

30-Day Analysis Report

This week : 07 Aug to 14 Aug 2026

ATHLETE PROFILE

Name: Ganesh
Profile: 44M | 181 cm | 87 kg -> 79 kg
Goal: Body Recomposition -- Fat loss, muscle preservation
Pace: 0.5 kg/week | 15% calorie deficit

Generated on 2026-08-13

WEEKLY TRAINING REPORT

Generated : 2026-08-14 05:04 IST
User : Ganesh | 44M | 181cm | 87kg -> 79kg
This week : 07 Aug to 14 Aug 2026

1. THIS WEEK AT A GLANCE

Sessions : 2 of 5 target
Prior 3 weeks: 4, 0, 2 sessions (avg 2.0)
Overall score: 2/10 -- Below par -- low sessions or major muscle imbalances this week.
Biggest win : Leg Extension (Machine) -- 77kg x 9 reps (e1RM 100.1kg)
Biggest concern: Back -- 3 sets vs 14 target (11 sets short)
vs last week : Volume DOWN 4% (8,607 vs 8,973 kg*reps)

2. THIS WEEK -- SESSION BY SESSION

Session 1: Monday 10 Aug 2026 08:59 IST | 42 min
Type : Full Body A -- Monday
Volume : 2,980 kg*reps | 13 sets
Squat (Barbell): 70kg x 6r x 4 sets (e1RM 84.0kg) vs prior: +12.0kg e1RM
Bench Press (Barbell): 60kg x 6r x 3 sets (e1RM 72.0kg) vs prior: +0.0kg e1RM
Pull Up: 0kg x 6r x 3 sets (e1RM 0.0kg) [FLAG: 0kg logged]
Lateral Raise (Dumbbell): 10kg x 14r x 3 sets (e1RM 14.7kg) vs prior: +0.0kg e1RM
Session 2: Wednesday 12 Aug 2026 09:09 IST | 65 min
Type : Full Body B -- Wednesday
Volume : 5,627 kg*reps | 15 sets
Overhead Press (Barbell): 45kg x 7r x 3 sets (e1RM 55.5kg) vs prior: -1.2kg e1RM
Lying Leg Curl (Machine): 36kg x 10r x 3 sets (e1RM 48.0kg)
Leg Extension (Machine): 77kg x 9r x 3 sets (e1RM 100.1kg) vs prior: -2.6kg e1RM
Bicep Curl (Barbell): 20kg x 9r x 3 sets (e1RM 26.0kg)
Triceps Pushdown: 27.2kg x 11r x 3 sets (e1RM 37.2kg) vs prior: +0.0kg e1RM

4-WEEK VOLUME TREND

Wk -3 (17 Jul-24 Jul): [#####] 21,340 kg*reps 4 sess
Wk -2 (24 Jul-31 Jul): [.....] 0 kg*reps 0 sess
Wk -1 (31 Jul-07 Aug): [#####.....] 8,973 kg*reps 2 sess
This wk (07 Aug-14 Aug): [#####.....] 8,607 kg*reps 2 sess

3. STRENGTH -- HOW ARE THE LIFTS MOVING?

e1RM = estimated 1-rep max (formula: weight x (1 + reps / 30))
[C] = compound lift | [I] = isolation
[C] Bench Press (Barbell)

Best this week : 60kg x 6 reps (e1RM 72.0kg)
 vs prior : SAME as 03 Aug
 Next session : 60kg x 6 reps

[C] Overhead Press (Barbell)

Best this week : 45kg x 7 reps (e1RM 55.5kg)
 vs prior : DOWN -1.2kg vs 15 Jul
 Next session : 42.75kg x 7 reps

[C] Pull Up

Best this week : 0kg x 6 reps (e1RM 0.0kg)
 vs prior : First time in 30-day log
 Next session : 0kg x 6 reps
 * FLAGS: 0kg logged -- check entry

[C] Squat (Barbell)

Best this week : 70kg x 6 reps (e1RM 84.0kg)
 vs prior : UP +12.0kg vs 03 Aug
 Next session : 72.5kg x 6 reps

[I] Bicep Curl (Barbell)

Best this week : 20kg x 9 reps (e1RM 26.0kg)
 vs prior : First time in 30-day log
 Next session : 20kg x 9 reps

[I] Lateral Raise (Dumbbell)

Best this week : 10kg x 14 reps (e1RM 14.7kg)
 vs prior : SAME as 03 Aug
 Next session : 10kg x 14 reps

