus: OHP at 38kg should be a clean reset. If all 3 sets hit 8 reps, return to 40kg the following week. Lateral Raise at 12.5kg is the main target -- this is the V-taper session.

FRIDAY 19 Jun -- Pull B (Back + Rear Delts + Biceps)

Bent Over Row (Barbell) 3 x 10 @ 57.5kg
 Lat Pulldown (Cable) 3 x 12 @ 55kg
 Rear Delt Reverse Fly (Machine) 4 x 11 @ 52.5kg
 Face Pull 3 x 15 @ 24.9kg [mandatory rear delt]
 Bicep Curl (Machine) 3 x 12 @ 25kg
 Hammer Curl (Dumbbell) 3 x 10 @ 12.5kg
 Bird Dog 3 x 16 [T8-T12 corrective -- MANDATORY]
 Focus: Rear Delt Reverse Fly (4 sets) + Face Pull (3 sets) = 7 rear delt sets in this session alone. This is the most important session of the week for shoulder joint health.

SATURDAY 20 Jun -- Legs B (Glutes, Hamstrings, Single-Leg, Rack Pull)

Hip Thrust (Machine) 3 x 12 @ 22.5kg [APT corrective -- FIRST exercise]
 Romanian Deadlift (Barbell) 3 x 8 @ 60kg [consolidate form before progressing]
 Rack Pull 3 x 8 @ 52.5kg [+2.5kg from 50x8 on 26 May]
 Single Leg Press (Machine) 3 x 10 @ 20kg [first loaded attempt -- conservative]
 Seated Leg Curl (Machine) 3 x 9 @ 45.5kg
 Dead Bug 3 x 16 [T8-T12 corrective -- MANDATORY]
 Focus: Rack Pull at 52.5kg is a +2.5kg step from last logged (50kg, 26 May). If form breaks at 52.5kg, return to 50kg -- do not push a hinge pattern with a compromised lower back.

+-----+		
Deload	: not yet -- next due Week 6, ~02 Jul 2026	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