[I] Leg Extension (Machine)

Best this week : 77kg x 9 reps (e1RM 100.1kg)
 vs prior : DOWN -2.6kg vs 15 Jul
 Next session : 73.15kg x 9 reps

[I] Lying Leg Curl (Machine)

Best this week : 36kg x 10 reps (e1RM 48.0kg)
 vs prior : First time in 30-day log
 Next session : 36kg x 10 reps

[I] Triceps Pushdown

Best this week : 27.2kg x 11 reps (e1RM 37.2kg)
 vs prior : SAME as 15 Jul
 Next session : 27.2kg x 11 reps

4. ARE THE RIGHT MUSCLES GETTING ENOUGH WORK?

Muscle Group | Sets this wk | Target/wk | Gap | Status

* +-----+-----+-----+-----

Chest		3		12		9		CRITICAL
Back		3		14		11		CRITICAL
Shoulders		6		10		4		CRITICAL
Traps		0		6		6		CRITICAL

Rear Delts		0		8		8		CRITICAL
Biceps		6		8		2		LOW
Triceps		3		8		5		CRITICAL
Legs		10		14		4		CRITICAL
Core		0		6		6		CRITICAL

Push sets: 12 | Pull sets: 9 | Ratio pull:push = 0.75 (LOW -- add more pulling work)

Rear delts: 0 sets this week (need 8+/week)

SHORT by 8 sets. Rear delts stabilise the shoulder joint. If front shoulder muscles stay much stronger than rear, you risk rotator cuff problems over time. Add face pulls or reverse flys.

Traps : 0 sets this week (need 6+/week)

SHORT by 6 sets. Traps support neck and upper back posture. Add shrugs or deadlifts.

Short this week : Chest, Back, Shoulders, Traps, Rear Delts, Biceps, Triceps, Legs, Core

Under-trained muscles lose size first on a calorie deficit. Prioritise these next session.

5. REST AND RECOVERY THIS WEEK

Sessions this week : 2 of 5 target

Wk -3 (17 Jul-24 Jul): 4 sessions

Wk -2 (24 Jul-31 Jul): 0 sessions

Wk -1 (31 Jul-07 Aug): 2 sessions

Time between sessions this week:

Mon 10 Aug 08:59 -> Wed 12 Aug 09:09: 48h

No sessions after midnight IST this week. Good.

No back-to-back same-muscle sessions this week. Good.

6. BODY RECOMPOSITION CHECK

Calorie target : 2367 kcal/day

TDEE estimate : 2784 kcal/day (your estimated daily burn at current weight)

Daily deficit : 417 kcal (15% cut -- sustainable rate for muscle retention)

Protein target : 174g/day (2g per kg bodyweight)

WHY PROTEIN MATTERS ON A CUT:

In a calorie deficit, the body looks for extra fuel. If protein is low, it breaks down muscle tissue for energy -- this is called muscle catabolism. At 174g/day, you supply enough amino acids to maintain muscle while losing fat. Going below ~120g/day on this deficit risks losing the muscle you are training to build.

MUSCLE STIMULUS CHECK (minimum sets/week to retain muscle on a calorie deficit):

Muscle	This wk	Min	Status
Chest	3	8	AT RISK
Back	3	10	AT RISK
Shoulders	6	8	AT RISK
Traps	0	4	AT RISK
Rear Delts	0	6	AT RISK

RECOVERY AT 44:

This week had two sessions: Full Body A on Monday 10 Aug (08:59 IST) and Full Body B on Wednesday 12 Aug (09:09 IST) -- a gap of 48 hours 10 minutes. That barely clears the 48h minimum required between same-muscle sessions. Shoulders were stressed on both days: Lateral Raise (Monday) into Overhead Press (Wednesday) -- 48h gap, exactly at the limit. Legs were similarly doubled: Squat (Monday) into Leg Curl + Leg Extension (Wednesday) -- again a 48h gap. Every same-muscle pair technically cleared the 48h minimum, but there was no buffer. At 44, connective tissue and joint recovery lags behind muscle recovery. An extra rest day would reduce injury risk without meaningfully reducing adaptation.

PPL ADHERENCE AND PROGRAMME AGE:

This is Week 12 of the PPL x2 programme (started 2026-05-24). Through Thursday, 2 of 4 expected sessions were completed -- 50% adherence for the days elapsed. Over the full 6-day week the target is 6 sessions; at the current pace only Monday and Wednesday are being used consistently. The pattern across the 30-day log confirms this: sessions cluster on Mondays and Wednesdays, with Thursday, Friday, and Saturday almost never used. The 4-week history shows session counts of 4, 0, 2, 2 -- an average of 2 sessions per week against a 6-session target. That is 33% compliance with the programme design. The Tuesday Pull A and Saturday Legs B sessions are the most consistently missed; neither has appeared in the 30-day log.

CORRECTIVE COMPLIANCE:

Hip thrust was absent from Wednesday's Legs A session -- 0 of 1 legs sessions this week. This is the APT (anterior pelvic tilt) corrective: every legs session must include hip thrust or the pelvic alignment work accumulates no stimulus. Core stabilisers (dead bug, bird-dog, plank) have not appeared in a single session across the entire 30-day log -- 0 of 8 sessions. This is the T8-T12 kyphosis corrective and it is being skipped completely. Rear delt work reached 0 sets this week against an 8-set weekly target. At 44, if front-delt pressing volume significantly outpaces rear-delt rowing and fly volume, the rotator cuff is progressively destabilised: the front of the shoulder pulls forward while the posterior stabilisers weaken, compressing the supraspinatus tendon between the humerus and the acromion -- the clinical path to rotator cuff impingement. This week's push:pull ratio was 0.75 (LOW), and no dedicated pull session was completed.

LATERAL RAISE -- V-TAPER KPI:

The Lateral Raise has been flat at 10kg x 14 reps for two consecutive weeks (03 Aug and 10 Aug). Zero progression on the primary V-taper KPI. This matters specifically because Ganesh's love handles sit at lat-width level: the visual taper from shoulder to waist depends entirely on shoulder width expansion. If lateral raises do not progress, the shoulder silhouette does not widen and the waist:shoulder ratio stays unfavourable regardless of fat loss. The weight needs to move to 11.25kg or the reps need to push to 15-16 before adding load.

HARD FLAGS:

1. Pull Up logged at 0kg across all sets in sessions 5, 7 -- creates a false 0.0kg e1RM in the system and appears as a red flag in every report. Log bodyweight explicitly (e.g., 87kg) if using bodyweight only so the e1RM calculation is meaningful.
2. Wednesday 12 Aug ran 65 minutes -- 5 minutes over the 60-minute session cap. Overhead Press warmup + 3 exercises with full rest intervals is pushing into the limit.
3. Core stabiliser (Dead Bug or Bird-Dog) is completely absent from all 8 sessions in the 30-day log. This is not an occasional miss -- it has never been logged.
4. Hip Thrust missing from Wednesday Legs A -- the only legs session of the week and the primary APT correction was skipped.
5. Overhead Press e1RM has slipped from 56.7kg (15 Jul) to 55.5kg this week. Two consecutive months without a rep or weight PR on the primary shoulder compound.

OVERALL VERDICT: HOLDING

Volume is DOWN 4% vs last week (8,607 vs 8,973 kg*reps). Session count is identical (2 of 6). Squat e1RM is UP +12kg, which is positive, but Overhead Press and Leg Extension are both trending DOWN from their July peaks. Corrective compliance (hip thrust, core, rear delts) remains consistently poor across the full 30-day window. No regression, but no forward progress either -- HOLDING at a level that is well below the programme's design intent.

8. PLAN FOR NEXT WEEK

Programme week: W13 of PPL x2 (DELOAD WEEK -- 5 active training weeks without deload; deload due every 4 weeks; overdue by 1 week. All sets reduced to 2 per exercise. Weights unchanged. This lets joints and connective tissue recover before W14 resumes full volume.)

MONDAY -- Push A (Chest primary + Shoulders + Triceps)

Bench Press (Barbell) 2 x 6 @ 60kg

[hold -- not all sets at 60kg last week; deload week: 2 sets only]

Overhead Press (Barbell) 2 x 7 @ 42.75kg

[5% drop from 45kg -- e1RM trending down vs Jul peak; deload confirms reset]

Lateral Raise (Dumbbell) 2 x 14 @ 10kg

[V-taper KPI -- hold weight; aim for 15 reps to qualify for 11.25kg next cycle]

Triceps Pushdown 2 x 11 @ 27.2kg

[hold]

MANDATORY CORRECTIVE: Dead Bug 2 x 10 -- do not skip (T8-T12 kyphosis reset)

Key focus: Keep bench controlled; this is not the week to push for a PR.

Overhead press has been slipping -- treat 42.75kg as a form reset, not a failure.

TUESDAY -- Pull A (Back compound + Biceps)

Pull Up (Bodyweight) 2 x 6 @ BW (log actual bodyweight, not 0kg)

Bent Over Row (Barbell) 2 x 7 @ 70kg

[last logged 17 Jul; conservative hold for deload]

Rear Delt Reverse Fly (DB) 2 x 13 @ 10kg [MANDATORY -- 0 rear delt sets this week]

[Face Pull is an acceptable substitute if rear delt fly not available]

Bicep Curl (Barbell) 2 x 9 @ 20kg

[hold -- first time in log this cycle]

MANDATORY CORRECTIVE: Bird-Dog 2 x 10 -- do not skip

Key focus: Tuesday has not been used in the 30-day log -- completing this session alone would be a meaningful step toward the 6-session target.

WEDNESDAY -- Legs A (Quads, Hamstrings, Glutes -- Hip Thrust mandatory)

Hip Thrust (Barbell) 2 x 10 @ 60kg [MANDATORY APT correction]

[no log in last 30 days; conservative start weight -- do NOT skip]

Squat (Barbell) 2 x 6 @ 72.5kg

[+2.5kg progression from 70kg -- all sets at 70kg hit last week; deload = 2 sets]

Lying Leg Curl (Machine) 2 x 10 @ 36kg

[hold -- first in log this cycle]

Leg Extension (Machine) 2 x 9 @ 73.15kg

[5% drop from 77kg -- e1RM trending down from Jul peak]

MANDATORY CORRECTIVE: Dead Bug 2 x 10 -- do not skip

Key focus: Hip Thrust must be the FIRST main movement, before squats. APT correction requires glute activation before loading the spine. Never swap this order.

THURSDAY -- Push B (Shoulders primary + Chest variation + Triceps)

Overhead Press (Barbell) 2 x 7 @ 42.75kg

Seated Shoulder Press (Mach) 2 x 8 @ 90kg

[last logged 18 Jul; hold for deload]

Incline Chest Press (Machine) 2 x 11 @ 30kg

[last logged 18 Jul; hold for deload]

Triceps Pushdown 2 x 11 @ 27.2kg

MANDATORY CORRECTIVE: Bird-Dog 2 x 10 -- do not skip

Key focus: Thursday has been skipped every week in the 30-day log. Getting this session done is itself the win. Keep it to 55 minutes maximum.

FRIDAY -- Pull B (Back + Rear Delts mandatory + Biceps)

Bent Over Row (Barbell) 2 x 7 @ 70kg

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

[last logged 05 Aug; hold]

Rear Delt Reverse Fly (DB) 2 x 13 @ 10kg [MANDATORY -- face pull acceptable]

Shrug (Barbell) 2 x 12 @ 70kg

[last logged 17 Jul; hold for deload]

Bicep Curl (Dumbbell) 2 x 10 @ 10kg

[last logged 05 Aug; hold]

MANDATORY CORRECTIVE: Dead Bug 2 x 10 -- do not skip

Key focus: Rear delt fly or face pull is non-negotiable on this session. Rear delts were at 0 sets for the week; two sets here start closing the weekly gap.

SATURDAY -- Legs B (Glutes, Hamstrings, Single-Leg -- Hip Thrust mandatory)

Hip Thrust (Barbell) 2 x 10 @ 60kg [MANDATORY APT correction]

Romanian Deadlift (Barbell) 2 x 8 @ 75kg

Lying Leg Curl (Machine) 2 x 10 @ 36kg

Bulgarian Split Squat (BW) 2 x 10 each leg

[no prior data -- bodyweight only; add 5kg in W14 if form holds]

Rack Pull / Deadlift (Bar) 2 x 7 @ 80kg

[last logged 17 Jul at 80kg; hold for deload]

MANDATORY CORRECTIVE: Bird-Dog 2 x 10 -- do not skip

Key focus: Saturday is the most-skipped day in the programme. Saturday Legs B completion this week would close the week at 6 sessions -- the first time since the programme started. Hip Thrust before RDL, always.

+-----+		
Deload	: needed this week -- execute W13 (17-22 Aug) as	
	full deload. 5 active training weeks without deload;	
	overdue by 1 week. Resume full 3-set volume in W14.	
Timing	: 6-9 PM IST -- no sessions after midnight	
Nutrition:	2,367 kcal/day 174g protein minimum	
+-----+
